August 19 All Faculty Report
August 22 Classes Begin
September 5 Labor Day Holiday − No Classes
October 3 Early Alert Grades Due − 4 p.m.
November 23 Thanksgiving Holiday Begins − No Classes
November 28 Classes Resume
December 12 Finals Begin
December 16 Fall Semester Ends
December 19 Final Grades Due − 4 p.m.

2012 WINTER SEMESTER
January 5 All Faculty Report − In-Service
January 6 All Faculty Report
January 9 Classes Begin
February 20 Early Alert Grades Due − 4 p.m.
March 5 Spring Break Begins − No Classes
March 12 Classes Resume
April 30 Finals Begin
May 4 Commencement
May 4 Winter Semester Ends
May 7 Final Grades Due − 4 p.m.

2012 SPRING SESSION
May 14 Classes Begin
May 28 Memorial Day Holiday − No Classes
June 22 Spring Session Ends
June 25 Final Grades Due − 4 p.m.

This calendar applies to all instructional divisions and departments of the college, on-campus and off-campus, with the following exceptions: In fall semester, no class which is scheduled to fulfill all its weekly requirements of contact hours on Tuesday shall be required either to schedule or meet more than sixteen Tuesdays, and Weekend College classes are excluded from this calendar.
St. Clair County Community College

COLLEGE OVERVIEW
COLLEGE OVERVIEW

ACCREDITATION
St. Clair County Community College is accredited by The Higher Learning Commission and is a member of the North Central Association of Colleges and Schools (www.ncahigherlearningcommission.org or (312) 263–0456), the recognized regional accreditation agency. The college is a member of the American Association of Community Colleges.

The college has been approved by U.S. Immigration and Customs Enforcement for the training of non-quota, alien students admitted under Section 4(e) of the Immigration Act of 1924.

Contact the Office of the College President if you wish to review the Statement of Affiliation Status.

ACCREDITING AGENCIES
The Higher Learning Commission; Member – North Central Association; Michigan Department of Education.

ASSESSMENT OF STUDENT LEARNING
St. Clair County Community College is committed to excellence in education. To ensure this excellence, the college has instituted a plan to assess student learning and to analyze the college’s impact on its students to improve teaching and learning. The various procedures used in the assessment plan are designed to gather information and will not affect an individual student’s progress in his/her program, grades and/or graduation.

HISTORY
St. Clair County Community College began as Port Huron Junior College, which was the Junior College Department of the Port Huron School District. The college was established by act of the Board of Education of the Port Huron School District under Michigan State Law in 1923 and began operation in the same year. It has continued without interruption since that time.

The St. Clair County Community College District was established by a vote of the people June 12, 1967, which transformed the former Port Huron Junior College into a county-wide community college. Final approval of the transfer was given by the Michigan State Board of Education, which authorized an effective day of January 1, 1968.
The parent institution, Port Huron Junior College, had developed a tradition of academic excellence beginning with its establishment in 1923. The college first received its accreditation from the North Central Association in 1931, and at the same time, from universities throughout the United States and foreign countries. A transfer of this accreditation was made by the North Central Association during the 1968-69 school year to the community college.

During its early years, the college program was largely academic. Since 1954, a variety of programs of a vocational-technical nature have been established.

**COLLEGE CAMPUS AND BUILDINGS**

St. Clair County Community College's 25-acre main campus is in downtown Port Huron.

The historic **Main Building (MB)** is home to most of the college's administrative offices. The four-story Main Building also includes classrooms and offices for several academic departments.

The **North Building (NB)** includes the gymnasium, which is used for intercollegiate athletics, intramural sports and physical education classes; offices for several academic departments; and classrooms.

The **Clara E. Mackenzie Building (CEM)** houses science labs, classrooms, faculty offices and a lecture hall.

The **A.J. Theisen Building (AJT)** includes classrooms and computer labs for communication design and computer and office technology, as well as faculty offices and the college's Office of Information Technology.

The **College Center (CC)** houses the Library, Achievement Center, disability services, cafe and multipurpose areas for meetings and events.

The **Fine Arts Building (FAB)** includes the Fine Arts Theatre, Fine Arts Galleries, television and radio studios, music practice rooms, a band and choir rehearsal hall, and separate areas devoted to art and communications media programs.

The Dr. Edward G. **Acheson Technology Center (ATC)** houses the One-stop Student Services Center to assist students with all functions related to the enrollment process, including admissions, registration, financial aid, advising and payments.
The Citizens First Michigan Technical Education Center (M-TEC) is a facility for business and industry training. The building houses computer labs, multi-media classrooms, corporate meeting rooms and event space. M-TEC is also home to the SC4 University Center, a child care center operated by the Community Action Agency of St. Clair County and the offices of Economic Development Alliance of St. Clair County.

MEMBERSHIPS AND AFFILIATIONS

• Michigan Community College Virtual Learning Collaborative
• National Institute for Staff and Organizational Development
• National Junior College Athletic Association
• The Higher Learning Commission; North Central Association
• State of Michigan Board of Nursing

MISSION AND VISION

Mission Statement

St. Clair County Community College provides lifelong educational and enrichment opportunities.

Vision Statement

St. Clair County Community College strives to be a leader in our community’s renaissance by establishing dynamic partnerships and focused programs that are the top choice for students.
OFF-CAMPUS CENTERS
215 Main Building (MB), (810) 989-5747

OFF-CAMPUS INSTRUCTION

The college offers students the opportunity to complete degree requirements in a variety of programs at off-campus centers throughout the region.

Algonac High School
5200 Taft Road (Clay Township) Algonac, MI 48001

Croswell-Lexington College Center
15 S. Howard Ave. Croswell, MI 48422

Nursing Education Center
65 Patrick Drive
Bad Axe, MI 48413

Sanilac Career Center
175 E. Aitken Road (Elk Township) Peck, MI 48466

Yale High School
247 School Drive
Yale, MI 48097
UNIVERSITY CENTER
Citizens First Michigan Technical Education Center
(810) 989-5808
www.sc4.edu/universities

The SC4 University Center is located in the Citizens First Michigan Technical Education Center on the downtown Port Huron campus of St. Clair County Community College. Hundreds of local students enjoy the chance to work on bachelor’s degrees locally through the center.

FERRIS STATE UNIVERSITY
Coordinator: Lorie Callcut
Bachelor of Science in Business Administration − Professional Track in Hospitality and Tourism
Bachelor of Science in Criminal Justice

SAGINAW VALLEY STATE UNIVERSITY
Coordinator: Kathy Lopez
Director of Off-Campus Programs: Dr. John Armstrong
Bachelor of Arts in Elementary Education
Elementary Teacher Certification
Secondary Teacher Certification

UNIVERSITY OF MICHIGAN − FLINT
Coordinator: Tiffny Rohner
Bachelor of Arts in Psychology
Bachelor of Science in Nursing (RN to BSN)

WALSH COLLEGE
Coordinator: Karen Mahaffy
Bachelor of Business Administration in Accounting Processes
Bachelor of Business Administration in Management

Online Alliances
SC4 has developed agreements with the following institution to provide convenient online bachelor’s and master’s degree completion programs.

FRANKLIN UNIVERSITY − degrees in business, computers, health care and more. For information, call (888) 341-6237, Ext. 6057 or visit www.alliance.franklin.edu/go/stclairccc.
SC2O JOINT ADMISSION PROGRAM
(810) 989-5520
www.oakland.edu/sc20

Students can earn their associate degree at SC4, while working toward their bachelor’s degree at Oakland University. Students with 32 or fewer college credits will be considered for admission.

The program offers:
• Joint admission to SC4 and Oakland University through one, free application.
• Flexibility to take courses at SC4 and Oakland University at the same time.
• Coordinated financial aid at both institutions.
• Expanded course selection.
• Coordinated advising and course planning.
• Timely completion of associate and bachelor’s degrees.
• Access to the on-campus resources of both institutions, including housing at Oakland University.
The Workforce Training Institute, located in the Citizens First Michigan Technical Education Center (M-TEC), is devoted to providing its clients with the training needed for a lifetime of gainful employment. Through public offerings classes and customized contract training, the institute provides outstanding cost-effective training solutions and educational services to enhance skills, increase productivity, and improve workforce quality.

Workforce Training Institute customers include employers, employed workers, unemployed and underemployed workers, and adults seeking foundational skills, professional development and industry certifications.

Registration options are flexible and include: online at www.sc4.edu/wave, fax (810) 989-5738, walk-in and phone (810) 989-5788.

PRODUCT SOLUTIONS FOR INDIVIDUALS

Professional Development, Entry-Level Employment Training and Career Readiness Preparation in a variety of areas:

- Allied Health/Nursing
- Basic Skills
- Construction
- Culinary
- Education
- Energy
- Environment
- Fire and Emergency Services
- Human Resources
- Industry/Manufacturing
- Information Technology
- Medical Office Support
- MIOSHA
- Pharmacy Tech
- Professional Management
- Safety
- Small Business/Entrepreneur
- Transportation, Distribution and Logistics

Training formats include:

- In-person (classroom)
- Online
- Open-entry/open-exit lab
EMPLOYER SOLUTIONS FOR BUSINESSES OF ALL SIZES

Customized Contract Training
Our tailor-made training solutions rapidly can help increase employee performance. SC4 can develop customized training solutions to fill employee skill gaps and increase productivity. At your convenience, training can be delivered, in virtually any subject area, on your job site, or at SC4’s Citizens First Michigan Technical Education Center located on the Port Huron campus.

Facilitation Services
- WorkKeys testing (National Career Readiness Certificate)
- Training needs analysis and consulting
- Skills assessment and training
- Strategic planning
- Focus groups
- Process mapping
- Identification of key performance indicators
- Identification of potential funding sources

AVAILABLE SERVICES FOR INDIVIDUALS AND EMPLOYERS

Certification Testing (VUE, Prometric and Certiport testing certified lab)
- Adobe
- CompTIA
- Cisco
- Novell
- IBM
- CIW
- Siebel
- NREMT
  - EMT
  - First Responder
  - Paramedic
- WorkKeys (National Career Readiness Certificate)
- RSA Security
- Microsoft Technical Exams
- American College (Financial)
- IC3
- Microsoft Office Suite
- Manufacturing Skill Standards Council (MSSC)
  - Certified Logistics Associate
  - Certified Logistics Technician
  - Certified Production Technician

For more information, contact the Workforce Training Institute at (810) 989-5788 or visit www.sc4.edu/workforce.

COLLEGE PROGRAMS OF STUDY
& GRADUATION REQUIREMENTS
Associate Degrees and Transfer Programs
Associate in Applied Arts and Science Degree and Certificate Program Guides
COLLEGE PROGRAMS OF STUDY

St. Clair County Community College provides a solid educational foundation to help students pursue career goals in any field.

There are many ways to earn college credit at SC4. Students may choose to obtain transfer credit toward a four-year degree, earn an associate degree in a career-related area, or obtain a certificate that can be applied toward a degree program while preparing for employment.

Whatever students choose to study, they are urged to plan their program with an SC4 advisor. Programs of study fall into two major categories – transfer and career.

TRANSFER PROGRAMS
Transfer programs are designed to prepare students who plan to transfer to four-year colleges and universities after completing their coursework at SC4.

Programs designed for transfer toward bachelor's degrees are:
- Associate in Arts
- Associate in Science
- Associate in Business (transfer)
- Associate in Engineering (transfer)
- Certificate in General Transfer Studies (MACRAO)

CAREER PROGRAMS
Career programs are designed to prepare students for entry into a specific job-related field, for advancement in a current job, or for making a career change. Many career courses and programs will transfer to other colleges and universities. See an SC4 advisor for additional information.

Associate in Applied Arts and Science – occupational degrees
Certificates – occupational certificate programs

UNDECIDED PROGRAMS
Many students come to college undecided about their future career. These students often pursue a program of study designed to earn basic credits, allowing them to make progress while they explore their options with career guidance experts at the college.

- Associate in General Education
REQUIREMENTS FOR GRADUATION

CERTIFICATE PROGRAMS
Students must satisfy the following criteria to be granted a certificate from SC4:

1. Complete the specific certificate program requirements as listed in this catalog.
2. Complete a minimum of 30 credit hours 100-level or higher (credit hour requirements vary by program) with a GPA of 2.0 or above.
3. Complete a minimum of 10 credits at SC4 or through the Michigan Community College Virtual Learning Collaborative (MCCVLC).

ASSOCIATE DEGREES
Students must satisfy the following criteria to be granted an associate degree from SC4:

1. Complete the specific associate degree program requirements as listed in this catalog.
2. Complete a minimum of 62 credit hours 100-level or higher (credit hour requirements vary by program) with a GPA of 2.0 or above.
3. Complete a minimum of 15 credits at SC4 or through the Michigan Community College Virtual Learning Collaborative.
4. Complete all Competency Requirements (degree specific) with a final grade of “C” or above.
5. Complete all Degree Distribution Requirements (degree specific).

NOTE: Classes with a designation of less than 100 (e.g., MTH 075) may not be used for graduation credit. These classes also do not transfer to other colleges and universities.

COMPETENCY REQUIREMENTS
To prepare students to compete in a changing society, SC4 requires successful completion (C or above) of competencies in seven categories for all associate degrees granted. Definitions of the competencies are listed following this section. Competencies are required in the following categories:

• Computer Literacy (CL)
• Critical Thinking (CT) – 2 courses required
• Global Awareness (GA) – 2 courses required
• Government and the Political Process (GP)
• Mathematics (MA)
• Oral Communication (OC)
• Writing (WR) – 2 courses required
The competencies specific to each associate degree program are as follows:

**Associate Degree Competency Requirements**
Honors courses (i.e. ENG 101H, HIS 101H, PS 101H, etc.) may also be used.

23
COMPETENCY DEFINITIONS
Upon completion of an associate degree at SC4, a student will have met all of the competencies as listed:

1. **COMPUTER LITERACY (CL)** – is the ability to use a computer at a level appropriate to a student's academic and career needs. **Outcomes:** 1. Software: a. Demonstrate proficiency in the use of at least one computer operating system, including file organization. b. Demonstrate proficiency in using major categories of computer software, such as word processing, spreadsheet, database and presentation software. Graduating students must also meet **at least two** of the following outcomes: 2. Hardware: Examine the use of common hardware used for input, output, processing and storage. 3. Information: Formulate effective strategies to access, retrieve and analyze electronic information utilizing computer technology. 4. Communications: Organize electronic communications by using email to exchange electronic information, share files and retain important correspondence. 5. Security: Design a plan to protect a computer user from malicious code and threats to user privacy which includes the implementation of various computer security software and personal protection strategies.

2. **CRITICAL THINKING (CT)** – is an active process of carefully examining our thinking and the thinking of others in order to clarify and improve our understanding of ourselves and the world. **Outcomes:** 1. Demonstrate ability to recognize biases and assumptions, evaluate the reliability of evidence and determine whether the evidence available can support some generalization(s). 2. Demonstrate ability to distinguish fact from opinion, determine the validity of reasoning, and make informed judgments and decisions. 3. Demonstrate an attitude of intellectual curiosity and skepticism, objectivity and open-mindedness, and flexibility to consider new ideas and different viewpoints.

3. **GLOBAL AWARENESS (GA)** – gives the students a multicultural perspective; that is, students gain a measure of understanding about the cultures of other societies. In placing their own cultural assumptions in the context of an interdependent and diversified world view, students learn to respect different peoples and their lifestyles. **Outcomes:** 1. Demonstrate knowledge of at least one cultural aspect of at least two non-U.S. societies. 2. Demonstrate an awareness of the interdependence of nations in respect to current global issues.
4. **GOVERNMENT AND THE POLITICAL PROCESS (GP)** – is the study of the organization and functioning of governmental and political systems. **Outcomes:** 1. Demonstrate knowledge of the structure and functioning of the U.S., Michigan and local governments. 2. Demonstrate knowledge of the U.S. political system and electoral process. 3. Demonstrate knowledge of the rights and responsibilities of U.S. citizens. 4. Demonstrate an understanding of international organizations and interrelationships.

5. **MATHEMATICS (MA)** – is the logical study of shape, arrangement, quantity and space, and their inter-relationships, applications, generalizations and abstractions. **Outcomes:** 1. Express numerical concepts symbolically, and translate word problems into algebraic representations. 2. Recognize the deductive nature of mathematics. 3. Locate and employ information from graphs to make decisions. 4. Recognize the applicability of mathematics to other disciplines. 5. Express mathematical conclusions verbally or in writing. 6. Employ problem-solving strategies, including numerical and other approaches. 7. Estimate answers and access the relative worth of the estimate from a common sense perspective.

6. **ORAL COMMUNICATION (OC)** – is the process of effectively transmitting and receiving ideas and information in a variety of situations. **Outcomes:** 1. Express ideas and knowledge in a manner others can understand. 2. Demonstrate ability to select a topic and organize a presentation with supporting material appropriate for purpose, audience and occasion. 3. Use pronunciations, grammar and articulation appropriate to audience and occasion. 4. Use nonverbal cues as necessary to support the verbal message. 5. Listen effectively.

7. **WRITING (WR)** – is a process of effectively selecting, developing and arranging one’s own ideas and those of others. The process requires students to compose ideas in a variety of forms for a variety of purposes and audiences. **Outcomes:** 1. Demonstrate ability to select, organize and develop ideas in coherent essays and/or other forms (for example, letters, journals, essays, abstracts, reports and research suitable for college work. 2. Demonstrate ability to vary writing style, including vocabulary and sentence structure for different audiences (for example, to inform, persuade or analyze). 3. Demonstrate ability to locate and gather information from primary and secondary sources and incorporate quotation, paraphrase and summary from such sources into a properly documented paper. 4. Demonstrate
ability to write informative, interpretative, analytical and/or evaluative essays. 5. Demonstrate ability to write standard English using the principles of correct grammar, punctuation and spelling. 6. Demonstrate ability to analyze one’s own writing skills and to know how to use resources such as a grammar handbook, dictionary and/or thesaurus to improve and revise one’s writing.

8. **ADDITIONAL COMPETENCY OPTIONS** – SC4 recognizes a variety of non-course options, including Advanced Placement, CLEP and Departmental Exams, which allow students to satisfy the competency requirements without taking an actual SC4 course. **Interested students must contact the Student Success Center, Room 124, Acheson Technology Center, for details.** The following list indicates the options currently available to satisfy each competency.

**DEGREE DISTRIBUTION REQUIREMENTS**
In addition to the satisfactory completion of competency requirements, students must satisfy the degree distribution requirements specific to the program of study at SC4. Subject areas satisfying the Degree Distribution Requirements are divided into four groups as listed below:

**Group I. Social Science:** Anthropology, economics, geography (except GEO 101, GEO 105, GEO 137 and GEO 210), history, political science, psychology, sociology

**Group II. Humanities:** Literature (English 200 or above), foreign language, speech, art, communication design, music, theatre, philosophy, HIS 101, HIS 102

**Group III. Biological Sciences:** Agriculture, biology
**Group IV. Physical Sciences:** Astronomy, chemistry, earth science (GEO 101), meteorology (GEO 105), geology, global energy resources (GEO 137), physics, physical science

**Associate Degree Distribution Requirements**

HONORS PROGRAM DEGREE OPTION

The St. Clair County Community College Honors Program is designed to satisfy the needs of students who are hard-working and self-motivated, are curious and appreciate exploring a topic in depth, and enjoy strong interaction with instructors and fellow students. A student may earn an Honors degree in any associate degree program.

BENEFITS

- Honors degree if program is completed
- Greater academic challenges
- Recognition for outstanding achievement
- Greater depth in subject matter
- More stimulating course work with greater interaction
- Honors options in regular courses
- New honors courses
- Smaller class size
- Honors Program credential on transcript

ADMISSION REQUIREMENTS

- Be enrolled at St. Clair County Community College.
- Fill out the Honors Program application form, available at www.sc4.edu/honors.

Program admission criteria:

- One of the following minimums for admission:
  - ACT Composite score of 25
  - Minimum Writing COMPASS score of 95
  - 3.2 high school GPA (on a 4.0 scale)

  OR

- Two of the following minimums for admission:
  - ACT Math score of 24
  - ACT Writing score of 25
  - College Algebra COMPASS score of 46
  - GED score of 55
  - GPA at SC4 or other college
  - Membership in National Honor Society in high school
  - Recommendation by Honors Program director, advisor or faculty
PROGRAM REQUIREMENTS

- To remain in good standing in the honors program, a student must maintain a 3.00 overall GPA and receive at least a “B” in each honors class.
- To receive the honors associate degree, a student in the honors program must receive a grade of at least a “B” in four different honors courses and complete all other degree requirements with an overall GPA of 3.00 or better.
- If a student falls below a 3.00 GPA or receives less than a “B” in an honors course, he/she will be placed on program probation for one semester. During that semester, the student may take, with permission, an honors course and must regain a 3.00 GPA by the end of that probationary semester to remain in the program.
  - If the student received less than a “B” in an honors course, he/she must retake the honors course or designate a replacement honors course after the probationary semester.
  - If the probationary student fails to regain a 3.00 after one semester or fails to obtain a “B” grade in an honors course after the probationary semester, he/she will be dropped from the honors program.
  - If no honors course suitable to the student's curriculum is available after the probationary semester, a one semester waiver will be permitted before the original honors course must be retaken or a replacement course taken.
  - For good cause, the director, with the consent of the Honors Committee, will be permitted some discretion in the application of these guidelines.
- Any student who wishes to withdraw from the honors program may do so at any time without penalty. He/she may seek a regular associate degree.
- Any student who is dropped from the honors program may, of course, pursue a regular associate degree provided he/she fulfills the requirements.

SPECIAL NOTE: An honors option is available for non-honors courses. This option course can replace one of the regular honors courses. Provided the instructor is willing, the option would involve some special work within the regular course that the student, the instructor and the honors director agree is acceptable.

TRANSFER PROGRAM INFORMATION

St. Clair County Community College provides the freshmen and sophomore courses needed to fulfill requirements for those students planning to transfer to a senior college or university to complete a bachelor’s degree. Most transfer institutions prefer that students select courses leading to the Associate in Arts (AA), Science (AS), Engineering (AE) or Business (AB) degree. However, credits for the Associate in Applied Arts and Science (AAS) degrees may be transferred, depending upon the major area of study and the transfer institution of choice.

The transferability of SC4 courses may vary among transfer institutions. Therefore, it is important for transfer students to identify their transfer institution early in their freshman year.

TRANSFER OPTIONS

After completing the associate degree requirements, many SC4 students continue their career paths at four-year institutions in programs such as:

- Accounting
- Agricultural science
- Animal science
- Anthropology
- Architectural engineering
- Art
- Automotive engineering
- Biology
- Broadcasting
- Business administration
- Chemical engineering
- Chemistry
- Child development
- Civil engineering
- Communication design
- Computer science
- Corrections
- Counseling
- Criminal justice
- Economics
- Education
- Electrical engineering
- English
- Environmental science
- Fine arts
- Foreign language
- Forestry
- Geography
- Geology
- General business
- Health care administration
- History
- Horticulture
- Human development
- Human resources
- Journalism
- Marketing
- Math
- Mechanical engineering
- Medical records
- Music
- Nursing
- Occupational therapy
- Pharmacy
- Philosophy
- Physical therapy
- Physics
- Political science
- Pre-dentistry
- Pre-law
- Pre-medicine
- Psychology
- Radiologic therapy
- Social work
- Sociology
- Veterinary medicine
TRANSFER STUDENT TIPS

- Meet at least once per semester with an SC4 advisor before selecting courses to review transfer guides and articulation agreements.
- Contact the four-year institution(s) where you plan on transferring and consult the institution’s website.
- Transfer institutions will typically accept 60 credit hours from SC4 and require a minimum 2.0 GPA; however, these requirements may vary by institution.
- View transfer equivalency information on the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) website at www.macrao.org or at www.michigantransfernetwork.org.
- Apply for admission to the four-year institution before the actual date you plan to transfer.
- A variety of applications are available in the Student Success Center or online at www.macrao.org.
- Have an official SC4 transcript mailed directly to the four-year institution. Requests may be made online via the WAVE at www.sc4.edu/wave or in the Enrollment Services office.
- Inquire about transfer scholarships in the SC4 Financial Aid office and/or by contacting the four-year institution.
**BUSINESS (TRANSFER)**

Program Code: ABTGB  
**ASSOCIATE IN BUSINESS** (Transfer Program)  
Business Administration Department (810) 989-5575

This program is intended for students wishing to pursue an associate degree while preparing to transfer to a four-year school in business. **Since transfer requirements vary by institution, students are strongly encouraged to meet with representatives from the transfer school.** In addition, students should work closely with the SC4 Business Administration Department and the Student Success Center.

*ENG 101T − Introduction to Writing for Technical students may be substituted.
**or CIS 115.
***ENG 104 − Technical Report Writing may be substituted.
****Elective must include one of the following: ART 121, ART 122, ART 123, BUS 221, BUS 222, GEO 102, HIS 101, HIS 102, HIS 149 or HIS 150.
*****PHY 231 − Statics may not be required for some programs. See the Student Success Center or an engineering school representative from your university of choice. Students choosing not to take PHY 231 must complete all degree requirements and have a minimum of 62 credits to graduate.
MACRAO STATEWIDE COLLEGE AND UNIVERSITY TRANSFER AGREEMENT

SC4 is a member of the Michigan statewide transfer agreement between community and four-year public or private colleges and universities of Michigan. The MACRAO (Michigan Association of Collegiate Registrars and Admissions Officers) Agreement helps simplify the transfer of credit for SC4 students. The agreement stipulates that 30 semester credit hours of 100 level and above, compatible, general course work will be granted smooth transferability to participating universities. Credits will be awarded towards a student’s general education requirements.

Students completing the following MACRAO Agreement requirements must request in the SC4 Enrollment Services office to have their transcript listed as “MACRAO Agreement Satisfied.”

</tbody>
</table>

Total Credit Hours/Range Total Contact Hours = 30/30-32

Note: Courses taken in each group must be in more than one subject area (with the exception of English Composition).

For a list of senior colleges and universities that have signed the MACRAO Agreement, visit www.macrao.org.
GENERAL TRANSFER STUDIES (MACRAO)

Program Code: CERTR
CERTIFICATE
Student Success Center (810) 989-5520

The General Transfer Studies certificate program is intended for students who wish to transfer to a four-year college or university after completing one year of coursework at SC4. Completion of this certificate program will satisfy the MACRAO requirements (a transfer agreement in the state of Michigan that assists students with the transferability of general education requirements).

Required courses are flexible and may be customized to meet the needs of the student based upon the transfer institution requirements. Most transfer institutions will accept a minimum of 60 credit hours from SC4; therefore, students are encouraged to take additional courses beyond the Transfer Certificate requirements.

Students seeking the Transfer Certificate must work closely with the transfer school of choice as well as an SC4 advisor to help ensure the appropriate courses are taken at SC4.

**Tuscola County**
Vocational Education Center

High school students should contact the counseling office at their local high school or technical education center to obtain the most updated information regarding the articulation of credits to the college.
CAREER PROGRAMS

OCCUPATIONAL PROGRAMS
The occupational program prepares the student for direct entrance into business or industry without having to continue on to other institutions of higher education. However, credits for some classes designed to fulfill requirements for the Associate in Applied Arts and Science degree may be transferred depending upon the major area of study and the transfer college of choice. SC4 has a number of articulation and transfer agreements with colleges and universities leading to a bachelor's degree. Students planning to transfer should meet with an academic advisor before selecting classes. The sequence of classes listed under each program is a suggested sequence only and is subject to change without prior written notice. There may be various sequences available to students within an individual program, depending on the student's area of interest. If the student wishes to select classes for a chosen program in a sequence different from the one suggested, and/or it is the student's intent to transfer credits to a college or a university, the student should see an advisor before selecting classes. Course of study equivalency sheets are available in the Student Success Center.

All students must apply for graduation in the Enrollment Services office.

ASSOCIATE IN APPLIED ARTS AND SCIENCE PROGRAMS
Students completing the Associate in Applied Arts and Science degree may choose from the following occupational programs:

Accounting
Alternative Energy − Architectural Design/Green Building
Alternative Energy − Facility and Energy Management
Alternative Energy − Renewable and Alternative Energy Technology
Architectural Design
Business, General
CNC Programmer/Machinist
Communication Design
Communications Media − Broadcasting
Communications Media − Journalism
Computer Information Systems − Applications
Computer Information Systems − Networking
Computer Information Systems − Programming
Computer Information Systems − Web Development
Criminal Justice − Corrections
Criminal Justice − Law Enforcement
Early Childhood Education
Electronics and Computer Technology
Engineering Graphics Technology
Fabrication and Design
Fire Science Technology
Landscape Design, Turf and Greenhouse Management (Manager Track)
Management − Business
Marketing
Mechatronics
Nursing − Associate Degree Nursing (ADN)
Nursing − LPN to ADN Track
Nursing − Health Care Provider to ADN Track
Office Administration − Administrative Executive Assistant
Office Administration − Administrative Legal Assistant
Office Administration − Administrative Medical Assistant
Office Administration − Medical Clinical Assistant
Robotics/Automation Technology
Technology, Applied Studies
Therapeutic Massage
Welding and Cutting Technology

CERTIFICATE PROGRAMS
Students completing the certificate may choose from the following occupational program options:
Alternative Energy Technology
Architectural Design
Architectural − Civil/Sitework
Architectural − Mechanical/Electrical/Plumbing (MEP)
Architectural − Structural
Business, General
Communications Media − Broadcasting in Radio/TV
Computer Information Systems − Computer Applications
Electronics and Computer Technology
Electrical/Industrial
Engineering Graphics Technology
Fire Science Technology
Horticulture − Landscape
Machine Tool
Management, Professional Certification
Marketing
Nursing, Practical
Office Administration − Clerical Specialist
Radio Frequency Identification Technology
Technology, Applied Studies
Transportation and Logistics Technology
Welding and Cutting Technology

PREPARATION FOR CERTIFICATION
Early Childhood National CDA Credential

SPECIAL TRANSFER DEGREES AND CERTIFICATION
Associate in Business (Transfer)
Associate in Engineering (Transfer)
General Transfer Studies (MACRAO) Certificate
The two-year Accounting degree prepares students for positions in the field of accounting practices. The program is designed to prepare students to obtain accounting jobs in the areas of accounts payable, accounts receivable, payroll, general ledger processing, and managerial accounting within service and industrial firms. The program combines the in-depth study of accounting principles with the application of those principles and concepts in a computerized accounting system. Students graduating from this program will be trained to fill positions that require knowledge and skills in accounting at an introductory level.

Students completing this course of study will be able to complete the accounting cycle for service, merchandise and manufacturing firms that are sole proprietorships, partnerships or corporations. Students will be able to analyze and interpret financial data, assist in the budgeting process, and process and account for payroll related transactions. Students will be skilled in performing these tasks in a manual and computerized accounting system.

NOTE: Students wishing to transfer should follow the Business Transfer program and contact the Business Administration Department or academic advisor for guidance and details relating to transfer information specific to each college/university.

ALTERNATIVE ENERGY PROGRAM OPTIONS

ALTERNATIVE ENERGY ASSOCIATE DEGREE and CERTIFICATE PROGRAM OPTIONS

The Alternative Energy associate degree programs are designed with a common interdisciplinary core of first year courses. Students take a first-year curriculum that provides a solid general and technical educational background. After the first year, students branch off into their desired area of interest. These programs of study are designed to prepare students to work in the growing alternative energy fields which include rapidly evolving professions with high growth and high wage potential. An advisory committee made of alternative/renewable energy professionals help guide the development of the programs. Energy conservation and efficiency is an integrated part of the curriculum. The Alternative Energy Technology certificate is designed to give the student a quick start in the field. The Alternative Energy associate degree and certificate program options are outlined on the following pages.
ALTERNATIVE ENERGY – ARCHITECTURAL DESIGN/GREEN BUILDING
Program Code: AASAE
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

This technical associate degree is offered as a second year option within the Alternative Energy Program for those who wish to pursue a career in the architectural green building design field. The coursework prepares students to work as an architectural draftsperson or junior designer who can also assist engineers and supervisors in the development of green building designs. In addition, graduates also will be prepared to perform material estimating, sizing, etc. Energy conservation and energy efficiency are integrated throughout the curriculum. Go to www.sc4.edu/energy for information.

# ALTERNATIVE ENERGY – FACILITY AND ENERGY MANAGEMENT

**Program Code: AASFE**  
**ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE**  
Engineering Technology Department (810) 989-5754

This interdisciplinary program of study is planned to prepare students to work in the growing field of facility and energy management. The facility manager is an important link in the integration of telecommunication, information management systems, maintenance, security and general administrative services. Facility managers are responsible for the total facility work environment from chairs to air quality. Facility management professionals work in industries such as: general manufacturing, banking and finance, electronics, insurance, education, research and development, health care, communication, public administration, retail, wholesale, data processing, architecture and design, transportation, real estate, government agencies and distribution companies. Energy conservation and energy efficiency are integrated throughout the curriculum. Go to www.sc4.edu/energy for information.

ALTERNATIVE ENERGY—RENEWABLE AND ALTERNATIVE ENERGY TECHNOLOGY

Program Code: AASRA

ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

This technical associate degree is offered for those who wish to pursue a career in the renewable energy field. The course work prepares students to work as a renewable energy technician installing, servicing, modifying, troubleshooting and designing wind power systems, solar domestic hot water and space heating systems and solar electric systems for the growing residential and small business markets. In addition, graduates will also be prepared to perform material estimating, sizing, etc. Energy conservation and energy efficiency are integrated throughout the curriculum. Go to www.sc4.edu/energy for information.

ALTERNATIVE ENERGY TECHNOLOGY
Program Code: CERAE
CERTIFICATE
Engineering Technology Department (810) 989-5754

The Alternative Energy Technology program is intended for people who wish to develop a working knowledge of alternative energy power generation and delivery systems. It is expected that students in this program intend to pursue a career that includes the design, building and service of energy systems such as, but not limited to, wind energy, passive solar energy, photovoltaic energy, solar domestic hot water and space heating systems. Energy conservation and energy efficiency are integrated throughout the curriculum. Go to www.sc4.edu/energy for information.

ARCHITECTURAL DESIGN
Program Code: AASAR
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

The Architectural Design associate degree program teaches architecture design and building construction technologies including space planning and design, analyzing blueprints, using spreadsheets for cost estimating, preparing architectural working drawings and construction specifications. Also included are 3-D scale and CAD models, as well as architectural CAD rendering photo-realistic software.

This program will help train entry-level workers in the following fields or positions: architectural design, interior design, planners, field inspectors, construction estimators, construction management, residential builders and decorating contractors.

ARCHITECTURAL DESIGN (CERTIFICATE)
Program Code: CERAR
CERTIFICATE
Engineering Technology Department (810) 989-5754

The Architectural Design certificate teaches architecture design and building construction technologies, including space planning and design, analyzing blueprints, using spreadsheets for cost estimating, preparing architectural working drawings and construction specifications, and 3-D scale and CAD models.

This program will help train entry-level workers in the following fields and positions: architectural design, architectural planners, field inspectors and construction estimators.

ARCHITECTURAL – MECHANICAL/ ELECTRICAL/PLUMBING (MEP)
Program Code: CERMP
CERTIFICATE
Engineering Technology Department (810) 989-5754

The Architectural – Mechanical/Electrical/Plumbing (MEP) certificate program teaches building systems design and construction technologies within a building. Also included are analyzing blueprints, using spreadsheets for cost estimating, preparing 3-D scale and CAD models, and MEP plans for HVAC, electrical and plumbing.

Courses in this program are helpful for the following entry-level positions: building mechanical technician, building electrical technician, field inspector and construction estimator.

ARCHITECTURAL − STRUCTURAL
Program Code: CERSR
CERTIFICATE
Engineering Technology Department (810) 989-5754

The Architectural − Structural certificate program teaches building structural systems and components for design and construction of roofs, floors, walls and foundations of buildings. Also included are analyzing blueprints, using spreadsheets for cost estimating, and preparing 3-D scale and CAD models. Courses in this program are helpful for entry-level positions such as: structural drafter, field inspector and construction estimator.

BUSINESS, GENERAL
Program Code: AASGB
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Business Administration Department (810) 989-5575

The general business occupational curriculum provides a broad, basic program in business, supplemented with technical skills, and rounded out with general liberal arts courses. This foundation will permit the student to seek employment through a variety of entry-level business positions, such as accounting clerk, junior accountant, assistant office manager, assistant department manager or administrative assistant. This program is also intended to provide sufficient background so that the student may ultimately specialize in some area of administration.

NOTE: Students wishing to transfer should not follow the sequence listed below. Please contact the Business Administration Department or Student Success Center for detailed transfer information specific to each college/university.

BIOHISTORY (TRANSFER)
Program Code: ABTGB
ASSOCIATE IN BUSINESS (Transfer Program)
Business Administration Department (810) 989-5575

This program is intended for students wishing to pursue an associate degree while preparing to transfer to a four-year school in business. Since transfer requirements vary by institution, students are strongly encouraged to meet with representatives from the transfer school. In addition, students should work closely with the SC4 Business Administration Department and the Student Success Center.

*ENG 102/SPC 101 or OA 225. Students choosing this option are still required to complete a minimum of 62 credits.
**or higher except CIS 150, CIS 160, CIS 290, CIS 297.
***or MTH 110 or higher or BUS 158. Students choosing this option are still required to complete a minimum of 62 credits.

Elective Courses: Elective course options may vary based upon the transfer institution. Please contact the Student Success Center at (810) 989-5520 or the SC4 Business Administration Department at (810) 989-5575 for assistance with selecting the appropriate elective courses.
# CNC PROGRAMMER/MACHINIST

**Program Code: AASMT**  
**ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE**  
**Engineering Technology Department (810) 989-5754**

This program of study is planned to prepare the student to work in a modern manufacturing plant. Program emphasis is on developing skills in computerized manufacturing methods, computer-aided drafting and machining skills, material testing and inspection, quality control and good communication skills. Employment objectives for graduates include CAD/CAM operator and designer, materials tester, field service technician, quality control manager, estimator, laboratory technician or industrial supervisor.

COMMUNICATION DESIGN
Program Code: AASCD
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Visual and Performing Arts Department (810) 989-5709

Visual thinkers who are interested in computers and want to use their art skills and ideas in the world of work should consider developing their knowledge, skills and abilities in the Communication Design program. St. Clair County Community College offers a two-year curriculum that provides students with effective training for entry-level positions in the field of print or virtual design. Students may also consider transferring SC4 credit to a four-year program and taking advantage of one of the articulation agreements that the department has established with other colleges. Prospective students are encouraged to schedule an interview with a design instructor to clarify the objectives of the program and to present a portfolio of art work.

COMMUNICATIONS MEDIA – BROADCASTING IN RADIO/TV
Program Code: CERBR
CERTIFICATE
Communications Department (810) 989-5578

This one-year program is designed for students who wish to prepare for a career in radio and television. Work is concentrated in the radio and television facilities of the college. Completion of the certificate program prepares the student for entry-level employment in either radio or television.

Students get hands-on experience working on the college radio station WSGR and in the college television studio. Students learn to announce, write for broadcast, direct, appear on camera and operate radio and television broadcast equipment.

Working in computer installation in today’s business world requires a broad base knowledge in hardware, software and management. Through the presentation of theory, applications and a bit of management, this Applications degree meets the needs of several job descriptions. A graduate with the Associate in Applied Arts and Science Degree – Applications meets the technical and knowledge requirements for a database analyst, tech trainer or Web designer. Graduates also are qualified to work in tech support, applications support or help desk positions.

COMPUTER INFORMATION SYSTEMS
− NETWORKING

Program Code: AASCN
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Computer and Office Technology Department (810) 989-5628

Networks have dramatically changed business and society. This program prepares students for positions in the constantly growing and changing networking industry. Courses in this program cover topics such as cabling, network device configuration, network operating systems, local and wide area networks, analysis and troubleshooting tools, security and network design. Students who complete this program will have the necessary training to sit for applicable industry certification exams, including the CompTIA Network+ certification exam.

(Range Total Contact Hours = 62-63)

*or MTH 110 or higher. Students opting to take MTH 110 or higher must ensure that enough credits are taken to meet the 62 credit minimum.

**See suggested electives for CIS majors following the CIS program guides (any program).
# COMPUTER INFORMATION SYSTEMS – PROGRAMMING

**Program Code:** AASPR  
**ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE**  
**Computer and Office Technology Department (810) 989-5628**

Developing software solutions to harness the ever expanding capabilities of today’s computer systems requires technical knowledge and problem solving skills that are in high demand. This Programming degree is designed to prepare students for entry-level positions such as: systems analyst (trainee) or business applications programmer. Students who complete this program will also have the fundamental background required for further study in a four-year computer science program.

*or MTH 112 or higher.*
This program prepares students for entry-level positions in Web development. The degree includes technical and supporting courses in computer information systems and Web design, as well as training in the business relations skills needed to function effectively as a Web developer. Graduates normally find jobs developing and maintaining websites for a wide range of organizations.

CIS SUGGESTED ELECTIVES

COMPUTER INFORMATION SYSTEMS
SUGGESTED ELECTIVES FOR CIS MAJORS (any program)
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Computer and Office Technology Department (810) 989-5628

Elective courses may be chosen from any 100-level or higher course, but the following courses are suggested as being particularly beneficial and relevant for CIS majors.

ACD 140 Introduction to Computer Graphics 3
BUS 155 Principles of Management 3
CIS 120 Introduction to Networking CL 4
CIS 225 Network Security CL 4
CIS 233 Linux+ Certification CL 4
CIS 267 Special Topics in Computer Programming CL 3-4
CIS 160 / ELT 160* A+ Certification 4
OA 101 Personal Keyboarding (students attain 25 wpm) 1
OA 110 Beginning Keyboarding (students attain 40+ wpm) 3
OA 115 Intermediate Keyboarding CL 4
OA 130 Time and Project Management 1
OA 161 Office Technology CT OC 4
OA 164 PowerPoint Presentation Graphics 1

* Course may count as an elective OR toward the program sequence, not BOTH.

College credit may be given for earned industry certifications (see list below).

Student must provide proof of completion in order to receive credit. Testing and/or a personal meeting may be required. Contact the Computer and Office Technology Department with questions at (810) 989-5628. If other certifications have been earned, contact department for articulation review.

**Please check with an advisor for complete details on industry certifications and equivalent Computer Information Systems courses.

73
CRIMINAL JUSTICE PROGRAM

Social Science Department (810) 989-5707

The Criminal Justice program provides the student with the information and skills to effectively progress to the university level or enter the workforce with the required employment prerequisite education.

Two degree options are available: CORRECTIONS and LAW ENFORCEMENT

CORRECTIONS
Corrections graduates possess the education and training to pursue careers as correctional officers in county jails, corrections facilities, juvenile corrections facilities, the state correctional system and federal correctional facilities. In addition, students who follow the MACRAO statewide college and university transfer agreement may pursue additional years of education at a four-year institution to earn a bachelor’s degree in criminal justice and seek employment as a probation officer, parole officer, correctional caseworker or social worker.

Students in the Corrections program may take classes in corrections, criminal justice, psychology and sociology, all of which are acceptable prerequisites for the 15 hours of college credit required for employment by the Michigan Department of Corrections. Students who complete an Associate's Degree in Corrections also are eligible for promotions within the Michigan Department of Corrections. A complete listing of employment requirements can be found at www.michigan.gov/corrections.

Corrections applicants who have been convicted of a felony or misdemeanor should contact potential employers to determine employment restrictions based upon these convictions.

LAW ENFORCEMENT
Students who have a desire to pursue careers in law or as peace officers or other state-level enforcement occupations should select criminal justice – law enforcement. This curriculum is designed for students to customize their degree to best suit their interests in law or law enforcement. Students who follow the MACRAO statewide college and university transfer agreement may pursue additional years of education at a four-year institution to earn a bachelor’s degree in criminal justice. Graduating students wishing to become a certified police officer will have the necessary education to enter a state-certified police academy. Graduates wishing to become a certified police officer must meet the Michigan Commission on Law Enforcement Standards (MCOLES) entrance requirements available at www.michigan.gov/mcoles.

Law enforcement applicants who have been convicted of a felony or misdemeanor should contact potential employers to determine employment restrictions based upon these convictions.

EARLY CHILDHOOD EDUCATION
Program Code: AASEE
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Social Science Department (810) 989-5707

Early childhood professionals act as parent substitutes and are responsible for the care, safety and personal conduct of the children in their charge. In addition to providing for children's health, safety and basic needs, early childhood professionals foster learning in young children by planning and implementing developmentally appropriate activities and experiences. They create a homelike atmosphere by offering support and counsel, and by providing for the physical necessities of the children in their care. Child care settings include home settings, preschool or nursery school center settings, Head Start and public schools. Position titles and the amount of responsibility vary: nanny, child care or nursery school worker/attendant, classroom or recreational aide, classroom assistant or preschool teacher, paraprofessional, owner and/or director of a child care facility.

*Satisfies MACRAO for transfer (includes 6 credits of English Composition, 8 credits of Math and Science, 8 credits of Social Science and 8 credits of Humanities). Students planning to transfer to a four-year university need to follow a transfer program sheet for the respective college to which they wish to transfer. Plan to work closely with an advisor or the discipline coordinator if you are planning to transfer.

**or MTH 110 or higher.

Students may acquire hours of formal child care training and education toward completion of the CDA credential, renewal of CDA and child care licensing requirements for Michigan.

For those students wishing to pursue a bachelor’s degree, SC4 has an articulation agreement with Madonna University. Contact the discipline coordinator or Student Success Center for details.
The Child Development Associate (CDA) credentialing program is designed to assist and support students planning to apply for the National CDA credential. Courses within the program allow the student to obtain the required 120 clock hours of formal child-care training and education, with no fewer than 10 clock hours in each of the eight content areas outlined by the National Credentialing Program.

**Suggested Course Sequence**

</tr>
</tbody>
</table>

*Prerequisites may need to be taken prior to enrolling in these courses.

**Students planning to complete the CDA in one year will need to take ECE 105 in the spring or summer session. Plan to work closely with the discipline coordinator for course scheduling purposes.

Students may acquire clock hours for formal child care training and education toward completion of the CDA credential, the Michigan Department of Education Paraprofessional requirements and child care licensing requirements for Michigan.
ELECTRONICS AND COMPUTER TECHNOLOGY

Program Code: AASEL
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

One of the most rapidly expanding areas in modern industry is the field of electronics. There is an ever-increasing demand by industry for trained electronics technicians to assist in the development, maintenance, testing and repair of modern electronic equipment. This course work provides the technical knowledge and skills necessary for entry-level employment in industry as technicians in electronics layout, instrumentation, design, lab work, field service or as an engineering aide. Technicians may also install microcomputers, maintain communications equipment, write technical reports or work in sales and service of instrumentation equipment.

*MTH 101 or appropriate placement by college assessment or ACT score is a prerequisite to ELT 130A.

**Students have the option of taking MTH 112 as a replacement for MTH 110 and MTH 111. However, due to transfer agreements with W.S.U., L.S.S.U. and F.S.U. into Electrical Engineering Technology (BSET) programs, students may want to substitute courses for maximum transfer credit (MTH 113 and MTH 114). Contact Engineering Technology Department at (810) 989-5754 for more details.

***Electives: Must choose from ELT 105, CIS 120, NTR 100 or any AET course.

Note: ELT 130A, ELT 130B and ELT 131 combined are equal to one Global Awareness (GA) competency. ELT 231 and ELT 236 together equal one Oral Communication (OC) competency.
The Electronics and Computer Technology certificate program is designed for students with an interest in computer repair, computer interfacing, preparation for the A+ Certification exam and the electronic components inside the computer. No prior electronic or computer background is required. Courses fit into the Electronics and Computer Technology associate degree program.

Total Credit Hours/Total Contact Hours = 31/52

*MTH 101 or appropriate placement by college assessment or ACT score is a prerequisite to ELT 130A.

**or MTH 112 or higher.

Transfer students should take MTH 112, MTH 113 & MTH 114. See program advisor for recommendation.
Students in the Engineering Graphics Technology program take a series of courses covering the principles of engineering graphics. These classes provide extensive laboratory experience in the application of these principles. This program provides hands-on experience to prepare students for employment in association with engineers and designers. The diversity of the curriculum provides opportunities for students to develop proficiency in specialized areas such as Bodyline Design, Tool and Die and Injection Mold Design.

While most graduates enter the job market as engineering graphics technicians and work with engineers in the preparation of technical drawings, some graduates enter fields where they are responsible for the interpretation and implementation of drawings. Other technologists become designers and assist engineers in preparing design details and specifications for engineering projects.

*Students with drafting experience should contact the Engineering Technology Department at (810) 989-5754 for a possible substitution of EG 180 or another approved course.

**Student has the option of taking MTH 112 as a replacement for MTH 110 and 111. If students choose MTH 112, they must select an additional course from the Critical Thinking list to satisfy graduation competency requirements.

A transfer agreement exists with Wayne State University. Contact the Engineering Technology Department at (810) 989-5754 for transfer of credit.
ENGINEERING GRAPHICS TECHNOLOGY
(CERTIFICATE)

Program Code: CERDI
CERTIFICATE
Engineering Technology Department (810) 989-5754

This program is for those who desire a working knowledge of fundamental drafting as applied to the machine tool industry. This program will prepare students for entry level jobs as technicians who support and work with engineers in the preparation of technical drawings. The skills taught in these courses are needed for manufacturing-related jobs that rely on drawings to provide clear and complete information.

** or CIS 115.
***ENG 104 – Technical Report Writing may be substituted.
****Elective must include one of the following: ART 121, ART 122, ART 123, BUS 221, BUS 222, GEO 102, HIS 101, HIS 102, HIS 149 or HIS 150.
*****PHY 231 – Statics may not be required for some programs. See the Student Success Center or an engineering school representative from your university of choice. Students choosing not to take PHY 231 must complete all degree requirements and have a minimum of 62 credits to graduate.
# FABRICATION AND DESIGN

**Program Code: AASFD**  
**ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE**  
**Engineering Technology Department (810) 989-5754**

Fabrication and Design students will take a series of courses covering principles of Architectural Design, Engineering Graphics, CNC Precision Machining and Welding that involve extensive hands-on lab experience stressing application as well as principles. The diverse curriculum will allow students to develop proficiency in the specialized welding of their choice, as well as the subsequent design processes that align with manufacturing principles.

*All welding courses are taught on an individualized, self-paced, open lab basis. Class times are available both day and evenings.

**Students have the option of taking MTH 112 as a replacement for MTH 110 and MTH 111. If this option is chosen, student must select another course from the Critical Thinking list. See program advisor for recommendation, or contact Engineering Technology Department at (810) 989-5754.
FIRE SCIENCE TECHNOLOGY
Program Code: AASFS
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Health and Human Services Department (810) 989-5675

The Fire Science Technology program is designed to provide the skills and knowledge necessary to be successful in the fire protection field as a designated safety professional employed in industry, government or the public sector. The program is intended as a basic study in the fire sciences for fire fighters, fire protection specialists and those in related fields such as architecture, insurance, corporate security and environmental safety. The program covers fire protection, prevention and suppression, hazardous materials, fire source investigation and organizational management.

Range Total Credit Hours/Range Total Contact Hours = 62-63/62-63
Program Optional Courses:
FST 111 Incident Management for the Fire Service 3
FST 112 The Legal Aspects of Public Fire Service 3

Optional courses may replace any FST course except FST 203 Hazardous Materials I and FST 205 Hazardous Materials II. FST 203 and 205 are required to receive the associate degree.

*A total of nine articulated credits are available for students who have earned certification through SC4’s Workforce Training Institute or any other recognized training facility where a Michigan Fire Fighters Training Council certificate has been issued. Students must provide proof of certification(s) to the Registrar. Credit awarded is only applicable to the Fire Science Technology associate degree and/or certificate programs at SC4 and will be added to the student transcript once the student has officially enrolled (i.e., past the drop/add period).

**or MTH 112. Students choosing this option are still required to complete a minimum of 62 credits.

BACHELOR OF SCIENCE DEGREE – FIRE AND SAFETY ENGINEERING TECHNOLOGY
For those students wishing to pursue a baccalaureate degree at University of Cincinnati, an English literature course and a total of nine credit hours in humanities or social science are required at the associate degree level.
FIRE SCIENCE TECHNOLOGY (CERTIFICATE)

Program Code: CERFS
CERTIFICATE
Health and Human Services Department (810) 989-5675

The Fire Science Technology certificate program is designed to be a focused program providing technical knowledge related to the fire and safety professions. Courses transfer directly into the Fire Science Technology associate degree program.

Optional courses may replace any FST course except FST 203 Hazardous Materials I and FST 205 Hazardous Materials II. FST 203 and FST 205 are required to receive the certificate.

*A total of nine articulated credits are available for students who have earned certification through SC4’s Workforce Training Institute or any other recognized training facility where a Michigan Fire Fighters Training Council certificate has been issued. Students must provide proof of certification(s) to the Registrar. Credit awarded is only applicable to the Fire Science Technology associate degree and/or certificate programs at SC4 and will be added to the student transcript once the student has officially enrolled (i.e., past the drop/add period).
GENERAL TRANSFER STUDIES (MACRAO)

Program Code: CERTR
CERTIFICATE
Student Success Center (810) 989-5520

The General Transfer Studies certificate program is intended for students who wish to transfer to a four-year college or university after completing one year of coursework at SC4. Completion of this certificate program will satisfy the MACRAO requirements (a transfer agreement in the state of Michigan that assists students with the transferability of general education requirements).

Required courses are flexible and may be customized to meet the needs of the student based upon the transfer institution requirements. Most transfer institutions will accept a minimum of 60 credit hours from SC4; therefore, students are encouraged to take additional courses beyond the Transfer Certificate requirements.

Students seeking the Transfer Certificate must work closely with the transfer school of choice as well as an SC4 advisor to help ensure the appropriate courses are taken at SC4.

<table>
<thead>
<tr>

<td>8</td>
</tr>
<tr>
<td><strong>Science and Math Requirement</strong></td>
<td>8</td>
</tr>
</tbody>
</table>

Total Credit Hours/Range Total Contact Hours = 30/30-32

*Social Science Requirement – must select classes from ANT, PS, PSY, SOC, HIS, GEO (not GEO 101, 105, 137 or 210), BUS 221 or BUS 222. Courses must be from more than one subject area (i.e., you cannot take two PSY classes to fulfill this requirement).

**Humanities Requirement – must select classes from SPC, ART, MUS, THA, PHL, HIS (101 and 102 only), SP, FR, GR or ENG 200 level classes. Courses must be from more than one subject area (i.e., you cannot take two ART classes to fulfill this requirement).

***Science and Math Requirement – must select classes from AST, CHM, GEO (101, 105, 137 and 210 only), GLG, PHY, PHS, AGR, BIO or MTH 104 and higher. Courses must be from more than one subject area (i.e. you cannot take two MTH classes to fulfill this requirement) and include at least one lab science.
HORTICULTURE–LANDSCAPE
Program Code: CERHL
CERTIFICATE
Engineering Technology Department (810) 989-5754

This curriculum is designed for the students to choose courses most meaningful to them and their immediate and long-term goals. All courses may be applied to the Landscape Design, Turf and Greenhouse Management associate degree. Completion of this certificate prepares students for jobs such as: landscaper, nursery technician, greenhouse technician, groundskeeper and garden center technician.

MANAGEMENT, PROFESSIONAL CERTIFICATION

Program Code: CERMN

Certificate

Business Administration Department (810) 989-5575

This program provides certification of a professional level of academic achievement in the field of management. An individual achieving this certification will demonstrate a level of managerial competence commensurate with successful managerial practice. The program is designed for current managers and supervisors who wish to enhance their professional effectiveness and those aspiring to a position in management or supervision. Contact the Business Administration Department for more information. Courses directly transfer into the Business Management associate degree program.

MARKETING
Program Code: AASMK
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Business Administration Department (810) 989-5575

Marketing is one of the major segments of our economy. Through this area, goods and services flow from producer to consumer. The objective of this program is to examine marketing and its parts: advertising, pricing, product selection, consumer behavior, market definition, promotion, distribution and selling. This includes the necessary skills and knowledge for students to find and hold an occupational position.

NOTE: Students wishing to transfer should not follow the sequence listed below. Please contact the Business Administration Department or Student Success Center for detailed transfer information specific to each college/university.

MECHATRONICS
Program Code: AASMR
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

This program of study prepares students to work in the growing field of mechatronics. It combines technical skills from the computer, electrical/electronic and mechanical disciplines to develop well-rounded, multi-skilled technicians who can design, install, program, integrate, service and troubleshoot mechatronic components and systems.

Mechatronics has been identified as one of the ten emerging technologies that will change the world. The U.S. Department of Labor has listed mechatronics as a new and emerging green jobs growth area that also has been identified as one of the in-demand industry clusters. According to the Bureau of Labor Statistics, the job outlook for mechatronics is green and bright through 2018 with an annual salary around $50,000. According to the Center for Automotive Research, mechatronics will dominate future hiring at motor vehicle firms. The National Council on Competitiveness estimates that 100 million new jobs will be created in the 21st century at the intersection of disciplines rather than in individual disciplines. Mechatronics technicians exhibit this multi-disciplinary or multi-skilled requirement.

There is no mechatronics industry sector; rather, it is an enabling approach to technology that is increasingly applied in a number of economic sectors including: alternative/renewable energy and a variety of green jobs; biotechnology, life science and medical; electronics and applied computer equipment; telecommunications and information services; distribution, transportation and logistics; heavy and special trade construction; energy, mining and related support services; petroleum refining and chemical; transportation equipment; production support and industrial machinery; agriculture, forestry and food; and aerospace, homeland security and defense.

*or MTH 112 or higher. Transfer students should take MTH 112, MTH 113 and MTH 114. See program advisor for recommendation, or contact Engineering Technology Department at (810) 989-5754.

**or ELT 160.

***Technical electives must be selected from: AET 183, CIS 120, EG 162, ELT 150, ELT 230, IA 150. These courses contain a project that will be related to the student's individual program of study.

NOTE: ELT 130A, ELT 130B and ELT 131 together are required to satisfy GA requirement. ELT 231 and ELT 236 together are required to satisfy OC requirement.
Due to the dynamic nature of the health professions, changes in either the curricula or course content or both may be made at any time.

Applicants planning to pursue a career in nursing should familiarize themselves with the essential physical tasks of the nursing profession and limitations based upon criminal convictions. Please feel free to contact the Nursing Department to discuss such issues.

Nursing students are expected to regularly attend all classes. The demonstration of professional attitudes and behaviors as defined in the policies established by the course instructors is considered critical. Therefore, failure to demonstrate these critical attitudes and behaviors may result in a failing grade in the course, regardless of the degree of progress in other areas.

Students are required to achieve and maintain an 80% pass rate in their course of study and a grade of satisfactory in each clinical course. Failure to meet these requirements will result in the student's exclusion from the program.

Any failure or withdrawal from the Nursing program after drop and add will result in loss of tuition, and may also impact financial aid.

BACHELOR OF SCIENCE IN NURSING
BSN transfer option

Students planning to continue their education in nursing after attaining an Associate Degree in Nursing at SC4 must inform their academic advisor of this plan. Students may want to incorporate courses that are required by all BSN programs, such as microbiology. Academic advisors have current information on those universities with direct relationships with SC4.
The Associate Degree in Nursing (ADN) program prepares students to enter the profession of nursing. Upon successful completion of the required courses, the graduate is eligible to write a national licensure examination to become a Registered Nurse. The program is two years in length and includes liberal arts and nursing courses. However, a student may choose to complete any of the liberal arts courses prior to admission to the ADN program.

Transportation to and from the clinical facility is the sole responsibility of the student. In all nursing programs, students are required to purchase uniforms approved by the nursing department.

PRE-ADMISSION REQUIREMENTS (RN)
If you have previously attended college, you may already have a head start toward your nursing degree. See an SC4 advisor for more information.

The pre-admission requirements are:

1. Minimum selective GPA of 2.7 based on courses that apply to the ADN program (current high school students is overall 3.0 GPA based on 10th and 11th grade college prep courses).
2. Complete BIO 171 Human Anatomy/Physiology I, or equivalent, with a grade of 2.0 (“C” or better) by Jan. 15 of application year.
   - Students applying directly from high school must have completed biology and chemistry in high school with a grade of “C” or better by Jan. 15 of application year. They must also complete BIO 171 before starting the program. Official high school transcripts must be sent to the Nursing Department.
   - All biology A & P courses, HE 101 and HE 224 must be completed within five academic years of admission to the Nursing program.
3. Complete HE 101 Math Related to Drug Administration, or equivalent, with minimum of 80% by Jan. 15 of application year.
4. All pre-nursing and general education requirements must have a “C” or better if student wishes to be considered in the applicant pool.
5. Assessment tests are required if the student has not previously attended college. Arrangements for assessments can be made by calling the Achievement Center at (810) 989-5555.
6. HESI Pre-admission Test must be taken at SC4. Letter confirming receipt of application will explain procedure.

Fulfillment of these criteria does not guarantee admission to the nursing program.

Applicants planning to pursue a career in registered nursing who have a criminal record of felony or misdemeanor convictions should contact the Nursing Department to determine employment restrictions based upon these convictions.
APPLYING FOR ADMISSION
Persons seeking admission to the RN – Associate Degree Nursing (ADN) program must:

1. Submit to the SC4 Enrollment Services office:
   • A completed Application for Admission to SC4, indicating an ANTRN, Associate Degree Nursing program code as the intended program of study.
   • A completed nursing program application by Jan. 15 of application year.
   • Official college transcripts by Feb. 5, if you have previously attended a college other than SC4.

2. Schedule a mandatory group advising appointment with the Nursing Department at (810) 989-5675. Attending a group advising session is mandatory before application is considered.

3. Make arrangements to take the mandatory admission assessment test.

ACCEPTANCE PROCEDURE

1. Qualified applications will be reviewed by the Nursing Department in the winter semester for the ADN program (program starts the following fall semester in August). Notification of applicant acceptances and rejections will be mailed. Acceptance into the program is based on space, availability and entrance criteria that includes GPA, credits taken towards a nursing degree and HESI Pre-admission Test results. See www.sc4.edu/nursing for a breakdown of the criteria.

2. Accepted ADN applicants will be required to attend an ADN program orientation after admission. At the ADN program orientation session, course schedules for fall semester will be completed.

3. Upon admission and before classes begin in the fall semester, students will need to submit a completed Physical Examination Form and evidence of current CPR for the Health Care Provider certification from the American Heart Association (forms will be provided by the Nursing Department during ADN program orientation). Additional screenings are required.

TRANSITION PROGRAM OVERVIEW:
LPN AND HEALTH CARE PROVIDER TO ADN
FOR CURRENT LICENSED PRACTICAL NURSES AND LICENSED HEALTH CARE PROVIDERS
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Nursing Department (810) 989-5675

The Transition Program includes two tracks: Licensed Practical Nursing (LPN) to Associate Degree Nursing (ADN) − Registered Nurse and licensed Health Care Provider (HCP) to Associate Degree Nursing (ADN) − Registered Nurse. Each track is one and a half years in length and includes liberal arts and nursing courses (see appropriate model schedules). However, a student may elect to complete any of the liberal arts courses prior to admission to the ADN program. The program is a fast track/accelerated course of study and is designed to expand upon previous education and experience. Students are expected to apply prior knowledge to all nursing courses. In order to be successful, it is strongly suggested that students in the program work no more than 24 hours a week. All testing may be proctored on SC4’s main campus. If available, the HCP program may have designated off-campus testing sites, which may require the student to pay a fee for each scheduled test. Upon successful completion of the program, the graduate is eligible to write a national licensure examination to become a registered nurse.

APPLICATION/ PRE-ADMISSION REQUIREMENTS

1. Submit a completed Application for Admission to the Enrollment Services office by Oct. 1 of the desired academic year for admission. Indicate on the application one of the following as the intended program of study:
   - ANTap − Associate Degree Nursing LPN code
   - ANTHP − Associate Degree Nursing HCP code

2. Meet with an advisor in the SC4 Student Success Center regarding program prerequisites and admission to the nursing program. Schedule an appointment by calling (810) 989-5520.

3. Attend a mandatory group advising session prior to application deadline in the Nursing Department. Schedule an appointment by calling (810) 989-5675.

4. Submit a completed Nursing Program Application by Oct. 1 of the desired academic year of admission. This must be submitted to the Nursing Department (Room 100, North Building) in person, by mail or fax (810) 989-5667.

5. Register to take the HESI Pre-admission Test as directed by the Nursing Department prior to the Oct. 1 deadline.

6. Complete, or be currently enrolled in, the following SC4 prerequisite courses prior to the Oct. 1 application deadline in order to be considered for admission:
   - HE 101 − Math Related to Drug Administration
   - ADN 103 − Nursing Process and Health Assessment
   - HE 224 − Altered States of Adult Health

   Note: These courses must be taken within five years of admission to the nursing program. A passing grade of 80% must be achieved in order to be considered for admission.
7. Achieve a minimum selective GPA of 2.7 based on courses that apply to the Associate Degree Nursing program.
8. All nursing and general education courses must be completed with a "C" or better to be considered in the applicant pool.
9. Submit college transcripts to SC4 Enrollment Services office by Oct. 1 of the desired academic year of admission from all previously attended colleges other than SC4.
10. Provide evidence of 1,040 hours of work experience as an LPN or HCP within the past five years. This must be submitted by Oct. 1.
11. Provide evidence of current unencumbered Michigan licensure as an LPN or HCP. This must be submitted by Oct. 1 of the desired academic year of admission.
12. LPNs with strong, up-to-date drug knowledge may consider taking the NLN Pharmacology competency exam to waive ADN 124. It must be taken within five years of admission to the ADN program and students must score at least 70% for credit. Schedule a testing appointment with the Achievement Center by calling (810) 989-5555.

Fulfillment of these criteria does not guarantee admission to program.

Note: Applicants planning to pursue a career in registered nursing who have a criminal record of felony or misdemeanor convictions should contact the Nursing Department to determine employment restrictions based upon these convictions.

ACCEPTANCE PROCEDURE

1. Materials from applicants meeting the pre-admission requirements will be reviewed by the Nursing Department in the fall semester of the application year. The transition program begins in the winter semester (January). Notification of applicant acceptances and rejections will be mailed. Acceptance into the program is based on space availability and entrance criteria that includes GPA, credits taken towards a nursing degree and HESI Pre-admission test results. See www.sc4.edu/nursing for a breakdown of the criteria.
2. Accepted applicants will be required to attend an ADN program orientation after admission. Course schedules for winter registration will be provided at this orientation session.
3. Upon admission and prior to entering the clinical setting, students must submit a completed Physical Examination Form, evidence of malpractice insurance, and evidence of current CPR for the Health Care Provider certification from the American Heart Association. Forms will be provided by the Nursing Department during ADN program orientation. Additional screenings are required.

Upon successful completion of the required courses, all competencies will be satisfied.

NOTE: Online courses may have proctored exams.
NURSING PROGRAM, PRACTICAL
ONE-YEAR OPTION OVERVIEW
CERTIFICATE, One-year Option
Nursing Department (810) 989-5675

The Practical Nursing program prepares the graduate to provide direct patient care with supervision. Upon successful completion of the required courses, the graduate is eligible to write a national licensure examination to become a licensed practical nurse (LPN). The program is one year in length. However, the student may select a part-time schedule and complete the required courses over a two-year time span (available only in Port Huron).

PRE-ADMISSION REQUIREMENTS (LPN)

1. High school graduate or successful completion of the G.E.D. test.
2. Achievement of overall grade point average (GPA) of 2.5 or better in high school or college-level academic work.
3. Competitive score on the HESI Pre-admission Test. See website www.sc4.edu/nursing.

Note: Fulfillment of these criteria does not guarantee admission to the LPN program.

APPLYING FOR ADMISSION
Persons seeking admission to the LPN – Licensed Practical Nursing certificate program must:

1. Submit to the SC4 Enrollment Services office by June 1 (Port Huron) or Sept. 1 (Bad Axe) of the year you plan to start program courses:
   • A completed Application for Admission to SC4, indicating an LPN–Licensed Practical Nursing certificate program code (ANTLP for Port Huron or ANTLB for Bad Axe) as the intended program of study.
   • A completed Nursing Program Application.
   • Official high school transcripts and/or GED scores.
   • Official college transcripts, if you have previously attended a college other than SC4.

2. Schedule a mandatory group advising appointment with the Nursing Department at (810) 989-5675. Attending a group advising session is mandatory before application is considered.

3. Schedule an appointment for the SC4 HESI Pre-admission Test – see www.sc4.edu/nursing for details.

Applicants planning to pursue a career as a practical nurse who have a criminal record of felony or misdemeanor convictions should contact the Nursing Department to determine employment restrictions based upon these convictions.
ACCEPTANCE PROCEDURE

1. Qualified applications will be reviewed by the Nursing department during the semester that precedes the start of the LPN program.

   **Note:** Because admission is competitive, not all candidates will be accepted.

2. Students are strongly encouraged to complete BIO 160 and HE 101 prior to acceptance to the program, ENG 101 and HE 102 are recommended. Completion of these courses will increase chances for admission. (Anatomy and Physiology course(s) and HE 101 must be completed within five years of admission to the program.)

3. Accepted LPN applicants will be required to attend an LPN program orientation after admission. At the LPN program orientation session, course schedules for upcoming semester registration will be completed.

4. Upon admission and before classes begin, students will need to submit a completed Physical Examination Form and evidence of current CPR for the Health Care Provider certification from the American Heart Association (forms will be provided by the Nursing department during LPN program orientation). Additional screenings may be required.

FUTURE ARTICULATION DEGREE OPTIONS

Students planning to continue their education toward a Registered Nursing license may do so at SC4 after they have graduated from the LPN program, received their LPN nursing license and can provide evidence of 1,040 hours of work experience within the last five years as an LPN.

OFFICE ADMINISTRATION—
ADMINISTRATIVE EXECUTIVE ASSISTANT

Program Code: AASEX

ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE

Computer and Office Technology Department (810) 989-5628

The Administrative Executive Assistant associate degree program prepares students for careers as administrative assistants and/or executive secretaries. Employment opportunities are found in every industry including manufacturing, construction, wholesale and retail trade, banking, insurance, real estate, education, government and health care facilities. This curriculum provides skills in business communications, interpersonal relations, computer keyboarding and word processing, accounting principles, electronic spreadsheets and file management, office procedures and transcription, along with on-the-job training. Successful graduates have readily found positions in business and often progress to high-level positions.

OFFICE ADMINISTRATION–
ADMINISTRATIVE MEDICAL ASSISTANT
Program Code: AASMA
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Computer and Office Technology Department (810) 989-5628

The medical office is an ever-changing and growing field. This program leads to positions in doctors’ and dentists’ offices, hospital records and administrative offices, clinics, nursing homes, insurance offices, pharmaceutical firms and many allied areas including health organizations. Successful students will obtain skills in keyboarding, appointment scheduling, medical billing, records management, medical transcription, public relations and communications skills leading to positions as front office medical assistants, medical records technicians, medical transcriptionists and medical billers, just to name a few.

*OA 110 Beginning Keyboarding or equivalent is a prerequisite.
**Students have the option of taking BIO 171 and BIO 172 as substitutions for BIO 160
***or MTH 102 or higher.

NOTE: Upon successful completion of the required courses, all graduation competencies will be satisfied. Completion of entire Office Administration program constitutes one GA competency.
OFFICE ADMINISTRATION – MEDICAL CLINICAL ASSISTANT  
Program Code: AASMC  
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE  
Computer and Office Technology Department (810) 989-5628

The position of the medical clinical assistant is both challenging and rewarding, as it assists physicians in examining and treating patients. Positions can be found in a variety of doctors’ and dentists’ offices, hospitals, clinics, medical laboratories, pharmaceutical firms, nursing homes and other health care facilities. Duties may include taking vital signs, preparing patients, documenting patient histories, assisting in exams, collecting specimens, giving injections, and sterilizing supplies and equipment, as well as a number of basic clerical duties necessary to have an office run effectively and efficiently. Proof of Hepatitis B vaccine and/or positive titer is a prerequisite to the following courses: OA 287, OA 288, OA 200A & OA 200B. See an Office Administration discipline advisor for details.

OFFICE ADMINISTRATION – CLERICAL SPECIALIST
Program Code: CERCS
CERTIFICATE
Computer and Office Technology Department (810) 989-5628

The Clerical Specialist certificate program offers a foundation of basic office courses preparing students for employment as receptionists, file clerks and general office clerks for virtually every kind of industry. This certificate program leads to a two-year associate degree by continuing in a specialization (executive, medical or legal) for a second year. Elective choices may be used for this transition.

RADIO FREQUENCY IDENTIFICATION TECHNOLOGY
Program Code: CERRF
CERTIFICATE
Engineering Technology Department (810) 989-5754

The goal of the Radio Frequency Identification Technology (RFID) certificate program is to prepare students for employment in career fields related to radio frequency identification technology. The lab will provide students with hands-on warehouse and storage/retrieval experience working with software, tags, readers, antennas and peripheral equipment. Students will learn to set up an RFID system, test and troubleshoot the system components, and modify the system. Students will also be able to communicate the business value of an RFID implementation.

ROBOTICS/AUTOMATION TECHNOLOGY
Program Code: AASIA
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

This program of study will prepare students to work in the rapidly expanding field of robotics and automation. It incorporates technical skills from the electrical, mechanical, computer and manufacturing disciplines. Robotics and automation in industry is providing jobs for technically trained people who can build, program, integrate, service and maintain robotic/automated equipment.

Suggested Program Sequence

FIRST YEAR – 1st Semester Semester Hours
ELT 130A Fundamentals of Direct Current Electronics GA 2
ELT 130B Fundamentals of Alternating Current Electronics GA 2
IA 100 Electrical Power & Control Circuits I 3
IA 143 Fluid Power & Control Circuits I 3
MTH 110* Intermediate Algebra CT MA 4

2nd Semester Semester Hours
ELT 131 Semiconductor Devices and Circuits GA 4
ELT 236 Microcontrollers: Energy Control Systems I OC CT CL 4
IA 101 Introduction to Robotics/Automation 3
IA 102 Programmable Logic Controllers CL 3
IA 243 Fluid Power & Control Circuits II 3

SECOND YEAR – 1st Semester Semester Hours
ELT 231 Industrial Electronics OC 3
ENG 101 English Composition I WR 3
IA 201 Advanced Robotics & Programmable Controls CL 3
MFT 111 Machine Tools GA 4
WELD 110A Basic Oxyacetylene Welding, Cutting & Brazing 1
WELD 110B Basic Shielded Metal Arc Welding I 1
WELD 110C Gas Metal Arc/Gas Tungsten Arc Welding 1

2nd Semester Semester Hours
EG 110 Introduction to Drafting 2
EG 111 Fundamentals of Computer-Aided Drafting 2
ENG 102 English Composition II WR 3
MFT 211 Beginning NC/CNC Programming 3
PS 101 Introduction to Political Science GA GP 3
**Technical Elective 2-3

Range Total Credit Hours/Range Total Contact Hours = 62-63/97-98

*or MTH 112 or higher. Transfer students should take MTH 112, MTH 113 & MTH 114.
**Technical Electives: IA 150, Industrial Automation Co-op recommended, or AET 183,
CIS 120, EG 162, ELT 105, ELT 135, ELT 232.
NOTE: ELT 130A, ELT 130B and ELT 131 together are required to satisfy one GA
graduation competency requirement. Both ELT 231 and ELT 236 are required to satisfy
the OC graduation competency requirement.
TECHNOLOGY, APPLIED STUDIES
Program Code: AASST
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Engineering Technology Department (810) 989-5754

This program is designed for those individuals who have technical work experience, and for persons who have completed a trade apprenticeship. Work experience may be done concurrently or after courses are taken. Experiential and apprenticeship credit may be awarded. This degree is intended for those who desire a broader knowledge of manufacturing (e.g., CIM, quality, processes). This degree is not intended for those wishing to transfer to a four-year engineering technology program.

Semester Hours: 15

Total Credit Hours/Range Total Contact Hours = 62/64+

*Technical Emphasis (major area of study−12 credits minimum). Courses must be chosen from only one of the following disciplines: AD, EG, ELT, IA, ITL, MFT, QA, RFID, WELD.
**Students have the option of taking MTH 110 and MTH 111 as a replacement for MTH 112.
***Humanities Elective – suggested: Language (Conversational) German/Spanish.
****Science Elective – suggested: PHY 121 or PHS 101 or CHM 101.
*****Technical elective – any course(s) from the disciplines listed above or a technical elective approved by the program advisor or the Department Chair, Engineering Technology. A minimum of 6 credits are required from this group.

NOTE: In addition to meeting graduation competency requirements, students must complete a minimum of 62 credit hours.
TECHNOLOGY, APPLIED STUDIES
(CERTIFICATE)
Program Code: CERST
CERTIFICATE
Engineering Technology Department (810) 989-5754

This program is designed to give the student a broad look at several fields of technology before selecting a specific major. This program provides the student with the basic occupational skills necessary to obtain employment. Specifically, upon successful completion of this program the student will be in an advantageous position to pass the pre-apprenticeship and/or pre-employment examinations required by many trade unions and companies.

Suggested Course Sequence

1st Semester | Semester Hours

THERAPEUTIC MASSAGE
Program Code: AASTM
ASSOCIATE IN APPLIED ARTS AND SCIENCE DEGREE
Health and Human Services Department (810) 989-5675

The Therapeutic Massage program is a cooperative effort between St. Clair County Community College (SC4) and Lakewood School of Therapeutic Massage (Lakewood). The program combines occupational-specific courses at Lakewood and general education courses with the required competencies for graduation from SC4. Students must complete the graduation requirements at Lakewood and successfully complete an additional 31 credits. A minimum of 15 credits must be completed at SC4.

NOTE: It is also highly recommended that graduates of this program also complete the national certification examination offered by the National Certification Board for Therapeutic Massage and Bodywork.

***Transfer of 32 credits from Lakewood School of Therapeutic Massage is available through a formal articulation agreement with St. Clair County Community College. Total Credit Hours/Total Contact Hours = 63/67

*or MTH 110 or higher.
**or ENG 102 and SPC 101.
***Articulated credit is awarded to students who have graduated from Lakewood. Students MUST have an official transcript mailed to the Registrar. Credit awarded is only applicable to the Therapeutic Massage associate degree program at SC4 and will be added after the student has completed the program requirements.
TRANSPORTATION AND LOGISTICS TECHNOLOGY
Program Code: CERTL
CERTIFICATE
Engineering Technology Department (810) 989-5754

The Transportation and Logistics Technology program is intended for those who wish to develop a working knowledge of the freight transportation industry. This includes supply chain management, domestic and international freight operations, import and export procedures, and documents and border security. Work experience and/or internship is also included.

Completion of this certificate is helpful for entry-level positions in the following fields: transportation management, U.S. Customs, logistics management, freight operations and supply chain operations.

This workforce solution was funded by a grant awarded under the President’s Community-Based Job Training Grants as implemented by the U.S. Department of Labor’s Employment and Training Administration. EMPLOYMENT–RELATED ACADEMIC OPPORTUNITIES

APPRENTICESHIP
(810) 989-5790

In today’s highly technical world, whether in industry, commerce or public services, apprenticeship is still one of the best ways to acquire occupational skills required for full qualification in an ever-increasing number of career fields.

Apprenticeship is a prescribed learning experience during which an individual who is an “apprentice” learns a trade through several years of on-the-job training and Related Trade Instruction (RTI). Apprenticeships usually last about four years, in which the apprentice is a full-time employee.

Apprenticeship programs are registered with the Office of Apprenticeship, U.S. Department of Labor. Upon successful completion of both the Related Trade Instruction and a predetermined work schedule, the apprentice receives a Certificate of Completion from the Federal Bureau of Apprenticeship. The apprentice will also receive a Certificate of Program Completion from St. Clair County Community College. Apprentices have the opportunity to continue their education in a prescribed curriculum and earn an associate degree.

JOB UPGRADING

In cooperation with local industries, the college has also established an “Upgrader Program.” An upgrader is any person working in or learning an apprenticeable occupation, but is employed by a company not participating in a registered program even though the occupation is apprenticeable.

These programs are excellent Earn-As-You-Learn training, which allow the student to earn college credit. Credit and work experience earned in this program may be applied to an apprenticeship RTI if the employer becomes an active participant in apprenticeship. Enrollment in these specialized courses or programs is made with the College Apprenticeship Coordinator.

Many programs for different vocations are available. Inquiries regarding these programs should be made to the College Apprenticeship Office, Tom Decker at (810) 989-5790 or tdecker@sc4.edu.
ENROLLMENT OPTIONS
Adult students who desire to improve their working knowledge through related trade instruction, individuals who are required to attend specific classes as part of a company apprenticeship program, working adults in training or upgrading programs, or any individual who can profit from the instruction may enroll.

TUITION
Cash or check must accompany enrollment.

ATTENDANCE
To comply with apprenticeship training regulations, there is a rigid check on classroom attendance. Each apprentice should be present and on time for every class session.

COOPERATIVE EDUCATION (CO-OP)
Co-op is a program which incorporates actual work experience into the planned college curriculum. After successful completion of the basic courses, students may elect to enter a co-op experience. Co-op allows the student to be placed in an approved training environment, earn college credits for satisfactory work performance and earn wages for hours worked.

To participate in this program, students must be qualified and receive approval from their department faculty advisor prior to the semester that co-op work experience is desired.

The following programs offer co-op education:

Administrative Executive Assistant
Administrative Legal Assistant
Administrative Medical Assistant
Computer Information Systems
  Applications
  Networking
  Programming
  Web Development
Medical Clinical Assistant
Robotics Automation Technology
INTERNSHIP
Internship is the most commonly used term to describe another means for students to apply classroom theory to work situations. Through the integration of academic study and work experience, students enhance their academic knowledge, personal development and professional preparation. This is a structured work experience for college credit that is developed by the department faculty advisor, the employer and the student. See the appropriate department faculty for more details.

The following programs offer internships:

Broadcasting
Communications Media
Computer Information Systems
  Applications
  Networking
  Programming
  Web Development
Early Childhood Education
Journalism
Management
Marketing
St. Clair County Community College

ENROLLMENT & SUPPORT SERVICES
ENROLLMENT SERVICES/ADMISSIONS

Registrar
123 Acheson Technology Center (ATC)
(810) 989-5500, Fax: (810) 989-5541
enrollment@sc4.edu
Monday and Thursday 8 a.m. to 6 p.m.
Tuesday and Wednesday 8 a.m. to 4:30 p.m.
Friday 9:30 a.m. to 4:30 p.m.

The Enrollment Services office provides the following services:
- Maintenance of student academic records
- Collection and distribution of grades
- Evaluation of transfer credit
- Advanced standing credit (e.g., AP, CLEP)
- Verification of degrees/certificates
- Calculation of academic honors
- Distribution/collection of admission related materials
- Distribution/collection of class schedules and other registration related materials
- Registration and payment (including drops, adds and withdrawals)
- SC4 official/non-official academic transcript requests
- SC4 enrollment verifications
- Residency verifications (used for billing purposes)
- Name and address changes

CAMPUS TOURS
SC4 campus tours are provided free of charge upon request. Prospective students are encouraged to contact the Admissions office to schedule a tour with a Student Ambassador. Tours include visits to Student Services offices, buildings, classrooms and programs of specific interest. Requests for tours can be made by calling (810) 989-5574 or visiting www.sc4.edu/tour.

ADMISSION INFORMATION
Admission to SC4 is open to all applicants who are high school graduates and those who have successfully completed the General Education Development (G.E.D.) test. In addition, students who have stopped attending high school, as well as home schooled students, are eligible for admission if their high school class has graduated by their intended semester of enrollment. Students seeking admission prior to high school graduation may be admitted on a semester by semester basis as a guest student.
SC4 strongly encourages students to submit a Social Security Number on the application for admission. The Social Security Number is used as the single unique identifier that facilitates the coordination of a student’s academic record, especially those submitted by external institutions. Without the Social Security Number, the college cannot provide tuition related Federal Tax Credit information and may have difficulty providing the accurate coordination of academic records.

ADMISSION PROCEDURES FOR NEW STUDENTS
(First-time enrollment following high school graduation)

1. Application
Anyone wishing to apply for admission must complete an SC4 Application for Admission. Students are encouraged to apply online at www.sc4.edu/apply. Applications also are available from high school counseling offices, by contacting the SC4 Enrollment Services office directly at (810) 989-5500 or through the SC4 website at www.sc4.edu/admissions.

A record of high school grades, and/or G.E.D. scores, is required and must be submitted with the application. This record can be obtained by contacting the high school from which graduation occurred. If for some reason the high school is no longer in existence, students are encouraged to contact the Michigan Department of Education for further information.

2. Assessments
SC4 supports the concept that its students should be competent in reading comprehension, writing and math skills in order to succeed in both their college courses and their lifelong career choices. Recognizing the college’s commitment to quality education for its students and the communities they represent, SC4 requires students enrolling in SC4 for the first time following high school graduation to complete the SC4-administered COMPASS assessment tests or submit ACT scores (valid tests are those completed within the last three years). These assessments are used to develop an educational plan tailored to the skills of each student. Scores are used for course placement. A preview of the COMPASS assessment is available at http://act.org/compass/sample/index.html. Students are encouraged to visit the website prior to testing.

The COMPASS assessment tests are given free-of-charge on campus and at select off-campus centers.
To schedule the COMPASS assessment, visit www.sc4.edu/compass or call the Achievement Center at (810) 989-5555 or the Student Success Center at (810) 989-5520. Information for high school students regarding the ACT can be obtained by contacting the high school counseling office.

3. **Orientation**
   New students attending SC4 for the first time following high school graduation are required to complete an orientation session prior to enrollment. Orientation provides students with important information on SC4 requirements and procedures and prepares students for their academic advising appointment with an advisor. As a convenience to students, orientation sessions are completed online at http://online.sc4.edu. Contact the Enrollment Services office at (810) 989-5500 for assistance.

4. **Advising**
   All new students attending SC4 for the first time following high school graduation are required to meet with an SC4 advisor in the Student Success Center. The purpose of the appointment is to develop a personal educational plan consistent with a student’s career goals and to select classes for the first semester of enrollment. To schedule an advising appointment, visit www.sc4.edu/advising or call the Student Success Center at (810) 989-5520.

5. **Registration**
   Upon completion of all requirements, students will be allowed to register for classes by selecting the days and times they would like to attend. Classes are offered at a variety of different times, including day, evening, and weekend. In addition, some classes are offered online, and in accelerated or short-term formats. Once class times have been selected, students are free to register online via www.sc4.edu/wave or in person. A registration statement may be printed that details class schedule and billing information once registration is complete. There is a non-refundable student fee assessed once per semester.

6. **Activate student email**
   All students must activate their student email account. SC4 uses email to communicate important information about: billing, classes, deadlines, events, refunds and registration. Students should remember to check their SC4 email account often. For assistance, call the Helpdesk at (800) 630-8918 or (810) 989-5858.

**ABILITY TO BENEFIT ADMISSION**
(No high school diploma or G.E.D.)
Adults who did not graduate from high school or complete the General Education Development (G.E.D.) may be admitted to SC4. They are
required to follow the same enrollment requirements as those students attending SC4 for the first time following high school graduation. Eligibility for financial aid for these students requires demonstrated "Ability to Benefit". For additional information, contact Financial Aid at (810) 989-5530.

TRANSFER ADMISSION
Transfer students, those who have attended another college/university, are required to submit an SC4 Application for Admission to the SC4 Enrollment Services office. Students are encouraged to apply online at www.sc4.edu/apply. Applications also may be obtained by downloading a printable copy at www.sc4.edu/admissions or by contacting the Enrollment Services office directly at (810) 989-5500. In addition, official high school transcripts must be submitted along with any college/university transcripts that the student wishes to have evaluated for transfer credit to SC4. For more information regarding the transferability of courses, students may access the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) website at www.macrao.org or may contact the Registrar at (810) 989-5550.

Upon submission of the completed application, transfer students are required to meet with an SC4 advisor prior to enrollment. Once the appointment has been completed, students are free to register for classes online via www.sc4.edu/wave, in person in the Enrollment Services office, or at one of the off-campus centers.

EARLY ADMISSION – HIGH SCHOOL GUEST ENROLLMENT
(Must apply each semester)
The Early Admission − High School Guest program affords high school students and age-appropriate homeschooled students the opportunity to get a head start on college by allowing them to take college credit courses prior to graduation.

High school juniors and seniors and age-appropriate homeschooled students may be admitted to SC4 on a semester-by-semester provisional basis upon completion of the following admission procedure:

1. Early Admission Application
   High school juniors and seniors and age-appropriate homeschooled students must submit a completed Early Admission Application prior to each semester of enrollment to the SC4 Enrollment Services office. The application must bear the signatures of the designated high school official if enrolling
under the Dual Enrollment payment option, parent/legal
guardian (if under 18 years of age) and student. In addition,
the application must list the course(s) in which the applicant
intends to enroll. Students planning to attend SC4 starting
with the summer session, which begins annually in late June,
following high school graduation will also be required to submit
the SC4 Application for Admission as a new student.

2. **ACT Scores or Compass Assessment Scores**
   High School Guests planning to register in an SC4 college
credit English and/or math course(s) are required to complete
the appropriate assessment tests prior to registration in these
courses. If the ACT test has been completed, a copy of the
test scores must be sent to the SC4 Enrollment Services
office in order to fulfill the assessment requirement. If the
ACT has not been completed, the student must schedule an
appointment to complete the SC4 COMPASS assessment
test(s) prior to registration. Assessment tests may be taken on
campus in Port Huron by calling the Student Success Center
at (810) 989-5520, the Achievement Center at (810) 989-5555
or at select off-campus centers.

3. **Course Prerequisites**
   It is the responsibility of all High School Guests to meet course
prerequisites prior to registration. Guests who have not met
required course prerequisites will not be allowed to register.

4. **Dual Enrollment**
   High school juniors and seniors may qualify to register
as High School Guest students at SC4 under the Dual
Enrollment Program established by the State of Michigan.
Dual Enrollment is a form of payment whereby the student's
high school pays for college tuition and possibly other college-
related fees. Additional questions regarding Dual Enrollment
should be directed to the student's local high school official or
to the Michigan Department of Education at (517) 373-4213.

5. **Registration**
   High School Guests can register online at www.sc4.edu/wave
or in person either in the Enrollment Services office or at one of
the off-campus centers. Students are responsible to pay for all
tuition and fees that are not covered by the high school. Payment
schedule compliance is required to maintain class registration.
For specific information regarding registration times, refer to
the registration calendar (www.sc4.edu/registrationcalendar) for the semester you intend to enroll or call SC4 Enrollment
Services at (810) 989-5500.

6. **Activate student email**
   All students must activate their new student email account.
SC4 uses email to communicate important information about:
billing, classes, deadlines, events, refunds and registration.
Students should remember to check their SC4 email account often. For assistance, call the Help Desk at (800) 630-8918 or (810) 989-5858.

CONDITIONAL ADMISSION FOR UNDERAGE STUDENTS
(Must apply each semester)
Admission may be granted on a conditional, semester-by-semester basis for students less than 16 years of age. Students who are academically qualified will be considered for admission as a guest by the Registrar once they have satisfied the following:

1. Must complete and submit the Early Admission Application form, including parent/guardian signature.
2. Must complete assessment testing (i.e., COMPASS) at SC4 to demonstrate college level skills in the areas of reading, writing and math.
3. Must meet with an SC4 advisor to discuss desired courses and establish an academic plan.
4. Must receive instructor permission for each desired class section in order to officially register and attend classes at SC4.

Students attending SC4 under Conditional Admission are considered “guests” to the college and must follow the above process prior to each semester of enrollment. Guest students are not eligible to receive financial aid assistance and may have limited participation in college related clubs and activities.

COLLEGE GUEST ADMISSION
(Must apply each semester)
College students attending another college/university in Michigan may be admitted to SC4 as a College Guest on a provisional basis by submitting a completed Michigan Uniform Undergraduate Guest Application. These applications are available in the Registrar’s office at each Michigan college/university and in the Enrollment Services office at SC4, or through the SC4 website at www.sc4.edu/admissions.

College Guests must apply each semester of enrollment and the application should bear the official signatures of the college/university home school where the student is enrolled.

College Guest students are not required to meet with an SC4 advisor prior to registration or to complete assessment tests. Registration for classes may be completed online via www.sc4.edu/wave, in person in the Enrollment Services office, or at
one of the off-campus centers. For a complete listing of courses and registration information, please refer to either the schedule of classes (www.sc4.edu/wave). To review transfer course equivalencies, refer to the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) website at www.macrao.org.

**Note:** It is the position of SC4 that College Guests have met all SC4 course prerequisite requirements and will therefore be allowed to register accordingly.

**RETURNING STUDENTS**
Former students who have not enrolled in SC4 college credit courses for two consecutive calendar years are required to complete an SC4 Returning Student Update Form in order to reactivate their student status. The information provided is used to update the student's demographic and academic information. Once a completed form has been processed by the Enrollment Services office, a student may register online via www.sc4.edu/wave, in person in the Enrollment Services office, or at one of the off-campus centers. Former students are not required to see an advisor prior to registration. However, due to continuous changes in the SC4 curriculum and Michigan college/university transfer information, an advising appointment is highly recommended. Students may contact the Student Success Center directly at (810) 989-5520 to schedule an appointment.

**COLLEGE GRADUATE ADMISSION**
(Students with an associate degree or higher)
Students seeking admission to SC4 who have completed an associate, bachelor's, master's or higher degree may do so by completing the SC4 Application for Admission. Students with a college degree are not required to see an SC4 advisor prior to registration but may schedule an appointment with the Student Success Center at (810) 989-5520. Once the application has been processed by the Enrollment Services office, students will be allowed to register online via www.sc4.edu/wave, in person in the Enrollment Services office or at one of the off-campus centers.

**Note:** College graduates are required to meet course prerequisites prior to enrollment.
INTERNATIONAL STUDENT APPLICANTS
123 Acheson Technology Center (ATC), (810) 989-5500

St. Clair County Community College welcomes international students to its campus community. Applicants from other countries will be admitted on an individual basis.

ADMISSION REQUIREMENTS FOR INTERNATIONAL STUDENTS

1. Apply for admission. The International Student Application for Admission is available online at www.sc4.edu/international. Application deadline dates for each semester:

   Fall semester       June 1
   Winter semester     Oct. 1
   Spring semester     March 1
   Summer semester     March 1

   Note: Only Canadian commuter students are permitted to start in the spring or summer session.

2. Submit a certified English translation of school records (high school diploma, and, if applicable, college transcripts).

3. Submit a copy of a valid passport. (Passport must be valid for a period extending at least six months past a student’s expected program completion date.)

4. Submit a statement of financial solvency for the amount of $15,000 ($9,100 for Canadian commuter students). This information is required for all students planning to enter the United States. It is required by St. Clair County Community College in compliance with regulations set forth by the U.S. Bureau of Citizenship and Immigration Services. U.S. consulate officials require evidence of financial support before a student visa is granted. Students may not include expected income from employment during the academic year or summer months as proof of resources.

5. Submit completed Financial Resources form (found in the International Student Application for Admission).

6. Submit Summary of INS Regulations for F-1 Students form (found in the International Student Application for Admission).

7. Submit a handwritten personal statement in English (two pages maximum) summarizing educational and professional goals. Applicant must include plans for the future and how SC4 can help the applicant meet these goals.

8. Applicants must provide proof of English ability by submitting official scores from the Test of English as a Foreign Language.
(TOEFL) or an ELS Language Center. No other scores will be accepted. Students must score a minimum of 512 on the paper-based version of TOEFL, or a minimum of 68 on the Internet-based version of TOEFL. The minimum ELS proficiency level required is 109. The St. Clair County Community College code for TOEFL is 1628. Students’ home countries whose official language is English need not submit English proficiency scores. See the International Student Application for Admission for a complete listing of English-speaking nations. Non-U.S. applicants also are exempt from the TOEFL requirement if they have completed one full academic year at a college or university in the United States as a full-time student or earned an accredited bachelor’s, master’s or doctorate degree from a college or university in the United States. Applicants from Puerto Rico must meet the TOEFL requirement.

9. Submit International Student Transfer form, if transferring from a U.S. college or university to SC4 (found in the International Student Application for Admission).

Upon completion of the steps listed above, students will be issued a Form I-20. Applicants are required to pay a $200 SEVIS I-901 fee when issued a Form I-20. If you need a visa to enter the United States (visa-exempt countries include Canada and Bermuda), you must pay the SEVIS I-901 fee before going to the United States embassy or consulate for your visa interview.

You may complete the I-901 form and make payment by using the following options:

**ONLINE**
This is the fastest option. Go to www.fmjfee.com. Payment via credit or debit card is required. Visa, MasterCard and American Express are accepted credit cards. Debit cards must contain the logo of either Visa or MasterCard.

**BY MAIL**
Complete the paper version and mail, along with your check or money order in U.S. funds (monies must be drawn on a bank located in the United States – do NOT send cash) payable to “I-901 Student Exchange/Visitor Processing Fee”, to:

I-901 Student Exchange/Visitor Processing Fee
P.O. Box 970020
St. Louis, MO 63197-0020
United States
BY COURIER  (to expedite delivery to SEVP; requires an additional $35.00 shipping and handling fee)  
I-901 Student/Exchange Visitor Processing Fee  
1005 Convention Plaza  
St. Louis, MO 63101  
United States
Phone Number: (314) 418-8833 (United States Country Code 011)
Be sure to write the name of the student and the SEVIS identification number on the check. Questions concerning the I-901 fee can be addressed by calling the I-901 customer service hotline at (212) 620-3418 (United States country code 011).

HEALTH INSURANCE
Prior to arriving in the United States, it is required that international students provide proof of U.S. health insurance which includes repatriation coverage. (Canadian students must purchase supplementary travel health insurance and submit a copy of Canadian Health card.)

International students are required to report to the SC4 International Programs Coordinator within 10 days of arrival to the United States. International students are required to complete pre-enrollment steps including orientation, academic assessments and academic advising before being allowed to register. Tuition for classes must be paid at the time of registration.

HOUSING
St. Clair County Community College does not provide housing for students. Students must make housing arrangements prior to arrival in Port Huron. Upon acceptance to SC4 and receipt of F-1 Visa, the International Programs Coordinator will provide resources to international students requiring assistance researching housing options.

CANADIAN RESIDENTS
All Canadian residents must apply for admission to the college by completing the International Student Application for Admission.

Lambton County residents are charged tuition at the same rate as Michigan (out-district) residents. However, St. Clair County Community College participates in a Tuition Reciprocity Agreement with Lambton College that allows Lambton County residents to be charged at in-district tuition rates. To qualify, students must enroll in a program at SC4 that is not offered, or is at capacity, at Lambton College. Students must receive approval from the Lambton College Registrar and submit the Tuition Reciprocity form to SC4’s Registrar’s Office, 123 Acheson
Technology Center, in order to be reassessed at in-district rates. Contact Enrollment Services at (810) 989-5500 or Lambton College at (519) 541-2403 for additional information.

**Note:** The Lambton County Tuition Reciprocity Agreement is subject to change without notice by action of the Board of Trustees.

All Canadian residents living outside Lambton County are charged foreign student tuition rates. Canadian students planning to commute must obtain a Form I-20 from the Enrollment Services office each semester. The Form I-20 is required to cross the U.S./Canada border. Because SC4 is located within 75 miles of the port of entry, Canadian commuter students are permitted to attend part-time.

**PERSONAL ENRICHMENT**

Students interested in enrolling in college credit classes at SC4 for the purpose of personal enrichment may do so without having to complete the admission requirements of first-time college students. Personal enrichment students are required to submit an SC4 Application for Admission. On the application, the student must designate the program “major” as PERPE - Personal Enrichment. The only remaining requirement is that the student must meet all course pre-requisites prior to registration, including assessment tests if required.

**Note:** Financial aid funding cannot be used toward the completion of courses taken for the purpose of personal enrichment.

**Note:** Once the Application for Admission has been processed by the Enrollment Services office, personal enrichment students may register online via www.sc4.edu/wave, in person in the Enrollment Services office or at one of the off-campus centers.
REGISTRATION INFORMATION
123 Acheson Technology Center (ATC)
(810) 989-5500, Fax: (810) 989-5541
enrollment@sc4.edu
Monday and Thursday 8 a.m. to 6 p.m.
Tuesday and Wednesday 8 a.m. to 4:30 p.m.
Friday 9:30 a.m. to 4:30 p.m.

SCHEDULE OF CLASSES
In an effort to provide students the best detail possible to plan their
class schedule in advance, SC4 offers the WAVE, an online class
schedule and registration system at www.sc4.edu/wave. The WAVE
provides students with updated class schedule information including
the number of openings available.

SC4 offers classes in a variety of formats including day, evening,
weekend, online, accelerated, short-term and other formats. Students
are encouraged to register early in order to take full advantage of these
opportunities.

REGISTRATION
There are two ways to register for classes:

Online: Students may register for classes online via the WAVE at
www.sc4.edu/wave.

Walk-in: Students may register in person at the Enrollment Services
office or at one of the off-campus centers.

Registration times vary. Refer to the registration calendar at
www.sc4.edu/registrationcalendar for specific registration dates/times.

It is the responsibility of the student to follow the established procedure
for adding, dropping or withdrawing from classes. It is the student’s
responsibility to confirm the accuracy of both registration and billing
information at the time of enrollment. Award amounts listed for students
receiving financial aid and/or scholarships are “pending” and may
be adjusted following registration. Students are responsible for
payment of tuition and fees not covered by financial aid and must
drop classes within the established refund period. In the event
that a student declines a financial aid award, or does not register
for the minimum number of required credit hours, the student
is responsible to drop the class(es) prior to the final drop/add
deadline date.
REGISTRATION RESTRICTIONS
SC4 students will not be allowed to register if they do not have a valid address on file with the college or if they owe outstanding balances to the college for tuition or fees. A registration restriction will be imposed for students that have been dropped for non-payment twice in the same semester.

CLASS AUDIT
If a student wishes to register for a course and receive no credit, the student must indicate “audit” either on the registration form or when registering online. “Audit” means that a student has registered, paid and is attending a college credit course, but will receive no credit or grade for the course. Students auditing a class are still required to meet all course prerequisites.

Students who choose to “audit” a class must designate this registration status at the time of registration or by the end of the drop/add period. Once a class has been registered as an “audit,” no adjustments may be made to change the course status to college credit after the drop/add period has ended. Conversely, once a class has been registered for college credit, a student may not change the status of the class to “audit” after the drop/add period has ended. Students failing to comply with this requirement will be held responsible for the resulting consequences. Ultimately, it is the student’s responsibility to verify the accuracy of the registration and billing statement at the time of registration.

OFF-CAMPUS CENTERS
Students planning to take courses at one of the SC4 off-campus centers may register online via www.sc4.edu/wave, in person in the Enrollment Services office, or at the off-campus center. Payment schedule compliance is required to maintain class registration.

RESIDENT AND NON-RESIDENT POLICY
(Determines tuition rate)
Residents of the St. Clair County Community College district pay taxes to support SC4 through a voter-approved millage rate. The current SC4 district is based upon local school districts and does not include persons living in St. Clair County who reside in Anchor Bay, Armada, Richmond or Croswell-Lexington school districts. Therefore, students who live within the SC4 district are charged less per contact hour than those who live outside the SC4 district.

SC4 students are responsible for maintaining an accurate address at the college for the purpose of billing tuition appropriately as well as mailing refunds or other pertinent information. Because residency
corresponds to a student's address and consequently determines tuition rates, a student wishing to be classified as an SC4 in-district resident must meet the following requirements:

1. Must have been a bona fide resident in the SC4 college district for at least 30 days prior to the start of the semester.
2. Must have been a bona fide resident of Michigan for at least six months prior to the start of the semester.

Note: International students cannot establish residency.

Residency of all students under 18 years of age follows that of their parents or legal guardians. Students who falsify their residency will be subject to payment of tuition at the correct residency rate. Charges in such cases will be retroactive.

Students who have moved from out-district to in-district must complete the following steps, prior to the start of classes, to be charged at the in-district rate:

1. Complete a Proof of Residency Form (available in the Enrollment Services office or online at www.sc4.edu/forms).
2. Provide a copy of a valid Michigan driver’s license or Michigan ID card showing the current in-district address dated a minimum of 30 calendar days prior to the start of classes.
3. Provide at least one additional proof showing the current in-district address dated a minimum of 30 days prior to the start of classes. The second proof may be:
   a. A rent receipt or letter from the landlord (must be notarized at least 30 days prior to start of classes)
   b. A lease agreement
   c. Utility bill(s) issued in the student’s name

Appeals may be made to the Registrar. The proof of residency outlined above must include the student’s name, current address and be dated a minimum of 30 calendar days prior to the start of semester.

Please note that all changes in residency status should be reported immediately to the Enrollment Services office, Room 123, Acheson Technology Center.

NAME AND ADDRESS CHANGES
Students are required to report name and address changes directly to the Enrollment Services office. As a matter of convenience, students may print the Name and Address Change form located on the SC4 website at www.sc4.edu/forms. Students may also submit address changes online via www.sc4.edu/wave. Students wishing to update
their name(s) must provide legal documentation (marriage license, court documentation, divorce papers, etc.) before name changes are processed. If the address is being changed from an out-district address to an in-district address, residency change procedures must be followed as outlined in the aforementioned section. Failure to submit the necessary forms pertaining to a given semester may result in the Enrollment Services office being unable to provide requested services. As a result, students will be held responsible for the consequences of such action.

COURSE CANCELLATIONS
SC4 makes every attempt to run all classes; however, it is unfortunate that some classes must be cancelled because of low enrollment. Students whose class(es) have been cancelled will be notified as soon as possible. Students are encouraged to enroll in other available classes or see an academic advisor for assistance in selecting other class options. If students choose not to enroll in another class, they will be refunded the tuition for the cancelled class. Students are cautioned to check with the Financial Aid office to see if financial aid funding is affected if the cancelled class is not replaced in a student's class schedule.

FACULTY ABSENCE TELEPHONE LINE
The college has established a telephone line, (810) 989-5770, that students can call to find out about class cancellations and faculty absences. The information on this line is updated throughout the day Monday through Friday and on Saturday by 7 a.m. SC4 will also use this line to inform students of college closings due to inclement weather.

DROPPING/ADDING AND LATE REGISTRATION
Students may adjust their schedule with 100% tuition refund by dropping/adding courses either online or in person during the established deadlines for each course, as listed below. Students are responsible to complete the appropriate drop/add procedure by the designated deadline dates. No refunds will be processed for drops processed after the established deadline.

<table>
<thead>
<tr>
<th>Course Length</th>

<td>5 calendar days from the start date of the class</td>
</tr>
<tr>
<td>1 day to 2 weeks</td>
<td>first day of class</td>
</tr>
</tbody>
</table>
CLASS WITHDRAWAL
(Period following Drop/Add and Late Registration)
Once the drop/add period (i.e., 100% refund) has expired, students may withdraw from classes by completing the appropriate process either online or in person. Students requesting withdrawal by the appropriate deadline will receive a final grade of “W.” The established deadline dates are listed below.

1. Fall/Winter semester (16-week classes):
   Students may withdraw through the 12th Saturday of the semester.
2. Spring/Summer sessions, short-term and weekend classes:
   Students may withdraw until one week prior to the final class meeting.

Students who withdraw from a class may no longer attend the class and no tuition refund will be processed. Failure to formally withdraw from a class(es) may result in a grade of “E.” Ill or injured students unable to withdraw online or in person should have a family member or friend initiate the process by contacting Enrollment Services.

All students requesting a complete withdrawal of classes prior to the 60% date of the semester are encouraged to visit the Financial Aid office to determine the impact that the Federal Return of Title IV Funds rule may have on their current and future financial aid.

CLASS ATTENDANCE
Class attendance policies are established by each individual instructor and are presented to each student on the course syllabus within the first week of classes. Punctuality and regular attendance are necessary if the student is to receive maximum benefit from courses enrolled. The responsibility for lecture and scheduled laboratory attendance rests solely with the student.

When work has been affected by unexcused absences or tardiness, penalties may be imposed at the discretion of the individual instructor. As a matter of courtesy, students should explain the reason for absence to their instructors. When possible, this should be done in advance.

If a student stops attending class and does not officially withdraw from the class, or does not make arrangements with the instructor for an “I” incomplete grade (restrictions apply), the instructor has no choice but to issue a final grade of “E” for the class. Students are cautioned to remember that failing grades may affect current and future financial aid.
TRANSCRIPT REQUESTS

Because academic information is protected under the Family Education Rights and Privacy Act (FERPA) of 1974, students must make all transcript requests either in writing or online via the WAVE, SC4’s secure online student information system. The Enrollment Services office processes requests to send official transcripts to other colleges/universities, places of employment, students’ home addresses, etc. The office also processes requests to send/distribute unofficial transcripts to students on an as-needed basis. There is no charge to process transcript requests at SC4.

Transcript requests may be submitted online via the WAVE or forms may be completed by students in the Enrollment Services office. In addition, forms may be printed from the SC4 website and faxed to (810) 989-5541. The transcript request form includes full name, birth date, social security number or student number, approximate dates of attendance, other last name(s) if different from the name that the student record may be filed under, number of official or unofficial copies to be sent, name and address of where the transcript(s) is to be sent and the student’s signature.

Note: Normally, transcripts sent to students directly are unofficial copies unless the student has specifically indicated in writing on the transcript request form that they wish to receive an official transcript.

Students who owe tuition dollars to SC4 or who have other obligations will be prevented from receiving transcripts (official/unofficial) and degrees/certificates until all financial issues are resolved with the SC4 Business Office.

STUDENT EMAIL ACCOUNTS

Students are assigned an SC4 email account within 24 hours of completing the registration process for college credit courses. Students are bound in their use of this email service by the Acceptable Use Policy found in the College Catalog. Appropriate uses of this service include communicating with:

- Faculty regarding coursework, as approved by the instructor.
- College staff regarding the enrollment process, financial account status or any other administrative process.
- Classmates regarding course and campus activities.

All students must activate their email accounts. Instructions are provided at www.sc4.edu/emailhelp. SC4 uses email to communicate with all students taking classes for credit, regarding important information about billing, classes, deadlines, events, refunds, financial aid and registration.
To use email, students may go to www.sc4.edu. Click on “Current Students” followed by the “SC4 email” button. Accounts will be inactivated after students have not enrolled in credit classes for a period of 24 months.

**STUDENT HELP DESK**
SC4’s Office of Information Technology provides a 24/7 help desk for students who need assistance with SC4’s email system and the WAVE online registration and information system. Assistance can be requested by calling (800) 630-8918 or (810) 989-5858.
TIME FRAME FOR DEGREES AND CERTIFICATES
SC4 continuously reviews all academic programs to ensure students receive up-to-date curriculum. Due to the ever-changing nature of the degree programs, SC4 monitors the time frame in which students complete their program. Students may follow the degree requirements included in the catalog year upon initial enrollment at SC4 or select any of the subsequent catalog years for which they are enrolled. Students will have a maximum of five years to complete the degree/certificate requirements listed in their selected catalog. For example, students entering SC4 in 2011 may graduate using the 2011 degree requirements until 2016. A student who has not enrolled for a period of five years or more must follow the catalog that is in effect the semester upon re-enrollment to the college.

MULTIPLE ASSOCIATE DEGREES
A second associate degree may be awarded to students who complete the specified degree/certificate requirements. In addition, the student must complete a minimum of 15 additional credits at SC4 for each additional degree/certificate awarded. For example, if the first associate degree is awarded with 62 credits, the second will require 77, the third 92, etc.

APPLICATION FOR GRADUATION
Students may apply for graduation via their WAVE student accounts, or by completing graduation applications available in the Enrollment Services office, Room 123, Acheson Technology Center. SC4 students may graduate at the conclusion of each semester. Applications must be submitted by the following deadlines:

<table>
<thead>
<tr>
<th>Graduation Semester</th>
<th>Application Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>May</td>
<td>Jan. 20</td>
</tr>
<tr>
<td>June</td>
<td>July 10</td>
</tr>
<tr>
<td>August</td>
<td>July 10</td>
</tr>
<tr>
<td>December</td>
<td>Sept. 10</td>
</tr>
</tbody>
</table>

Students must satisfy all degree/certificate requirements and have a minimum overall GPA of 2.0 to earn a degree/certificate. Students who do not meet the requirements for graduation may have their application reconsidered for one year.
COMMENCEMENT
All graduation candidates are invited to attend Commencement, hosted annually following the conclusion of the winter semester (May). Honors will be calculated from the end of the previous SC4 semester attended for Commencement purposes only. Actual honors will be calculated once the final semester grades are submitted. A bulletin with detailed Commencement information is published in March and mailed to all prospective graduates. Graduation candidates satisfying all requirements and financial obligations to the college will receive their degree/certificate in the mail by approximately:

<table>
<thead>
<tr>
<th>Graduation Semester</th>
<th>Approximate Mailing Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>May</td>
<td>Aug. 30</td>
</tr>
<tr>
<td>June</td>
<td>Nov. 30</td>
</tr>
<tr>
<td>August</td>
<td>Nov. 30</td>
</tr>
<tr>
<td>December</td>
<td>March 30</td>
</tr>
</tbody>
</table>

Replacement degrees and/or additional copies are available for a fee. Contact the Registrar for details.

FRESH START
It is the philosophy of St. Clair County Community College that students may need a “Fresh Start” at some point in their college career. The Fresh Start procedure allows students who were enrolled in one program and have now re-enrolled in a different program and successfully completed at least 12 credits the opportunity to have their cumulative grade point average reflect their present academic success in their current program. To be eligible for Fresh Start, students must have at least a two-year stop-out prior to program change. Interested students should contact the Student Success Center, Room 124, Acheson Technology Center, or call (810) 989-5520 for a complete outline of this procedure.

COURSE SUBSTITUTIONS/WAIVER
Students are expected to take the courses required by the program of study in which they are enrolled. If the circumstances necessitate a substitution, the student must obtain a Course Substitution Request form from the Department chair presiding over their academic program. The form must be completed by the student in consultation with the department chairperson, listing the required course to be substituted, and the rationale for such action. Both the department chairperson and the Registrar must approve all substitutions. Having a course waived will not reduce the total number of credits required for an associate degree/certificate, the requirements for completion of the General Education competencies, nor the course distribution requirements for the associate degree or certificate program.
REPEATED COURSES
A college credit course taken at SC4 for which a final grade has been recorded may be repeated a total of three times. The nursing retake policy is located in the Nursing Policy Handbook. Non-credit courses can be repeated indefinitely. A withdrawal ("W") from a class counts as an attempt and is included in the retake policy.

The best grade earned becomes the officially recorded grade. All attempts remain on the official transcript, including the semester, course number and grade earned, although only the best grade will be used to calculate the grade point average.

TRANSFER CREDIT TO SC4
Students wishing to transfer credit to St. Clair County Community College must have an official transcript sent from their previous college(s). Credits for courses taken elsewhere will be evaluated by the Registrar. Transfer credit is accepted with grades of “C” or better or an equivalent of 2.0 or higher based on a 4.0 scale from other colleges and universities which are approved by the American Council on Education and/or accredited by the Higher Learning Commission or its regional equivalent. Recognized regional associations of colleges and schools include Middle States, North Central, New England, Northwest, Southern and Western. Contact the Registrar at (810) 989-5550 for additional information on transferring credits to SC4.

TRANSFER CREDIT FROM SC4
Students wishing to transfer credits from SC4 to another college/university should work closely with their advisor to ensure the credits will transfer to the school of choice. As a general policy, colleges and universities will not accept courses for transfer with a grade less than “C.” Since colleges and universities vary as to the prescribed curriculum for the first two years, it is very important that an entering student choose a specific school(s) for transfer. In addition to using transfer equivalency guides and working with an SC4 advisor, students are strongly encouraged to contact the transfer institution to ensure the credits they are taking will transfer. Transfer information is also available through the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) website at www.macrao.org.

Transfer students should also be aware that some four-year colleges and universities consider “I” and “W” grades as less than satisfactory; therefore, it is important to check the transfer policy of the receiving institution.
NOTIFICATION TO STUDENTS OF RIGHTS UNDER FERPA

It is the policy of St. Clair County Community College to comply with the Family Education Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records.

Definitions

A student is an individual for whom the college maintains education records and who is or has been enrolled in and attended credit bearing courses at the college.

Education records include those records which contain information directly related to a student and which are maintained by the college or by a person acting for the college. The following are not education records: records kept in sole possession of the maker, law enforcement records, records relating to individuals employed by the college, records related to treatment provided by a health professional, records that contain information about an individual after that person is no longer a student, i.e., alumni records.

Directory information may appear in public documents and may otherwise be released to individuals outside the college with the student’s specific consent. St. Clair County Community College has designated the following items as directory information:

- Name, address, telephone listing, email address
- Student status; part-time/full-time; freshman/sophomore
- Major field of study
- Weight and height of athletes
- Most recent previous school attended
- Date and place of birth
- Participation in officially recognized activities and sports
- Dates of attendance, degrees, date of graduation and awards

Non-disclosure of directory information may be requested by currently enrolled students. Non-disclosure means the college may not release any directory information about the student, except as permitted under the provisions of FERPA. The college may not even acknowledge to third parties that the person is a student.

Legitimate educational interest is the need to review an education record in order for a college official to carry out his or her responsibilities in regard to performing an administrative task outlined in the official’s duties, or performing a supervisory or instructional task directly related to the student’s education.
A college official is any person employed by the college in an administrative, supervisory, academic, research or support position; a person elected to the Board of Trustees; a student or college graduate serving on an official college committee or assisting another college official in performing his or her tasks; a person employed by or under contract to, or serving as the agent of, the college to perform a specific task.

Authorized disclosures without the student’s prior written consent include but are not limited to information necessary to the health and safety of the student or other individuals if the college determines that there is an articulable and significant threat to the health or safety of a student or other individuals, internal disclosures for legitimate educational reason, information returned to the author/sender of the information, information forwarded to schools where the student plans to enroll or transfer, notice to parents about drug and alcohol violations.

Student Rights
Beginning the first day of class, you have the following rights concerning your student records:

- The right to inspect and review all material in your file(s) except:

  - Professional mental health treatment records to the extent necessary, in the judgment of the attending physician or professional counselor, to avoid detrimental effects to the mental health of the student or of others. These records may, however, be reviewed by a physician or other appropriate professional of your choice.
  - Financial information furnished by your parents in support of an application for financial aid.
  - Confidential letters of recommendation that were placed in your file prior to January 1, 1975.
  - Confidential letters of recommendation concerning admission, employment or honorary recognition, for which you have waived access. (The college may not require you to sign a waiver in order to obtain services, but a person writing a recommendation may insist on a waiver as a condition for his or her writing it.)
  - Personal notes made by a faculty member or counselor that are accessible only to that person and are not shared with others.
  - Materials in any admissions files, until you have been admitted to, and have attended the college.
  - All other records which are excluded from the FERPA definition of education records.
Education records are maintained in a number of college offices. Requests to review records must be made in writing to the responsible official of each office that maintains the records. The responsible office will comply with the request within 45 days of receipt.

- The right to request an amendment of your education records if you believe it is inaccurate or misleading. If you believe there is an error in your record, you should submit a statement to the college official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of the decision and advise you regarding appropriate steps if you do not agree with the decision.

- The right in most instances to control access to information in your records by persons or agencies outside the college. With respect to college officials, information from your records will be made available only if the college official can demonstrate a legitimate educational interest consistent with their official functions for the college and consistent with normal professional and legal practices. Except for directory information, however, persons outside the college – including your parents and/or spouse – will be given information from your records only (1) when you authorize it in writing, or (2) in connection with your application for or receipt of financial aid, or (3) in connection with studies conducted for the purpose of accreditation, development and validation of predictive tests, administration of student aid programs, or improvement of instruction, or (4) when disclosure is required in a health or safety emergency or by federal or state law or by subpoena. If information from your record is subpoenaed, a reasonable attempt to notify you will be made as quickly as possible. In addition, the results of a disciplinary hearing conducted by the institution against the alleged perpetrator of a crime of violence will be made available to the alleged victim of that crime.

- The right to limit disclosure of your directory information. If you do not want the college to release those items designated as directory information, you must file a written request to that effect with the Registrar. However, you should carefully consider the consequences of that action before making the decision to do so. Information is not withheld selectively. If you choose to have directory information withheld, all items designated as directory information will be withheld from everyone who inquires. If you have requested non-disclosure of directory information and wish to repeal that request, you must file a written request to that effect with the Registrar.
• The right to a hearing if you believe that you have been improperly denied access to your records, your records contain information that is inaccurate or misleading, or information from your records has been improperly released to third parties. If you believe that one or more of these situations has occurred, contact the head of the office responsible for the record or send an email to the Registrar at cbeanss@sc4.edu detailing the specifics of the situation including the office(s) and records involved. If the head of the office does not agree with your contention, you may request a hearing by a hearing panel or hearing officer designated by the Registrar’s procedures. If the decision of the hearing panel or hearing officer agrees with you, the necessary corrective action will be taken. If the decision of the hearing panel or hearing officer disagrees with you, you have the right to submit an explanatory statement, which must be included as a permanent part of your record.

• The right to file a complaint to federal officials if you believe that there has been a violation of the rights afforded you under the Family Educational Rights and Privacy Act of 1974. The complaint must be submitted in writing within 180 days of the alleged violation to:

U.S. Department of Education
The Family Policy Compliance Office
400 Maryland Avenue SW Washington, D.C. 20202-5920
Phone: (800) USA-LEARN (800-872-5327)

Questions about the policies and procedures of any unit should be directed to the head of that unit. Questions about the college’s “Policies on Student Rights and Student Records” or about the Family Educational Rights and Privacy Act of 1974 should be directed to:

Carrie Bearss
Registrar
St. Clair County Community College
323 Erie St. P.O. Box 5015
Port Huron, MI 48061-5015
Phone: (810) 989-5501

STUDENT RIGHT TO KNOW
In compliance with the Higher Education Act of 1965, SC4 provides information regarding the college’s graduation/completion and transfer-out rates. Questions related to this information should be directed to the Registrar, Room 123, Acheson Technology Center.
As a part of the college’s instructional program improvement efforts, and to meet the requirements of the Carl D. Perkins Vocational and Technical Education Act, Section 113 and the Workforce Investment Act of 1998, Section 122, the college uses student Social Security Numbers to compile certain data for the purpose of instructional program improvement and Perkins and WIA reporting. This is in compliance with FERPA. See www.sc4.edu/righttoknow for more information.

SOLOMON AMENDMENT DIRECTORY INFORMATION
Effective March 29, 1997, schools are required to provide the Department of Defense, upon request, access to directory information. Directory information is defined as:

- The student's name, address, and telephone number
- The student's date and place of birth
- The student's level of education, academic major and any degrees received
- The educational institution in which the student was most recently enrolled

Students may request in writing to withhold the release of any or all information to the Department of Defense. Requests should be made to the Registrar.

ADVANCED STANDING CREDIT
SC4 provides students with a variety of alternative ways to earn college credit. Awarded credits will be placed on the transcript as “Credit By Exam/Work Experience” and may or may not transfer to other institutions. The following outlines the many options available.

Credit-By-Exam – Students pay a fee to complete an exam and may earn college credit based upon the results. The following are samples of Credit-By-Exam options.

Advanced Placement (AP) – High school students taking AP courses may pay to take an exam sponsored by the College Entrance Examination Board (CEEB). SC4 grants credit for scores of 3 or above. Students must request that an official copy of their scores be sent directly to the Registrar from The College Board (www.collegeboard.com) or (212) 713-8000.

College Level Examination Program (CLEP) – National standardized tests in selected academic areas. SC4 grants credit for scores of 50 or above, with the exception of ENG 101, which also requires an essay component. Contact the Achievement Center, Room B100, College Center, for details.
Departmental Exams – Course specific exams developed by SC4 faculty that give students the opportunity to earn credit for a specific course. Contact the Achievement Center, Room B100, College Center, for details.

Experiential Credit – Students who can demonstrate they have gained the knowledge contained in a particular course(s) may receive a maximum of 12 credit hours of “Experiential Credit.” Credits are only applicable to a specific Applied Arts and Science (AAS) degree program. Students must pay a fee and enroll in the appropriate AAS program for the credits to be applied. For complete details, contact the Registrar, Room 123, Acheson Technology Center.

Military Credit – SC4 may award credit(s) based upon military training. Credits must be directly applicable to the program of study and the student must submit an official military transcript to the Registrar. No fee is required.

Articulation Agreements – SC4 has established articulation agreements with numerous high schools, vocational/technical centers, trade academies, etc. which enable students to receive specific credit(s) within their program of study at SC4. No fee is required but students must complete the articulation application and submit it with the required documentation to the Academic Services office in Room 215, Main Building.

STANDARDS OF ACADEMIC SUCCESS
SC4 monitors the academic progress of all students on an annual basis. A student must make satisfactory progress towards completion of a degree or certificate in order to continue enrollment at the college. The Standards of Academic Success for SC4 students are:

1. Students who have attempted 12 or more credit hours at SC4 with a cumulative GPA of 2.0 or above will be considered “Satisfactory.”
2. Students who have attempted 12 or more credit hours at SC4 with a cumulative GPA of below 2.0 will be considered “Unsatisfactory.”

Students identified as “unsatisfactory” will be subject to probation and/or dismissal from the college. Details of the complete procedure are available by contacting the Registrar, Room 123, Acheson Technology Center.
GRADING SYSTEM
Following final examinations, grade reports are available to students online via the WAVE, except to those who owe tuition to the college. Grades are recorded as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Grade Points</th>
<th>Letter Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0 points</td>
<td>D</td>
<td>1.0 points</td>
</tr>
<tr>
<td>A−</td>
<td>3.7 points</td>
<td>D−</td>
<td>0.7 points</td>
</tr>
<tr>
<td>B+</td>
<td>3.3 points</td>
<td>E</td>
<td>0 points</td>
</tr>
<tr>
<td>B</td>
<td>3.0 points</td>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>B−</td>
<td>2.7 points</td>
<td>W</td>
<td>Withdraw</td>
</tr>
<tr>
<td>C+</td>
<td>2.3 points</td>
<td>X</td>
<td>Audit</td>
</tr>
<tr>
<td>C</td>
<td>2.0 points</td>
<td>S</td>
<td>Satisfactory</td>
</tr>
<tr>
<td>C−</td>
<td>1.7 points</td>
<td>U</td>
<td>Unsatisfactory</td>
</tr>
<tr>
<td>D+</td>
<td>1.3 points</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The grade point average (GPA) is computed for each semester as well as for the total credit hours attempted at SC4. In accordance with the grading system scale, students earn grade points for each credit completed at SC4. The GPA is calculated as follows:

\[
\text{Total grade points earned ÷ Number of credit hours attempted} = \text{GPA.}
\]

INCOMPLETE GRADES
The “I” incomplete grade is used by instructors to note that the student, for good reason, has not completed the course requirements by the time final grades were recorded. To qualify, the student: (1) should have completed at least 80% of the work (excluding the final exam), (2) must have been in good attendance, and (3) can be reasonably believed to complete the course independently with a passing grade. If agreed to by both faculty member and student, an agreement delineating exactly what is required, how it is graded, and when it is to be completed must be signed by both parties and placed on file in the Enrollment Services office.

Unless otherwise agreed to in the contract, work must be completed by the end of the next regular semester. In extenuating circumstances, an extension beyond the normal period may be obtained by the presentation of a petition by the student, and endorsed by the instructor. Incomplete grades are not counted in the cumulative average until the grade is completed. If a grade of “Incomplete” is not removed within the specified time, the grade of “I” will be changed to the grade specified by the instructor on the incomplete grade form.

GRADE CHANGE TIMEFRAME
All grade change requests must be initiated within one year following the end of the course(s) for which the grade was officially recorded. No
grade change requests will be accepted following the expiration of that period of time.

**HONORS**
Academic Honors will be awarded to students who have earned a minimum of 62 credits for an associate degree and 30 credits for a certificate, based upon the following scale:

- Summa Cum Laude = Overall GPA of 4.0
- Magna Cum Laude = Overall GPA of 3.5 – 3.99
- Cum Laude = Overall GPA of 3.0 – 3.49

**STUDENT CLASS LEVEL**
Freshman = 1 – 26 credit hours completed
Sophomore = 27 or more credit hours completed

**PRESIDENT’S HONOR LIST**
Students enrolled in a minimum of 6 credit hours with an SC4 semester GPA of 3.00 or above will be placed on the President’s Honor List.
TUITION AND FEES INFORMATION

BUSINESS OFFICE
220 Main Building (MB)
(810) 989-5513, Fax: (810) 989-5514
Monday through Friday 8 a.m. to 4:30 p.m.

Students attending SC4 are responsible for payment of tuition and fees to the college, as well as other costs of attendance including, but not limited to, books, supplies, transportation and other personal expenses.

TUITION
SC4 receives financial support from the taxpayers of the SC4 District through a voter approved millage and the taxpayers of the state of Michigan through state appropriations. Recognizing this support in addition to student tuition and fees, SC4 has established the following tuition structure based on legal residency:

- **In District** – Legal residents of the SC4 District. Does not include St. Clair County residents of the Anchor Bay, Armada, Croswell-Lexington or Richmond school districts.
- **Out of District** – Legal residents of the State of Michigan living outside the SC4 District.
- **Out of State** – U.S. citizen outside the State of Michigan.
- **Foreign** – International students enrolled through visas.

Please refer to the Resident and Non-Resident Policy in this catalog for residency information.

Credit hours are the number of credits the student earns toward graduation. Contact hours are the number of hours the student is in class with the instructor. Additional class time is required for some courses, usually those requiring lab sessions. All students are billed for tuition based on the number of registered contact hours.

FEES

- **Student fee** – A non-refundable fee assessed at time of registration once per semester
- **Technology fee** – Charged per contact hour
- **Laboratory fee** – Applies to certain classes only
- **Facility fee** – Applies to classes taught at off-campus centers outside St. Clair County
- **Online fee** – Charged per online course
- **Program fee** – Applies to certain programs of study only
- **Other fees may apply**
PAYMENT DUE DATES
Payment due dates for tuition and fees vary according to the date of registration. For tuition and fee payment requirements, refer to the current semester schedule. Payment methods accepted are cash, checks, Visa, MasterCard and Discover. A payment plan is available for fall, winter and spring semesters. For information regarding the payment plan, contact the Business Office, Room 220, Main Building.

Residents of the college district age 60 and older may qualify for a tuition reduction on most credit courses. This reduction does not apply to any course fees.

Students auditing a class pay the same tuition and fees as students taking classes for credit.

A registration restriction will be imposed for students who have been dropped for non-payment twice in the same semester.

Current tuition and fee rates can be found on the SC4 website at www.sc4.edu/tuition. The tuition and fee schedule is subject to change without notice by action of the Board of Trustees.

REFUND POLICY
Tuition and refundable fees for 16-week courses dropped through the first nine calendar days for the fall and winter semesters, and the first five calendar days for the spring and summer sessions offered throughout the academic year will be refunded in full. Tuition and refundable fees for short-term classes offered throughout the academic year will be refunded as follows:

<table>
<thead>
<tr>
<th>Course Length</th>
<th>Drop with a Refund</th>
</tr>
</thead>
<tbody>
<tr>
<td>3 to 15 weeks</td>
<td>5 calendar days from the start date of class</td>
</tr>
<tr>
<td>1 day to 2 weeks</td>
<td>first day of class</td>
</tr>
</tbody>
</table>

The student fee is non-refundable.

Refunds for less than $5 will be processed upon request. No refund will be made for courses dropped after the aforementioned dates, unless said course(s) are dropped as a result of illness, injury or military service. The student will be required to provide a physician’s (or equivalent) verification of illness or injury or proof of being called up for military service. (The student must already be in the service to qualify.) Refunds granted due to illness, injury or military service will be pro-rated on the number of weeks which remain in the semester and
will be effective as of the date of course drop/withdrawal. Ill, injured or military students unable to drop in person should have a family member or friend contact the Enrollment Services office to initiate the process.

Students who receive Title IV Federal Aid and withdraw completely during the first 60% of the semester must have the amount of financial aid they are entitled to recalculated. The student/school may be required to return a portion of the federal funds awarded to the student back to the Federal Government. Further information may be obtained in the Financial Aid office.

Students disputing any balance due on tuition/fees must do so within 90 days of the end of the semester in which the dispute has occurred.

**St. Clair County Community College/Lambton College Twinning Agreement**

In the true spirit of international cooperation, St. Clair County Community College and Lambton College in Sarnia, Ontario, have signed a Twinning Agreement which allows residents of St. Clair County and Lambton County to access opportunities for education not readily available in their own county. St. Clair County residents can complete programs not offered at St. Clair County Community College and offered at Lambton College at the Ontario resident fee. For further information, contact the Enrollment Services office, Room 123, Acheson Technology Center, (810) 989-5500.
FINANCIAL AID
123 Acheson Technology Center (ATC)
(810) 989-5530, Fax: (810) 989-5774
financialaid@sc4.edu
Monday and Thursday 8 a.m. to 6 p.m.
Tuesday and Wednesday 8 a.m. to 4:30 p.m.
Friday 9:30 a.m. to 4:30 p.m.

A college education is one of the most important investments you can make. SC4 believes that anyone who desires a college education and is capable of doing college work should have the opportunity to attend. The college understands that students often need help to finance their education. Through a combination of federal, state and private community funding sources, SC4 will work to help eligible students meet college expenses. Many programs base their awards on financial need, but some programs have other requirements such as academic achievement.

Students with questions concerning the financial aid process are encouraged to either call (810) 989-5530 or stop by the Financial Aid office. Staff members are available to meet with students to discuss financial aid options and provide assistance with completing the process. For additional information on financial aid, consult The Student Guide, published by the U.S. Department of Education, and The 5 Ws of Financial Aid, published by the Michigan Department of Treasury. Reliable Internet sources for financial aid information are The Financial Aid Page at www.finaid.org, U.S. Department of Education at www.studentaid.ed.gov, or Michigan Student Financial Aid at www.michigan.gov/studentaid. All programs, criteria and funding are subject to change without notice.

FINANCIAL AID APPLICATION PROCESS
All students seeking financial aid at SC4 must first complete an Application for Admission to the college. To be considered for financial aid, the Free Application for Federal Student Aid (FAFSA) must be completed each academic year. Students are encouraged to complete the application online at www.fafsa.ed.gov. Students MUST include SC4’s Title IV code, 002310, on their FAFSA to ensure the college receives their financial aid application.

The application process takes approximately four weeks to complete; therefore, students are encouraged to apply for financial aid as early as possible. Although Federal Pell Grants and student loans are awarded on a continual basis throughout the year, other state and federal grants, as well as student employment (work-study), are awarded on a first-come, first-served basis. Limited funds exist in some programs, and they may be depleted early.
An additional SC4 Financial Aid Request form is required for the spring and summer sessions. The application is available in the Financial Aid office in mid-February of each year.

**DETERMINATION OF ELIGIBILITY**
Most awards are made to students who have demonstrated financial need. The Federal Methodology Formula measures a family’s ability to pay college expenses by assessing its financial strength. Family/student income and assets, family size, retirement needs of parents and number of children in college are just some of the factors considered with the federal formula. As a result of the FAFSA application (which supplies the data used in the Federal Methodology formula), each student will receive an Expected Family Contribution (EFC). The EFC is the amount calculated that the student/family could reasonably contribute toward educational expenses and is used in determining financial need.

**COST OF ATTENDANCE**
A student demonstrates need when the Cost of Attendance MINUS the Expected Family Contribution (EFC) is greater than zero. The Cost of Attendance is an average of what it will cost to attend a particular institution for an academic year. It includes tuition and fees, books and supplies, room and board, travel costs and miscellaneous personal expenses. These costs are used only to calculate financial aid eligibility. Actual costs will vary from student to student. The Cost of Attendance for the average in-district, full-time student at SC4 is approximately $11,321 for the current academic year. For detailed information on Cost of Attendance at SC4, contact the Financial Aid office.

**AWARDING PROCESS**
Students are selected to receive financial aid based on program eligibility requirements, deadlines and maintaining satisfactory academic progress. Funds are limited in some programs and awarded to early applicants who meet all requirements. Award amounts are based on demonstrated financial need, cost of attendance, enrollment status, program limitations and the availability of funds. SC4 awards financial aid in the following order: grants and scholarships, work-study programs and loan programs. The type of financial aid offered depends on the amount of need, program regulations, other funding sources, dependency status and availability of funds.
Awards may be adjusted based upon the enrollment status of the student according to the following:

- Full-time = 12 or more credit hours
- Three-quarter-time = 9 – 11 credit hours
- Half-time = 6 – 8 credit hours
- Less than half-time = less than 6 credit hours

RETURNING SC4 FINANCIAL AID STUDENTS
Students must reapply for financial aid each academic year. Program criteria, funding and maintaining satisfactory academic progress is used in determining eligibility for aid. In addition, students cannot owe an over-payment on any federal grant program, be in default on any student loan or have borrowed in excess of the student loan limits at any institution.

ATTENDANCE AT MULTIPLE INSTITUTIONS
Students cannot receive financial aid at another institution and SC4 concurrently. Students will be responsible for any over-awards and will not be eligible for further aid until the funds are recovered.

STUDY ABROAD
Students may be eligible for federal assistance while attending a study abroad program that is approved for credit by SC4.

DISBURSEMENT OF FINANCIAL AID
Students who have been awarded grants, scholarships or loans will have their accounts credited toward the cost of tuition and fees. Remaining funds will be transferred to the bookstore one week prior to the beginning of each semester and will remain on the bookstore account through the last day to add and/or drop with a refund.

Any remaining funds after tuition, fees and bookstore charges will be disbursed to the student after the conclusion of the institutional refund period. Credit balances from grant and/or loan awards will be refunded to the student as soon as possible, but no later than 14 days from the date the credit balance occurs on the student account.

Students are responsible for payment of any remaining balance after all financial aid has been applied.

FINANCIAL AID PROGRAMS
The following section provides a brief description of the financial aid programs available at SC4. Enrollment requirements vary by program and can range from less than half-time to full-time enrollment each semester. Awards are based on meeting eligibility criteria, satisfactory academic progress and the availability of funding. Generally, grants
and scholarships are tax free if they are used for qualifying tuition and course-related expenses. Questions regarding tax issues should be directed to the IRS or your tax preparer.

**GRANT PROGRAMS**

**Federal Pell Grant**
This is a federal grant program for students without a bachelor’s degree enrolled in an undergraduate program who demonstrate exceptional financial need. The award range is set by the federal government each academic year and currently ranges from $400 to $5,550. Enrollment requirements range from less than half-time to full-time depending on individual eligibility.

**Federal Supplemental Educational Opportunity Grant (FSEOG)**
This is a federal grant program for students without a bachelor’s degree enrolled in an undergraduate program who demonstrate exceptional financial need. The award is determined by the college and is based on funds available each year. Enrollment requirements range from less than half-time to full-time depending on individual eligibility.

**Tuition Incentive Program (TIP)**
This is a high school completion program that offers to pay for the first two years of college and beyond for identified students who graduate from high school or complete their GED before age 20. Contact the Office of Scholarship and Grants at (888) 447-2687 for an application.

**SCHOLARSHIPS**

Students are encouraged to pick up a copy of the Scholarship Book available in the Financial Aid office between February 1 and mid-March. The Scholarship Book contains current scholarship offerings, criteria and deadline dates. The Financial Aid office also announces student scholarships as they become available through the Student Connection, a weekly newsletter emailed to students, as well as online at www.sc4.edu/scholarships. The following is a list of scholarships that have been made available to students attending SC4:

- Howard A. Acheson Memorial Scholarship
- Helen Alexander Scholarship
- K. Altherr Memorial Endowment
- American Legion Post 449 Scholarship
- Vera Andrus Scholarship
- Robert Ange Scholarship
- Beacon Home Care Scholarship for Excellence in Nursing
- Theodora Beard Memorial Scholarship
- Norman D. Beauchamp Scholarship – SC4 Foundation
- Wilford Beauvais Memorial Scholarship
- Irvin and Agnes Bedford Scholarship
• Donald Bezenah Memorial Scholarship
• Guido and Elizabeth Binda Scholarship
• Del James Blessinger Scholarship
• Blessinger Grant in Aid
• Blue Water Chapter of Michigan Association of Retired School Personnel
• Blue Water Garden Club Scholarship
• Blue Water Shipmasters
• Blue Water Sportfishing Scholarship
• Blue Water Women Lawyers
• Clara E. and Joseph M. Bourke Memorial Scholarship
• Emerson and Lucilda Brown Scholarship
• Edward Bush Memorial Scholarship
• Mayme Bush/Inez Innes Memorial Scholarship
• Joseph Calmi Scholarship Fund
• Jack S. Campbell Memorial Scholarship
• Cardiology Associates of Port Huron Scholarship
• Frank V. and Bula A. Carney Memorial Scholarship
• Clay Township Good Fellows Scholarship
• Darin Conrad Memorial Fund
• Howard D. and Annabelle Crull Scholarship
• Delta Kappa Gamma Scholarship
• Disabled American Veterans – Chapter 12 of St. Clair County Scholarship
• E &A Credit Union Scholarship
• Jerry Ebner Memorial Scholarship – SC4 Foundation
• Erie Square Gazette Scholarship
• Virginia Fadel Memorial/Grace Goodwin Scholarship
• Foreign Language Scholarship
• Fort Gratiot Lions Club Scholarship
• Fort Gratiot Rotary Scholarship
• Vera Fuller-Hansen Educational Trust Fund
• Catherine C. Gellein Scholarship Fund
• Theron and Eleanor Godbold Endowment
• Charles Myron Gossman Scholarship
• Pauline Groff Music Scholarship
• Christian B. and Agnes A. Haas Memorial Scholarship
• James H. Halamka Memorial Scholarship
• Donna Jean Hale Memorial Scholarship
• Raymond and Mary Haley Memorial Scholarship
• Thomas A. Hamilton Scholarship
• Jeff Harrington Memorial Scholarship
• Lillian Hill Memorial Scholarship
• Hispanic Council of St. Clair County Scholarship
• Paul Jackson Memorial Scholarship
• Kahmann Memorial Scholarship
• Hon. Edward T. Kane Memorial Scholarship – SC4 Foundation
• Ellen Kean Scholarship − SC4 Foundation
• Janet Kelly Memorial/Social Science Department Endowment
• Barbara Ann Kessler Saph Memorial Scholarship
• Charles A. Koppel Scholarship
• Robert and Marilyn Kovach Scholarship
• James T. Kreger Memorial Scholarship
• League of Catholic Women Scholarship
• Hazel and Harold Lewis Memorial Scholarship
• Little Brothers/Little Sisters of St. Clair County Scholarship
• Mari-Lu Rea McDannel Scholarship – SC4 Foundation
• Alfred Maxwell Memorial Scholarship
• May-O’Brien, VFW Post 8465 Scholarship
• Marian Pollock Moore Scholarship
• Marilyn K. Moore Scholarship
• Bessie I. Mueller Endowment
• E. B. Mueller Endowment
• Mueller Brass Scholarship
• Nebraska Book Company Tuition Scholarship
• Dr. Carol Nowakowski Scholarship – SC4 Foundation
• Nursing Program Scholarship
• Lillian M. Perry Scholarship Fund
• Police Officer’s and Fire Fighter’s Survivor Scholarship
• Port Huron Garden Club Scholarship
• Port Huron Hospital Auxiliary Scholarship
• Port Huron Lion’s Club Scholarship
• Port Huron Museum/Blue Water Indian Fund
• Port Huron Police Association Scholarship
• Port Huron Rotary Club Scholarship
• Port Huron Sports Hall of Fame Scholarship
• Port Huron VFW Post 796 Scholarship
• Prestolite Endowment
• Prichard Scholarship
• Prichard Nursing Scholarship
• Gordon and Marlene Rady Scholarship
• Mary Regling Memorial Endowment
• River District Hospital Auxiliary – McFern-Smelzer Scholarship
• St. Clair County AFL-CIO Scholarship
• SC4 Alumni Association Scholarship
• SC4 Board of Trustees Grant
• SC4 Board of Trustees Honors Scholarship
• SC4 Board of Trustees Scholarship
• St. Clair County Community College Retirees Scholarship
• SC4 Student Scholarship
• F. William and Patricia Schwarz Fund
• Carl Schwedler Memorial Endowment
• Clarence Scott Memorial Scholarship
• Evelyn Sharrow Memorial Scholarship Fund – SC4 Foundation
• Cyril Smith Memorial Scholarship Fund
• Sydney Spofford Scholarship
• Carl Steinborn Memorial Endowment
• Student Government Scholarship
• Student Services Grant
• Randy Sugars Memorial Scholarship
• Beverly L. Tansky Memorial Scholarship
• Thomas A. Treleaven Communication Scholarship – SC4 Foundation
• Trumble Memorial Scholarship Fund
• Watson Brothers Centennial Scholarship
• WGRT Broadcasting Scholarship
• James T. Wilhelm Memorial Scholarship Fund
• Vivian Williams Minority Scholarship
• John F. and Rose Marie Wismer Community Foundation Scholarship
• Bert D. and Rose E. Wright Memorial Scholarship Fund

For further information regarding scholarships, contact the Financial Aid office, Room 123, Acheson Technology Center. Students are also encouraged to seek additional scholarship information from high school counseling offices; fraternal, civic, state and national organizations; and employers who issue information through their own publications.

Michigan Competitive Scholarship Program
This state scholarship program provides up to $1,300 per academic year to students who achieve required scores on the ACT exam, who demonstrate financial need, are citizens or permanent residents and have been continuous residents of Michigan for 12 months. The state of Michigan determines the award.

STUDENT EMPLOYMENT
Federal Work Study (FWS)
This work study program provides funds for part-time employment on campus as well as at some off-campus locations. Employment normally is limited to 20 hours a week for students who enroll for a minimum of six credit hours a semester, maintain satisfactory academic progress and demonstrate financial need. Students eligible for work-study employment should contact Employment Services (Room 120, Acheson Technology Center or by calling (810) 989-5515) for assistance in locating positions.

College Payroll Student
The college employs a limited number of students with specialized skills who are not eligible for the Federal Work Study program. Contact the Financial Aid office for more information.
ADDITIONAL RESOURCES

Tax Credits
The 1997 Taxpayer Relief Act created two tax credit programs for college students. The Internal Revenue Service provides the requirements for the Hope Tax Credit and Lifetime Learning Credit programs. Questions regarding tax issues should be directed to the IRS or your tax preparer. Visit www.IRS.gov for additional information.

Michigan Indian Tuition Waiver
Native North Americans who are members of a U.S. federally recognized tribe certified by the state of Michigan and who are legal residents of Michigan may be eligible for a tuition waiver. Call (517) 241-7748 for additional information.

STUDENT LOAN PROGRAMS

Federal Loan Programs
To qualify for a loan, a student must complete the FAFSA as well as a loan request form available in the Financial Aid office or online at www.sc4.edu/financialaid. All students must participate in entrance and exit counseling as a condition of loan acceptance. Money from federal loans are disbursed in several payments. The amount of a loan is determined by the student's financial need, the student's enrollment status, other aid received and program limits. The school determines eligibility for a Federal Direct/Federal Direct PLUS Loan. If reasons are documented and explained to students in writing, financial aid administrators may decline to certify an otherwise eligible loan application. In addition, a loan may be certified for an amount less than that for which the student would otherwise be eligible. Interest rates, repayment terms and borrowing limits vary with each loan program.

Federal Direct Loan Program
This low-interest loan program is available to students who attend college at least half-time. To receive a Subsidized Direct Loan, the student must demonstrate financial need. This loan is exempt from interest accrual until six months after the student ceases attending on at least a half-time basis. The Unsubsidized Direct Loan has the same terms as a Subsidized Direct Loan, except borrowers are responsible for interest that accrues while they are in school, and the loan is not based on need. The fixed interest rate for subsidized loans is 3.4% for the 2011-12 academic year. The unsubsidized interest rate is fixed at 6.8%.

Federal PLUS Loans
Federal PLUS Loans are for parents who want to borrow money to help pay for their dependent children's educations. The interest rate is fixed at 7.9%. Parents who have no adverse credit history are eligible
for PLUS Loans. Students are required to complete the FAFSA before Plus Loan eligibility can be determined.

Private Donor Loans
The following are loan funds that have been established to assist eligible students attending SC4. For complete details and application materials, contact the Financial Aid office.

- Jeff Jones and Stephen Endean Memorial
- Mary Koerber Memorial Loan
- Phelps Loan
- Donald Shephard Memorial Loan
- Joseph and Elizabeth Stowe Loan
- Townley Medical Education Loan

All of the Private Donor Loans are interest free. Students are still responsible for the repayment of the loan.

WITHDRAWALS, REFUNDS AND RETURN OF TITLE IV FUNDS
The SC4 refund policy is printed in the Tuition and Fee Information section of this catalog. There are additional implications to consider before dropping classes or completely withdrawing from all courses during a semester in which a student receives financial aid. One implication is the effect that withdrawals can have regarding the student maintaining satisfactory academic progress. The complete policy is printed in the section below. Another issue is the Return of Title IV Funds Policy. Title IV programs include Federal Direct Loans, Federal PLUS Loans, Federal Pell Grants and Federal Supplemental Educational Opportunity Grants. Return of Title IV Funds is the process of calculating the student’s earned and unearned portion of Title IV aid when a student completely withdraws from classes before 60 percent of the semester has passed. For example, if a student completes only 30% of the semester before completely withdrawing, the student has earned only 30% of the aid package awarded to them. If the student received more aid than earned, the college and/or the student may then be required to return some of the funds awarded. Owing money to a federal program may prevent the student from receiving further financial aid. You will be responsible for repaying any unearned aid that you were not entitled to receive. Further information regarding the Return of Title IV Funds Policy is available in the Financial Aid office.

SATISFACTORY ACADEMIC PROGRESS POLICY FOR FINANCIAL AID RECIPIENTS
All financial aid recipients are required to meet satisfactory academic progress guidelines established by SC4, pursuant to Federal regulations. This policy applies to all students receiving assistance.
from any financial aid program administered by the college. Federal regulations require that the policy include reviewing enrollment periods in which the student did not receive aid, as well as the semesters where aid was received. This policy is separate from the college’s general probation policy and is monitored each semester the student receives aid.

To receive financial aid, the student must maintain satisfactory academic progress toward a degree or certificate. The following guidelines describe the requirements necessary to maintain financial aid eligibility at SC4:

1. **Eligibility Requirements – Each semester a student must:**
   a. Along with transfer credits, have successfully completed at least 67% of all of the credit hours attempted or be a first-time student at SC4, and
   b. Maintain a cumulative SC4 grade point average of at least 2.00, and
   c. Along with transfer credits, not have attempted (whether or not earned) more than 93 credit hours or 150% of the student’s official SC4 academic program requirements. This is true whether or not financial aid was received or the student paid for some classes from his/her resources.

2. **Evaluation of Eligibility**
   Eligibility is determined at the time a student applies for financial aid and is reviewed each semester. To establish initial eligibility for financial aid as a current SC4 student, it is required that the past SC4 academic record be reviewed even if the student paid for the classes out of his/her own resources. Applicants who have not made satisfactory academic progress are notified by mail.

3. **Appeals**
   A student whose financial aid has been terminated may appeal in writing. All appeals should include appropriate documentation. Extenuating circumstances considered for appeals include personal illness or accident, serious illness or death within an immediate family or other circumstances beyond the reasonable control of the student. Students in extended credit hour programs and/or second-degree programs may submit appeals. Acceptable documentation includes letters from a physician, attorney, social service agency or parole officer; or a copy of a death certificate, divorce decree and/or academic records. Submission of an appeal does not guarantee reinstatement of eligibility for financial aid. The student will be notified of the appeal results in writing. An appeal may result in a denial of reinstatement, a reinstatement of the student’s eligibility or a probationary period. All appeal decisions are final.
4. **Warning**
   Financial aid applicants who do not meet the eligibility requirements will be granted a semester of financial aid to move toward acceptable grade point average or completion rates. This also applies to students who did not meet initial eligibility requirements. Students who fail to make satisfactory academic progress after the warning semester will be terminated from financial aid eligibility until they meet the standard or have an acceptable appeal. During the warning period, financial aid for the next semester will not be disbursed until FINAL GRADES from the previous semester are available. It is the student’s responsibility to contact the Financial Aid office to initiate action for reinstatement of financial aid. Loans may be awarded to students on warning if tuition and fees are not covered by other resources.

5. **Audits and Credit by Exam**
   Classes taken for audit or credits earned by exam are not considered when determining financial aid eligibility. Details of the complete policy and procedure are available online at www.sc4.edu/financialaid or by contacting the Financial Aid office in Room 123, Acheson Technology Center.

**OMBUDSMAN FOR STUDENTS**

**HOUSING LISTS**
You may go to www.emrha.org for a listing of housing opportunities available in the Blue Water area.
The college maintains and staffs an office for veteran services where veterans, dependents and selected reservists are provided information about education benefits available to them.

**FEDERAL PROGRAMS**

Chapter 30 – Montgomery GI Bill
Chapter 33 – Post 9/11 Montgomery GI Bill
Chapter 35 – Survivors’ and Dependents’ Education Benefits
Chapter 1606 – Selected Reserve, Montgomery GI Bill
Chapter 1607 – Reserve Educational Assistance Program (REAP)

**Application Process**

Students are encouraged to apply at the earliest possible date. Applications are available through the U.S. Department of Veterans Affairs website, www.gibill.va.gov. Electronic application (VONAPP) and paper applications are accessible for both veterans (Form 22–1990) and dependents (Form 22–5490). The Department of Veterans Affairs will normally provide the applicant with a Certificate of Eligibility when approved. Visit the SC4 Veterans Certifying Official, Room 123, Acheson Technology Center, after you have applied or have received your certificate of eligibility or notice of award.

**Note:** The VA strongly recommends that veterans and other beneficiaries submit their education benefits application online to expedite processing. You may call the VA National Education Help Line at (888) 442-4551 for assistance.

Chapter 31 – Vocational Rehabilitation

This program is available to veterans with a service-connected disability. For more information, contact the Veterans Administration Regional Office (28), Patrick V. McNamara Federal Building, 477 Michigan Avenue, Detroit, MI 48226 or call (800) 827-1000. Upon approval, deliver the Authorization and Certification of Status (Form 28–1905) to the SC4 Veterans Certifying Official, Room 123, Acheson Technology Center.

**STATE OF MICHIGAN PROGRAM**

**Children of Veterans Tuition Grant Program**

Obtain an application from the Children of Veterans Tuition Grant Program (CVTG) at www.michigan.gov/osg. Application questions should be directed to (888) 4-GRANTS or email osg@michigan.gov. Upon approval the applicant will receive a Letter of Eligibility from
the State of Michigan Department of Treasury. Deliver the Letter of Eligibility to the SC4 Veterans Certifying Official, Room 123, Acheson Technology Center.

EARNED CREDITS
If students have previously drawn educational benefits, a “Request for a Change of Place and/or Program” (Form 22−1995) must be filed. An official transcript from other colleges must be sent to SC4 for evaluation of credit as soon as possible. Benefits can be suspended if credits granted for previous training are not reported to the Veterans Administration.

PAY RATE
Monthly rates vary according to which VA program is providing the assistance and the student’s course load. For more information, contact the SC4 Veterans Certifying Official, Room 123, Acheson Technology Center.

SATISFACTORY PROGRESS FOR VETERANS
Students receiving VA benefits need to understand the college’s policy regarding academic probation. They must maintain a GPA equal to or better than a 2.0 cumulative grade point average (“C” average). A 2.0 GPA is required to meet graduation requirements. If the GPA falls below 2.0, students will be placed on probation with VA. Failure to raise the cumulative GPA to 2.0 within two consecutive semesters will result in termination of VA educational benefits. The college will inform the Department of Veterans Affairs and the student in writing of this fact. The student can be recertified in the future under one of two conditions: (1) the cumulative GPA is raised to 2.0 or (2) a request for resumption of educational benefits is submitted to the VA and the VA reinstates benefits based on evidence supporting the student’s claim.

GUIDELINES/RESPONSIBILITIES

1. Individuals may register only for courses required to satisfy graduation requirements for specified majors.
2. VA payment is not ordinarily allowed for repeating a previously passed course.
3. Any changes in program of study, course load, address, etc., must be reported to the SC4 Veterans office.
4. Report to the Veterans office when changing an “I” (incomplete) grade to a non-punitive (A, B, C) grade.
5. If a student receiving VA benefits withdraws from a class after the first 30 days of a regular semester, the student may have to repay the money received for the class unless the withdrawal was due to circumstances beyond the student’s control.
STUDENT SUCCESS CENTER
ADVISING, CAREER and EMPLOYMENT SERVICES

ADVISING AND CAREER SERVICES
122-124 Acheson Technology Center (ATC)
(810) 989-5520 or (800) 553-2427, Ext. 5520
Fax: (810) 989-5775
careerservices@sc4.edu
Monday and Thursday 8 a.m. to 6 p.m.
Tuesday and Wednesday 8 a.m. to 4:30 p.m.
Friday 9:30 a.m. to 4:30 p.m.

EMPLOYMENT SERVICES
120 Acheson Technology Center (ATC)
(810) 989-5515 or (800) 553-2427, Ext. 5515
Fax: (810) 989-5775
employmentservices@sc4.edu
Monday through Thursday 8 a.m. to 4:30 p.m.
Friday 9:30 a.m. to 4:30 p.m.

The Student Success Center provides students with a variety
of informational and support services essential to college and
employment success. The center is staffed by advising, career
and employment specialists and provides comprehensive support
services including: academic assessments, academic advising, career
exploration, transfer planning, preparation for employment and access
to employment opportunities.

APPOINTMENTS
Appointments can be scheduled in person, by telephone or online at
www.sc4.edu/advising. Services are also provided on a walk-in basis,
depending on the nature of the request and staff availability. Students
are advised to call for current information on the walk-in and evening
schedules.

SERVICES

ACADEMIC ADVISING
All degree/certificate seeking students are required to meet with
a Student Success Center advisor for academic advising prior to
registering for their first semester. Thereafter, academic advising and
educational planning are encouraged but not required.

EDUCATIONAL PLANNING
Advisors assist students with the development of a Personal Education
Plan for their career goals. Through educational planning, advisors
help students select academic programs and the courses needed for SC4 certificate and degree completion. They also help students locate and understand transfer information. Access to print and Web-based information enables students to make decisions to meet their unique career goals.

CAREER PLANNING
Student Success Center staff members assist students in making career decisions and plans that will relate their interests, abilities, values and personalities to career goals. Career assessments and print and computer-based resources are used to assess interests, identify options, explore career areas and educational choices, and access occupational information. Career planning resources include computerized career planning systems, inventories and other self-exploration programs. Interest Inventories are useful in assessing and describing a person’s likes and dislikes. This information leads to greater self-awareness for career and life decision making. Personality Assessments are designed to measure a wide variety of traits and characteristics that may be related to a person’s behavior and feelings. This information leads to greater self-awareness concerning the career area one may find satisfying. Career Planning Programs are comprehensive computer-based resources which allow users to develop personalized educational and career plans. They provide valuable information on careers, job markets and training. In addition, a Career Development (SD 110) one credit class is offered to provide in-depth career exploration for the undecided student.

STUDENT EMPLOYMENT SERVICES
The Student Success Center offers lifetime employment services including pre-employment preparation and access to job opportunities. These services are available for current and former students. Students may access the latest local and national employment opportunities through the Web-based e-Recruiting employment system, accessible from the college’s website or the printed Job Book in Room 120, Acheson Technology Center. Other services include assistance with developing resumes, acquiring interview techniques, job search strategies and locating job shadowing opportunities. The Student Success Center also organizes career fairs, conducts job seeking workshops, schedules on-campus job interviews and offers a one credit course, Job Search and Employment (SD 130).

PERSONAL CONCERNS
The Student Success Center provides students with crisis services and assistance locating appropriate services when they have concerns that adversely affect the pursuit of their educational and career goals.
STUDENT SUCCESS SEMINARS
The Student Success Center offers a variety of non-credit free seminars designed to support students’ academic, employment and career success. These free seminars provide information and strategies for coping with the demands of college enrollment and for life and career planning. Seminars are scheduled throughout the year for students and community members and are presented in classes by faculty invitation. Some topics include basic computer skills, career success, personal finance, stress management, study skills and test anxiety.

STUDENT DEVELOPMENT CREDIT CLASSES
The Student Success Center offers college credit classes for student development. The classes are Career Development (SD 110), Assertive Behavior (SD 120), Job Search and Employment Skills (SD 130), College Success (SD 140) and Stress Management (SD 150). A course summary for each course can be found in the course description section of the catalog under Student Development.

TRIO – STUDENT SUPPORT SERVICES
211 Main Building
(810) 989-5801
trio@sc4.edu

TRIO – Student Support Services is a federally funded program that helps students stay in college, graduate and transfer to a four-year university. The mission of TRIO is to assist students in completion of their educational goals. The program serves students who are first-generation college students (neither parent graduated from a four-year college), qualify for federal funding such as a PELL grant and/or have a documented disability.

Eligible students receive:
- Additional support services for students with disabilities
- Cultural enrichment activities
- Help applying for financial aid and scholarships
- Help with career planning, developing resumes and completing job searches
- Individualized tutoring
- One-on-one mentoring
- Personalized academic advising
- Priority registration for SC4 classes
- Specialized workshops
- Transfer planning, including visits to selected colleges/universities

For more information, contact the TRIO office or visit www.sc4.edu/trio.
ACADEMIC SUPPORT SERVICES

LIBRARY
College Center
(810) 989-5640
Fax: (810) 989-5773
library@sc4.edu

The Library is open seven days a week, including four evenings during the fall and winter semesters.

Fall and winter semester hours:

7:30 a.m. to 9 p.m.     Monday to Thursday
7:30 a.m. to 4 p.m.     Friday
8 a.m. to 4 p.m.        Saturday
1 p.m. to 5 p.m.        Sunday

Spring and summer sessions, exam weeks, breaks and holiday hours are posted in advance.

The Library provides access to many resources and services. Librarians and staff members willingly provide assistance with questions. Listed below is a summary of the resources and services available to students.

PRINT, AUDIOVISUAL AND ELECTRONIC MEDIA

• Approximately 51,700 books in the reference and circulating collections searchable through our automated online catalog.
• Journals and magazines in print format.
• 3,500 videotapes and DVDs.
• Electronic access to resources that include the Internet; the Port Huron Times Herald; Academic OneFile; Literature Resource Center; Nursing Resource Center; Business Source Elite; Cumulative Index to Nursing and Allied Health Literature; Criminal Justice Periodicals; ERIC; Facts.com; Gale Virtual Reference; Small Business Resource Center, and many more.

SERVICES

• Reference and research assistance
• Programs on how to conduct research and use the library effectively
• Interlibrary loan (borrowing materials from other libraries)
• Small group study rooms
• Printers and photocopy machines.
To borrow materials, students must present their SC4 identification/library card to a staff member at the circulation desk.

**COMPUTER AND WIRELESS ACCESS**
Computers are available in the combined Library and Achievement Center located in the College Center. Wireless access is also available in the Library and Achievement Center for students preferring to use their laptops. Inquire at the circulation desk for specifics on how to obtain wireless access.

**COPYRIGHTED SOFTWARE**
Microcomputer software, such as books, magazines, audiovisual software and other reproducible materials, is protected by the Copyright Revision Act of 1976. The rights of copyright include the rights of reproduction, adaptation, distribution, public performance and display. All of these rights are subject to fair use, depending on the purpose of the use, the nature of the work, the amount of the work used and the effect the use has on the market for the copyrighted work. Guidelines have been established which define what educators can do with software acquired for instructional use without infringing on the copyright.
The Achievement Center provides specialized academic services to assist students so that their studies will be positive, meaningful and successful experiences. All services are provided at no charge to currently enrolled students.

Fall and winter semester hours:

- 8 a.m. to 9 p.m. Monday to Thursday
- 9:30 a.m. to 4 p.m. Friday
- 10 a.m. to 4 p.m. (testing only) Saturday

Visit www.sc4.edu/ac for spring and summer hours.

TUTORING
SC4 students have access to tutoring services at no charge. Tutoring services provide assistance in understanding course materials.

DROP-IN TUTORING
Available regardless of course or grade on a first-come, first-served basis.

TUTORING EMPLOYMENT OPPORTUNITIES
Qualified peer and professional tutors are continuously needed to provide tutoring services. Tutors must have an accumulated minimum 3.0 GPA. Request an application for employment from the Achievement Center.

EDUCATIONAL SOFTWARE
Educational software programs are available to support courses such as biology, physical science, computer information systems, electronics, English, math, nursing, office administration, reading and social sciences.

DISABILITY AND SPECIAL SERVICES
SC4 is committed to providing equal educational and employment opportunities for individuals with disabilities, in accordance with state and federal laws and regulations, including the Americans with Disabilities Act (ADA). To ensure equality of access for students with disabilities, SC4 will provide reasonable accommodations to students.
with disabilities, provided such accommodation does not fundamentally alter the nature of the program, cause undue hardship on the college, or jeopardize the health or safety of others.

An Achievement Center counselor is available to assist students experiencing academic difficulties and/or needing special support services (documentation required).

Services include:

- Braille translation
- Interpreter services
- Mobility assurance
- Note-taker services
- Reader services
- Referral services
- Specialized assistive equipment for students with physical disabilities
- Test-taking accommodations

ENGLISH AS A SECOND LANGUAGE
Support is provided for students with limited English-speaking skills.

CRISIS COUNSELING
The Achievement Center counselor is trained in providing crisis counseling and intervention to students in need. The focus is on single or recurrent problems that are overwhelming or traumatic. Crisis counseling is short-term and provides education, guidance and support, but is not a substitute for psychiatric care. Crisis counseling may involve referral to community organizations that have the resources to provide the assistance needed by the student.

TESTING SERVICES
- Admissions testing: COMPASS, HESI
- Test proctoring
  - SC4 online courses
  - CLEP
  - Other colleges and universities

RIDE SHARE INFORMATION
The Ride Share Information Board is located in the Achievement Center. Any student who would like to share a ride or are in need of transportation may participate in the program by completing the form on the Ride Share Information Board.
WRITING CENTER
Office and tutoring center: 117 Main Building
Writing lab: 115 Main Building
(810) 984-3881, Ext. 6223
wc@sc4.edu

The Writing Center offers tutoring sessions with student writing consultants who are able to assist in every step of the writing process.

Assistance is not limited to English classes; it is available for any class. Tutors can help with brainstorming, developing a thesis, research and citation, drafting and revising.

Visit www.sc4.edu/writingcenter to view walk-in hours. Other days and times are available by appointment. Schedule your appointment by calling (810) 984-3881, Ext. 6223, or emailing wc@sc4.edu.
CENTER FOR eLEARNING
A-101 College Center (CC)
(810) 989-5525
elearning@sc4.edu

Complete details regarding online learning can be accessed at www.sc4.edu/onlinelearning.

ONLINE COURSES
Online courses provide a flexible opportunity for continuing education. Online courses are instructor led and typically follow the same semester schedule as on-ground courses, while some also are offered as short-term courses. The platform used to deliver the online courses requires unique identification for each user. Attributes of the online course include the following:

- Course materials are accessible from any Internet connection at any time.
- Interaction with fellow students happens in the online classroom, while private communication occurs with the instructor via email
- Some online courses do require campus visits for taking tests or participating in labs

ONLINE DEGREE PROGRAMS
Students seeking the convenience of online education can earn an associate degree online with campus visits required for some courses. Options include Associate in Arts, Associate in General Education, and Health Care Provider to RN Articulation Associate Degree. Students also can complete an Associate of Business − Transfer online by working with an academic advisor to determine the right selection of courses.

WEB099 − INTRODUCTION TO ONLINE COURSES
Because online learning is different from the traditional classroom, choosing to take an online course should be an informed decision. WEB099, Introduction to Online Courses, prepares students to become online learners at SC4. It is a free online tutorial that is scheduled as an open-entry course estimated to take three to five hours to complete. Enrollment and completion can occur at any time during a semester. The course shows how the online classroom looks and works, while providing practice on actions that may be required in the online course, such as submitting assignments with attachments, posting discussion board messages and emailing the instructor. Because this introduction is critical to the success of the online learner, completing WEB099 with an “S” grade is a requirement prior to registering for a student’s first online course.
TECHNOLOGY REQUIREMENTS
Typical courses will display best at a screen resolution of 1024 x 768 pixels. The speed of your computer and the amount of system and video memory are important. A recent (less than three years old) PC or Macintosh with at least 512 MB (1 GB preferred) will significantly improve your interactive experience. Other technology requirements include:

- Reliable Internet access (dial-up supported, but Cable or DSL (Broadband) preferred)
- Internet Explorer (Version 7 or later) as browser with Java and cookies enabled and pop-up blocking disabled for this site
- Updated anti-virus software (Google ‘AVG Free’ is a free version if needed)
- Microsoft Word (Office 2000 or later). Other Office software may be required depending on the course.
- CD-ROM drive and sound card (with speakers or headphones) and specialized software as required for some courses
OTHER SUPPORT SERVICES

BISTRO COLLEGE CENTER CATERING
College Center Café
(810) 982-1767
The Bistro offers light breakfasts, full café lunches, snacks and beverages for between classes. Hours are 8 a.m. to 5 p.m. Monday through Thursday during the fall and winter semesters. Visit www.sc4.edu/cafe for current hours.

CHILD CARE CENTER
Citizens First Michigan Technical Education Center
(810) 989-5673
The M-TEC Child Care Center at SC4 is designed to provide quality child care for college students and staff. The center is operated by the Community Action Agency of St. Clair County. Hours are 6:30 a.m. to 6 p.m. Monday through Friday.

COLLEGE BOOKSTORE
Acheson Applied Technology Center, Room 125
(810) 989-5725 or (810) 989-5728
The College Bookstore carries required books and supplies for classes, as well as clothing and convenience items. New and used books are available.

EMERGENCY MESSAGES TO STUDENTS
St. Clair County Community College will attempt to deliver EMERGENCY messages only. Call (810) 989-5560 or the Campus Security office at (810) 989-5549.

HEALTH INSURANCE
Students may obtain an accident and sickness insurance policy for a nominal premium. The college is not responsible for any coverage and/or claims. Call (810) 989-5560 to request a brochure.

PARKING
Free student parking is available on a first-come, first-served basis in the lot adjacent to the College Center. The entire lot at the Main Building is reserved for faculty and staff. All parking lots are lined and vehicles are to be parked within the designated spaces.

The college assumes no liability for vehicles or contents in vehicles parked in or using college lots. People parking illegally (including fire lanes, walking paths, lawn and unauthorized handicapped space usage) will be ticketed or towed by college Campus Patrol personnel or city, county or state police agencies.
Overflow parking often is available in the McMorran Place civic center parking lots east of campus. Depending on the time/day, a small fee may be charged.

VOTER REGISTRATION
Forms to register for voting are available in the College Bookstore, Enrollment Services and Library. Forms also may be downloaded at www.michigan.gov/sos.

WAVE – SC4 ONLINE STUDENT SYSTEM
Students are encouraged to use the SC4 WAVE, which may be accessed online at www.sc4.edu/wave. The WAVE provides a wide variety of services to students in an easy-to-use online format. Examples of the services available on the WAVE include:

- Searching for classes
- Registration and payment
- Access to grades
- Academic transcripts
- Progress to degree/certificate completion (degree audit)
- Financial aid awarding status

Questions related to the WAVE may be directed to Enrollment Services at (810) 989-5500 or enrollment@sc4.edu.

Students are to use WAVE responsibly and are to limit their transactions to a level that meets their educational needs. Excessive transactions tax the WAVE and are viewed as inappropriate and irresponsible use of the system. Determining reasonable use of WAVE is at the discretion of college administration.

Students using the WAVE inappropriately or irresponsibly will be notified either by phone, email, or letter of the institution’s concerns. Advising assistance will be offered for the purpose of selecting and scheduling classes. If unreasonable use continues, WAVE registration privileges may be revoked.
STUDENT ATHLETICS AND ACTIVITIES
(CLUBS AND ORGANIZATIONS)

ATHLETICS
North Building, Rooms 22 and 119
(810) 989-5670 or (810) 989-5671
SC4 has an intercollegiate athletic program and is a member of the
National Junior College Athletic Association in men’s and women’s
basketball, men’s baseball, women’s softball, men’s golf and women’s
volleyball. Contact the Athletic Department for additional information.

COLLEGE RADIO STATION
Fine Arts Building, Rooms 21 and 22
(810) 989-5564 or (810) 989-5646
SC4 operates radio station WSGR (91.3 FM) 24 hours a day year
round.

FITNESS CENTER / GYM USAGE
North Building, Rooms 22 and 119
The College Gym and Fitness Center are open for student use. Call
(810) 989-5670 for open hours.

STUDENT CLUBS
Acheson Technology Center, Room 123
(810) 989-5552
Student clubs provide opportunities for leadership, expanded interests
and social life. Student Government is made up of a board of executive
officers and a representative from each recognized club on campus.
For descriptions of each club, visit www.sc4.edu/clubs. The following
is a typical list of clubs that receive appropriations from Student
Government:

• Alternative Energy and Engineering Club
• Campus Progressives
• Computer Information Security Club
• Criminal Justice Club
• Drama Club
• Environmental Concerns Organization
• Erie Square Gazette
• Gay-Straight Alliance
• Global Awareness Club
• Health and Wellness Club
• InterVarsity Christian Fellowship
• Music Club
• Newman Club
• Phi Theta Kappa
STUDENT GOVERNMENT
Main Building, Room 110
(810) 989-5737
Student Government promotes and sponsors a wide range of activities throughout the academic year and serves as the formal spokes group for students. Membership to Student Government is by election. However, all currently enrolled students, excluding guest students, may participate in some segment of Student Government. All students are invited to attend the monthly all-club meetings.

PETITIONS TO RUN FOR ELECTION TO STUDENT GOVERNMENT
Student Government officers are president, vice president, treasurer and secretary. A 2.0 grade point average is required to hold office and officers must be enrolled in a minimum of 9 credit hours each semester. Students must file petitions with 40 valid signatures as specified by the Student Government Constitution. The deadline for filing petitions will be posted. Petitions may be picked up in Room 123, Acheson Technology Center, and must be returned by the date specified. The Student Government officers are elected during the winter semester, and take office the Monday following the end of the winter semester. Guest students (high school and college) are not permitted to run for Student Government office.

STUDENT LITERARY MAGAZINE
Visual and Performing Arts Department
Fine Arts Building, Room 10
(810) 989-5709

or
Communications Department
Main Building, Room 319
(810) 989-5578
Patterns is an award-winning literary magazine of student writing and art that is published annually and features the winning entries in the college’s writing and art competition.

STUDENT NEWSPAPER
Main Building, Room 122
(810) 989-5584
The Erie Square Gazette is published every two weeks during the fall and winter semesters.
CAMPUS SECURITY AND CAMPUS PATROL
CAMPUS PATROL OFFICE
A.J. Theisen Building, Room 109A
(810) 989-5757 or
CAMPUS SECURITY DIRECTOR
(810) 989-5549

ACCIDENTS AND HEALTH EMERGENCIES ON CAMPUS
Report all accidents occurring on the college campus that cause injury to students. Accidents causing serious injury are to be treated as emergencies. When a student is injured or becomes ill while on campus, first call 911, then Campus Patrol who will assist until necessary aid arrives. A student encountering a minor accident, damage to their vehicle, or lost or stolen items on campus may elect to have Campus Patrol make an incident report. Remember, if there is any doubt about the severity of the occurrence, call 911.

CAMPUS CRIME STATISTICS
Detailed information is available by visiting www.sc4.edu/securityreport.

SECURITY ESCORTS
Anyone uncomfortable with walking to their vehicle or to another building may request an escort from Campus Patrol. It is advised that you call ahead of time to make necessary arrangements.

LOST AND FOUND
A.J. Theisen Building, Room 109A
(810) 989-5757
All lost and found property is centrally located in the Campus Patrol office located in Room 90, A.J. Theisen Building.

PARKING ON CAMPUS
Students shall ensure their vehicle is legally parked on the campus at all times. Failure to do so may result in the vehicle being ticketed and/or towed at owner’s expense. See section “Other Support Services,” in this catalog for additional parking information.
SEX OFFENDER REGISTRATION
Notice is hereby given to the campus community that persons seeking information concerning registered sex offenders should contact the St. Clair County Sheriff Department or the Sheriff Department for any county where off-campus programs are offered.

STUDENT ASSISTANCE FROM CAMPUS PATROL
Campus Patrol can assist faculty, staff and students experiencing trouble with some vehicle problems such as:

- Dead or low car battery
- Frozen door locks
- Low or flat tires
- Keys left in locked vehicle
- Out of gas
- Directions around campus

STUDENT IDENTIFICATION
When applicable and/or upon request by an appropriate member of the college staff, persons requested to do so shall present acceptable identification (i.e. driver’s license, Michigan ID card).
STUDENT CODE OF CONDUCT

Enrollment in St. Clair County Community College implies acceptance of certain standards of student conduct and a willingness to abide by those standards. College standards of conduct are established to maintain conditions under which individuals, with respect for the rights and well-being of others, can participate effectively in a common educational enterprise and well-ordered collegiate community.

The college adopts the following Student Code of Conduct hereby referred to as the Code and prohibits all persons from engaging or participating in any of the practices or behaviors listed below. Specific examples are used by way of illustration and are not meant to limit the practices or behaviors that may be deemed to violate the college’s standards of conduct.

Violence of any kind will not be tolerated on college premises or at college-sponsored activities. Any student, group or organization found to have committed misconduct is subject to disciplinary action and to the sanctions outlined in the Code. Attempts to commit any of these acts of misconduct are included in the scope of these definitions.

The following are examples of college expectations and misconduct under the Code subject to disciplinary action up to and including dismissal and expulsion.

Student Code of Conduct violations (except as noted) should be reported to the college official in charge and the Dean of Students. If warranted by nature and severity of the offense, Campus Security and/or local law enforcement should be contacted.

CODE

APPROPRIATE ATTIRE
Dress, grooming and personal cleanliness standards contribute to the ambiance and character of the college. College students are required to adhere to prevailing standards of good judgment in their choice of attire and are expected to conduct themselves in a way that best represents themselves and the college.

APPROPRIATE CONDUCT
Students are expected to act responsibly and to conduct themselves in the classroom and on the campus in a manner that does not disrupt the learning process. A climate of mutual respect and courtesy should exist
between faculty, staff and students. However, students must recognize that instructors and staff, by virtue of their positions, must exert a measure of authority in the classroom and other campus areas. Students should respect this authority. Disciplinary problems may result in a student being withdrawn from class and, in extreme cases, dismissed from the college.

**DISORDERLY CONDUCT**
Disorderly conduct is prohibited and is defined as acting in a manner to annoy, disturb, interfere with, obstruct or be offensive to others, including but not limited to shouting or making excessive noise either inside or outside a building to the annoyance or disturbance of others; verbally abusing college officials (either on the phone or in person) acting in performance of their duties; acting in a lewd or indecent manner; making threats; harassing others.

**ASSAULT AND THREATS**
Assault and threats are prohibited, and include, but are not limited to, the following: committing physical abuse and/or battery or other behavior resulting in harm to any person; placing a person in fear of imminent physical danger or injury; making threats or engaging in behavior to harm self or others.

**CLASSROOM AND LABORATORY SAFETY VIOLATIONS**
Students must abide by classroom safety regulations. Safety glasses, headgear, aprons, lab coats, earplugs and other appropriate safety equipment may be needed by all students in specific courses.

**DISCRIMINATION AND HARASSMENT**
Discrimination and harassment are strictly forbidden on campus and in all college affiliated activities. Discrimination and harassment include inappropriate and offensive conduct against any person, student or staff member on the basis of race, color, religion, gender, national origin, creed, ancestry, familial status, age, disability, marital status, height, weight, sexual orientation or other protected status. Modes of contact or communication include, but are not limited to, in person, in writing, through telephone, electronic mail or instant messaging.

Any form of harassment is unacceptable at St. Clair County Community College, and complaints or charges will be followed through with appropriate action. SC4 employees and students are individually responsible to ensure such harassment does not occur. Concerns should be directed to the Human Resources office, Room 203, Main Building. See details and complaint form online at www.sc4.edu/hr.
SEXUAL HARASSMENT
Sexual harassment or related retaliation is strictly prohibited on campus and in college affiliated activities. Prohibited conduct includes, but is not limited to, unwelcome verbal or physical acts that are sexual in nature, unrelated to the content or context, and sufficiently severe and/or pervasive as to objectively either (a) have the effect of unreasonably interfering with an individual's work or academic performance, or (b) create an intimidating, hostile or offensive learning or working environment. Sexual harassment includes, but is not limited to, sexually based unwelcome verbal remarks or physical advances, request for sexual favors, inappropriate and unwelcome contact, and explicitly or implicitly stating that submission or rejection of sexual acts or advances will be a factor in one's employment, participation or evaluation within the College and/or its activities.

Any form of harassment is unacceptable at St. Clair County Community College, and complaints or charges will be followed through with appropriate action. SC4 employees and students are individually responsible to ensure such harassment does not occur. Concerns should be directed to the Human Resources Office, Room 203, Main Building. See details and complaint form online at www.sc4.edu/hr.

DISHONESTY − ACADEMIC
The college considers academic honesty to be essential to all academic performance. Instances of academic dishonesty will be treated as serious offenses of the Student Code of Conduct. Students involved in activities such as cheating and/or plagiarism will be subject to disciplinary action up to and including dismissal.

• Definition of plagiarism: Plagiarism is the appropriation of language, thoughts or ideas of another author and claiming that as one's own. Plagiarism is work not produced by the student, or work that does not credit borrowings from the original source(s).

• Definition of cheating: Cheating can be, but is not limited to, a student using electronic technology, notes or other written materials not permitted by the instructor; looking at other students’ papers without the instructor's permission; requesting answers from other students; or working with other students when independent work is required. Situations where cheating may occur are during tests, exams, quizzes or other similar methods of evaluation.

When the instructor has sufficient evidence of cheating or plagiarism, the instructor may impose disciplinary actions such as assigning a failing grade to the student's assignment, quiz, paper or test.
If the plagiarism or cheating involves major course work such as plagiarizing a research paper or cheating on a final exam, the instructor may fail the student in the course.

**DISHONESTY – NON-ACADEMIC**

Non-academic dishonesty includes, but is not limited to:
- Furnishing false information to the college or college personnel, including Campus Security.
- Furnishing false information at disciplinary proceedings.
- Forging; unauthorized alteration or unauthorized use of any college documents, records or identification cards, including computer records; and misuse of computer facilities and electronic mailing systems.
- Giving false or incomplete replies to questions, verbal or written, on applications, forms or other documents required by properly authorized representatives of the college.

**DRUG AND ALCOHOL VIOLATION**

Intoxication; drug–altered states; and the possession, use or sale of alcohol, illegal drugs or related paraphernalia; are strictly forbidden on campus or at or as part of any college affiliated activity. This prohibition includes, but is not limited to: possession of paraphernalia containing drug residue; and manufacture or distribution of illegal drugs or controlled substances. If students are experiencing problems with drugs and/or alcohol, they should contact the Student Success Center, Room 120, Acheson Technology Center, or call (810) 989-5520. The College Drug Prevention Program is detailed on the SC4 website.

**FIRE/FALSE ALARM/REPORT**

Knowingly or negligently causing or attempting to cause a fire in a college building; and initiating or causing to be initiated any false alarm/report, warning, or threat of fire, explosion or other emergency is prohibited.

**GAMBLING**

It is the policy of the college to prohibit gambling on the college campus. Except as hereinafter provided, the college prohibits the sale, solicitation or promotion of a game of chance, including, but not limited to lotteries, raffles, bingo or similar other activities on college premises or which use the college’s name in any way. The Board authorizes the President of the college to waive this prohibition for such fundraising activities which support student services or scholarships and which comply with any applicable laws and license requirements. The President may establish procedures and guidelines for applying for this waiver.
GIVING FALSE INFORMATION
No person shall give false or incomplete replies to questions, verbal or written, on applications, forms or other documents required by properly authorized representatives of the college.

HAZING
Any act of hazing is prohibited. Hazing is defined as any action taken or situation created intentionally, with or without consent, whether on or off campus, to produce mental or physical discomfort, embarrassment, harassment or ridicule.

INTERFERING WITH EVENTS
Interfering with any normal college or college-sponsored events is prohibited and includes, but is not limited to, disruption of studying, teaching, research, administration, and fire, police or emergency services.

LEWD BEHAVIOR
Behavior that is lewd or indecent is prohibited. Such behavior is defined in consideration of the general standards of acceptable behavior and includes, but is not limited to, the following: obscene remarks, gestures or other communications; exposing oneself in an indecent manner; entering restrooms against the gender designation; viewing pornographic images; or engaging in sexual activities on the campus.

MISUSE, THEFT OF FIRE SAFETY OR EMERGENCY EQUIPMENT
Misuse, tampering, theft or damage to fire safety equipment such as fire extinguishers, exit signs, first aid kits, automated external defibrillators (AEDs) or other emergency supplies on campus is prohibited.

NON-COMPLIANCE
Failure to comply with reasonable directions of college officials, including college security officers, faculty and staff acting in performance of their duties is prohibited. Directives to cooperate in the administration of the Code including those to appear and give testimony at a college disciplinary proceeding, as well as directives to produce identification are included in the scope of this provision.

REGULATION VIOLATION
Any violation of other published regulations including, but not limited to, SC4 policies as listed in this catalog is considered a Code violation.
SANCTION VIOLATION
Violating the terms of any disciplinary sanction imposed in accordance with the Code is a Code violation.

SEXUAL ASSAULT
Inflicting any sexual invasion/assault upon any person without that person’s consent is prohibited. “Consent” requires actual words or conduct indicating a freely-given agreement to have sexual intercourse, or to participate in sexual activities. The college community should be aware that, depending on the particular circumstances, previous sexual relationships or current relationship between the persons involved, or silence, or lack of protest do not necessarily constitute consent. Further, the degree of impairment of a person’s ability to give or withhold consent (including, but not limited to, incapacity or helplessness caused by alcohol or any other drugs) may be introduced as pertinent information at any college disciplinary hearing.

SMOKING ON CAMPUS
Smoking is prohibited in all campus buildings, vehicles and outside areas of the campus where non-smokers cannot avoid exposure to smoke.

Specifically, smoking is prohibited up to 20 feet outside any enclosed area to ensure that secondhand smoke does not enter the area through entrances, windows, ventilation systems or any other means.

SOLICITATION
In order to provide an environment that is conducive to teaching and learning, it has been determined by SC4 to prohibit outside persons from operating or distributing materials or items on the college campus. Any problems should be reported to Campus Patrol. Specifically:

1. Selling, soliciting and advertising are prohibited unless an exception has been authorized by the Office of the Vice President for Administrative Services.
2. Distribution of handbills on vehicles on college property is prohibited.
TECHNOLOGY
Computers and Internet Services – Acceptable Use Policy
2011-2012
(Complete information is available at
www.sc4.edu/consumerinformation).

St. Clair County Community College provides computer, Internet and email services to support research and education in order to fulfill the mission of the college. These unique resources enrich the learning and instructional process and foster opportunities for collaborative work among college students and staff.

Privileges: Access to the college’s computer services, including the Internet, is a privilege granted to students, faculty, staff and the public. Individual users, including public patrons, are to act responsibly, respect the rights of other users and respect the integrity of the systems and related physical resources. The college reserves the right to limit, restrict or extend computing privileges and access to its information resources. Users and providers inherit privileges and obligations defined by several authorities:

- Law (such as international copyright law, the U.S. constitution, federal communications regulations, federal educational regulations and Michigan laws)
- College policies (such as policies on plagiarism and harassment)
- Service Provider requirements (typically specifying addresses, protocols, quotas and other technical standards)
- Contracts (including licenses, warranties, service level agreements, memoranda of understanding and agreements with telecommunications services)

Inappropriate use will result in denial or cancellation of that privilege. St. Clair County Community College reserves the right to monitor Internet use, and determine if specific uses are consistent with the acceptable use practices. The college further reserves the right to deny access to prevent unauthorized or unacceptable activity, and could involve disciplinary action.

Uses: Faculty, staff and students may use the college’s computing resources only for purposes related to their studies, their responsibilities for providing instruction, the discharge of their duties as employees, their official business with the college and other college-sanctioned or authorized activities. Public users are expected to use the computers for research and educational pursuits.
Restrictions: Use of the Internet for viewing, sending or retrieving any of the following are prohibited:

- Pornographic material or inappropriate text files in violation of Michigan criminal laws, including, but not limited to, Michigan obscenity laws MCLA 752.361–752.374 and other Michigan statutes and cases concerning obscenity
- Libel or slander
- Deliberately wasting or overloading computing resources, such as printing too many copies of a document
- Fraud or misrepresentation
- Commercial or for-profit purposes
- Games or gambling
- Personal and private enterprise
- Personal advertisement or political lobbying
- The modification or misrepresentation of files, data and/or passwords belonging to others
- Use of the college’s trademarks, logos, insignia or copyrights without prior approval
- Development or use of unapproved mailing lists
- Academic dishonesty, including plagiarism
- Violation of software license agreements
- Actions that would destroy, modify or abuse hardware and software
- Infiltration of a computer or computing system for any reason
- Forged electronic mail to make it appear as though it originated from a different person
- Electronic mail that is abusive, threatening or for sexual, ethnic, religious, minority or other forms of harassment
- Material that is posted or sent that is contrary to the mission or values of the college
- Electronic mail that menaces or harasses an individual or individuals

Such actions include, but are not limited to:

- Sending or forwarding chain letters or email that uses a pyramid scheme to distribute communications to an exponentially growing collection of recipients
- Deliberately flooding a user’s mailbox with automatically generated mail
- Sending mail that is deliberately designed to interfere with proper mail delivery or access
- Other acts forbidden by federal or state law
- Attempting, successfully or not, to gain access to another person’s email files
- Intentional distribution of computer viruses
- Anything contrary to the college’s board policy
Peer-to-peer (P2P) file sharing applications allow network users to download and share audio, video and picture files with each other for legitimate academic endeavors. Some network users may transfer files to others without the consent of the copyright owner. Use of P2P file sharing applications for the unauthorized acquisition or distribution of copyrighted or licensed material by SC4 network users is prohibited on any SC4 college computer or the college’s network.

All users are to abide by the 1976 United States Copyright Law and the Digital Millennium Copyright Act when using the Internet. Users must respect the legal protection applied to programs, data, photographs, music, written documents and other material as provided by copyright, trademark, patent, licensure and other proprietary rights mechanisms.

The college recognizes that electronic communications and computer resources are no different than any other form of communication or resource available at the college. Users of this medium are bound by but not limited to:

- Federal, state and local laws
- Compliance with all college policies regarding sexual, racial and other forms of harassment
- Contractual obligations
- All policies of the Board of Trustees

Alleged violations will be processed according to college policies and procedures.

Misuse of computing, networking or information resources may result in the loss of computing and/or network access. Additionally, misuse can be prosecuted under applicable statutes. Users may be held accountable for their conduct under any applicable college policies, procedures or employee contracts. Illegal production of software and other intellectual property protected by U.S. copyright law is subject to civil damages and criminal punishment including fines and imprisonment.

The college disclaims liability due to losses due to technology failures, due to intruders (viruses, worms, hackers, etc.), or due to freaks of nature.

Users should use all available methods to protect their files, including the frequent changing of their passwords, encryption of data and storing back-up copies of information off-site.

The college makes every attempt to maximize security of its computer systems. In the event that data have been corrupted as a result of
intrusion, the college’s technology services area should be notified immediately. Every reasonable attempt will be made to restore files to their status prior to intrusion; HOWEVER, TECHNOLOGY SERVICES CANNOT GUARANTEE FULL RESTORATION.

THEFT OR DAMAGE TO PROPERTY
No person or persons shall steal or damage property belonging to another person, organization or institution. This includes tampering with coin operated machines. Violators may be handled by the local police, the college disciplinary process, or both.

- **Theft**: Theft of property or of services, or knowing possession of stolen property.
- **Destruction of Property**: Destroying or damaging college property, such as library holdings or the property of others.

UNAUTHORIZED ACCESS OR USE OF COLLEGE FACILITIES
Students and members of the public are not allowed in campus buildings or facilities after the building has been closed and locked to student and public access. Access to locked buildings requires official permission from an authorized college representative and notification of Campus Patrol. Students in secured buildings after closing must be under the supervision of an authorized college official such as an official club advisor, coach, faculty member or appropriate staff member.

UNAUTHORIZED USE OF THE COLLEGE’S NAME
Any unauthorized commercial use of the college’s name, logo or other representation, or undertaking any unauthorized action in the name of the college are prohibited.

VIOLATION OF LAW
Violation of federal and/or local law, including, but not limited to, possession of any falsified identification or the manufacture, sale or distribution of local, state or federal identification.

WEAPON/EXPLOSIVE VIOLATION
The use, possession, storage or bringing into a building or class of any firearms, ammunition, knives, other weapons or objects that could be construed as weapons is strictly forbidden. Items that pose a potential hazard to the safety or health of others (such as explosives in any form) are also prohibited.

SANCTIONS
The college’s policy is directed toward imposing more severe disciplinary sanctions based on the nature of the case. The college
seeks to preserve flexibility in the imposition of sanctions so that each student or group offender is afforded the greatest possibility for appropriate and just treatment. Significant mitigating or aggravating factors shall be considered, which may include the current demeanor and the presence or lack of a disciplinary or criminal record of the offender, as well as the nature of the offense and the extent of any damage, injury or harm resulting from it.

Sanctions may include:

Verbal Warning – Reported verbal reprimand.

Censure – An official written reprimand for violation of specified regulations, including a warning that continuation or repetition of prohibited conduct will be cause for disciplinary action.

Disciplinary Probation – The college may limit and/or monitor student participation in academic, privileged or extracurricular activities for a specified period of time. Violation of the terms of disciplinary probation may result in suspension or expulsion from the college.

Suspension – Exclusion from classes and other privileges or activities, including access to college premises or college-sponsored activities off campus, as set forth in the notice of suspension, for a specified period of time. Any student who is suspended shall not be entitled to any tuition or fee refund and is barred from college premises in accordance with the suspension.

Expulsion – Termination of student status and exclusion from college privileges and activities, including access to college premises or college-sponsored activities off campus, in perpetuity. Any student who is expelled shall not be entitled to any tuition or fee refund and is barred from college premises.

Restitution – Repayment to the college or to an affected party for damages, loss or injury resulting from a violation of the Code.

Other Sanctions – Other sanctions may be imposed instead of or in addition to those specified above. For example, students may be subject to restrictions upon or denials for college parking privileges for violations involving the use or registration of motor vehicles on campus. Service projects may also be assigned. Students may be directed to have no contact with other students and/or may be forbidden to access specified areas of campus.
DUE PROCESS
The Due Process system defines the procedure to be applied to instances in which a student charged with noncompliance with college rules and regulations (Student Code of Conduct) objects to the discipline decision rendered by a college official. The complete procedure is available in the Student Success Center, Room 124, Acheson Technology Center and online at www.sc4.edu/consumerinformation.
OTHER POLICIES

CHILDREN ON CAMPUS
In order to provide a friendly and safe campus while maintaining a learning environment for SC4 students and a disruption-free workplace for our employees, students will not bring any child with them to class. In order to meet an emergency situation, the instructor can approve a temporary exception to this policy. Exceptions may also be made for SC4-sponsored events or classes that specifically suggest bringing a child. However, under no circumstances are children on campus to be left unattended.

CLASSROOM AND LABORATORY SAFETY REGULATIONS
Students must abide by classroom safety regulations. Safety glasses, headgear, aprons, lab coats, earplugs and other appropriate safety equipment may be needed by all students in specific courses.

CONCESSION RIGHTS
The college retains all concession rights. Nothing is to be sold on the premises without written permission from the college.

GRADE APPEAL PROCESS
Any appeal for a change of grade, other than a final grade, must be initiated in the semester during which the student is enrolled in the course. Appeals of a final grade for the semester must be made prior to the last day of classes of the subsequent semester with the option (student) of excluding spring and summer sessions. There will be no formal grade appeals during the week of final exams or during semester breaks. Grade appeals occurring during the spring and summer sessions will adhere to the process with time lines to be established by the Dean of Students with reasonable flexibility as needed. The only grounds for a student grade appeal shall be as follows:

1. The grade is allegedly based on an error in calculation.
2. The grade assigned allegedly did not follow the grading criteria as stated in the course syllabus.

It shall be the responsibility of the student to prove that the grade is incorrect or unjustified. A student wishing to file a grade appeal begins by contacting the Dean of Students for information. Procedures for the formal appeal are available in the Student Success Center, Room 124, Acheson Technology Center, and online on the SC4 website (under Student Grade Appeal Process) at www.sc4.edu/consumerinformation.
PETS/ANIMALS ON CAMPUS
Animals, with the exception of those required for persons who are disabled (i.e., seeing eye/service dogs), are prohibited from college buildings.

POSTING OF SIGNS/FLIERS
SC4 internal announcements may be posted on bulletin boards and tack strips which are located throughout the campus. These bulletin boards and tack strips are specifically allocated for internally generated information related to campus events and activities such as registration, Student Services, Student Government, clubs and organizations, and departments. Student and community postings may only be posted on the bulletin boards labeled “Student/Community Postings” located in the Acheson Technology Center Building, across from Room 124. The board is for posting items for sale, special event information, apartment rentals, community events, etc. Note the following guidelines for all bulletin board and tack strip usage:

- Boards will be cleared of all materials at least once per month.
- Internal postings must be proof read by appropriate supervisor.
- Inappropriate items will be removed.
- Do not use staples to attach fliers.
- Do not tape fliers on walls or windows.
- Fliers are not allowed to be posted on vehicles in the parking lots.
- Information (handbills, fliers, announcements, etc.) that are not part of an approved organization event, shall not be distributed on campus or at events without the written consent of the Vice President of Administrative Services.

STUDENT COMPLAINT PROCESS
The following guidelines have been established to provide students at St. Clair County Community College with a process for resolving concerns related to the academic environment and/or support services. When a concern arises that is covered by College Policy, including sexual harassment, racial or sex discrimination, or those arising under the Americans with Disabilities Act, the issue should be referred to the Office of Human Resources. All others will be handled in the following manner:

Complaint Process

1. The student will meet with the faculty or staff member involved to attempt to resolve the concern.
2. If a satisfactory resolution has not been reached, the student has the option to consult with the appropriate department chair or supervisor.
3. If the issue has not been satisfactorily resolved with the department chair or supervisor, the student has the option to meet with the next appropriate supervisor for final resolution. Academic environment matters should be addressed to the Vice President of Academic Services and other matters to the Dean of Instruction.

The student must provide specific documentation of the resolution efforts and to support issues and concerns related to the complaint.

WEATHER, SEVERE CLOSINGS
If the college closes because of severe weather, announcements will be made as early as possible.

The Port Huron campus may close for day classes only, night classes only, or for both day and night classes. Day classes are defined as classes that begin between 8 a.m. and 5:30 p.m. Night classes are defined as classes that begin between 6 and 10 p.m. (Note: If the college is closed for day classes, but open for night classes, the Achievement Center, College Bookstore, Library and student support services offices will remain closed for the evening.)

The Port Huron campus also may close early at any point in the day or evening.

Off-campus centers make independent decisions about closing. Whether they are open or closed is not related to if the Port Huron campus is open or closed.

To ensure you are getting accurate information, check the front page of the college website (www.sc4.edu), listen to the voicemail message on the college’s main switchboard at (810) 984-3881 or the class cancellation hotline at (810) 989-5770, or login from home and check your SC4 student email account. Please note: Cancellations by the instructor for individual classes will be reported only on the class cancellation hotline at (810) 989-5770, at www.sc4.edu/cancellations and through other methods the instructor chooses.

Text alert messages available: You may sign up to get text alert messages about closings delivered to your cellular phone or other wireless device. Sign up by logging in to the college’s online class registration system at www.sc4.edu/wave. Alerts will arrive labeled from “SC4 alerts.”
While details about closings also will be reported by local newspapers, radio and television stations, and their websites, the only information the college can guarantee the accuracy of for SC4 closings will be on the college website, switchboard, class cancellation hotline, email and text alert messages.

Specifically for early closings: If the Port Huron campus closes early at any point in the day or evening, Campus Patrol will notify classes in session about the closing. Because of the possibility of closing early, students should monitor the various communications listed above throughout the day.

Because SC4 is not in a busing situation, the college’s decision on closing is not related to decisions to close by any K-12 school districts.

If the college must close for severe weather during finals week, special announcements will be made regarding final exams.

**WORKS PRODUCED BY STUDENTS**

Students have a right to their own creative work. After the work has been reviewed, corrected, evaluated or graded, the work is to be returned to the student. Except for classroom and instructional purposes, no one may publish, display, perform, record, transmit or otherwise use a student's work without his/her permission. However, if a student submits a work for publication, display or performance to any college activity, the student thereby grants the college the right to edit, publish, display, perform, record and transmit the work.
COURSE DESCRIPTIONS

Course descriptions menu

READING A COURSE DESCRIPTION

At the bottom of the course descriptions, students will see a pattern such as 3 credits, plus 1 contact hour = (2 lecture, 2 laboratory), OR 4 credits = 4 lecture/laboratory. The numbers will change based on the individual course. Tuition is charged by the contact hour.

Some course descriptions contain two-letter codes indicating that they meet certain general education competencies. The competencies, along with their codes, are listed below:

- Computer Literacy = CL
- Critical Thinking = CT
- Global Awareness = GA
- Government and the Political Process = GP
- Mathematics = MA
- Oral Communication = OC
- Writing = WR

For some courses a prerequisite course or assessment score is required prior to registration. Students who believe that the prerequisite was met through previous college work or work experience may ask the course instructor for permission to waive the prerequisite. It is up to the student to provide the evidence for this waiver request.

DIRECTED STUDY

Directed Study is intended as an enrichment opportunity for the student. It is designed for topics not covered in any other course in the catalog and may take the form of a project or research. The interested student may obtain the appropriate form from the instructor or department chair.

INDEPENDENT STUDY

Any college course described in the catalog may be taken as independent study if there are unusual and extenuating circumstances. However, the student must initiate acceptance and approval for supervision by an instructor and obtain the appropriate form from the instructor or department chair.

SELECTED TOPICS

All disciplines now have a course as follows with the acronym for each discipline – 195 Selected Topics – a course that offers an intensive
investigation of one or more topics of current interest. Topics are to be selected by discipline. Interested students should inform the instructor of their interest at the earliest possible date. Special requirements may be necessary. 1 to 5 credits = 1 to 5 lecture and/or laboratory

**CURRENTLY INACTIVE COURSES**
These courses may be offered in the future. If students are interested in having a currently inactive course listed in the fall, winter, spring or summer schedule, contact the department chair or an instructor in the appropriate area.

Inactive classes are listed at the end of the course descriptions.

**PREREQUISITE WAIVERS**
Any course prerequisite may be waived by the permission of the instructor. Student must contact the instructor for approval.

**KIDS IN COLLEGE**
SC4 offers courses to middle- and high-school students through the Reach Out for College Credit program. These special topic courses are 090 level and are only applicable for general credit at SC4. Course descriptions are not listed for these courses and students should be aware that the courses may/may not transfer to other colleges and universities.
ACCOUNTING
Business Administration Department (810) 989-5575

ACCT 189 College Accounting. This course emphasizes bookkeeping and accounting procedures utilized by sole proprietors in the service and merchandising industries. Focus is on the accounting cycle, double-entry bookkeeping, payroll and basic current and long-term assets and current liabilities. Preparation of worksheets and basic financial statements is studied. This course provides an introduction to accounting and will prepare students for ACCT 211. This course is highly recommended for students with no previous exposure, education or experience in accounting or business.
Prerequisite: None
3 credits = 3 lecture

ACCT 192 Computerized Payroll Accounting. This course emphasizes the laws that affect payroll and human resource administration and the application of those laws to the processing of payroll. This course provides an in-depth study of the processing of and accounting for payroll transactions in a computerized environment.
Prerequisite: ACCT 189
3 credits = 3 lecture

ACCT 211 Principles of Accounting I. This course is designed to explore the study of Generally Accepted Accounting Principles (GAAP) and practices used in business. The focus of this course is on Financial Accounting. Students will study the useful application of recording, adjusting, summarizing and reporting financial data significant to the management and control of a business enterprise. Topics studied include accounting for sole proprietorships, partnerships and corporations with emphasis on service oriented and merchandise firms.
Prerequisite: ACCT 189
4 credits = 4 lecture

ACCT 212 Principles of Accounting II. This course is designed to continue the study of Generally Accepted Accounting Principles (GAAP) and practices used in business. It continues the study of Financial Accounting where ACCT 211 left off. Students will study the useful application of recording, adjusting, summarizing and reporting financial data significant to the management and control of a business enterprise. Topics studied include accounting for long-term liabilities, cash flow analysis and financial statement analysis. In addition, students will begin the study of managerial accounting focusing on concepts of accounting for manufacturing firms including the study of job order and process costing, cost-volume analysis, budgeting, performance analysis, differential analysis and capital investment analysis.
Prerequisite: ACCT 211
4 credits = 4 lecture

ACCT 220 Computerized Accounting. Computerized accounting is an accounting course that is designed to provide students with hands-on experience working with a general ledger software package. Concepts learned will be transferable to and from the course software to software packages encountered in the business world. Students will process business simulations to experience the accounting cycle, processing of accounts payable and accounts receivable, accounting for inventory and fixed assets, processing and accounting for payroll and financial statement analysis.
Prerequisite: ACCT 212
2 credits = 2 lecture
ACCT 231 Intermediate Accounting I. This course is designed to continue the study of Generally Accepted Accounting Principles (GAAP) and practices used in business. The focus of this course is on Financial Accounting. Students will study the useful application of recording, adjusting, summarizing and reporting financial data significant to the management and control of a business enterprise. Topics studied include accounting for corporations and the FASB requirements for more advanced subjects as well as a more in depth study of assets and revenue recognition. Offered fall semester only.
Prerequisite: ACCT 212
4 credits = 4 lecture

ACCT 232 Intermediate Accounting II. This course is designed to continue the study of Generally Accepted Accounting Principles (GAAP) and practices used in business. The focus of this course is on Financial Accounting. Students will study the useful application of recording, adjusting, summarizing and reporting financial data significant to the management and control of a business enterprise. Topics studied include accounting for corporations and the FASB requirements for more advanced subjects as well as a more in depth study of accounting for pensions, debt and equity accounting, accounting for leases, deferred taxes and liabilities and error corrections. Offered winter semester only.
Prerequisite: ACCT 231
4 credits = 4 lecture

ACCT 241 Federal Income Taxation. This course provides basic concepts in federal income taxation, including gross income, exclusions, adjusted gross income, deductions, exemptions, credits, assignment of income, identification of the taxpayer, tax rates, depreciation, and the alternative minimum tax. It also supplies practical exposure in the preparation of personal returns and an introduction to tax research. Business tax topics may include the Michigan business tax, an introduction to Partnership, Subchapter "S," and corporate taxes.
Prerequisite: None
3 credits = 3 lecture

ACCT 251 Cost Accounting. This course expands upon the managerial accounting concepts introduced in ACCT 212. Cost accounting is the primary focus with emphasis on understanding cost accounting concepts and how the use of cost accounting data assists managers in making better business decisions. Key topics covered include cost accounting systems, cost behavior, profit planning through budgets both static and flexible, utilizing cost accounting information for decision-making and capital budgeting.
Prerequisite: ACCT 212
4 credits = 4 lecture

ADVERTISING DESIGN
(See Art and Communication Design)
**AGRICULTURE**

*Engineering Technology Department (810) 989-5754*

**AGR 103 Soil Management.** This course presents a study of the physical and chemical properties of soil. Discussion will include texture, structure, mineral composition, life in the soil, soil water and air, soil chemistry and fertility management. Offered fall semester only.

Prerequisite: None

3 credits, plus 1 contact hour 2 lecture, 2 laboratory

**AGR 104 Computer-Aided Drafting for Landscaping.** This course is intended to provide students with the knowledge needed to apply computer-aided drafting and design skills to landscaping. The course includes study of computer use in scale drawing, materials planning, cost estimating, and in business presentations.

Prerequisite: EG 110 or EG 111 or AD 170

2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

**AGR 105 Introduction to Horticulture.** A study of plant physiology, the principles of plant propagation, and the responses of plants to environmental conditions is the focus of this course. Offered fall semester only.

Prerequisite: None

2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

**AGR 124 Introduction to Forestry.** General information of forestry practices from planting to lumber production is presented. Major areas of study include the importance of forests, tree identification, forestry practices, forest production, conservation, trees and pests. Offered fall semester only.

Prerequisite: None

3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

**AGR 126 Garden and Landscape Maintenance.** The establishment and maintenance of a garden, flower bed, and home landscape is an integral part of this course. Areas covered will include garden soils, organic matter, pest control, starting plants, transplanting, fertilizing, irrigation, shrub and tree maintenance, lawn care and management.

Prerequisite: None

3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

**AGR 127 Landscape Plant Identification & Selection.** This course focuses on the ways that plants complete and enhance the new and/or established landscape. Emphasis will be on landscape project site evaluation including climate and micro-climate, soil analysis, aspect, grade, and suitability of plants for different environments.

Prerequisite: AGR 105

2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

**AGR 150 Landscape Placement Training.** A multi-week work experience intern program is an important part of this course. This placement training offers an intensive but varied experience in all phases of the industry. Students will be under supervision of the employer and the course coordinator. Each 80 hours of placement training fulfills 1 credit hour.

Prerequisite: None

1 to 6 credits = 1 to 6 lecture/laboratory
AGR 202  Integrated Pest Management. The principles of pest identification, life cycles and controls are presented. In addition, the principles/practices of handling and using pesticides and their legal, public health, and environmental implications are discussed. Preventive methods of controlling pests will be emphasized, along with the possible benefits of pest populations. Students will discover how a pest's presence may indicate something about a crop's growing conditions. The effects of the introduction of exotic species will also be discussed. Offered fall semester only.
Prerequisite: None
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

AGR 206  Applied Horticulture. This course offers a study of the practical application of horticultural principles, which includes areas of propagation, selection, and care of ornamental plants. Shrub and tree care, fruit production, and landscaping will also be studied. This course is a once-a-year offering.
Prerequisite: AGR 105
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

AGR 207  Greenhouse Management. This is a practical management course designed to acquaint students with the operation of a greenhouse. Areas of study include pest control, temperature and humidity control, shading, light control, purchasing of supplies and materials, merchandising, structures, and how to design a time schedule to meet the needs of a retail business. Offered winter semester only.
Prerequisite: None
2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

AGR 208  Nursery Management. This is a practical management course designed to acquaint students with the operation of a nursery. Areas of study include purchasing of various types of plant material in different steps of maturity, purchase of supplies, plant nutrition and care of stock from inception to sale. Offered fall semester only.
Prerequisite: None
2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

AGR 209  Turf Management. This course is intended to provide a basic working knowledge of turfgrass. The course includes study of turfgrass career options, biology, uses as ground cover for playing surfaces (from golf to baseball) and in landscaping. This course also covers pest and nutrient management as related to different species of turfgrass.
Prerequisite: None
2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

AGR 227  Landscape Design. This course prepares students for residential and commercial landscape design work. Students will design, draw, and document landscape projects. Discussion will include site evaluation, client preference, functional needs assessment, project programming, portfolio development, materials and cost estimating and budgeting.
Prerequisite: EG 110 or EG 111 or AD 170
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory
AET 100 Electrical Power & Control Circuits I. This course focuses on the fundamentals of relay circuitry, electric motor control, automation, logic circuits, machine tool applications, blueprint reading, laboratory wiring of D.C. motors and A.C. single phase, and three phase motor control. This course is the same as IA 100.
Prerequisite: MTH 101 or appropriate placement by our college assessment or ACT score
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

AET 102 Programmable Logic Controllers. This course introduces students to programmable logic controllers (PLCs). It focuses on the underlying principles of how PLCs work and provides students with the knowledge and "hands-on" training to install, program, modify, interface, troubleshoot, and maintain PLC systems. Programming is done both on- and off-line. No previous knowledge of PLC systems or programming is required. This course is the same as IA 102.
Prerequisite: AET 100 or IA 100 or ELT 130A and ELT 130B
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

AET 143 Fluid Power & Control Circuits I. This course provides an introduction to fluid power. It focuses on the concepts, physical laws, principles of operation and applications of components and circuits found in modern fluid power systems. This course will provide students with the knowledge and "hands-on" training to install, modify, troubleshoot, maintain, and repair fluid power components, circuits, and systems. No previous knowledge of fluid power systems is required. This course is the same as IA 143.
Prerequisite: MTH 101 or appropriate placement by our college assessment or ACT score
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

AET 181 Planning a Sustainable Alternative Energy System. The emphasis of this course will be to design an energy system for either a home or small business. In addition to classroom learning and student research, the student will develop a written plan. The final project goal will be zero energy dependence on the power grid. A final written report with research sources, materials used, drawings, and explanations as to how the goal will be achieved is required, and will be critiqued by fellow students and program advisors.
Prerequisite: None
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

AET 182 Installation & Control of Energy Systems. This course will be an on-site installation of a complete energy system with power and efficiency monitoring and remote sensing. Installation of two or more sustainable energy sources connected to a charge controller and inverter with optional connection to the power grid is required. The wiring of sources to a controller and inverter system to meet safety and local code rules will be achieved.
Prerequisite: AET 181
4 credits = 3 lecture, 1 laboratory

AET 183 National Electrical Code (NEC Handbook). The sections of the National Electrical Code related to high voltage AC wiring for three-phase wind energy turbines with delta and wye connections and proper grounding code rules will be discussed
and illustrated. DC and low voltage circuit wiring and proper ground and code rules will be discussed and illustrated. Rules and regulations regarding Inverters/DC charge controllers and connections to the power grid will be discussed and illustrated. Solar panel wiring and proper connection and termination will be discussed and illustrated.

Prerequisite: ELT 130B or IA 100/AET 100
2 credits = 2 lecture

AET 250 Integrated Facility & Energy Systems Internship. This course consists of work experience in industry relating to facility and energy management (80 hours of work experience related to the objectives equals 1 credit). This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training agreement developed which is agreed upon by the student, employer and the college. Special requirements may be necessary.

Prerequisite: Permission of instructor and first year in Facility and Energy Management Program (GPA ≥ 2.5 in major area of study)
1 credit (80 hours of work experience = 1 credit)

ANTHROPOLOGY
Social Science Department (810) 989-5707

ANT 171 Introduction to Anthropology. This course focuses on the processes of human physical and cultural change and adaptation, with a major emphasis on the principles of social organization in diverse cultures of the world.
Prerequisite: None
3 credits = 3 lecture

ARCHITECTURAL DESIGN
Engineering Technology Department (810) 989-5754

AD 120 Architectural Basics. Fundamentals of line work, lettering, orthographic/pictorial projection, freehand technical sketching and introductory CAD drafting highlight this course. An understanding of architectural building materials and nomenclature will be obtained from lectures and learning how to read architectural building blueprints including floor plans, elevations, sections, details and schedules. Offered fall semester only.
Prerequisite: None
2 credits = 2 lecture/laboratory

AD 121 Structural Basics. The student will learn to identify the structural components that comprise roof, wall, floor and foundation construction including beams and columns. Topics will include construction materials of concrete, masonry, steel and wood. Lectures will include materials and nomenclature of structural components; reading blueprints of structural framing plans and details. Offered fall semester only.
Prerequisite: None
1 credit = 1 lecture/laboratory

AD 122 Civil/Sitework Basics. Students will learn to identify the civil/sitework components associated with building construction. Topics will include property descriptions, topography, excavation, grading, paving, and site utilities. Lectures
will cover materials and nomenclature of civil-related components, and reading site layout, grading, paving and utilities plans and detail sheets. Offered fall semester only. 
Prerequisite: None 
1 credit = 1 lecture/laboratory

**AD 123 Mechanical/Electrical/Plumbing (MEP) Basics.** The student will learn to identify the mechanical/electrical/plumbing (MEP) components integrated into all building construction. Topics will include heating, ventilating and air conditioning systems (HVAC), electrical power and lighting systems, and plumbing drain-waste-vent and water distribution systems. Lectures will include materials and nonmenclature of MEP components and learning to read MEP building blueprints. Offered fall semester only. 
Prerequisite: None 
1 credit = 1 lecture/laboratory

**AD 130 Architectural Drafting.** This course covers fundamentals of linework, lettering, orthographic/pictorial projection, freehand technical sketching and introductory CAD. An understanding of architectural space planning and building assemblies will be obtained from lecture and developing floor plans, elevations, sections, stairways and details. Offered winter semester only. 
Prerequisite: EG 111 
2 credits = 2 lecture/laboratory

**AD 131 Structural Drafting.** This course covers the fundamentals of linework, lettering, orthographic/pictorial projection, freehand technical sketching and introductory CAD drafting. An understanding of structural assemblies will be obtained from lectures and developing foundation plans, framing plans and details. Offered winter semester only. 
Prerequisite: EG 111 
1 credit = 1 lecture/laboratory

**AD 132 Civil/Sitework Drafting.** Fundamentals of linework, lettering and introductory CAD drafting highlight this course. An understanding of site planning topics will be obtained from lectures and performing a zoning analysis and developing a preliminary plot plan, site layout plan, grading and paving plan and a site utilities plan with details. Offered winter semester only. 
Prerequisite: EG 111 
1 credit, plus 1 contact hour = 1 lecture, 1 laboratory

**AD 133 Mechanical/Electrical/Plumbing (MEP) Drafting.** Fundamentals of linework, lettering, symbols and introductory CAD drafting highlight this course. An understanding of HVAC, Electrical and Plumbing design topics will be obtained from lectures and the drafting of a plumbing plan, an HVAC plan and an electrical power and lighting plan. Lecture topics will include figuring drainage fixture units, pipe sizing, heat loss and gain calculations, duct sizing and electrical loading, and circuiting. Offered winter semester only. 
Prerequisite: EG 111 
1 credit = 1 lecture/laboratory

**AD 140 Cost Estimating - Architectural Construction.** This course will focus on analyzing and preparing construction cost estimates for architectural related construction trades, including CSI Divisions 6-14, woods, moisture protection,
openings, finishes, specialties, equipment, furnishings, special construction and conveying systems. Offered fall semester only.
Prerequisite: None
1 credit = 1 lecture

**AD 141 Cost Estimating - Building Structural.** This course will focus on analyzing and preparing construction cost estimates for the structural-related building construction trades including CSI Divisions 3-5, concrete, masonry, and steel. Offered fall semester only.
Prerequisite: None
1 credit = 1 lecture

**AD 142 Cost Estimating - Civil/Sitework.** This course will focus on analyzing and preparing construction cost estimates for the civil/sitework related construction trades including CSI Division 2 Site Construction and Divisions 31-33; earthwork, exterior improvements and site utilities. Offered fall semester only.
Prerequisite: None
1 credit = 1 lecture

**AD 143 Cost Estimating - Mechanical/Electrical/Plumbing (MEP).** This course will focus on analyzing and preparing construction cost estimates for the mechanical/electrical/plumbing (MEP) related construction trades including CSI Divisions 15-16 and 21-28; Mechanical, Electrical, Fire Suppression, Plumbing, HVAC, Integrated Automation, Electrical Systems, Communications and Electronic Safety Services. Offered fall semester only.
Prerequisite: None
1 credit = 1 lecture

**AD 150 Civil Architectural Technology.** Six weeks or more work experience in industry is an integral part of this intensive but varied experience in the student's program of study. This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. A written training program which is agreed upon by the student, employer and the college will be developed.
Prerequisite: None
1 to 6 credits = 1 to 6 lecture/laboratory

**AD 220 3D & CAD Models - Architectural.** Each student will be provided with an architectural design concept for a residential or light commercial building and will be required to construct a three-dimensional scale model of the design and include a mounted perspective drawing for final presentation. Offered winter semester only.
Prerequisite: None
1 credit, plus 1 contact = (1 lecture, 1 laboratory)

**AD 221 3D & CAD Models - Structural.** Each student will be provided with a structural framing concept for a residential or light commercial building. Each student is required to construct a scaled three-dimensional stick-framed model and a computer-aided digital model of the building structural framing system. Offered winter semester only.
Prerequisite: None
1 credit = 1 lecture/laboratory

**AD 222 3D & CAD Models - Civil/Sitework.** Each student will be provided with a site design concept for a residential or light commercial building. Each student will be required to construct a scaled three-dimensional topographical presentation model
and a computer-aided digital model of the site layout plan including a landscape design. Offered winter semester only.
Prerequisite: None
1 credit = 1 lecture/laboratory

AD 224 Construction Specifications Writing. Each student will be provided a set of plans for a residential or light commercial building and will be responsible for writing a complete Construction Specifications for the project. Offered fall semester only.
Prerequisite: None
1 credit = 1 lecture

AD 230 Design Documentation - Architectural. Each student will be provided an architectural design concept for a residential or light commercial building and is required to develop a set of architectural working drawings containing floor plans, elevations, building sections, wall sections and details including stairway layout. Offered fall semester only.
Prerequisite: EG 111 and one of the following: AD 130, AD 131, AD 132 or AD 133
1 credit plus 1 contact = 1 lecture, 1 laboratory

AD 231 Design Documentation - Structural. Each student will be provided with a structural framing concept for a residential or light commercial building and will be required to develop a set of structural working drawings containing the foundation plan, floor framing plans, wall framing plans, roof framing plans and details. Soil mechanics, foundation design, loads analysis, joist, beam and rafter selection will be discussed. Offered fall semester only.
Prerequisite: EG 111 and one of the following: AD 130, AD 131, AD 132 or AD 133
1 credit, plus 1 contact = 1 lecture, 1 laboratory

AD 232 Design Documentation - Civil/Sitework. Each student will be provided with a survey of a parcel of land for development of a residential or light commercial building and will be required to develop a set of civil working drawings containing the site layout plan, site grading and paving plan, site utilities plan, and landscaping plan. Zoning ordinances, legal descriptions, topography, cuts and fills, utilities, and landscaping will be discussed. Offered fall semester only.
Prerequisite: EG 111 and one of the following: AD 130, AD 131, AD 132 or AD 133
1 credit = 1 lecture

AD 233 Design Documentation - Mechanical/Electrical/Plumbing (MEP). Each student will be provided with a mechanical design concept for a residential or light commercial building and will be required to develop a set of mechanical working drawings including plumbing plan, HVAC plan and electrical power and lighting plans. Sanitary drain/waste/vent systems, water distribution, heat loss, heat gain, duct sizing and electrical circuiting will be discussed. Offered fall semester only.
Prerequisite: EG 111 and one of the following: AD 130, AD 131, AD 132 or AD 133
1 credit = 1 lecture

AD 234 Architectural CAD Rendering. Each student will be assigned either a residential or commercial building. Student is responsible for creating a computerized, digital 3D model of the building to the extent necessary to generate and render one final full-color perspective of the building exterior and one final full-color perspective of an interior space. Offered winter semester only.
Prerequisite: None
1 credit, plus 1 contact hour = 1 lecture, 1 laboratory
ART AND COMMUNICATION DESIGN
Visual & Performing Arts Department (810) 989-5709

Course sequence guides are available in the Department Office in the Fine Arts Building.

ACD 110 Advertising Design. This course is an introduction to the basic principles of advertising with emphasis placed on the fundamentals and purpose of print, audio and visual campaigns. Topics covered include the creative process and its application in problem solving, the various types of advertising and their use and application, and methods of visual persuasion. Emphasis is placed on being aware of the vital role advertising plays in communicating major concepts that affect the economy of the business world. Agency structure, cost factors and evaluative methods are discussed. Students will demonstrate an ability to structure and execute creative advertising strategy through the production of a television commercial.
Prerequisite: None
3 credits, plus 1 contact hour = 3 lecture, 1 laboratory

ACD 120 Typography I. Typography is a powerful visual tool, as well as an art form. An idea printed on a page can visually capture a reader - the intonation of that idea is expressed by the typography. This class will provide students with an introduction to the art of typography. Students will explore simple letterforms to complex type composition. In addition, students will learn the names and subtle nuances of typefaces, and the mechanics of type spacing – skills necessary to become a good designer. Offered winter semester only.
Prerequisite: ACD 140
3 credits, plus 3 contact hours = 1 lecture, 5 laboratory

ACD 140 Introduction to Computer Graphics. This course serves as an introduction for the advertising design student to the use of computers, various graphical software applications, and the hardware necessary for producing page compositions used in advertising. This course will enable the student to build a foundation of the necessary skills that are required for entering the advertising design arena. Students must provide their own discs.
Prerequisite: None
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

ACD 220 Typography II. This course is a continuation of ACD 120 Typography. The course develops students’ understanding of typographical principles through practical projects that require them to master computer technologies currently used in various mediums. Offered fall semester only.
Prerequisite: ACD 120
3 credits, plus 3 contact hours = (1 lecture, 5 laboratory)

ACD 230 Illustration Media and Techniques. Students learn various illustration techniques using markers, pen and ink, colored pencils, pastels, gouache, and watercolors in this hands-on course. The skills necessary to produce finished illustrations are integrated into finished art work. Offered fall semester only.
Prerequisite: ART 101 and ART 106 and ART 117
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory
ACD 235  Production Processes. This class provides an opportunity to practice translating design ideas into finished pieces which can be easily produced by a printer. Students investigate several kinds of printing, including letterpress, offset, and gravure, as well as other aspects of publication preparation. Basic design principles and typography for newsletters and advertisements are discussed. Students learn how to plan for a cost-effective publication by studying the capabilities and limitations of the printing. Offered fall semester only.
Prerequisite: ACD 110 and ACD 120
3 credits, plus 3 contact hours = 1 lecture, 5 laboratory

ACD 240  Digital Imaging. This course explores various image editing techniques by using computer programs specifically designed to manipulate and enhance digitized photographs and artwork in a variety of ways. Offered winter semester only.
Prerequisite: ACD 140
3 credits, plus 3 contact hours = 1 lecture, 5 laboratory

ACD 250  Communication Design I. This course offers an introduction to the concept-to-visualization process. The development of a concept is taught, and exercises take students through procedural stages. Discussions of particularly successful concepts widen students’ horizons and provide unique insight. Offered fall semester only.
Prerequisite: ART 117 and ACD 120 and ACD 240
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

ACD 255  Communication Design II. Instruction in this course centers on two-dimensional subject matter, concentrating on the integration of structure and surface as carrier of the message. From basic idea to presentation, the intricacies of constructing a visual solution of a final project will be presented. Offered winter semester only.
Prerequisite: ACD 220 and ACD 230 and ACD 235 and ACD 250
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

ACD 270  Corporate Communications. This course emphasizes the development of an identity for a business, large or small. Students will also learn how to apply the identity system to internal and external applications. Offered winter semester only.
Prerequisite: ACD 220 and ACD 230 and ACD 250
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

ACD 280  Interactive Internet Design. This course serves as an introduction for the communication design student to the internet. The course will cover the design of text and graphics for delivery on the internet. Offered winter semester only.
Prerequisite: ACD 220 and ACD 230 and ACD 250
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

ACD 290  Portfolio Presentation. This course is designed to develop the student’s portfolio with emphasis on personal career objectives. Subjects also covered include how to seek a position, how to interview, and how to develop the point of view of a designer or art director. Concept exhibiting and craftsmanship are investigated in a final sophomore show of work. Offered winter semester only.
Prerequisite: ACD 220 and ACD 230 and ACD 250
1.5 credits, plus 3 contact hours = 1 lecture, 2 laboratory

ART 101  Foundation Drawing. This course is generally directed to all art majors and is recommended as a prerequisite to most studio art classes. Included is a concentration in the fundamentals, knowledge, attitude and skills necessary for the development of visual imagery. This course may be taken concurrently with other courses.
entry level art classes.
Prerequisite: None
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

**ART 102 Watercolor Painting.** The techniques of watercolor painting are explored, emphasizing composition, design and color. Individual thinking, self-expression and interpretation are stressed.
Prerequisite: ART 105 and ART 117
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

**ART 103 Life Drawing I.** This is an introductory course in drawing the human figure. A variety of drawing approaches and the exploration of various media, such as charcoal, ink and chalk are included.
Prerequisite: ART 105
3 credits, plus 3 contact hours = 6 laboratory

**ART 104 Life Drawing II.** This is a continuation of ART 103 in which the student is encouraged to experiment with a wider variety of media and approaches. Watercolor, acrylics and oil techniques will be introduced. An emphasis will be placed on the total composition.
Prerequisite: ART 103
3 credits, plus 3 contact hours = 6 laboratory

**ART 105 Drawing II.** This course is an in-depth survey of drawing media which are applied to the figure, landscape and still life. Offered winter semester only.
Prerequisite: ART 101
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

**ART 106 Basic Design.** The principles of two-dimensional design as a foundation for all work in art are explored in various media. The course concentrates on the basic principles of composition, such as harmony, contrast, rhythm, movement and texture, through simple geometric forms. Students develop their technical skills and design concepts by experimenting with a wide variety of tools and materials through the study of design concepts. Offered fall semester only.
Prerequisite: None
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

**ART 107 3-Dimensional Design.** Three-dimensional problems in the fundamentals of design include projects that are both decorative and functional. Emphasis on form, texture and color are stressed. A variety of media both man-made and natural are explored. Offered winter semester only.
Prerequisite: None
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

**ART 108 Clay Handbuilding.** The focus of this course is on the exploration, interpretation, and understanding of the basic hand building techniques, along with a general understanding of the materials, clays, glazes, kilns and terminology used in clay handbuilding.
Prerequisite: None
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory
ART 108A  Clay Handbuilding. The focus of this course is on the exploration, interpretation, and understanding of the basic hand building techniques, along with a general understanding of the materials, clays, glazes, kilns and terminology used in clay handbuilding. This course provides half of the lab time of ART 108.
Prerequisite: None
1.5 credits, plus 1.5 contact hours = 1 lecture, 2 laboratory

ART 108B  Clay Handbuilding. The focus of this course is on the exploration, interpretation, and understanding of the basic hand building techniques, along with a general understanding of the materials, clays, glazes, kilns and terminology used in clay handbuilding. This course provides half of the lab time of ART 108.
ART 108B is a continuation of 108A.
Prerequisite: ART 108A
1.5 credits, plus 1.5 contact hours = 1 lecture, 2 laboratory

ART 109  Clay Throwing I. This course emphasizes wheel throwing techniques, decoration, glazing and the terminology involved with clay throwing.
Prerequisite: None
3 credits, plus 3 contact hours = 1 lecture, 5 laboratory

ART 109A  Clay Throwing I. The techniques of wheel throwing are explored with emphasis on the basic fundamentals of throwing, tooling, bisqueing, glazing and firing. This course provides half of the lab time of ART 109.
Prerequisite: None
1.5 credits, plus 1.5 contact hours = .5 lecture, 2.5 laboratory

ART 109B  Clay Throwing I. This course is a continuation of 109A with continued emphasis on all aspects of throwing, individual growth, artistic development and the historical development of clay throwing. This course provides half of the lab time of ART 109.
Prerequisite: ART 109A
1.5 credits, plus 1.5 contact hours = .5 lecture, 2.5 laboratory

ART 117 Color Theory. This course is a continuation of ART 106, including two-dimensional design principles with emphasis on color theory and interaction. Offered winter semester only.
Prerequisite: ART 106
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

ART 120 Art Appreciation. This course has a thematic approach to the exploration of the visual arts. Design elements, media, historical periods and movements are presented. These major questions are presented and explored: What is art and how does it work? Why is art made? Who are the artists and who uses the art? This class is for non-art majors.
Prerequisite: None
3 credits = 3 lecture

ART 121 Art of the Western World I. This course is a survey designed to introduce students to the historical and intellectual content of western art history. The class focuses on painting, sculpture and architecture from Paleolithic to late Gothic periods in Europe presented in terms of history, style, meaning and social context. Offered fall semester only.
Prerequisite: None
3 credits = 3 lecture
ART 122 Art of the Western World II. This course is a survey designed to introduce students to the historical and intellectual content of western art history. The class focuses on painting, sculpture and architecture from the Renaissance to the modern period in Europe and America presented in terms of history, style, meaning and social context. Offered winter semester only.
Prerequisite: None
3 credits = 3 lecture  GA

ART 123 Modern Art, Artists & Society. This course is a visual survey of the various art forms created during the 19th and 20th centuries including architecture, painting, photography and sculpture. The course encourages the exploration of art as a visual language and will enhance students’ appreciation and understanding of art as an expression of ideas within regional cultures.
Prerequisite: None
3 credits = 3 lecture  GA

ART 201 Clay Throwing II. This is a course in which emphasis is placed on personal development and expression, techniques, and loading and firing of electric kilns.
Prerequisite: ART 109 or ART 109A and ART 109B
3 credits, plus 3 contact hours = 6 laboratory

ART 201A Clay Throwing II. Emphasis is placed on personal development and expression, decorating techniques, glazing techniques, and loading and firing of electric kilns. This course provides half of the lab time for ART 201.
Prerequisite: ART 109 or ART 109A and ART 109B
1.5 credits, plus 1.5 contact hours = 3 laboratory

ART 201B Clay Throwing II. Emphasis is placed on personal development and expression, decorating techniques, glazing techniques and loading and firing of electric kilns. This course provides half of the lab time of ART 201.
Prerequisite: ART 201A
1.5 credits, plus 1.5 contact hours = 3 laboratory

ART 203 Painting. This class analyzes and discusses problems relative to painting. Various techniques, styles and media will be explored through paintings.
Prerequisite: ART 102 or ART 111
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

ART 204 Raku Pottery. The philosophy and challenge of a traditional Japanese technique is the focus of this course. The history, tea ceremony, clays, glazes, kilns and step-by-step description of reduction techniques and other methods of firing are discussed and analyzed.
Prerequisite: ART 108 or ART 108A and ART 108B or ART 109 or ART 109A and ART 109B
3 credits, plus 3 contact hours = 3 lecture, 3 laboratory

ART 208 Clay Handbuilding II. This course is a continuation of the introductory clay handbuilding class. The student will innovate a more personal style of expression and interpretation of works dealing with scale, surface treatment and glazing based on the introductory techniques already developed.
Prerequisite: ART 108 or ART 108A and ART 108B
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory
**ART 208A  Clay Handbuilding II.** This course is a continuation of ART 108. The student will innovate a more personal style of expression and interpretation of works dealing with scale, surface treatment and glazing based on advanced techniques. This course provides half of the lab time of ART 208. Prerequisite: ART 108 or ART 108A and ART 108B 1.5 credits, plus 1.5 contact hours = 1 lecture, 2 laboratory

**ART 208B  Clay Handbuilding II.** This course is a continuation of ART 208A. The student will innovate a more personal style of expression and interpretation of works dealing with scale, surface treatment and glazing based on advanced techniques already developed. This course provides half of the lab time of ART 208. Prerequisite: ART 208A 1.5 credits, plus 1.5 contact hours = 1 lecture, 2 laboratory

**ASSOCIATE DEGREE NURSING**
*(See Nursing, Associate Degree)*

**ASTRONOMY**
Math and Science Department (810) 989-5663

**AST 104 Astronomy of the Solar System.** This course is an introduction to the astronomy of the solar system, including the Sun, its planets, their satellites, and the solar debris. The course will include discussions of the development of astronomy from ancient times to recent discoveries and experience with the types of mathematical exercises and observations essential to a grasp of the fundamental principles of solar system astronomy. The laboratory for this course is AST 106 – Astronomy, Laboratory. Prerequisite: None 3 credits = 3 lecture

**AST 105 Astronomy of the Stars.** This course is an introduction to the astronomy of the stars, including the sun and associated important stars and constellations. The course will include discussions of the development of astronomy from ancient times to recent discoveries and hands-on experience with the types of mathematical exercises and observations essential to a grasp of the fundamental principles of stellar astronomy. The laboratory for this course is AST 106 – Astronomy, Laboratory Prerequisite: None 3 credits = 3 lecture

**AST 106 Astronomy, Laboratory.** This course is the laboratory course associated with AST 104 (Astronomy of the Solar System) and AST 105 (Astronomy of the Stars). It provides hands-on experience with the methods and instruments of the physical sciences as they relate to astronomy. NOTE: Students can only receive credit once for AST 106. Students must have completed or be concurrently enrolled in either AST 104 or AST 105. Prerequisite: None 1 credit, plus 1 contact hour = 0 lecture, 2 laboratory
BIOLOGY
Math and Science Department (810) 989-5663

BIO 100 Contemporary Biology. This course will acquaint the student with the major concepts of the biological sciences through scientific investigation, and the special relevance of biology in today’s society. Topical areas of study will include cellular and supracellular organization of life, energy relations, biological control, behavior, reproduction, development, heredity, evolution, ecology, and current biological issues. Prerequisite: None
4 credits, plus 2 contact hours = 3 lecture, 3 laboratory

BIO 150 Natural History. Natural history will enhance the student’s understanding of the world of nature. Field experiences will be conducted to enable students to accurately identify native plants, animals, and rocks and minerals in their natural setting. Methods of collection, maintenance, and display of specimens will be provided. Prospective teachers, camp counselors, nature lore instructors, scout leaders and others desiring to learn more about their natural surroundings may find this course to be of value. Prerequisite: None
4 credits, plus 2 contact hours = 2 lecture, 4 laboratory

BIO 160 Anatomy and Physiology for Health Care Professionals. This course is designed for health care professionals and deals with the structures and functions of the human body. The emphasis is placed on the application of the principles of human anatomy and physiology to help provide students with an adequate background to carry out health care duties. Prerequisite: BIO 100 recommended
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

BIO 171-172 Human Anatomy and Physiology I and II. These courses provide a study of the scientific principles related to the anatomy and physiology of the human body. Major concept areas include general organizational features, the molecular, cellular and tissue organization of the body and human inheritance as well as the anatomical and physiological characteristics of each of the body systems. The completion of courses in high school of biology and chemistry before enrollment in BIO 171-172 is highly recommended. It is strongly recommended that the BIO 171-172 sequence be completed.

BIO 171 Human Anatomy/Physiology I. The major concept areas emphasized in this course include the general organizational features of the body, cellular and tissue organization, and the anatomical and physiological characteristics of the skeletal, muscular, nervous and endocrine systems. Prerequisite: BIO 100 recommended
3 credits, plus 2 contact hours = 2 lecture, 3 laboratory

BIO 172 Human Anatomy/Physiology II. The major concept areas emphasized in this course include the anatomical and physiological characteristics of the digestive, respiratory, circulatory, excretory and reproductive systems as well as those of molecular organization of the human body, human metabolism and human inheritance. Prerequisite: BIO 160 or BIO 171
3 credits, plus 2 contact hours = 2 lecture, 3 laboratory

231
**BIO 200 Introductory Botany.** Introductory botany introduces the student to diverse structures of major plant groups, life processes, inheritance, evolution and environmental relationships of plants. This course is a once-a-year offering.
Prerequisite: BIO 100 or two years of high school Biology
5 credits, plus 2 contact hours = 3 lecture, 4 laboratory

**BIO 205 Medical Microbiology.** This course provides a general study of microorganisms. Major topics considered in this course include host-parasite relationship, defenses of the host, communicable diseases, microbial control, microbial culturing, and techniques of immunology.
Prerequisite: BIO 100 or BIO 160 or BIO 171
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

**BIO 206 Microbiology.** This course provides a general study of microorganisms. Major topics considered in this course include microbial taxonomy, anatomy and physiology of microorganisms, microbial bases of disease, as well as those of microbial control and economic significance. Techniques of culturing and identification of microorganisms are emphasized in the laboratory. The course is designed for biology majors, medical technology students, and related allied health fields. A previous course in college chemistry is recommended.
Prerequisite: BIO 100 or BIO 160 or BIO 171
5 credits, plus 2 contact hours = 3 lecture, 4 laboratory

**BIO 250 General Zoology.** This course is designed to assist students in learning about the evolutionary relationships of the major animal groups. Further emphasis will include comparative anatomy and physiology, ecology, classification, behavior and economic values of major animal representatives. This course is a once-a-year offering.
Prerequisite: BIO 100 or two years of high school Biology
5 credits, plus 2 contact hours = 3 lecture, 4 laboratory

**BIO 270 Environmental Issues.** The major approach in this course is with cultural evolution, technological pollutants, population patterns, energy consumption, land use and how humans impact the environment. Additional emphasis will be placed upon the economic, political and educational relationships dealing with those decisions that affect the values which bring about social changes.
Prerequisite: None
3 credits = 3 lecture

**BIO 280 Pathophysiology.** Pathophysiology is a biological introduction to the study of disrupted normal functioning of the human body. Emphasis is placed on various physiological concepts with related pathological implications.
Prerequisite: BIO 172
4 credits = 4 lecture

**BROADCASTING** (See Communications Media)
BUSINESS ADMINISTRATION
AND ECONOMICS
Business Administration Department (810) 989-5575

BUS 150 Principles of Business. This course covers the fundamentals of the following: career choices, trends and economic issues affecting business, forms of business ownership, entrepreneurship and franchising, starting a small business, marketing principles, pricing, distribution, wholesaling and retailing, promotion and marketing research, management and leadership, organizing a business, production and operations management, management tools for information processing, motivating employees, human resource management, employee management issues, accounting fundamentals, financial management, stocks and bonds, financial institutions, insurance, legalistic versus ethics-based management and international business.
Prerequisite: None
4 credits = 4 lecture

BUS 153 Business Law. This course is a practical approach to law that emphasizes current and relevant topics students need to understand about business transactions and issues, such as contracts, property, employer/employee relations, and insurance.
Prerequisite: None
3 credits = 3 lecture

BUS 155 Principles of Management. This course surveys principles and practices of business from the point of view of the manager as well as that of the employee. The course also presents a detailed development of the functions of management.
Prerequisite: None
3 credits = 3 lecture

BUS 158 Business Math. This course focuses on the application of mathematics fundamentals to a variety of business/consumer situations including, but not limited to: payroll, interest, present value, pricing, investments, taxes and use of percents. The course also covers basic math and elementary algebra concepts.
Prerequisite: Successful completion of the Math Assessment Test or MTH 050
4 credits = 4 lecture

BUS 180 Marketing Principles. This course is an introduction to the marketing concept and its role in overall business strategy. It covers identifying segmentation, differentiation, target marketing and positioning opportunities that can be addressed with the proper marketing mix. All of this is taught in the context of today’s complex global environment.
Prerequisite: BUS 150
4 credits = 4 lecture

BUS 181 Professional Selling. This class covers the basic fundamentals of professional selling which consists of developing a presentation strategy, planning the pre-approach, the approach, demonstration, negotiation, close and servicing the sale.
Prerequisite: None
3 credits = 3 lecture
BUS 185 Principles of Retailing. This class is designed to give the prospective store or franchise owner or manager the necessary background for a successful career in retailing. The material covered will include current practices and methods as well as equipment used in retailing. The topics include store layout, management of personnel, the buying function, retail advertising and control procedures. This course is a once-a-year offering.
Prerequisite: BUS 180
3 credits = 3 lecture

BUS 188 Directed Business Study. The study will be directed by a business instructor. Activities may include research, projects, papers, examinations, field training or employment.
Prerequisite: Permission of instructor.
1 to 4 credits = 1 to 4 lecture/laboratory

BUS 199 Personal Finance. An analysis of the fundamental principles of personal financial planning and the primary focus on family financial management. The emphasis will be on developing terminology, and understanding the nuances of budgeting and tax planning, managing liquidity, personal finance, wealth protection, personal investing, retirement and estate planning. An analysis of personal objectives and financial planning will be utilized to develop a comprehensive financial plan.
Prerequisite: None
3 credits = 3 lecture

BUS 221 Principles of Economics I. General economic concepts will be examined by covering the following: the nature and method of economics, an introduction to the economizing problem, pure capitalism and the circular flow, understanding individual markets - demand and supply, the fundamental market questions, the economic functions of government, the facts of American capitalism - the private sector and the public sector, measuring national output, national income and the price level, macroeconomic instability - unemployment and inflation, aggregate demand and aggregate supply, classical and Keynesian theories of employment, equilibrium national output in the Keynesian model, fiscal policy, money and banking, how the banks create money, the Federal Reserve Banks and monetary policy, budget deficits and the public debt and economic growth.
Prerequisite: 20 credit hours completed
3 credits = 3 lecture  GA  CT

BUS 221H Honors Principles of Economics I. General economic concepts will be analyzed by examining the nature and method of economics and the economizing problem; characteristics of individual markets regarding supply and demand, pure capitalism, and the market system; private and public sectors of the economy; measuring domestic output, national income, macroeconomics instability, unemployment, the price level and inflation; the aggregate expenditures model with reference to demand and supply, the multiplier, net exports, and the government; fiscal and monetary policy; money and banking, including the Federal Reserve Banks and how banks create money. Also explored will be alternative views on macroeconomic theory and policy, the relationship between inflation and unemployment, the public debt, budget deficits, economic growth, and the place of the United States in the global economy. Emphasis will be placed on application of the economic principles.
Prerequisite: 20 credit hours completed and acceptance into the Honors Program
3 credits = 3 lecture  GA  CT
BUS 222 **Principles of Economics II.** General economic concepts will be examined by covering the following: demand, supply and elasticity, the theory of consumer behavior, the costs of production, price and output determination under conditions of pure competition, pure monopoly, monopolistic competition and oligopoly, production and the demand for economic resources, wage determination, rent, interest and profits, general equilibrium in a market system, government and economic policy including antitrust and regulation, the agricultural problem, the problems of the cities, the economics of health care, income distribution, labor market issues-unionism, discrimination and immigration, international trade, exchange rates, the balance of payments, the trade "crisis," growth and the less developed countries, and the global economy.

Prerequisite: BUS 221 or BUS 221H

3 credits = 3 lecture

**GA CT**

BUS 222H **Honors Principles of Economics II.** Microeconomic concepts will be examined by covering the following: demand, supply and elasticity, the theory of consumer behavior, the costs of production, price and output determination under conditions of pure competition, pure monopoly, monopolistic competition and oligopoly, production and the demand for economic resources, wage determination, rent, interest and profits, general equilibrium in a market system, government and economic policy including antitrust and regulation, the agricultural problem, the problems of the cities, the economics of health care, income distribution, labor market issues-unionism, discrimination and immigration, international trade, exchange rates, the balance of payments, the trade "crisis," growth and the less developed countries, and the global economy.

Prerequisite: BUS 221 or BUS 221H and acceptance to the Honors Program

3 credits = 3 lecture

**GA CT**

BUS 257 **Supervision Management.** This course will help the student develop the skills and knowledge necessary to become an effective supervisor. Emphasis will be on supervision principles and the application of those principles to supervision practices.

Prerequisite: BUS 155

3 credits = 3 lecture

BUS 258 **Human Resources Management.** This course focuses on the fundamentals of human resource management (HRM). Major areas of focus are on understanding HRM, legal and ethical issues in HRM, staffing, training and development, high performance work systems and labor relations. Students will perform many tasks in a team environment including case analyses and an in-depth interview project. Through the completion of the interview project, students will have an opportunity to complete the staffing process from both sides of the interview table as an interviewer and as an applicant.

Prerequisite: BUS 155

3 credits = 3 lecture

BUS 259 **Management Internship.** This internship provides students with a "real-world" experience in management. Students will work in a business setting performing functions of management such as: planning, leading, organizing and controlling. Students may take from a one to three credit internship. Each credit hour requires fifty hours of work. Periodic reports will be provided by the employer to the internship coordinator to discuss progress and problems. The employer and the student will
complete performance appraisals at the end of the internship. The student will complete a term paper relating the theories of management to the internship experience.
Prerequisite: BUS 155
1 to 3 credit hours = 1 to 3 contact hours

**BUS 261 Marketing Internship.** This internship provides a work experience arrangement for students in the Associates Degree in Marketing program. Between fifty (1 credit) and one hundred fifty (3 credits) hours of work experience is necessary to complete the program. Regular updates will be held with the advisor to discuss experiences and problems. An appraisal will be completed by the employer and a term paper or Marketing Project will be required from the student. Completion of the internship will provide the student with work experience in the area of Marketing and provide an opportunity to network and possibly find a job in the field of Marketing.
Prerequisite: BUS 180
1 to 3 credit hours = 1 to 3 contact hours

**BUS 270 Applied Management Capstone.** This is a capstone course which extends the knowledge of the student beyond the management principles level. Emphasis will be on the application of management concepts and principles to real world management situations. The mode of instruction will be varied, using lectures, reading assignments, group projects, case analysis and field interviews.
Prerequisite: BUS 150, BUS 257, BUS 258, ACCT 211
3 credits = 3 lecture OC CT

**CAREER DEVELOPMENT** (See Student Development)

**CHEMISTRY**
Math and Science Department (810) 989-5663

Two sequences in chemistry are available to the entering student. Certain fundamental concepts of investigation are common to all students in chemistry. Those students enrolling in a curriculum requiring a strong background in chemistry should take CHM 111 and CHM 112. Those desiring only an introduction to general chemistry and organic/biochemistry should consider CHM 101 and CHM 102.

**CHM 101 Introduction to Inorganic Chemistry.** Several foundation concepts of inorganic chemistry are presented. The emphasis is placed on measurement, atomic and molecular theories and models, states of matter, fundamental stoichiometry, and reaction theory. Applications, some theory, and the scientific method of thought are stressed. Laboratory experiments are designed to enhance these basic chemical principles and provide techniques of data gathering and communication.
Prerequisite: MTH 102 or higher
4 credits, plus 3 contact hours = (4 lecture, 3 laboratory)

**CHM 102 Introduction to Organic and Biochemistry.** The organic chemistry segment considers the carbon atom, the classical functional groups, their definition, structure and bonding, systematic nomenclature, properties and reaction. The biochemistry segment examines fundamental organic molecules that occur in living organisms (biomolecules), in addition to considering the dynamic sequential reactions that interrelate these molecules. The laboratory is used to enrich the students’
experience by demonstrating techniques and establishing relationships to the topics under consideration. Offered winter semester only.
Prerequisite: CHM 101
4 credits, plus 3 contact hours = 4 lecture, 3 laboratory

CHM 111 Chemistry Theory and Principles with Analysis. A primary emphasis is placed on fundamental chemical concepts and problem solving. Topics of measurement, number analysis, nomenclature, atomic and molecular modeling, reaction stoichiometry, states of matter and solution chemistry are considered. The laboratory is directed toward development and improvement of fundamental techniques, collection of data, analysis of these data, drawing conclusions and communication of information to others.
Prerequisite: MTH 110 or higher
5 credits, plus 2 contact hours = 4 lecture, 3 laboratory

CHM 112 Chemistry Theory and Principles with Analysis. This is a continuation of CHM 111 in theory and calculations. Emphasis is placed on topics of introductory physical chemistry; for example, kinetics, equilibrium, thermodynamics, electrochemistry and coordination compounds. The laboratory will consider data that relates to these major topics in a quantitative approach. The study of qualitative analysis of selected ions is also considered. Offered winter semester only.
Prerequisite: CHM 111
5 credits, plus 3 contact hours = 4 lecture, 4 laboratory

CHM 210 Instrumental Analysis. A survey of practices and techniques in chemical analysis and of common spectroscopic, separation, electrochemical, and instrumental methods will be provided. The course provides a framework that can be used to understand new and old techniques, the theory behind a variety of specific techniques and the current practices. Interpretation of the output of these devices will be discussed, but the emphasis will be on the components within the instrumentation (inside the box), on the techniques used to obtain better output and better chemical knowledge from the output, and on the similarities between the different techniques.
Prerequisite: CHM 111; CHM 112 recommended
5 credits, plus 3 contact hours = 4 lecture, 4 laboratory

CHM 215 Organic Chemistry I. This class serves as an introduction to the nomenclature, reactions and synthesis of aliphatic and aromatic compounds and alkyl halides. Physical, structural and spectral properties of the various hydrocarbon subgroups are integrated with chemical bonding principles, reaction concepts and stereochemistry. The laboratory is designed to develop the techniques needed for product isolation, purification and identification of organic compounds. Offered fall semester only.
Prerequisite: Successful completion of CHM 112
5 credits, plus 3 contact hours = 4 lecture, 4 laboratory

CHM 216 Organic Chemistry II. The major functional groups based upon oxygen, nitrogen and sulfur are covered. The reactions of these compounds are approached from a mechanistic perspective including inductive, resonance, thermodynamic, kinetic and equilibrium effects. Special topics include polymers, intramolecular rearrangements and photochemical reactions. In the laboratory, emphasis is on the accomplishment of major classes of organic reactions and synthesis. Offered winter semester only.
Prerequisite: CHM 215
5 credits, plus 3 contact hours = 4 lecture, 4 laboratory
CHILDHOOD DEVELOPMENT
(See Early Childhood Education)

CHINESE
Communications Department (810) 989-5578

CHI 101 Introductory Mandarin Chinese I. The essentials of the Chinese language and culture are introduced in this course. Students begin to achieve basic facility in speaking, understanding, reading, and writing the Pinyin language as well as acquiring insight into Chinese life and customs. Students are provided with rich opportunities to interact with native Chinese language speakers in voice and text chat in the Chinese School in Second Life virtual world.
Prerequisite: None
4 credits = 4 lecture

CHI 102 Introductory Mandarin Chinese II. In this course, students will gain deeper understanding of Chinese language and culture. Weekly synchronous group learning activity is emphasized in this course to enhance real time student-instructor and student-student interaction. Students will be able to access a virtual community, in Second Life, called Chinese School, where students can view multimedia content, and chat with native Chinese speaking instructors, tutors and peers. More importantly, students will be immersed into a virtual Chinese environment where many cultural objects and artifacts are embedded. Group problem solving projects embedded in the Second Life Chinese School will be both engaging and instructive for students to collaboratively explore the Chinese vocabularies and structures. Groups of students will co-quest the language and culture challenges in the Second Life Chinese School.
Prerequisite: CHI 101
4 credits = 4 lecture

COMMERCIAL ART (See Art and Communication Design)

COMMUNICATIONS MEDIA
Communications Department (810) 989-5578

CM 101 Introduction to Mass Media. An introduction to all mass communications media, this course includes a review of the history of the development of mass media in the areas of television, radio, newspapers, magazines, books and film. Students participate in discussions, projects and readings that focus on the importance and significance of mass media in all of contemporary life.
Prerequisite: None
3 credits = 3 lecture

CM 102 News Writing. Emphasis is placed on the daily newspaper. The fundamentals of news writing, highlighting style and structure are also stressed. Practical experience may be given in covering assignments for the college newspaper and radio station. This course is a once-a-year offering.
Prerequisite: None
3 credits = 3 lecture
CM 103 Basic Photography. This class presents a survey of the history of photography that includes an introduction to the camera - its lens opening, shutter speeds and effective lighting techniques. Photographic darkroom techniques including film processing and print development are also discussed and practiced. This class is open to all students. Digital camera required.  
Prerequisite: None  
3 credits, plus 2 contact hours = 2 lecture, 3 laboratory

CM 104 Radio/Television Production. Students will produce programs for St. Clair County cable television in this introduction to performing, directing and producing campus based television programs. Students also host their own radio programs on the campus AM radio station. Students will make audition tapes for both radio and television employment opportunities. Offered fall semester only.  
Prerequisite: None  
3 credits, plus 2 contact hours = 3 lecture, 2 laboratory

CM 110 - 114 Journalism Practicum I - V. The student will have supervised experience producing the college newspaper, the Erie Square Gazette. The practicum student earns credit working in news writing, advertising, photojournalism or composition. No previous experience is necessary. Four semester hours are required in the Journalism degree program. Students may follow the course sequence CM 110 through 114, practicums I through V.  
Prerequisite: None  
1 credit each = 1 lecture/laboratory

CM 115 - 118 Radio Broadcasting I - IV. There will be supervised study in the college radio station, WSGR-FM. Students are expected to work in the station a minimum of two hours per week during the semester. The student will learn to operate radio equipment and to produce his or her own radio program for the station. Opportunities to work in news, sports, public service, music and programming will be available. Students may receive credit for each of four semesters. Four semester hours are the maximum amount of credits to be earned at one credit per semester. No previous experience is necessary. The student will work a minimum of 32 hours on air and on related assignments to earn one credit hour. Student may follow the course sequence CM 115 through 118, practicums I – IV.  
Prerequisite: None  
1 credit each = 1 lecture/laboratory

CM 200A/C Internship in Broadcasting I and II. This internship is meant to give students the opportunity to practice skills learned in class in a real work setting. Students who are recommended by a communications instructor make an application to the area of communications business that they are interested in working with. If the business is willing to participate, the student will work either 20 or 40 hours per week for the duration of the semester for either 3 or 6 hours of credit. Offered fall, winter, spring and summer semesters.  
Prerequisite: Permission of instructor  
3 credits each = 3 lecture/laboratory

CM 200B/D Internship in Journalism I and II. This internship provides experience for the journalism student at one of our area newspapers. Students are required to work 20 to 40 hours per week for either 3 or 6 hours of credit. Approval must
be obtained from the journalism instructor and the newspaper. Offered fall, winter, spring and summer semesters. Special requirements may be necessary; check with instructor.
Prerequisite: Permission of instructor
3 credits each = 3 lecture/laboratory

CM 201 Editing. This course will help the student become proficient in copy reading, headline writing and styles, and in laying out a newspaper or house magazine correctly.
Prerequisite: None
2 credits = 2 lecture/laboratory

CM 202 Advanced News Writing. This course is a continuation of CM 102 and is intended to provide practice in reporting more complex and specialized stories and to study how news is obtained from the various governmental and community agencies. This course is a once-a-year offering.
Prerequisite: CM 102
3 credits = 3 lecture

CM 203 Photojournalism. This course introduces students to the fundamentals of news photography, including composition, layout, cropping, and general photographic editing for publication. Laboratory exercises include photographic assignments, darkroom techniques and picture essays. This course is a once-a-year offering. Digital camera required.
Prerequisite: CM 103
3 credits, plus 2 contact hours = 2 lecture, 3 laboratory

CM 204 Advanced Television Workshop. Students will learn fundamentals of television anchoring, weather and sports casting and street reporting. Students will work on producing cable television programming focusing on St. Clair County. Programs will include County Government Beat, Spotlight on the County Sheriff’s Department, and Today in St. Clair County. Work completed in the semester will be added to each student’s audition tape résumé.
Prerequisite: CM 104
3 credits, plus 2 contacts = 3 lecture, 2 laboratory

CM 206 Radio and TV Production Workshop. News and public affairs programming will be the focus of this course. Students will work on a weekly SCR-TV newscast originating from campus studios in the Wismer Communications Center. The newscast will appear on St. Clair County cable television. Students will work on daily newscasts on the campus FM radio station, WSGR. News programs will include campus news, city and county news, sport, weather and entertainment. Students will gain experience through working with National Public Radio Broadcasts and Public Radio International programming. This course is a once-a-year offering.
Prerequisite: CM 104
3 credits, plus 2 contacts hours = 3 lecture, 2 laboratory

CM 208 Radio/Television Writing. This course is designed to provide students with the basic knowledge necessary to function as employees in the news or copywriting departments of commercial radio, public radio, or television stations. Students develop writing skills and interviewing techniques that are basic to news department operation, and they develop skills necessary to write and produce radio and television
commercials. Laboratory time will be spent writing and assembling copy for WSGR
newscasts and for a college-oriented television newscast produced for cable. This
course is a once-a-year offering.
Prerequisite: ENG 101
3 credits, plus 1 contact hour = 3 lecture, 1 laboratory

CM 209 Introduction to Digital Photography. This course introduces students to
the study of pixel-based photography and the process of creating images and storing
images using digital cameras, computer based media or digital media. Artistic,
thetical, ethical and technical aspects of digital photography will also be studied.
Other topics to be covered include what to look for when buying a digital camera; the
tory, mechanics and art of digital imagery; digital darkrooms; the process of digital
photo taking; stitching photos for virtual reality and preparing digital images for print,
World Wide Web and other digital media.
Prerequisite: CM 103 and CIS 115, or permission of instructor
3 credits, plus 2 contact hours = 2 lecture, 3 laboratory

COMPUTER-AIDED DRAFTING AND DESIGN
(See Engineering Graphics)

COMPUTER INFORMATION SYSTEMS
Computer & Office Technology Department (810) 989-5628

CIS 110 CIS Concepts and Careers. This course examines the impact of computers
on business, society and the individual. Topics include the evolution of computers;
the information processing cycle; components of an information system; usage of the
computer as an information gathering tool; basic hardware and software terminology
and concepts; information system design and development; data communications,
networking, the Internet; and exploration of computer-related careers.
Prerequisite: None
4 credits = 4 lecture/laboratory

CIS 112 Enhanced Data Cabling Installers Certification. This course prepares
students to sit for the vendor-neutral, Data Cabling Installer Certification exam which
is administered by the Evolving Technologies Association International (ETAI). This
exam assesses the ability to correctly design, install, and test Category 5 Network
Cable. This course provides all of the theory necessary to understand the concepts
behind cabling standards and to pass the theory examination. It prepares the student
to actually perform the tasks required of a cable installer. This course would also
be appropriate for those involved in the commercial construction industry as well as
computer service and network administration personnel.
Prerequisite: None
2 credits = 2 lecture/laboratory

CIS 115 Microcomputer Applications. This is a hands-on class using the
microcomputer in a variety of applications, including word processing, electronic
spreadsheet and database management. The course will emphasize systems as well
as applications software. Fundamentals such as identifying computer hardware, file
management and problem solving methodologies will be presented.
Prerequisite: None
4 credits = 4 lecture/laboratory CL
CIS 120 Introduction to Networking. This course gives students a broad overview of the networking industry. The course will cover common concepts of the technologies, topologies, protocols and standards that are used in networking. This course will provide the basic knowledge needed in all subsequent networking courses. 
Prerequisite: None
4 credits = 4 lecture/laboratory  CL

CIS 121 Introduction to Local Area Networks. This course covers local area network (LAN) physical media, layer 2 architectures, and network operating systems in detail. The course examines the advantages and disadvantages of common cable infrastructure, and provides guidelines for when each is appropriate. During this course students will examine the leading network operating systems and their administration. Wide area network considerations will be introduced. The course concludes with general LAN considerations and a case study. Offered fall semester only.
Prerequisite: CIS 120
4 credits = 4 lecture/laboratory  CL

CIS 122 Wide Area Networks. Participants in this course learn the technologies used to move voice and data across long distances. They will discover important new technologies such as Asynchronous Transfer Mode (ATM) that integrate voice, data and video communications. Basic concepts of how information is transported over a wide area network (WAN), from physical layer to application layer, and how these technologies work is also reviewed. Offered fall semester only.
Prerequisite: CIS 120
4 credits = 4 lecture/laboratory  CL

CIS 123 TCP/IP. The world's largest network, the Internet, is also one of the world's most powerful communication tools. Learn the underlying applications, components and protocols of TCP/IP and its necessary link to the Internet. This course will help participants learn how to identify TCP/IP layers, components and functions. Navigation tools, TCP/IP services, utilities and troubleshooting methodologies are also covered. Offered winter semester only.
Prerequisite: CIS 120
4 credits = 4 lecture/laboratory  CL

CIS 130 Operating Systems. This course provides an introduction to current microcomputer operating systems from an end-user perspective. Functions common to all operating systems will be examined. Through lecture and hands-on exercises, students will explore concepts and usage of several different systems such as: MS-DOS, Microsoft Windows™ and Unix.
Prerequisite: CIS 115
4 credits = 4 lecture/laboratory  CL

CIS 150 Programming Concepts. This course provides an introduction to general programming topics such as: the program development cycle, data types and control structures, structured programming principles, problem solving, basic algorithms and data validation.
Prerequisite: MTH 102 or BUS 158
2 credits = 2 lecture/laboratory

CIS 160 A+ Certification. This is an introductory course on how the computer works at the hardware level. Students will learn the basics of upgrading, maintaining and repairing a computer. Topics include the system board, BIOS, DOS, floppy drives,
hard drives, peripheral devices, memory, troubleshooting, supporting Windows and others. This course prepares the student to take the A+ Certification exam. This course is the same as ELT 160.
Prerequisite: CIS 110
4 credits = 4 lecture/laboratory

CIS 200 - Electronic Spreadsheets. This course focuses on the capabilities, features and usage of electronic spreadsheet software. Particular attention is given to the application of these spreadsheet tools in the solution of practical problems from business, finance, science and other areas. Through lecture and hands-on exercises, students will examine the skills which are needed to make effective use of spreadsheets including: worksheet design, problem organization, use of advanced functions, data manipulation, advanced charts and graphs, spreadsheet automation and presentation of results.
Prerequisite: CIS 115
4 credits = 4 lecture/laboratory

CIS 202 Microcomputer Databases. This course addresses the design, creation and management of relational databases. Topics covered include database fundamentals, the use of the database management software, the fundamentals of application development and the use of the data management topics such as structured query language (SQL). Emphasis is placed on “hands-on” use of popular personal computer database software. Students will be expected to design and develop a real-world database application.
Prerequisite: CIS 115
4 credits = 4 lecture/laboratory

CIS 205 Internet Development I. This course provides an introduction to development and management of content for the Internet, specifically the World Wide Web (WWW). Techniques for planning, developing, organizing and maintaining WWW content and sites will be addressed. Through lecture and hands-on exercises, students will explore concepts and usage of HTML, Web-creation and management software, and basic web scripting tools.
Prerequisite: CIS 115
4 credits = 4 lecture/laboratory

CIS 221 Packets and Protocols. This is an advanced course intended for networking professionals and students who already grasp the general concepts of data communications and networking, but would like a more detailed understanding of the processes and protocols used in today’s networks. Network architectures will be discussed from an Open System Interconnect (OSI) model perspective of the networking protocol stack, and a detailed analysis of the protocols will ensue using traces taken with protocol analyzers.
Prerequisite: CIS 120
4 credits = 4 lecture/laboratory

CIS 225 Network Security. This course exposes students to some of the security issues facing today’s networks. Topics covered include communication security, infrastructure security, cryptography, access control, authentication, external attack and operational and organizational security. The course will also feature a discussion
of current events and recent security challenges. The course prepares students to sit for the CompTIA Security+ Certification examination. CompTIA Security+ prepares students for advanced security certifications.
Prerequisite: CIS 120
4 credits = 4 lecture/laboratory   CL

CIS 227A Special Topics in Networking. This course is an in-depth study or one or more current topics in Computer Information Systems. Topics will be selected by the discipline.
Prerequisite: None
3 credits = 3 lecture/laboratory   CL

CIS 227B Special Topics in Networking. This course is an in-depth study or one or more current topics in Computer Information Systems. Topics will be selected by the discipline.
Prerequisite: None
4 credits = 4 lecture/laboratory   CL

CIS 228A Special Topics in Cisco Networking. This course is an in-depth study of one or more current topics in networking with Cisco devices and tools. Topics will be selected by the discipline.
Prerequisite: CIS 120; other prerequisites may apply; see online schedule.
3 credits = 3 lecture/laboratory   CL

CIS 228B Special Topics in Cisco Networking. This course is an in-depth study of one or more current topics in networking with Cisco devices and tools. Topics will be selected by the discipline.
Prerequisite: CIS 120; other prerequisites may apply; see online schedule.
4 credits = 4 lecture/laboratory   CL

CIS 229A Special Topics in Networking Security. This course is an in-depth study of one or more current topics in Computer Networking Security. Topics will be selected by the discipline.
Prerequisite: CIS 120; other prerequisites may apply; see online schedule.
3 credits = 3 lecture/laboratory   CL

CIS 229B Special Topics in Networking Security. This course is an in-depth study of one or more current topics in Computer Networking Security. Topics will be selected by the discipline.
Prerequisite: CIS 120; other prerequisites may apply; see online schedule.
4 credits = 4 lecture/laboratory   CL

CIS 233 Linux+ Certification. This course prepares students to sit for the CompTIA Linux+ Certification examination. Linux+ Certification validates technical competency and provides a broad awareness of Linux operating systems. Students will install, configure, use, maintain, administer and troubleshoot Linux systems. This course will cover a variety of distributions, including Red Hat/Fedora. Offered winter semester only.
Prerequisite: CIS 130
4 credits = 4 lecture/laboratory   CL

CIS 235 Internet Development II. This course focuses on the design of effective websites including page layout, navigation design and graphic design. The course includes working with forms, images, video, audio, and interactive page elements.
Students will create their own Web pages and websites utilizing intermediate web
development tools.  
Prerequisite: CIS 205  
4 credits = 4 lecture/laboratory  CL

CIS 236 Interactive Web Programming. This course provides an introduction to
technologies and tools used to create dynamic, interactive websites. Both client side
and server side technologies will be examined. Programming projects will emphasize
the usage of tools such as: Java, VBScript, JavaScript, PHP, ASP, Perl, Python, CGI
or other technologies as available. Offered winter semester only.  
Prerequisite: CIS 130 and CIS 260 or CIS 275  
4 credits = 4 lecture/laboratory  CL

CIS 237A Special Topics in Operating Systems. This course is an in-depth study
of one or more current topics in computer operating systems. Topics will be selected
by the discipline.  
Prerequisite: CIS 130; other prerequisites may apply; see online schedule.  
3 credits = 3 lecture/laboratory  CL

CIS 237B Special Topics in Operating Systems. This course is an in-depth study
of one or more current topics in computer operating systems. Topics will be selected
by the discipline.  
Prerequisite: CIS 130; other prerequisites may apply; see online schedule.  
4 credits = 4 lecture/laboratory  CL

CIS 238 Web Server Administration. This course explains the process of designing,
installing and administering a real-world commercial web server. Students will work
with the Linux operating systems and Apache Web Server, a combination that hosts
the majority of websites on the Internet. Offered winter semester only.  
Prerequisite: CIS 130 and CIS 202 and CIS 205  
3 credits = 3 lecture/laboratory  CL

CIS 239A Special Topics in Server Administration. This course is an-depth study of
one or more current topics in operating system administration. Topics will be selected
by the discipline.  
Prerequisite: CIS 130; other prerequisites may apply; see online schedule.  
3 credits = 3 lecture/laboratory  CL

CIS 239B Special Topics in Server Administration. This course is an-depth study of
one or more current topics in operating system administration. Topics will be selected
by the discipline.  
Prerequisite: CIS 130; other prerequisites may apply; see online schedule.  
4 credits = 4 lecture/laboratory  CL

CIS 247A Special Topics in Computer Applications. This course is an in-depth
study of one or more current topics in Computer Information Systems. Topics will be
selected by the discipline.  
Prerequisites will be determined by course topic; see online schedule.  
Prerequisite: CIS 200 or CIS 202 or CIS 205  
3 credits = 3 lecture/laboratory  CL
CIS 247B Special Topics in Computer Applications. This course is an in-depth study of one or more current topics in Computer Information Systems. Topics will be selected by the discipline. Prerequisites will be determined by course topic; see online schedule. Prerequisite: CIS 200 or CIS 202 or CIS 205 4 credits = 4 lecture/laboratory CL

CIS 260 Computer Programming I. This course provides an introduction to fundamental concepts of computer programming, problem solving techniques and algorithm development. Programming projects will emphasize the syntax and usage of a high level programming language, along with analysis, design and testing. This course is a once-a-year offering. Prerequisite: CIS 150 4 credits = 4 lecture/laboratory CL CT

CIS 261 Data Structures Programming. This course explores the techniques and data structures used in the development of complex software projects. Through lectures and programming projects, this course will cover elementary data structures, dynamic memory allocation, sorting and searching, recursion, algorithmic analysis and object oriented programming techniques. Offered winter semester only. Prerequisite: CIS 260. NOTE: MTH 113 or higher is strongly recommended. 4 credits = 4 lecture/laboratory CL

CIS 264 C++ Programming. This course provides an introduction to fundamental concepts of computer programming, problem solving techniques and algorithm development. Programming projects will emphasize the syntax and usage of the C++ programming language, along with analysis, design and testing. Prerequisite: MTH 114 or CIS 260 4 credits = 4 lecture/laboratory CL

CIS 267A Special Topics in Computer Programming. This course is an in-depth study of one or more current topics in Computer Information System programming. Topics will be selected by the discipline. Prerequisite: CIS 150; other prerequisites may apply; see online schedule. 3 credits = 3 lecture/laboratory CL

CIS 267B Special Topics in Computer Programming. This course is an in-depth study of one or more current topics in Computer Information System programming. Topics will be selected by the discipline. Prerequisite: CIS 150; other prerequisites may apply; see online schedule. 4 credits = 4 lecture/laboratory CL

CIS 275 Visual BASIC Programming. Fundamental concepts of computer programming, problem solving techniques and algorithm development as well as the syntax and usage of the Visual BASIC programming language in the Graphic User Environment are addressed in this class. Topics include visual BASIC controls, control properties, application planning and design, user interface creation, variables, symbolic constants, selection structures and repetition structures. The advanced topics include sequential access files, menus, dialog boxes, error trapping, random access files, control arrays, variable arrays and database access. This course is a once-a-year offering. Prerequisite: CIS 150 4 credits = 4 lecture/laboratory CL
CIS 284 Microcomputer Applications Specialist. This course is designed to develop management skills needed in the small to mid-sized computer installation environment. This will include the study of management (personnel, hardware and software) through research, lecture and scenarios. This course will include the development of the communication skills needed to present technical recommendations to non-technical staff. Through lecture, group work, student led presentations and research, the student will employ a variety of software programs (word processing, presentation graphics, spreadsheets, databases and flowcharting) to reach these objectives. Offered winter semester only.
Prerequisite: CIS 115 and CIS 130
4 credits = 4 lecture/laboratory

CIS 286 Network Analysis and Design. This capstone course explains the process of analyzing and designing a new network or network upgrade. It presents a step-by-step approach that breaks this complex process into five major phases, each with its own inputs, tasks and outputs: 1). Requirements Gathering, 2). Analysis, 3). Logical Design, 4). Physical Design and 5). Installation and Maintenance. By focusing on user requirements first, students will learn to create an effective solution.
Prerequisite: CIS 122
4 credits = 4 lecture/laboratory

CIS 290 A-D Computer Co-op/Internship. This work placement is designed for the Computer Information Systems student that has completed at least all the CIS classes listed in the first and second semesters of one of the four CIS programs. The work placement may be either a paid (co-op) or non-paid (internship) placement. Students will be individually placed into positions involving operations, programming, networking or systems analysis as fits their needs/ desires. One credit will equal 60 hours of placement. Students may receive credit for up to four CIS 290 courses A, B, C, D at the rate of one credit per course.
Prerequisite: Approval of CIS faculty co-op internship coordinator and sophomore status in one of the Computer Information Systems programs. Grade of C or better in CIS courses and competency courses required for entry into this course.
1 credit each = 1 lecture/laboratory

CIS 297 The CIS Professional. In this capstone course, students will prepare for employment as CIS professionals by developing a current resumé and portfolio, and discuss issues pertinent to the CIS workplace and employability will be included. Students should not take this course until they are within one year of obtaining their degree. Offered winter semester only.
Corequisite: CIS 130 and 20 credit hours completed
1 credit = 1 lecture/laboratory

CRIMINAL JUSTICE
Social Science Department (810) 989-5707

CJ 101 Introduction to Criminal Justice. This course is an introduction to the history, philosophy, concepts and problems of law enforcement. A survey is made of the various fields of law enforcement and corrections in the United States. Professional career opportunities are reviewed.
Prerequisite: None
3 credits = 3 lecture
CJ 104 Delinquency Prevention and Control. This course provides students with a basic knowledge of the problems of juvenile delinquency. The history of the different concepts of delinquency and the juvenile justice system will be discussed. Juvenile delinquency will be examined in reference to its impact on society and the various theoretical approaches developed to explain its causes. Juvenile court procedures, the police role in dealing with delinquent behavior and the rights and liabilities of juveniles will be investigated.
Prerequisite: None
3 credits = 3 lecture

CJ 105 Police Procedures. This course is designed to provide students with an orientation to patrol procedures. Areas examined are basic patrol operations and techniques to include juveniles, emergency preparedness, disaster control, explosive devices, domestic violence, plus civil disorder. Ethical police behavior and interpersonal communication are discussed in relationship to police procedures.
Prerequisite: None
3 credits = 3 lecture

CJ 109 Introduction to Private Security. This course is an introduction and career orientation to the field of private security. Topics include the basic principles of physical security, risk management systems, computer security, fire prevention and safety, and institutional security systems (industrial, commercial and institutional). This course is a once-a-year offering.
Prerequisite: CJ 101
3 credits = 3 lecture

CJ 119 The Court Function. This course is designed to cover arguments over the nature of justice; a brief history of the development of the Anglo-American legal system; basic tenets of American criminal law and procedure; the organization of courts, the powers, selection, training and professional orientation of key court personnel; and all the steps in the criminal justice process from arrest through the appeal; current developments in court technology and administration; and issues related to the discretion of court officials.
Prerequisite: CJ 101
3 credits = 3 lecture

CJ 121 Introduction to Corrections. This course is designed to introduce students to the historical and philosophical background of the field of corrections and to familiarize them with the legal processes involved: probation, imprisonment and parole. The role of officers and the rights of prisoners will be discussed and community-based corrections described.
Prerequisite: None
3 credits = 3 lecture

CJ 202 Criminal Law. This course is a study of substantive law as a means of defining and preserving social order. Sources of criminal law, classification of crimes against persons, property and public welfare; principles of criminal liability, elements necessary to establish crime and criminal intent, specific crimes and defenses, and constitutional limitations are examined.
Prerequisite: CJ 101
3 credits = 3 lecture
CJ 206  Traffic Law & Accident Investigation. This course is designed to familiarize the student with proper procedures for traffic control and enforcement. Specifically, the State of Michigan motor vehicle laws and procedures, arrests, citations, alcohol and accident investigation are examined.
Prerequisites: CJ 101
3 credits = 3 lecture

CJ 208A Field Service Observation. This course is designed to broaden the educational experiences of the student through observation. The agencies involved in the observations may vary as to the interest of the student.
Prerequisite: CJ 101 and CJ 105 or CJ 121
1 credit = 60 clock hours of observation plus four clock hours of contact with the field advisor
1 credit = 1 other (observation)

CJ 208B Field Service Observation. This course is designed to broaden the educational experiences of the student through observation. The agencies involved in the observations may vary as to the interest of the student.
Prerequisite: CJ 208A
1 credit = 60 clock hours of observation plus four clock hours of contact with the field advisor
1 credit = 1 other (observation)

CJ 210  Dynamics of Substance Abuse. This course is designed to equip students with up-to-date knowledge concerning the historical and cultural attitudes toward use of alcohol and other drugs, as well as the psychological and physical effects of their use and abuse. Social and political implications of drug abuse and available treatment modalities are also discussed.
Prerequisite: PSY 180 or permission of instructor
3 credits = 3 lecture

CJ 211 Police Organization, Systems and Issues. This course is designed to provide students with a basic orientation to government structure and law enforcement including the police and law, police in the criminal justice system, the diversity of the police establishment and the varieties of police at local, state and federal levels. It will examine the structure of law enforcement administrations, related human resource issues especially including the selection process, management theories, organizational structures, ethical dilemma, civil liabilities, police subculture and behavior, and policing in the future.
Prerequisite: CJ 101 and CJ 105
3 credits = 3 lecture

CJ 213 Legal Aspects for Law Enforcement. This course is designed to provide students with constitutional issues regarding law enforcement. It will cover topics such as probable cause and reasonable suspicion, stop and frisk issues, border seizures and stationhouse detentions, arrests, seizures of personal effects, vehicle stops, inventory searches and vehicle searches. Additionally, it will cover areas such as plain view doctrine, open fields doctrine, the abandonment of property, lineups, photographic identifications and confessions and admissions.
Prerequisite: CJ 101
3 credits = 3 lecture
**CJ 215 Basic Criminal Investigation.** This course presents the basic principles of criminal investigation. Current investigative procedures used in handling of crime scene, interviewing and interrogation, suspects and witnesses, gathering and preserving evidence, conducting surveillances, writing reports, establishing the method of operations used to commit a crime and utilizing technical resources are examined. Basic lab techniques and procedures that are an integral part of an investigation are conducted. 
Prerequisites: CJ 101 and CJ 105 
3 credits = 3 lecture

**CJ 220 Specific Offense Investigation.** This course provides students with the techniques of investigating specific offenses to include arson, burglary, narcotic violations, larceny, criminal sexual conduct, robbery and homicide. Laboratory techniques and procedures that are an integral part of forensic science investigations are demonstrated. This course is a once-a-year offering. 
Prerequisite: CJ 101 and CJ 105 
3 credits = 3 lecture

**CJ 222 Client Relations in Corrections.** This course will explore the social and cultural differences that exist between inmates and corrections officers. Factors such as economic status, discrimination and minority membership as well as societal response to these factors will be emphasized. The role of the corrections officer within custodial care settings to deal effectively with inmate relationships will be discussed. This course is a once-a-year offering. 
Prerequisite: CJ 121 
3 credits = 3 lecture

**CJ 223 Correctional Institutions/Facilities.** This course is designed to prepare students for employment in the corrections system. It will explore the function of prisons, various rehabilitation programs, custodial care and prisoner rights. The organization and management of correctional institutions and their safety and security will also be described. Concerns about future developments and problems in the corrections system will be addressed. 
Prerequisite: CJ 101 or CJ 121 
3 credits = 3 lecture

**CJ 224 Legal Issues in Corrections.** This course will examine and analyze the roles of the legislature, courts, prosecutors and attorneys in the criminal process. This course will place special emphasis on legal concerns within the corrections system itself: the constitutional rights of prisoners and the potential civil liability that correctional facilities and corrections personnel face when those rights are violated. 
The impact of recent case law decisions and future development resulting from those decisions will be discussed. 
Prerequisite: CJ 121 
3 credits = 3 lecture

**CJ 226 Client Growth and Development in Corrections.** This course is intended for students requiring an understanding of human behavior, psycho pathology and treatment interventions, as they relate to the correctional client. This course will emphasize and differentiate between normal and criminal behavior and will define
personality, social roles, criminal life styles and presenting biological, psycho social and sociocultural theories of normal and deviant human behavior. This course is a once-a-year offering.

Prerequisite: CJ 121
3 credits = 3 lecture

CJ 228 Probation and Parole. This course is designed to prepare students for employment in the Criminal Justice/Corrections field. It will introduce the student to the historical background and development of probation and parole from early history to the modern probation and parole system. Students will explore the court system. The juvenile justice system will be studied with juvenile probation and other available dispositions reviewed. The American probation system, community based corrections and parole and duties of the modern parole officer will be studied. This course is a once-a-year offering.
Prerequisites: CJ 121
3 credits = 3 lecture

CNC PROGRAMMER/MACHINIST TECHNOLOGY
Engineering Technology Department (810) 989-5754

MFT 110A Pre-Apprenticeship Skills – Measurements & Calculations. This course presents math concepts necessary to be successful in an industrial environment. The course will review the basics of whole number, fraction and decimal operations, and then apply these concepts to industrial settings. These applications will include: using a calculator, calculating percentages and/or decimals, calculating hole locations, taking measurements with steel rules, micrometers and calipers, etc.
Prerequisite: None
1 credit = 1 lecture

MFT 110B Pre-Apprenticeship Skills – Graphing & Problem Solving. This course presents the basic principles of elementary algebra as applied to an industrial setting. These concepts will include signed numbers, simple equations, graphs and coordinate systems, ratios and proportions.
Prerequisite: MFT 110A
1 credit = 1 lecture

MFT 110C Pre-Apprenticeship Skills – Areas & Volumes. This course presents the basic principles of geometry, to include lines, angles and triangle side/angle relationships.
Prerequisite: MFT 110B
1 credit = 1 lecture

MFT 110D Pre-Apprenticeship Skills – Spatial Skills. This course presents the basic principles of trigonometry, to include finding sine, cosine and tangent of a given angle, solve for the missing side of a triangle, use the Pythagorean Theorem, introduction to the use of Sine and Cosine Laws.
Prerequisite: MFT 110C
1 credit = 1 lecture
MFT 111  Machine Tools. This introductory course focuses on internationally accepted machining practices and measurement systems (inch/pound and metric). Lab projects include operating the mill, lathe, saw and drill press. Prerequisite: None
4 credits, plus 2 contact hours = 3 lecture, 3 laboratory  GA

MFT 150  Manufacturing Technology Co-op. This course includes six weeks or more work experience in industry that provides an intensive but varied experience in the program of study for which the student is enrolled. This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training program developed which is agreed upon by the student, employer and the college. Prerequisite: Permission of instructor
1 to 6 credits = 1 to 6 lecture/laboratory

MFT 190  Machinery's Handbook. The focus of this course is the use of the Machinery's Handbook as a reference tool. Topics include mathematical tables and formulas, inch/metric conversions factors, strength of materials, lubricants, fasteners, cutting tools, speeds and feeds, classification of ferrous and nonferrous material, service texture symbols, heat treatment and many other subjects related to manufacturing. Prerequisite: MTH 101
1 credit = 1 lecture

MFT 211  Beginning NC/CNC Programming. This is a beginning course in Numerical Control and Computerized Numerical Control Programming using a 3-axis mill. Prerequisite: MFT 111
3 credits, plus 1 contact hours = 2 lecture, 2 laboratory  CL

MFT 213  CNC Surfacing Applications. This course focuses on the generation and machining of surfaces and solids. Students will use MasterCam Software to design and machine surfaces and solids. Prerequisite: MFT 211 or industrial CNC mill work experience
2 credits, plus 1 contact hour = 1 lecture, 2 laboratory

MFT 214  Machine Tool, Advanced. This course is a continuation of MFT 111 with greater emphasis placed on development of skills in machine operations. Solutions of problems that arise in the planning and tooling for production of parts, economy, design, estimating and processing and planning are developed and analyzed. Prerequisite: MFT 111
4 credits, plus 2 contact hours = 2 lecture, 4 laboratory

DRAFTING AND DESIGN  (See Engineering Graphics)

EARLY CHILDHOOD EDUCATION
Social Science Department  (810) 989-5707

ECE 105  Introduction to Early Childhood Education. This course will introduce students to the field of early childhood education and the need for educated early childhood professionals. Emphasis is on the professional aspects of early childhood education and child care including historical perspectives, contributions in the field, current practices and trends, understanding the various roles of the early childhood
settings and identifying quality components of such. This course will benefit both future and present early childhood professionals. Students are required to observe various early childhood settings/facilities and interview early childhood professionals working in the field.

Prerequisites: None

NOTE: Students may clock hours of formal child care training and education toward completion of CDA, renewal of CDA and child care licensing requirements for Michigan.

ECE 108 Caring for Infants and Toddlers. This course will introduce students to the essentials of infant and toddler growth and development and the specialized care-giving skills needed to work effectively with the zero to three population. Emphasis is on developmental milestones; developmentally appropriate practice; standards of quality care; and current theories, research and findings related to infants and toddlers. Students will explore the various domains of development including: physical (fine and gross motor); cognitive; emotional; social; and language, as well as gaining an understanding of the "whole" child. This course will benefit early childhood professionals working with infants and toddlers, as well as parents of infants and toddlers.

Prerequisites: None

NOTE: Students may clock hours of formal child care training and education toward completion of CDA, renewal of CDA and child care licensing requirements for Michigan.

ECE 109 Working with School-Age Children. This course will introduce students to the care and teaching of school-age children and youth in out-of-school environments, including before- and after-school, holiday and summer programs. Emphasis is on the needs and the development of school-age children; standards of quality care; and best practices. This course will benefit early childhood professionals and others working with school-age children. Students will explore various current issues and conditions many children face today. Other topics include developmental theories and theorists; programming and administration, activities and curriculum planning; family and community involvement; and program accreditation.

Prerequisite: None

NOTE: Students may clock hours toward child care licensing requirements for Michigan and renewal of CDA.

ECE 200 A-D Early Childhood Education Practicum. This course will serve as a description for 200A, 200B, 200C and 200D. Students will integrate college classroom instruction with on-the-job learning through a required 64-hour practicum experience. Students will select a licensed and instructor-approved child care facility and will spend three to five hours per week over the course of the semester in the child care facility gaining direct experience working with young children. At the end of the semester, students will evaluate their experience and performance, as well as submitting journal entries and time sheets. This course must be taken concurrently with ECE 108, 109, 204, 205, 206 or 211 unless instructor permission is granted. If desired, students may
take each credit at a different location to broaden their experience and knowledge for a maximum of four credits total.

Prerequisite: ECE 105 or permission of instructor

1 credit = 1 lecture/laboratory

*Students may clock hours of experience toward completion of the CDA credential.

** ECE 204 Health, Safety & Nutrition for Young Children.** This course will provide a comprehensive examination of the critical issues related to children’s health, safety, and nutrition and the development of practical strategies for creating safe and healthy environments for young children. Emphasis is on the importance of the role early childhood professionals play in promoting good health and life-long healthy attitudes and practices for young children. This course will benefit early childhood professionals currently working with young children, those new to the field, as well as parents of young children. Topics include SIDS, FAS/FAE; HIV/AIDS; child abuse and neglect; health appraisals and assessment tools; allergies; communicable and acute illnesses (identification and management); management of accidents and injuries; basic concepts of food, nutrition and menu planning; and educational activities and experiences for children.

Prerequisite: ECE 105

3 credits = 3 lecture

NOTE: Students may clock hours of formal child care training and education toward completion of CDA, renewal of CDA and child care licensing requirements for Michigan.

** ECE 205 Supportive Learning Environments for Young Children.** This course will focus on creating and maintaining a safe, healthy and supportive learning environment for young children. All aspects of the early childhood setting will be explored, including physical room arrangement, floor plan and use of space; learning center areas or stations; schedules and daily routines; appropriate guidance and discipline techniques; social-emotional aspects and climate; and atmosphere. Emphasis is on meeting the physical needs of young children. Additional topics include the importance of play; physical/motor development and developmentally appropriate activities; nutrition/cooking experiences; methods of observing and recording a child’s development; and establishing productive relationships with parents.

Prerequisites: ECE 105

3 credits = 3 lecture

NOTE: Students may clock hours of formal child care training and education toward completion of CDA, renewal of CDA and child care licensing requirements for Michigan.

** ECE 206 Developmental Curriculum for Young Children.** Students will gain fundamental knowledge and skills in planning developmentally appropriate curriculum and activities designed to enhance development and foster competence in all areas of the young child. This course will focus on identifying and planning developmentally appropriate activities for young children. Additional topics include lesson plans; theme/unit development; methods and skills which enhance children’s development; dynamics of planning and conducting group activities and group management; appropriate learning materials and equipment; multi-cultural and anti-bias curriculum;
communication skills; language and literacy; math, science and social studies; songs and music; and the creative arts.

Prerequisites: ECE 105. NOTE: ECE 205 is recommended.

3 credits = 3 lecture

NOTE: Students may clock hours of formal child care training and education toward completion of CDA, renewal of CDA and child care licensing requirements for Michigan.

ECE 207 Child Development Associate (CDA) Assessment Preparation. This course is designed to assist and support students planning to complete the National Child Development Associate (CDA) Credentialing Program. Students will examine the CDA Credentialing qualifications, process, procedures and competency statements as specified by the National Credentialing Program. The instructor/field advisor will monitor and guide students in the fulfillment of national credentialing requirements. Course meets CDA requirements for formal child care training and education in content area maintaining a commitment to professionalism. Offered winter semester only.

Prerequisites: CDA candidates must have completed or be in the process of completing (within the past five years) 120 clock hours of formal child care training and education, with no fewer than 10 clock hours in each of the eight content areas outlined by the National Credentialing Program. CDA candidates must be currently working with young children in an appropriate child care setting. See ECE discipline coordinator.

Prerequisites: ECE 105 and ECE 205; may be taken concurrently with ECE 206.

3 credits = 3 lecture/on-site visitations

ECE 211 Creative Art for Young Children. This course will give students the knowledge and tools needed to develop rich, meaningful activities that integrate art into the early childhood curriculum. This course will benefit early childhood professionals currently working with children ages one through eight, as well as those new to the field. Emphasis is on developmentally appropriate practices and designing safe, open-ended art experiences and activities. Students will explore a variety of art mediums appropriate for young children, including drawing, collage, painting, play dough and clay, printmaking, fiber art, sculpture, group art and art for dramatic play. Other topics include: children's artistic development; the creative process; child-centered and child-directed activities; thematic teaching; and integrating art with language arts, music, science, math and social studies.

Prerequisite: ECE 105

3 credits = 3 lecture

NOTE: Students may clock hours of formal child care training and education toward completion of CDA, renewal of CDA and child care licensing requirements for Michigan.

ECE 275 Early Childhood Program Administration. This course examines the administrator's role in directing an early childhood program or child care center. Emphasis is on the range of administrative responsibilities related to creating, operating and maintaining a successful, high quality early childhood program/center. Topics include: budget, finances and funding; interpersonal skills; leadership styles and roles; licensing, credentialing and accreditation; marketing; organizing, planning and equipment; policy development; staffing - selection, supervision and training;
and parent/family involvement and education. This course will benefit both future and present early childhood program administrators, directors and assistant directors. Offered fall semester only.
Prerequisite: Any ECE class or instructor permission
3 credits = 3 lecture
NOTE: Students may clock hours of formal child care training and education toward completion or renewal of CDA Credential and child care licensing requirements for Michigan.

ECONOMICS (See Business Administration and Economics)

EDUCATION
Social Science Department (810) 989-5707

ED 100 Methods of Learning and Tutoring. This course is for new and current paraprofessionals, teacher aides, trainers and prospective teachers. It is an introduction to the methods and techniques of teaching and tutoring various subjects to small groups and individuals. Students will demonstrate an ability to assist or facilitate learning for a K-12 student. Students will receive instruction enhancements using techniques in multiple intelligences, learning styles, brain-based instruction, and emotional intelligences. Other training will include approaches to instruction for the K-12 student in reading, writing and mathematics.
Prerequisite: None
3 credits = 3 lecture

ED 101 Introduction to a Career In Teaching. This course is an introduction to the purposes and functions of education in American society for those planning a career in teaching or other educational service occupations. The course addresses issues such as the education of a prospective teacher, the rights and responsibilities of students and teachers, the history of education, school reform, teacher certification, financing public education and the purposes of schooling and curriculum. The course is designed to answer the student question of “why teach” and to assist students in their decision to pursue a career in education. Twenty hours of observation in K-12 settings is required. State laws may require a background check and finger-printing. Students are responsible for paying fees required for the background check.
Prerequisite: None
3 credits = 3 lecture

ED 120 Educational Behavior Management. This course will explore how to connect issues in behavior management and discipline to current themes in curricular design. Issues will also include hands-on practice with techniques addressing the developmentally challenged learner. Strategies of positive and productive management to enhance learners’ behaviors will be role-played to promote meaningful learning and critical thinking. Topics will include peer mediation, “I Care” philosophy and The Theory of Constraints.
Prerequisite: None; students are strongly encouraged to take PSY 210 or PSY 220 prior to this course
3 credits = 3 lecture
ED 162 Integrative Technology in the Classroom. This course will give students the practical, hands-on training and experience in several areas of classroom technology including using word processing software and external equipment including image scanning, digital painting, digital photography and image projection; slide shows with software; desktop publishing software to create several fliers, newsletters and other communication materials for classroom use and parent communication; creating classroom management spreadsheets for grade books and graphic reporting; experiencing telecommunications in classroom research and lesson delivery by using the Internet, email, virtual field trips, interactive television, and other web resources. Prerequisite: CIS 115
4 credits = 4 lecture/laboratory

ED 200A-D Education Observation Field Placement. This course will serve as a description for ED 200A, 200B, 200C and 200D. This course will integrate weekly college classroom instruction with on-location learning through a required 64-hour practicum experience. Students will select a K-12 classroom with a certified teacher or paraprofessional and will spend three to five hours per week over the course of the semester in the classroom gaining direct experience working with teachers, paraprofessionals and students. At the end of the semester, students will evaluate their experience and performance, as well as submitting journal entries and time sheets. It is recommended that students take each credit at a different location and classroom to broaden their experience and knowledge for the credits required. Students will be required to show proof of a negative TB test (1 year or newer) prior to beginning their observation. It is recommended that students successfully complete the Michigan Basic Teacher Skills Test. Prerequisite: None Corequisite: ED 100 or ED 101 1 credit, plus 2 contact hours = 1 lecture, 2 laboratory

ED 205 Integrative Arts in the Classroom. This course offers students the opportunity to observe and participate in visual and graphic art, music, movement and drama activities to enhance learning in a K-12 classroom. Students will be required to attend several fine arts activities, some as a group and some individually chosen. Students will create a portfolio of multiple arts activities that assist in the development of basic learning skills in a K-12 classroom. This course will integrate the development of academic skills with creative abilities using visual and graphic art, music, movement and drama benefiting all styles of learning and multiple intelligences. Prerequisite: ED 100 3 credits, plus 1 contact hour = 3 lecture, 1 laboratory

ED 220 Introduction to Exceptional Learners. This course addresses the physical, psychological, social and educational factors related to exceptional individuals, including those who experience giftedness as well as those who experience disability. Students will be afforded the opportunity to identify, evaluate and modify their personal attitudes and beliefs regarding exceptionality. This course will benefit those who are paraprofessionals, teachers, parents or any of the human service careers working within a teaching/learning setting. Prerequisite: ED 100 or ED 101 4 credits = 4 lecture
ELECTRONICS
Engineering Technology Department (810) 989-5754

ELT 105  Fundamentals of Residential Wiring. This course introduces students to basic electricity and its applications. A study of practical circuits used in residential building wiring, national electrical code and local code requirements, safety, blueprint reading and practical laboratory experiences are also featured.
Prerequisite: None
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

ELT 130A Fundamentals of Direct Current Electronics. This is a basic course to introduce students to analog electronics. Emphasis is placed on D.C. concepts. Topics include resistive, capacitive and inductive components in series and parallel, D.C. combinations, ohms Law, Kirchhoff’s current and voltage laws, the voltage divider rule and RC time constants. Students will build and troubleshoot D.C. circuits using a digital multimeter and oscilloscope.
Prerequisite: MTH 101 or higher
2 credits, plus 1 contact hour = 1.5 lecture, 1.5 laboratory
   GA with ELT 130B and ELT 131

ELT 130B Fundamentals of Alternating Current Electronics. This is a basic course to introduce students to the many uses of alternating current. Students will learn how to use transformers, function generators and the oscilloscope in testing A.C. circuits built in lab. Students will also learn A.C. concepts including reactance, resonance, tuning, AC to DC conversion, isolation and safety.
Corequisite: ELT 130A
2 credits, plus 1 contact hour = 1.5 lecture, 1.5 laboratory
   GA with ELT 130A and ELT 131

ELT 131 Semiconductor Devices and Circuits. This course focuses on semiconductor diode and transistor theory, filter circuits, power supplies, transistor parameters, load lines, biasing, amplifier tests and measurements, A-C circuit analysis of voltage and current operational amplifiers.
Prerequisite: ELT 130A and ELT 130B
4 credits, plus 2 contact hours = 3 lecture, 3 laboratory
   GA with ELT 130A and 130B

ELT 135 Digital Circuits. This is a basic course to introduce students to digital electronics. Topics include basic logic gates, the binary number system, Boolean logic, flip-flops, shift-registers, BCD decoder driver circuits, encoders, multiplexers, analog-to-digital converters, digital-to-analog converters, seven-segment displays and memory devices.
Prerequisites: None
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

ELT 150 Electronics Technology Co-op. This course consists of work experience in industry (each 80 hours of work experience related to the objectives equals 1 credit). This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training agreement
developed which is agreed upon by the student, employer and the college. Special requirements may be necessary.

Prerequisite: ELT 131, ENG 101 or ENG 101T, MTH 102 or higher (GPA> 2.5 in major area of study) and permission of instructor.

1 to 6 credits; 80 hours of work experience = 1 credit

ELT 155 Assembling a Computer. This is an introductory course on how the computer’s major components work at the hardware level. Students will learn the basics of assembling, maintaining and repairing a computer. Topics include the power system, motherboard, BIOS, floppy drives, hard drives, limited peripheral device exposure, memory and limited troubleshooting. This course prepares the student to take the A+ Certification course for more detailed instruction. It is recommended that students who have completed ELT 160 do not take this course.

Prerequisite: None

1 credit = 1 lecture/laboratory

ELT 160 A+ Certification. This is an introductory course on how the computer works at the hardware level. Students will learn the basics of upgrading, maintaining and repairing a computer. Topics include the system board, BIOS, DOS, floppy drives, hard drives, peripheral devices, memory, troubleshooting, supporting Windows and others. This course prepares the student to take the A+ Certification exam. This course is the same as CIS 160.

Prerequisite: CIS 110

4 credits = 4 lecture

ELT 231 Industrial Electronics. The physical considerations involved in the industrial applications of solid state devices are discussed and analyzed, along with rectifier circuits, amplifiers, oscillator control circuits, electronic motor control, servomechanisms, pressure, temperature and optical devices.

Prerequisite: ELT 131

3 credits, plus 3 contact hours = 2 lecture, 4 laboratory CL CT

ELT 232 Communications Circuits. This course is a survey of analog and digital communications circuits, antennas, transmission lines, frequency spectrum and sending and receiving equipment. Fiber optics and error detecting codes will be covered. This course is a review and culmination of basic electronic principles obtained in previous electronic courses. Offered winter or spring semester only.

Prerequisite: ELT 131

3 credits = 3 lecture

ELT 232L Communications Circuits Lab. This course requires a student to assemble, test and analyze digital and analog communication circuits. These circuits include the following: frequency multipliers, AM and FM modulation and demodulation circuitry, frequency shift keying, pulse width modulation, time division multiplexing and fiber optics. Offered winter or spring semester only.

Prerequisite: ELT 131

1 credit, plus 1 contact = 2 laboratory

ELT 236 Microcontrollers: Energy Control Systems I. This course introduces students to the programming of a Stamp Microcontroller using P-Basic language. Programs will be written on a PC and downloaded to the Microcontroller. Hardware such as a photovoltaic tracking energy system and a 3-phase wind turbine will be controlled by the Microcontroller. Data is logged by sensors and sent to the PC for real
time display and printing when needed. Wiring concepts and formulas for all circuits are presented and used in the laboratory exercises in this course. Completion of a capstone team energy project and report is required.
Prerequisite: ELT 130A and ELT 130B
4 credits, plus 2 contact hours = 3 lecture, 3 laboratory

ENGINEERING GRAPHICS
Engineering Technology Department (810) 989-5754

EG 110 Introduction to Drafting. This course offers an introduction to the use of drafting instruments, along with drills in geometric constructions; practice in lettering, reading and checking of drawings; principles of orthographic projection; practice in making of working drawings, and drafting practices in manual representation.
Prerequisite: None
2 credits, plus 1 contact hour = (1 lecture, 2 laboratory)

EG 111 Fundamentals of Computer-Aided Drafting. This course offers an introduction to the use of AutoCAD focusing on geometric construction and editing tools. The students will learn how to make the transition from traditional manual drafting techniques to computer-aided drafting practices. CAD provides the students with a wide range of benefits including increased accuracy and productivity.
Corequisite: EG 110
2 credits, plus 1 contact hour = (1 lecture, 2 laboratory)

EG 114 Blueprint Fundamentals. This is a course which is designed to help the student develop the basic skills required for industry print interpretation. A step-by-step approach is used to understand the “blueprint language” used in industry.
Prerequisite: None
2 credits, plus .5 contact hour = (2 lecture, .5 laboratory)

EG 115 Geometric Dimensioning and Tolerancing. This course is designed to develop technical knowledge and skills which will enable the student to prepare and interpret engineering drawings using the Geometric Dimensioning and Tolerancing System in accordance with the current ANSI Standards.
Prerequisite: EG 111 or EG 114, or equivalent
2 credits, plus .5 contact hour = (2 lecture, .5 laboratory)

EG 150 Drafting and Design Technology. A feature of this course is the six weeks or more work experience in industry in the program of study for which the student is enrolled. This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training program developed which is agreed upon by the student, employer and the college. Special requirements may be necessary.
Prerequisite: Permission of instructor
1 to 6 credits; 80 hours work experience = 1 credit

EG 161 Descriptive Geometry. Solutions to geometric problems by drawing board methods are studied. Topics include distance problems, angle problems, problems of intersection of lines and surfaces, area problems and development of surfaces. This course is a once-a-year offering.
Prerequisite: EG 110 or EG 111
4 credits, plus 2 contact hours = 3 lecture, 3 laboratory
EG 162 Advanced Drafting with AutoCAD. This course will provide students with an overview of applications as they apply to the fields of engineering drafting and design. The students will learn and apply computer-aided design techniques and principles to create drawings and will learn the software capability of the system by generating, moving and editing the basic geometric elements. Students will become familiar with system hardware such as CRT, keyboard, menu, etc. In addition to formal classroom lecture and demonstrations, students will use equipment such as a CAD system and other related hardware to complete a series of assignments.
Prerequisite: EG 111
4 credits, plus 2 contact hours = 2 lecture, 4 laboratory CL

EG 163 SolidWorks – Product Design & Development. This course provides an introduction to the process of developing solid models using a solid modeling program. Techniques for planning, developing, organizing and maintaining CAD files related to solid modeling will be addressed. Through lecture and hands-on exercises, students will explore the concepts and usage of explicit modeling, parametric modeling and feature-based modeling by using all of these tools integrated within SolidWorks.
Prerequisite: EG 110 or EG 111
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

EG 164 CATIA Basics. This course provides an introduction to the process of developing solid models using a hybrid solid modeler. Techniques for planning, developing, organizing and maintaining C.A.D. files related to solid modeling will be addressed. Through lecture and hands-on exercises, students will explore the concepts and usage of explicit modeling, parametric modeling and feature-based modeling by using all of these tools integrated within the CATIA Hybrid Modeler.
Prerequisite: None
2 credits, plus 2 contact hours = 1 lecture, 3 laboratory

EG 165 Interactive 3D Visualization. This course provides an introduction to the process of developing interactive 3D simulations and visualizations using EON Reality software. Students will learn how to incorporate solid models into a virtual workspace in order to animate real-time visualizations as are utilized in various capacities related to the manufacturing, architectural and gaming industries.
Prerequisite: None
2 credits, plus 2 contact hours = 1 lecture, 3 laboratory

EG 180 Engineering Graphics. This class focuses on selected graphical solutions in orthographic projection, pictorial presentation, visualization of projections, points, lines and planes in 3-D space. Studies surrounding primary and secondary projections, true lengths of lines, true size and shapes of planes, dihedral angles, visibility bearings, intersections and developments of surfaces using CAD System will be the focus of study.
Prerequisite: None
4 credits, plus 2 contact hours = 3 lecture, 3 laboratory

EG 265 Introduction to Mold Design. This course is designed to give students an understanding of the design, construction and terminology involved in designing and building plastic injection molds. Specific emphasis will be placed on standard design procedures used in designing injection molds today. This class will use computer aided drafting software.
Prerequisite: EG 162
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory
EG 266 Jig/Fixture Design. The principles of tooling design for productive machining operations are the main focus of this course. Comparative analysis of standards and commercial work-holding devices for such operations as drilling, milling, turning and grinding (cams, links, motion and gear) are also designed along kinematic outlines. From shop sketches, actual layouts are formulated and assembled. From the design drawing, working drawings are then produced following all present day drafting specifications, with emphasis on standard component parts and supply catalog. Offered winter semester only. 
Prerequisite: EG 162
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

EG 267 Tool/Die Design. Principle concepts of material flow and properties along with fundamental die design pertaining to forming, cutting, drawing and piercing operations performed on standard industrial presses are reviewed. From actual part prints, actual die designs are formulated, working drawings are made, machine mechanisms are reviewed and reproduction is made. All practices are geared to those used in modern drafting room today. Offered fall semester only.
Prerequisite: EG 162
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

EG 270 Advanced Solid Modeling. This course provides an advanced study in the process of developing solid models using a hybrid solid modeler. Techniques for planning, developing, organizing and maintaining CAD files related to solid modeling will be addressed. Through lecture and hands-on exercises, students will explore the concepts and usage of explicit modeling, parametric modeling and feature-based modeling by using all of these tools integrated within SolidWorks. 
Prerequisite: EG 163
2 credits, plus 2 contact hours = 4 lecture/laboratory

ENGLISH
Communications Department (810) 989-5578

Most college programs require a year of freshman English composition. Students should check their preferred program for recommendations. Each student is required to do the writing skills objective assessment given by the Achievement Center for initial placement. This placement is mandatory. The purpose of the writing skills assessment is to help determine the appropriate course selection in English for successful college work. Some students may follow a four course sequence - English 050 (basic writing skills), English 075 (basic writing skills II), English 101 (the writing process), and English 102 (advanced writing and research). Others need only a two course sequence - English 101 and English 102.

Composition courses are offered ranging from beginning composition through advanced writing and creative writing. These courses may be applied to most transfer programs and to a variety of two-year degrees. English 101, 101H, 102, and 102H meet the requirements for the transfer degrees of Associate of Arts and Associate of Science. English 101T and 104 do not, as a general rule, meet the requirements for these degrees.

Technical English courses are offered for the two-year vocational certificate and degree (AAS) programs. English 101, 101H, 101T, 102, 102H, and 104 meet the requirements for the non-transfer degrees, that is, the Associate in General Studies.
Students planning to transfer should check program requirements at the transfer institution and consult with an academic advisor for transferability credit of English 101T and 104.

The Communications Department offers a wide variety of literature courses that will satisfy the degree requirements of most four-year colleges and universities. Students should check with their advisor at the college or at the transfer institution regarding the ability of the credits to transfer.

Students who have taken the ACT Reading and Writing tests may submit their scores to Enrollment Services in lieu of the COMPASS Writing Skills assessment. ACT scores must be less than three years old.

**ENG 050 Basic Skills for College Writing.** This course is designed to help students become competent writers at the college level. In addition to reviewing grammar and editing rules, students will learn about the writing process and how to write various types of sentences, paragraphs and multi-paragraph assignments for a college reader. Prerequisite: None
3 credits = 3 lecture

**ENG 075 Basic Writing Skills II.** This is a basic writing course that can either be a continuation of English 050 for those students who are still not adequately prepared for the rigors of English 101, or a basic writing course for those students whose writing skills are too advanced for English 050, yet not strong enough for satisfactory completion of English 101. Emphasis will focus on the writing process used to produce 300-500 word paragraphs and 500-1,000 word essays, plus work with sentence combining to address grammatical errors and to develop the stylistic maturity needed for the writing required in English 101. Prerequisite: None
3 credits = 3 lecture

**ENG 101 English Composition I.** This course includes various types of current prose, a study of English usage, and intensive practice in composition, all of which is designed to improve a student’s ability to express ideas in a clear, logical and forceful manner. Prerequisite: Successful completion of writing assessment or ENG 050 or ENG 075
3 credits = 3 lecture WR

**ENG 101H Honors English Composition I.** The course content consists of the concepts stressed in English 101 with greater depth in reading and composition, based upon a premise of superior preparation. Prerequisite: Successful completion of writing assessment and acceptance into the Honors Program
3 credits = 3 lecture WR

**ENG 101T Introduction to Writing for Technical Students.** Written and oral work is chosen with special attention to the interest of the technically oriented student. There is work on technical research methods and report forms. Essays studied and written by the student meet the general requirements for writing competence. Prerequisite: Successful completion of writing assessment or ENG 050 or ENG 075
3 credits = 3 lecture WR
ENG 102 English Composition II. This course will provide practice in writing extensive units of composition with emphasis on critical thinking skills. Through the study of a variety of texts, students will practice analytical and interpretative writing, including one formal source paper involving training in the use of library facilities and research techniques.
Prerequisite: ENG 101, 101H or 101T
3 credits = 3 lecture WR

ENG 102H Honors English Composition II. This course content offers an enriched approach to achieve the same objectives as English 102.
Prerequisite: ENG 101H or ENG 101 and acceptance into the Honors Program
3 credits = 3 lecture WR

ENG 104 Technical Report Writing. This course studies problems in technical communications. Oral and written reports along with memorandum, the prospectus and industrial letters of various types are stressed and practiced. ENG 104 will substitute for ENG 102 in technical programs.
Prerequisite: ENG 101, ENG 101H or ENG 101T
3 credits = 3 lecture WR

ENG 201 Advanced Composition. This course gives students further study and practice in various types of nonfiction writing to assist them in the mastery of clear, accurate form and effective style. Conducted largely in workshop format, the class encourages each student to develop writing abilities desirable for personal interest and vocational needs.
Prerequisite: ENG 101 and 102
3 credits = 3 lecture

ENG 202 Creative Writing. This course provides an introduction to the art of creative writing and its genres, in both prose and poetry. In addition to practicing various techniques, students will be given opportunities to write in areas of their own interest.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 203 Advanced Creative Writing. This course offers the student who has successfully completed ENG 202 an opportunity for additional experience in creative writing.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 205 Introduction to Fiction. This course surveys fiction from American and international writers including Western and Third World short stories and short novels. Represented are works from England, Italy and Spain, from the Middle Eastern, Oriental and Central/South American countries.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture GA

ENG 206 Introduction to the Drama. This course introduces students to the unique features and techniques of dramatic literature and to the historical development of theater from its classical roots to contemporary staging. The primary emphasis is to aid the student in a critical understanding of plays and playwrights and to encourage a continued interest in theater.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture GA
ENG 207  Introduction to Poetry. This course introduces the student to the various specialized uses of language and poetic techniques, their patterns and styles. As a result, the student should be able to read and experience poetry with increased appreciation and understanding. This course is a once-a-year offering.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT

ENG 208  Introduction to Mythology. This course will examine myths from diverse ancient and modern cultures through an analysis of common elements and functions. Historical, social and psychological approaches will be used to study the myths of Greece, Rome, Europe, Asia, India, as well as the Americas, showing the power of these stories for both individuals and cultures.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT GA

ENG 210  English Literature I. This survey course covers major literary works from their beginnings through the 18th century, examining significant works and major authors to gain an understanding and appreciation of the literary contributions of Britain to world literature.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT

ENG 211  English Literature II. This survey course concentrates on the poetry and prose of the major Romantic, Victorian, and modern authors. It is not necessary to have had English 210 before enrolling in the course.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT

ENG 212  Shakespeare's Comedies, Tragedies and History Plays. The study of eight to ten of William Shakespeare's plays is designed to increase the students' critical appreciation of these works and to develop an awareness of the playwright/poet, his times and his influential place in world literature.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT

ENG 220  American Literature I. Representative American literature, from its beginning to 1870, is studied while the literature is read for understanding and enjoyment. Emphasis is placed on the literary, cultural and social developments of the time periods.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT

ENG 221  American Literature II. Representative prose and poetry in the United States from 1870 to the present time are studied while reading literature for understanding and enjoyment. Emphasis is placed on critical literary study and a survey of the cultural and social development of that period in America.  
Prerequisite: ENG 101 and ENG 102  
3 credits = 3 lecture CT

ENG 225  African American Literature. This course provides a survey of African American literature from the mid-18th century to the present juxtaposed against a general history of the United States. Emphasis shall be placed upon analysis of thought, style and form with special focus upon the contributions made by this
literature to the American literary canon and the American experience.
Prerequisites: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 230 World Literature I. A study is made of major literary, philosophical and historical works from ancient times to 1600. Students will examine some of the great pieces of world literature to place them in their appropriate social and artistic periods and to recognize some of the great ideas of our culture.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 231 World Literature II. A study is made of major literary, philosophical and historical works from 1600 to modern time. Students will examine some of the great pieces of world literature to place them in their appropriate social and artistic periods and to recognize some of the great ideas of our culture.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 236 Women in Literature. Images of women in various literary works are studied to increase students' awareness of the ways in which women are characterized and the importance of women's roles in literature. As illustrated in selected readings for this class, the literature by and about women reflects various societal views of women's lives.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 243 Modern Short Story. The short story is studied in-depth as a literary form with emphasis on analysis. Through reading, discussing and writing about historical, international and multi-cultural stories, students understand plurality of values, ethics and aesthetics related to society and culture.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 244 Modern Drama. Modern theatre and the works of significant leading playwrights around the world are the focal point of this course, beginning with the plays of Ibsen, father of modern drama. Such a study provides students with dramatic views of the human condition in the 20th Century and enables them to understand the contributions of modern theatre to the society to which it portrays.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 245 The Modern Novel. To acquaint the student with the influence of the modern novel on present-day writing, the course will include North American, English and continental novels beginning with 1850 and progressing to those since 1900. Attention is given to social background.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture

ENG 246 Modern Poetry. The course is intended to further the understanding of the content and forms of 20th Century poetry written in English. Attention is given to the writings of such poets as T.S. Elliot, Robert Frost, W.H. Auden, W.B. Yeats, Dylan Thomas, E.E. Cummings and the present-day poets.
Prerequisite: ENG 101 and ENG 102
3 credits = 3 lecture
ENG 249  Foundation for Literary Criticism. Students will study techniques for analyzing literary work through close examination of basic critical works from early Greece through modern times with some practice in the writing of criticism. Prerequisite: ENG 101 and ENG 102 3 credits = 3 lecture CT

ENG 252  Children's Literature. Students learn critical evaluation of children's literature from pre-school through adolescence. Students read both classic and modern works as they learn criteria for evaluation of each genre. Prerequisite: ENG 101 and ENG 102 3 credits = 3 lecture CT

ENG 255  Introduction to Film. This course will introduce students to general aspects of motion picture history, criticism and theory. The course will also provide students with opportunities for an increased appreciation of cinematic art through written and oral analysis of feature length movies. Readings and discussions of various terms, techniques and elements of film will be emphasized. Prerequisites: ENG 101 and ENG 102 3 credits = 3 lecture

ENG 257  Selected Topics in Literature and Language. This course is an intensive study of one or more specialized interests in language and/or literature. Topics will be selected by the discipline. Prerequisite: ENG 101 and ENG 102 1-4 credits = 1-4 lecture

FIRE SCIENCE TECHNOLOGY
Health and Human Services Department (810) 989-5675

FST 101  Introduction to Fire Protection. The course provides an introduction to the philosophy and history of fire protection, the history of loss of life and property by fire, a review of municipal fire defenses, a study of the organization and function of federal, state, county and private fire protection agencies and a survey of professional career opportunities. Prerequisite: None 3 credits = 3 lecture

FST 102  Introduction to Fire Prevention. This course continues to survey the organization and function of fire prevention organizations; the inspections themselves; surveying and mapping procedures; the recognition of fire hazards; the engineering of a solution to hazards; the enforcement of solutions, and public relations as affected by fire prevention. Prerequisite: None 3 credits = 3 lecture

FST 103  Introduction to Fire Suppression. Aspects of fire suppression organization, equipment and the characteristics and behaviors of fire are discussed and analyzed. Included is the study of fire hazard properties of ordinary materials, building design and construction, extinguishing agents, basic fire fighting tactics and public relations. Prerequisite: None 3 credits = 3 lecture
FST 104 Fire Fighting Equipment, Tactics and Strategy. This course provides for the study of fire fighting equipment and manpower, basic fire fighting tactics and strategies, pre-planning fire problems, exposures, confinement, ventilation and salvage.
Prerequisite: None
3 credits = 3 lecture

FST 110 Fire Protection Chemistry. This course will explore the chemistry of materials and their physical properties as these subjects relate to the fire services. Topics will include matter and energy; units of measurement; states of matter; chemical reactions; the processes of combustion; heat and its effect; fire extinguishment and foam agents.
Prerequisite: None
3 credits = 3 lecture

FST 111 Incident Management for the Fire Service. This course will explore the incident management system, the functions of command, staging and sectorization, the missions of attack, search, backup, ventilation, exposure, extension, overhaul, salvage and rapid intervention, and the importance of benchmarks. Emphasis is placed on the ‘everyday’ type of emergency response versus the ‘Big One.’
Prerequisite: None
3 credits = 3 lecture

FST 112 The Legal Aspects of Public Fire Service. This course will inform the student of the present attitude of today’s “suing society” and how it affects the public servant. The fire service is no longer exempt from lawsuits and this course uses actual case studies to prepare the firefighter to recognize and avoid potential legal problems.
Prerequisite: None
3 credits = 3 lecture

FST 201 Fire Department Organization and Administration. Fire department organization and administration - personnel, communications, equipment, maintenance, training, financing, records and reports - are covered in this course.
Prerequisite: None
3 credits = 3 lecture

FST 202 Building Construction. This course explores and reviews important areas of building construction, with emphasis placed on fire protection concerns, in addition to related statutory and suggested guidelines of construction that are both local and national in scope.
Prerequisite: None
3 credits = 3 lecture

FST 203 Hazardous Materials I. Material covered in this course includes the study of chemical characteristics and reactions related to storage, transportation and handling of hazardous materials, with examples including: hydrocarbons, hydrocarbon derivatives, flammable and combustible liquids, compressed gases, flammable solids, cryogenic gases and oxidizing agents. Emphasis is placed on emergency situations and mitigation of hazardous material incidents with an introduction to current regulations and standards.
Prerequisite: FST 110 or CHM 101
3 credits = 3 lecture
FST 205 Hazardous Materials II. A continuation of FST 203. Hazardous materials studied will be plastics, corrosives, unstable materials, radioactive materials, explosives, toxic materials and water/air reactive materials. Emphasis is placed on emergency situations and mitigation of hazardous material incidents. 
Prerequisite: FST 203 
3 credits = 3 lecture

FST 207 Post-Fire Investigation. This course covers basic fire investigation techniques, including determination of cause and origin; collecting, preserving and presenting evidence; conducting interviews; preparing reports and courtroom behavior. 
Prerequisite: None 
3 credits = 3 lecture

FST 208 The Firefighter at Risk. This course covers minimum standard requirements for a fire service occupational safety and health program. It also covers organization; training and education; vehicles and equipment; emergency operations; facilities safety, and medical and member assistance programs, in addition to the minimum criteria for emergency incident management. 
Prerequisite: None 
3 credits = 3 lecture

FRENCH Communications Department (810) 989-5578

FR 101 Introductory French I. The essentials of the French language and culture are introduced in this course. Students begin to achieve basic facility in speaking, understanding, reading and writing the language as well as acquiring insight into French life and customs. Audio materials are employed to enhance the students' speaking and comprehension skills. 
Prerequisite: None 
4 credits = 4 lecture GA

FR 102 Introductory French II. The course completes the introductory level of the French language. The student is expected to have acquired basic speaking and comprehension skills, knowledge of grammar of the language, as well as the ability to read and write simple prose and to express ideas in writing. Continued use is made of audio materials. The course is open to students who have completed one semester of the language in college or one year in high school. 
Prerequisite: FR 101 
4 credits = 4 lecture GA

FR 203 Intermediate French I. A systematic review of the principles of French grammar is undertaken. Selections are read from representative French writers. Vocabulary enrichment and further practice in speaking, understanding and writing are provided. The course is open to students who have completed one year of college French or two years of high school French. 
Prerequisite: FR 102 
4 credits = 4 lecture GA
FR 204  Intermediate French II. More extensive reading of representative
French writers is undertaken along with continued development and review of the
communications skills. The course is open to students who have had three semesters
of college French or three years of high school French.
Prerequisite: FR 203
4 credits = 4 lecture  GA

FR 257 Selected Topics in French. This course is an intensive study of one or more
specialized interests in literature, language and/or culture. Topics will be selected
by the discipline. Those students planning to transfer and use this course as an
elective for a French major or minor will be expected to do their coursework in French.
Depending on the course, the instructor may also give alternative assignments in
English to students interested in French culture and literature who are taking the
course for electives in the humanities.
Prerequisite: FR 101 and 102 or permission of instructor
1-3 credits = 1-3 lecture  GA

GEOGRAPHY
Math and Science Department (810) 989-5663

GEO 101 Earth Science. A description of the physical environment. The course offers
a broad overview of the weather, climate, mountains, volcanoes, earthquakes, plate
tectonics, soils, rivers, glaciers, wind and waves. Students will discover where these
natural features exist and why they are there. Features of the natural landscape will
be described with emphasis not only on identification, but also on the significance of
location. This course is structured as a science course for non-science majors.
Prerequisite: None
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

GEO 102 Human Geography. Human geography studies the various cultural
landscapes created by man around the globe. Such landscapes include patterns
in agriculture, urban development, populations, economics, languages, religions,
etc. This course gives the student an overview of many different cultures and the
opportunity to compare them with their own. This course is a once-a-year offering.
Prerequisite: None
3 credits = 3 lecture  GA

GEO 105 Introduction to Meteorology. This course is an introduction to meteorology
– the study of the earth’s atmosphere, its weather and climate. The course will include
discussions of the atmospheric conditions that control and influence the earth’s
weather and climate and hands-on experience with the types of observations essential
to grasp the fundamental principles of meteorology.
Prerequisite: None
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

GEO 137 Global Energy Resources. This course is everyday science for the non-
science student. Worldwide, humans consume energy all day long. From gasoline in
our cars to electricity in our microwaves and natural gas for our heat, we consume
more and more each year. In this course, we will take a look at the simple science of
electricity, the chemistry of biofuels, the “magic” behind manufacturing solar
panels, the basic science of your car engine and the scientific concepts of harnessing
hydrogen power, wind power, solar power, hydro-electric power, geothermal power
and others for our everyday needs. We will also research the formation of fossil fuels and the basics of fuel combustion. This course is designed as a lab science course for non-science majors.
Prerequisite: None
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

**GEO 210 Introduction To Geographic Information Systems (GIS).** An overview introducing the basic concepts, techniques and applications of geographic information systems (GIS). The course includes the basic fundamentals of map reading and map interpretation and enables students to create spatial data files using current GIS software and to manipulate and analyze data.
Prerequisite: CIS 115
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

**GEO 233 World Regional Geography.** World regional geography is a course that is intended to acquaint students with the cultural and natural environments in which they live. The course is multi-faceted with a variety of different topics introduced, including landforms of various regions, religions, and languages of the people, basic history and its effects today, current events and regional points of interest.
Prerequisite: None
3 credits = 3 lecture

**GEO 280 Geography of Michigan.** This course investigates Michigan’s natural land features, weather and climate patterns and the human imprint on the landscape including transportation, customs and the economy. Students will research the connection between the natural environment and past/present land uses. This course covers the geography of the Great Lakes themselves and investigates the relationship between human settlement patterns, natural resources and various types of land usage in Michigan.
Prerequisite: None
3 credits = 3 lecture

**GEOLOGY**

**Math and Science Department (810) 989-5663**

The geology courses are designed for students majoring in the field or can be used as a science elective.

**GLG 101 Physical Geology.** Physical Geology is the study of the processes that shape the rich diversity of landscapes on our planet. These processes fall under one of three major themes developed throughout the course: The Rock Cycle, Plate Tectonics and Geomorphology (the surface effects of water, wind and ice). The laboratory activities supplement lecture with practical experience in the identification and classification of minerals, rocks and landforms. Prospective teachers, geologists and those simply interested in learning more about their physical environment may find this course to be of interest.
Prerequisite: None
4 credits plus 1 contact hour = 3 lecture, 2 laboratory

**GLG 102 Historical Geology.** This course presents earth’s history through geologic time as revealed in the rocks of its crust. Topics include radiometric dating, paleontology and plate tectonics. The laboratory activities offer practical experience in the use of fossils, rocks and geologic maps to reconstruct the history of a region.
An activity involving field work will be available to interested students. This course is a once-a-year offering.
Prerequisite: GLG 101
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

GLG 220 Paleontology. Paleontology is the study of the history of life on Earth. The remains of simple life forms are found in rocks as old as 3.4 billion years. Layered sedimentary rocks, deposited over the past 700 million years, contain an abundance of fossil remains of complex life forms from which plants and animals have descended. What we know of the evolutionary patterns of plants and animals comes from the study of these fossils. Biostratigraphy, the study of the special distribution and temporal relationships of fossils and fossil bearing rocks is an important component of geology. Laboratory and field activities supplement lecture with practical experience in the identification of fossil species and application of paleontological techniques. Prospective teachers, geologists, biologists and anyone interested in fossils and the history of life may find this course to be of interest.
Prerequisite: None (GLG 101 and GLG 102 is recommended)
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

GERMAN
Communications Department (810) 989-5578

GR 101 Elementary German I. The oral and written use of the language is emphasized in this course. Students use German in everyday situations and some discussion of German culture will be presented.
Prerequisite: None
4 credits = 4 lecture GA

GR 102 Elementary German II. This course is a continuation of GR 101. Conversation and written use of German is emphasized.
Prerequisite: One year of high school German or one semester of college German
4 credits = 4 lecture GA

GR 203 Intermediate German I. A review of German grammar is built around short stories, skits, drama and conversation. Both spoken and written competency is developed.
Prerequisite: Two years of high school German or one year of college German
4 credits = 4 lecture GA

GR 204 Intermediate German II. German grammar is reviewed and practiced. Some literary works are read and discussed along with the historic development of German and other languages. GR 203 is not a prerequisite for GR 204.
Prerequisite: Two years of high school German or 1 year college German
4 credits = 4 lecture GA

GR 257 Selected Topics in Literature, Language & Culture. This course is an intensive study of one or more specialized interests in literature, language and/or culture. Those students planning to use this course as an elective for a German major or minor when they transfer will be expected to do their coursework in German.
Depending on the course, the instructor may give alternative assignments in English to students interested in German culture and literature who are taking the course for electives in the humanities.
Prerequisite: GR 101 and 102 or permission of instructor
1-3 credits = 1-3 lecture

GOVERNMENT (See Political Science)

HEALTH EDUCATION
Nursing Department (810) 989-5675

HE 101 Math Related to Drug Administration. An introductory course to review basic mathematics as it relates to the health care profession and to prepare health care professionals to calculate medication dosages. Topics include a review of mathematics, introduction to the basic metric system, calculations using dimensional analysis including oral and parenteral medication, IV calculations and pediatric safe dose calculations.
Prerequisite: MTH 050 or appropriate placement by college assessment or ACT score
1 credit = 1 lecture

HE 102 Medical Terminology. This course is designed for health care students to enable them to acquire the knowledge and use of medical terms and abbreviations through a broad range of learning experiences.
Prerequisite: None
2 credits = 2 lecture

HE 103 Critical Thinking in the Healthcare Professions. This is a basic course to develop critical thinking skills and knowledge of the application of the skills in a variety of situations. The course includes development of thinking skills based on the eight elements of thought to guide learners through a variety of decision-making situations.
Prerequisite: None
2 credits = 2 lecture

HE 106 Interpretation of Laboratory and Diagnostic Tests in the Healthcare Professions. This is a basic course to develop knowledge and ability to interpret the findings of a variety of laboratory and diagnostic tests. The course includes client preparation pre-, intra- and post-test. The course includes interpretation of normal and abnormal values along with the pathophysiologic basis for the values.
Prerequisite: None
2 credits = 2 lecture

HE 141 Personal Health. This course is designed to develop attitudes, skills and habits favorable to healthful living. The mental, physical and social aspects of individual and community health are stressed.
Prerequisite: None
3 credits = 3 lecture

HE 205 Nutrition and Diet Therapy. This course is open to any student who is interested in nutrition and health. The course covers nutrition and diet therapy that relate to prevention and treatment of chronic and acute illness. Composition and classification of foods, nutrients and their function; food and public health laws; and
nutrition under special conditions are covered. Emphasis will be given to basic food constituents and their physiological relationships within the body.

Prerequisite: None
3 credits = 3 lecture

**HE 210 Health Care Delivery Systems.** This course will describe basic concepts of health care delivery systems in the United States, with an emphasis on the identification of types of services available, settings of care and utilization of health services.

Prerequisite: ENG 102 and BIO 171 or BIO 160
2 credits = 2 lecture

**HE 224 Altered States of Adult Health.** This course is for licensed health care workers, current ADN students, and pre-RN students to explore how alterations in structure (anatomy) and function (physiology) disrupt the human body as a whole. An understanding of how the human body uses its adaptive powers to maintain homeostasis is an important feature of this course. The focus will be on the clinical application of pathophysiological concepts and alterations.

Prerequisite: BIO 172 and 16 credit hours completed
4 credits = 4 lecture

**HISTORY**

Social Science Department (810) 989-5707

**HIS 101 History of Western Civilization to 1715.** The evolution of the modern Western world is surveyed from its ancient and medieval cultural footings to the making of contemporary cultural premises in the Enlightenment.

Prerequisite: None
4 credits = 4 lecture  GA

**HIS 101H History of Western Civilizations to 1715.** The evolution of the modern Western world is surveyed from its ancient and medieval cultural footings to the making of contemporary premises to the Enlightenment. Selected topics will be analyzed in depth through lecture, class discussion, research and audio visual material.

Prerequisite: Acceptance into the Honors Program
4 credits = 4 lecture  GA

**HIS 102 History of Western Civilization Since 1715.** This course moves the development of Western Civilization from the Enlightenment to the French Revolution and Napoleon, and the Industrial Revolution through the 19th century to explain nationalism, communism, fascism, collective security, the Cold War and other major experiences of the 20th century world. History 102 may be taken before History 101.

Prerequisite: None
4 credits = 4 lecture  GA

**HIS 102H History of Western Civilization Since 1715.** This course moves the development of Western Civilization from the Enlightenment to the French Revolution and Napoleon, and the Industrial Revolution through the 19th century to explain nationalism, communism, fascism, collective security, the Cold War and other major experiences of the 20th century world. Selected topics will be analyzed in depth through lecture, class discussion, research and audiovisual material. History 102H may be taken before History 101H.

Prerequisite: Acceptance into the Honors Program
4 credits = 4 lecture  GA
HIS 131 History of Science. This is an interdisciplinary course that explores science through the medium of history. It allows one to look at science from the perspective of an outsider - much as a political scientist studies politics or an anthropologist explores indigenous cultures. At the same time, the student gains knowledge about where we are today, and how we got here, in our understanding of the structure of the universe, atomic theory, energy, motion, evolution by natural selection, and space and time. This course is also available as PHS 131.

NOTE: Students can only receive credit for PHS 131 or HIS 131, and course designation must be determined at the time of registration.
Prerequisite: None; ENG 102 recommended
4 credits = 4 lecture

HIS 149 History of the U.S., 1607 to 1876. This course deals with the history of the United States from colonial times through reconstruction. Among the many topics included are the development of the colonies, separation from Great Britain, growth as an independent nation, the rise of sectionalism, the Civil War and Reconstruction.
Prerequisite: None
4 credits = 4 lecture

HIS 150 History of the U.S., 1877 to Present. This course deals with the United States from 1877 to the present. It covers such topics as the transformation to an urban-industrial nation, the emergence of the U.S. as a world power including the world wars and the Depression. The last part of the course describes the Cold War, the civil rights movement, Vietnam and the new politics. This course may be taken before HIS 149.
Prerequisite: None
4 credits = 4 lecture

HIS 160 Tall Ship Sailing. This is a basic course designed to develop the skills and knowledge necessary to serve as a volunteer crew member on a traditional tall ship. The course includes terminology, knot tying, line handling, ship maintenance, other basic shipboard skills, maritime heritage and teamwork.
Prerequisite: None
2 credits, plus 2 contact hours = 1 lecture, 3 lab

HIS 175 History of Michigan. This course begins with an in-depth examination of the prehistoric and historic Indians of Michigan. The periods of French and British rule and Michigan's transition from territory to state are covered as well. The course also explores Michigan's contribution to wars the United States has been involved in, specifically the Civil War, World War I and World War II. Michigan's transition from an agricultural to an industrial state with world wide impact is also explored.
Prerequisite: None
3 credits = 3 lecture

HIS 190 Contemporary World History. The rise of communism and fascism, the breakdown of collective security between the world wars, World War II, the Cold War and the period of detente are covered.
Prerequisite: None
2 credits = 2 lecture

HIS 233 African-American History. This course will survey African-American history from 1619 and will explore such topics as the Atlantic slave trade, the origins of slavery in the U.S., comparative slavery in the Americas, slave culture, free blacks, the
demise of slavery and the post-reconstruction experience, including the emergence of Black Culture. The course will view American history from the perspective of the African-American experience.
Prerequisite: None
3 credits = 3 lecture

HIS 280 History of World Communism. The history of world communism from the Bolshevik Revolution in Russia to the present day is reviewed. Special consideration is given to the history of the Soviet Union, Communist China, the Cold War and the collapse of the Soviet Union and the European Communist Bloc, 1989-91. The past and current economic, foreign, educational and governmental policies of various communist countries are analyzed.
Prerequisite: None
3 credits = 3 lecture

HIS 297 Women in Modern America. This course is a historical view of American women. It begins with a discussion of women from the time of British settlement on this continent; emphasis is placed on the major periods of change, the accomplishments, and the contributions of women in America, beginning with the convention at Seneca Falls. Some other areas that receive particular attention are the post-Civil War period, the Progressive Era, women's suffrage, the effects of the two world wars and their aftermath, and women's changing role in a changing world.
Prerequisite: None
3 credits = 3 lecture

HORTICULTURE (See Agriculture)

HUMAN SERVICES
Social Science Department (810) 989-5707

All of the Human Services courses, except HS 100 (Programs & Services for Individuals, Children and Families), are currently on inactive status.

NOTE: Students wishing to transfer to a four year university for a program in the Human Services area should follow a transfer program sheet prepared by the respective college to which they will transfer. These transfer guides are available from the Student Success Center.

HS 100 Programs & Services for Individuals, Children & Families. This course will introduce the student to the broad field of human services and provide exposure to a wide range of community health, economic and social services programs, activities, agencies, organizations and resources available for children, youth, families and individuals over the course of the life span. In an informal seminar setting, guest speakers and specialists who are currently working in the human service field, representing the public and private, for-profit and non profit sectors, will discuss their agency/organization, the services, programs and activities available, as well as provide related job/career information and suggestions. Emphasis is on the potential problems that may affect individuals or families at some point during the life span including the aged, as well as on programs and activities designed to enhance people’s development and well-being. Offered fall semester only.
Prerequisites: None
3 credits = 3 lecture
Students interested in selecting mathematics courses should carefully examine the prerequisites for each course. A math assessment test is administered by the Student Success Center to guide students in selection of their initial course.

**MTH 050 Basic Mathematics.** This course covers topics including whole numbers, decimals, fractions and percents. It is designed for the student who needs review on these topics.
Prerequisite: None
3 credits = 3 lecture

**MTH 075 Pre-Algebra.** This is a review of the basic operations of arithmetic on whole numbers, fractions and decimals. Algebraic concepts are integrated within the topics, enhancing the transition from arithmetic to algebra. The basic concepts of algebra are introduced, such as signed numbers, expressions and equations. Topics from geometry include formulas for area and perimeter, and applications of problems involving geometry. Students will be introduced to statistics by pictographs, bar, line, pie charts and tables, mean, median and mode.
Prerequisite: MTH 050 or appropriate placement by college assessment or ACT score
5 credits = 5 lecture

**MTH 102 Elementary Algebra.** This course is an introduction to basic algebra. Topics include a review of arithmetic operations, literal numbers, algebraic expressions, operations with polynomials, special products and factoring, exponents, linear equations, inequalities and an introduction to quadratic equations. The course is intended for students enrolled in occupational programs as well as for students who have not had high school algebra.
Prerequisite: MTH 075 or appropriate placement by college assessment or ACT score
5 credits = 5 lecture
MTH 104 Foundations of Math. This course will allow students to discover some of the mathematics that they use on a daily basis. They will consider some of the greatest ideas that were founded by mathematicians. Students will be actively involved in investigations of mathematics to help them attain a better understanding of mathematical ideas, build sharper skills for analyzing life issues that stem from mathematics and develop a new perspective and outlook at the way they view the world involving mathematics.
Prerequisite: MTH 102 or appropriate placement by college assessment or ACT score
3 credits = 3 lecture MA CT

MTH 105 Foundations of Math I for Elementary Education. This course covers concepts and structures of mathematics including sets, logic, numeration systems, whole numbers, integers, rational numbers and real numbers. The course is designed for prospective elementary teachers.
Prerequisite: MTH 102 or appropriate placement by college assessment or ACT score
3 credits = 3 lecture MA CT

MTH 106 Foundations of Math II for Elementary Education. Topics included in this course are concepts from algebra and geometry that are applicable in elementary school mathematics. This course is a continuation of MTH 105.
Prerequisite: MTH 105 or concurrent enrollment in MTH 105
3 credits = 3 lecture MA CT

MTH 110 Intermediate Algebra. This course consists of a review of elementary algebraic operations, polynomials, factoring, linear and quadratic equations, exponents, radicals, fractions, fractional equations, functions and graphs, systems of equations and logarithms. Students may receive credit for MTH 110 and MTH 111 or MTH 112.
Prerequisite: MTH 102 or appropriate placement by college assessment or ACT score
4 credits = 4 lecture MA CT

MTH 111 Plane Trigonometry. The content of this course will be a review of selected topics from plane geometry, radian and degree measures, definitions and properties of trigonometric functions, identities, trigonometric equations, graphs, identities involving composite angles, laws of sines and cosines, and the solution of triangles. Students may receive credit for MTH 110 and MTH 111 or MTH 112. For those students who intend to take pre-calculus (MTH 113), this course is a required prerequisite.
Prerequisite: MTH 110, or appropriate placement by college assessment or ACT score
2 credits = 2 lecture MA CT

MTH 112 Intermediate Algebra and Plane Trigonometry. This is an integrated algebra/trigonometry course covering the topics of MTH 110 and MTH 111 but at a slightly accelerated pace. It is intended for those students who want to satisfy the prerequisites for MTH 113 in one semester. A maximum of six credits will be allowed for any combination of MTH 110 and MTH 111 or MTH 112.
Prerequisite: MTH 102, or appropriate placement by college assessment or ACT score
5 credits = 5 lecture MA CT

MTH 113 Pre-Calculus. This course takes an analytical approach to the elementary mathematical functions. Topics include: equations, identities, function properties and graphs. The functions studied include: polynomial, rational, exponential, logarithmic
and trigonometric. Calculators are used throughout this course.
Prerequisite: MTH 110 and MTH 111, or MTH 112, or appropriate placement by college assessment or ACT score
4 credits = 4 lecture  MA CT

**MTH 114 Calculus I.** Topics included in this course are limits, continuity, differentiation and integration of algebraic and trigonometric functions, and applications of the derivative.
Prerequisite: MTH 113 or appropriate placement by college assessment or ACT score
4 credits = 4 lecture  MA CT

**MTH 120 Introduction to Statistics.** Topics covered include the uses and abuses of data, presentation and analysis of data using technology, measures of central tendency and dispersion, probability, types of distributions (Binomial, Poisson, normal, students t), sampling and sampling distributions, testing hypotheses, estimation, regression and correlation. This is a beginning course in statistics that will be beneficial to students majoring in any field in which measurements and predictions are made.
Prerequisite: MTH 110 or MTH 112 or appropriate placement by college assessment or ACT score
4 credits = 4 lecture  MA CT

**MTH 210 Linear Algebra.** The content of this course will be matrices, linear systems, basis, dimensions, vector spaces, dot and cross products, eigenvalues and eigenvectors, and linear transformations. Offered fall semester only
Prerequisite: MTH 215 or concurrent enrollment in MTH 215
3 credits = 3 lecture  MA CT

**MTH 215 Calculus II.** Topics include the differential and integration of transcendental, inverse trigonometric and hyperbolic functions, techniques of integration, applications of the integral and infinite series. This course is a continuation of MTH 114.
Prerequisite: MTH 114
4 credits = 4 lecture  MA CT

**MTH 216 Calculus III.** Topics studied include polar coordinates, parametric equations, multivariable functions, vectors, the TNB frame, partial derivatives, multiple integrals with applications and line integrals. This is a continuation of MTH 215.
Prerequisite: MTH 215
4 credits = 4 lecture  MA CT

**MTH 217 Differential Equations.** Topics covered include first order differential equations, linear differential equations with constant coefficients, non-homogeneous equations, variations of parameters, the Laplace transform and inverse transforms, and series solutions. Offered winter semester only.
Prerequisite: MTH 216 or MTH 215 with permission of instructor
4 credits = 4 lecture  MA CT

**MUSIC**
Visual and Performing Arts Department (810) 989-5709

Course sequence guides are available in the Fine Arts department office.

**MUS 100 Class Piano I.** This course for beginning adults utilizes the electronic laboratory for teaching the basics of keyboard, and includes note reading, hand
positions and introductory theory.
Prerequisite: None
2 credits = 2 lecture

MUS 102 Class Piano II. This continuation of MUS 100 stresses more demanding and complex pianistic technical studies.
Prerequisite: MUS 100 or permission of instructor
2 credits = 2 lecture

MUS 106 Music Appreciation. This course is a listener’s introduction to musical styles from Ancient Greece through the new music developments of the 21st century. This humanities course presents an opportunity for non-music and music students to gain insights into the nature and structure of music.
Prerequisite: None
3 credits = 3 lecture

MUS 110 Basic Musicianship. This is an integrated, computer assisted course in music notation, reading, ear training and fundamentals of music. It is designed for every person desiring knowledge of music and needing entry level music skills for collegiate study. The course is required of all music majors. Offered fall semester only.
Prerequisite: None
3 credits = 3 lecture

MUS 120 Theory I. Designed for the student pursuing a musical career in performance or education, MUS 120 provides a focus on “common practice” diatonic harmony in four part chorale writing, the inversions of triads and chords, harmonic progressions and non-chord tones. Offered winter semester only.
Prerequisite: MUS 110 and concurrent enrollment in MUS 123
3 credits = 3 lecture

MUS 123 Ear Training I. This course is the aural counterpart of Theory I and must be taken concurrently with MUS 120. Drills in musical dictation, and sight-singing will provide the student with important skills that benefits the musician in numerous ways, making all musical experiences more comprehensible. Individual computer lab time will be assigned. Offered winter semester only.
Prerequisite: MUS 110 and concurrent enrollment in MUS 120
2 credits = 2 lecture

MUS 162 Choir I. The choir is dedicated to the performance of the finest in vocal literature. The emphasis is on performance, hence attendance at all rehearsals and performances is obligatory. This course may be taken up to four times. Courses are sequenced as MUS 163, 262 and 263 (one course per semester).
Prerequisite: None
1 credit, plus 2 contact hours = 3 laboratory/rehearsal

MUS 182 The Symphonic Band I. This course is comprised of college students and members of the community with previous playing experience. The group is dedicated to the performance of the finest in symphonic wind literature. Attendance at all rehearsals and performances is obligatory and membership is expected for the entire year. This course may be taken up to four times. Courses are sequenced as MUS 183, 282 and 283 and/or MUS 187/287 during the summer (one credit per semester).
Prerequisite: High school experience or equivalent, or permission of the conductor
1 credit, plus 2 contact hours = 3 laboratory/rehearsal
MUS 187 The Twilight Festival Band. The Twilight Festival Band is composed of college students and members of the community. It is dedicated to providing a series of outdoor concerts during the summer. The emphasis is on the performance of light classical and symphonic “Pops” music for the enjoyment of the entire community. Membership is expected for the entire season. This course may be taken up to two times, with a course sequence of MUS 287 the following summer (one credit per semester).
Prerequisite: High school experience or equivalent, or permission of the conductor
1 credit, plus 2 contact hours = 3 laboratory/rehearsal

MUS 192 International Symphony Orchestra. This course is comprised of college students and members of the community. The International Symphony Orchestra is dedicated to the performance of the finest in orchestra literature, both classic and contemporary. The emphasis is on performance, and membership in the group is expected for the entire season. This course may be taken up to four times. Courses are sequenced as MUS 193, 292 and 293 (one credit per semester).
Prerequisite: Audition/permission of the conductor
1 credit, plus 1.5 contact hours = 2.5 laboratory/rehearsal

MUS 192A International Symphony Singers. This course is comprised of college students and members of the community. The International Symphony Singers is dedicated to the performance of the finest in choral literature, both classic and contemporary. The emphasis is on performance, and membership in the group is expected for the entire season. This course may be taken up to four times. Courses are sequenced as MUS 193A, 292A and 293A (one credit per semester).
Prerequisite: Audition/permission of the conductor
1 credit, plus 1.5 contact hours = 2.5 laboratory

MUS 220 Theory II. This continuation of Theory I stresses more complex theoretical problems such as seventh chords, secondary dominants, altered chords, common modulation and linear concepts. Offered fall semester only.
Prerequisite: MUS 120. MUS 224 is an optional co-requisite.
3 credits = 3 lecture

MUS 221 Theory III. This continuation of Theory II focuses on the more advanced aspects of chromatic harmony, with greater emphasis on expanded tonalities and linear relationships. Offered winter semester only.
Prerequisite: MUS 220 and MUS 224 and concurrent enrollment in MUS 225.
3 credits = 3 lecture

MUS 224 Ear Training II. This is a continuation of MUS 123. Emphasis is placed on further drills in harmonic, melodic, rhythmic dictation and sight-singing. Offered fall semester only.
Prerequisite: MUS 120 and 123
2 credits = 2 lecture

MUS 225 Ear Training III. This continuation of MUS 224 must be taken concurrently with Theory III (MUS 221). Emphasis is placed on a more complex level of sight-singing and harmonic, melodic and rhythmic dictation. Offered winter semester only.
Prerequisite: MUS 220 and MUS 224 and concurrent enrollment in MUS 221
2 credits = 2 lecture
MUS 230  The History of Music I. This course is for those students who wish to specialize in the area of music, and for those students who wish to broaden their knowledge about the fine arts. It is a study of the elements of musical expression, and the concepts of form and style in relation to societal evolution. This covers music in the ancient world through the Baroque period.
Prerequisite: None
3 credits = 3 lecture  GA

MUS 231  The History of Music II. This continuation of MUS 230 links the Baroque era with the 20th Century. It examines the “revolutions” of the 17th, 18th, 19th and 20th centuries and their influences on musical expression.
Prerequisite: None
3 credits = 3 lecture  GA

Applied music or activity courses:

MUSA 103  Applied Voice I
MUSA 104  Applied Voice II
MUSA 105  Applied Piano I
MUSA 106  Applied Piano II
MUSA 107  Applied Brass Wind I
MUSA 108  Applied Brass Wind II
MUSA 109  Applied Organ I
MUSA 110  Applied Organ II
MUSA 111  Applied Woodwind I
MUSA 112  Applied Woodwind II
MUSA 113  Applied Classical Guitar I
MUSA 114  Applied Classical Guitar II
MUSA 115  Applied Percussion I
MUSA 116  Applied Percussion II
MUSA 203  Applied Voice I
MUSA 204  Applied Voice II
MUSA 205  Applied Piano I
MUSA 206  Applied Piano II
MUSA 207  Applied Brass Wind I
MUSA 208  Applied Brass Wind II
MUSA 209  Applied Organ I
MUSA 210  Applied Organ II
MUSA 211  Applied Woodwind I
MUSA 212  Applied Woodwind II
MUSA 213  Applied Classical Guitar I
MUSA 214  Applied Classical Guitar II
MUSA 215  Applied Percussion I
MUSA 216  Applied Percussion II

Applied music (private instruction) is offered in the preceding list of performance areas. Instruction is provided by student contracted instructors, under the supervision of the college. Applied Music courses require payment of tutorial fees in addition to regular tuition and lab fees. Lab fees are used to help defray the cost of providing practice facilities in the Fine Arts Building. The tutorial fees may range from $12 to $35 per half hour of instruction. Students studying with a contracted instructor pay their tutorial fees directly to their instructor. The tutorial fee is established by the contracted instructor.
All applied music courses are intended to develop necessary skills in performance, in preparation for transfer to senior institution. Students are expected to practice at least one hour per day. Instruction is given by college approved, private teachers. Instruction may take place on campus or in the instructor’s own studio. A list of approved instructors is available in the office of Visual and Performing Arts Department. Students with no previous experience in their chosen field of Applied Music study will not be permitted to register for three credit hours.

**MUSA** courses with a catalog number ending with “A” carry one hour of academic credit based on a weekly half-hour private lesson. This level of instruction is intended for beginners or those seeking a performance minor.

**MUSA** courses without the letter “A” carry three hours of academic credit based on a weekly one-hour private lesson. This level of instruction is intended for music majors only and students will qualify for their semester final grade by performing before a music examination jury. The jury is composed of all available music faculty, including contract instructors. Instructor approval is required with an **AUDITION**.

**MUSA** courses numbered in the 100 range are the first and second semester courses. The 200 level courses are restricted to sophomores in music who have completed two 100 level courses in sequence.

**NATURAL RESOURCES**  
Math and Science Department (810) 989-5663

**NTR 100 Introduction to Sustainable Energy Concepts.** This interdisciplinary course introduces the student to the principles and concepts associated with the efficient production of usable energy based on sustainable resources. It includes the technology of power production by wind energy, solar energy, hydrogen-fuel devices and other alternative fuel systems.  
Prerequisite: None  
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

**NURSING, ASSOCIATE DEGREE**  
Nursing Department (810) 989-5675

**ADN 103 Nursing Process and Health Assessment.** This course will expand on basic adult assessment skills utilizing the nursing process. This course includes interviewing skills, obtaining a health history, physical exam techniques for various body systems, diagnostic reasoning and documentation of findings. Student does not have to be admitted to the nursing program to take this course. Offered fall semester only.  
Prerequisite: Pre-transition program student (licensure required), licensed RN, or permission of instructor  
2 credits, plus 1 contact hours = 1.5 lecture, 1.5 laboratory

**ADN 123 Nursing Assessment.** This course will focus on basic adult and older adult health assessment skills for the adult client. This course includes interviewing skills, obtaining a health history, basic physical examination techniques for various body
systems, diagnostic reasoning and documentation of findings.
Prerequisite: Admission to ADN program and BIO 171
.90 credit = .90 lecture

ADN 123L Nursing Assessment - Clinical Skills. The laboratory component of this course expands on health assessment through practice and application of skills.
Prerequisite: Admission to the ADN program and BIO 171
.90 credit = .90 laboratory

ADN 124 Pharmacology for Nurses. This course is an introduction to nursing as a practicing profession and the role of the nurse relating to the use of pharmaceutical agents. The focus of this course is on the delivery of health care using evidence based practice and the nursing process for an adult client receiving pharmaceutical agents in a structured environment. The nurse provides direct care, communicates, teaches and manages the process of pharmacotherapeutics. Ethical and legal accountability of medication administration is emphasized.
Prerequisite: Admission to two-year ADN traditional or transition program, or permission of instructor
2 credits = 2 lecture

ADN 125 Principles of Nursing Care. This course is an introduction to nursing as a profession. The nursing process is introduced as it relates to nursing practice of the adult client in a structured environment. The roles of the nurse as a professional are introduced.
Prerequisite: Admission to the ADN program
4 credits = 4 lecture

ADN 125L Principles of Nursing Care - Clinical Skills. The clinical component of this course introduces the principles and practice of clinical nursing skills using nursing process in the laboratory and clinical setting. Principles inherent to the role of nurse as provider of direct care, communicator, teacher and member of the profession are practiced.
Prerequisite: Admission to the ADN program
5 credits, plus 10 contact hours = 15 laboratory

ADN 126 Nursing Care of the Adult I. This course is a continued development of the student as a professional. The nursing process is used as it relates to the medical surgical adult client with well-defined diagnoses. A holistic approach is used to assist the student to deliver care to the adult client.
Prerequisites: ADN 123, ADN 124 and ADN 125/125L
2.5 credits = 2.5 lecture

ADN 126L Nursing Care of the Adult I - Clinical Skills. The clinical component emphasizes the role of the student in providing direct client care. The role of nurse as communicator, teacher, manager and member of the profession is continued.
Prerequisites: ADN 123, ADN 124 and ADN 125/125L
2.5 credits, plus 5 contact hours = 7.5 laboratory

ADN 127 Nursing Care of the Childbearing Family. This course is a continued development of the nurse as a professional. The nursing process is used as it relates to the childbearing family with well-defined nursing diagnoses. A holistic approach is
used to assist the student to deliver family-centered care to the childbearing family with both normal and abnormal conditions.
Prerequisites: ADN 123, ADN 124 and ADN 125/125L
2 credits = 2 lecture

ADN 127L Nursing Care of the Childbearing Family - Clinical Skills. The clinical component of this course emphasizes the role of the student in providing direct care to the childbearing family in the acute care and community setting. The role of the nurse as communicator, teacher, manager and member of the profession is continued.
Prerequisites: ADN 123, ADN 124 and ADN 125/125L
1.5 credits, plus 3 contact hours = 4.5 laboratory

ADN 128 Nursing Care of the Adult II. This course is a continued development of the student as a professional. The nursing process is used as it relates to the medical surgical adult client with well-defined diagnoses. A holistic approach is used to assist the student to deliver care to the adult client.
Prerequisites: ADN 126/126L, and ADN 127/127L
1.5 credits = 1.5 lecture

ADN 128L Nursing Care of the Adult II - Clinical Skills. The clinical component of this course emphasizes the role of the student in providing direct client care. The role of the nurse as communicator, teacher, manager and member of the profession is continued.
Prerequisites: ADN 126/126L and ADN 127/127L
1.5 credits, plus 3 contact hours = 4.5 laboratory

ADN 200 Essentials of Nursing Care. This course is an introduction to nursing as a profession for qualified licensed health care providers. The nursing process is introduced as it relates to nursing practice in the adult client in a structured environment. The role of the nurse as a professional is introduced.
Prerequisite: Admission to Transition Nursing Program: Health Care Provider to ADN Track
4 credits = 4 lecture

ADN 200L Essentials of Nursing Care - Clinical Skills. The clinical component of this course introduces the principles and practice of clinical nursing skills using nursing process in the laboratory and clinical setting. The role of nurse as provider of direct care, communicator, teacher, manager and member of the profession are practiced.
Prerequisites: Admission to Transition Nursing Program: Health Care Provider to ADN Track
4 credits, plus 8 contact hours = 12 laboratory

ADN 225 Nursing Care of the Adult II. This course is a continued development of the student as a professional. The nursing process is used as it relates to the medical surgical adult client with well-defined diagnoses. A holistic approach is used to assist the student to deliver care to the adult client.
Prerequisites: ADN 128/128L
2 credits = 2 lecture
ADN 225L Nursing Care of the Adult III - Clinical Skills. The clinical component emphasizes the role of the student in providing direct client care. The role of the nurse as communicator, teacher, manager and member of the profession is continued. Prerequisites: ADN 128/128L 2.25 credits, plus 4.5 contact hours = 6.75 laboratory

ADN 226 Mental Health Nursing Care. This course continues to develop the student as a communicator by teaching the therapeutic use of self in nursing practice. The nursing process is used as it relates to adult clients with well-defined mental health nursing diagnoses. Principles of holistic health are considered, with particular focus on behaviors, stress, crisis and coping. Ethical/legal issues unique to mental health situations are emphasized. Prerequisites: ADN 128/128L and PSY 220 2 credits = 2 lecture

ADN 226L Mental Health Nursing Care - Clinical Skills. The nursing process is used to help adult clients to achieve personal goals in mental health settings. The clinical component emphasizes the role of the student in providing direct client care for actual and potential mental health problems. The role of nurse as communicator, teacher, manager and member of the profession is continued. Prerequisites: ADN 128/128L and PSY 220 2 credits, plus 4 contact hours = 6 laboratory

ADN 227 Nursing Care of Children. This course continues the development of the student as a professional. The nursing process is used as it relates to the child and family with well-defined nursing diagnoses. A holistic approach is used to assist the student to deliver family-centered care to the pediatric client. Prerequisites: ADN 225/225L, ADN 226/226L and HE 210 2 credits = 2 lecture

ADN 227L Nursing Care of Children - Clinical Skills. The clinical component of this course emphasizes the role of the student in providing direct care to the child and family in a variety of settings. The role of nurse as communicator, teacher, manager and member of the profession is continued. Prerequisites: ADN 225/225L, ADN 226/226L and HE 210 1.5 credits, plus 3 contact hours = 4.5 laboratory

ADN 228 Nursing Leadership. This course is designed to continue the development of the student as a professional and a leader. Emphasis is placed on the skills required for managing care of a group of clients at the beginning RN level. The principles of critical thinking are applied to guide the student in legal and ethical decision making. Prerequisites: ADN 225/225L and ADN 226/226L 2 credits = 2 lecture

ADN 228L Nursing Leadership - Clinical Skills. Clinical experiences focus on the integration of prior learning as a direct care provider, communicator, and teacher. Emphasis is placed on leadership and management principles; professional responsibilities; and legal and ethical accountability. Prerequisites: ADN 225/225L and ADN 226/226L 2.5 credits, plus 5 contact hours = 7.5 laboratory

ADN 230 Nursing Transition. This course is an introduction to nursing as a profession focusing on the transition from the LPN to the RN role. Emphasis is on scientific principles, holistic nursing care of the person and the use of the nursing process to
provide care. Trends in health care, health promotion and legal-ethical accountability are integrated throughout this course.

Prerequisite: Admission Transition ADN Program: LPN to RN track, ADN 103, HE 101 and HE 224

4 credits = 4 lecture

**ADN 231 Nursing Transition and Care of the Adult I.** This course is a continued development of the student as a professional. The nursing process is used as it relates to the medical surgical adult client with well-defined nursing diagnoses. A holistic approach is used to assist the student to deliver care to the adult client. This course is a once a year offering.

Prerequisite: ADN 230; HCP to RN Track = ADN 200/ADN 200L

2.5 credits = 2.5 lecture

**ADN 231L Nursing Transition - Clinical Skills.** This clinical component emphasizes the role of the student in providing direct care. The role of the nurse as a communicator, teacher, manager and member of the profession is continued.

Prerequisite: ADN 230; HCP to RN Track = ADN 200/ADN 200L

1.5 credits, plus 3 contact hours = 4.5 laboratory

**ADN 233 Nursing Transition and Care of the Adult II.** This course is a continued development of the student as a professional. The nursing process is used as it relates to the medical surgical adult client with well-defined nursing diagnoses. A holistic approach is used to assist the student to deliver care to the adult client.

Prerequisites: ADN 231/231L, ENG 101 and PSY 180

5 credits = 5 lecture

**ADN 233L Nursing Transition and Care of the Adult II - Clinical Skills.** The clinical component of ADN 233 emphasizes the role of the student in providing direct client care. The role of the nurse as a communicator, teacher, manager and member of the profession are continued.

Prerequisites: ADN 231/231L, ENG 101 and PSY 180

1.5 credits, plus 3 contact hours = 4.5 laboratory

**ADN 234 Nursing Transition: Maternal Child.** This course is a continued development of the transition student as a professional. The nursing process is used as it relates to the newborn, child, maternity client and family with well defined nursing diagnoses. A holistic approach is used to assist the student to deliver family-centered care.

Prerequisites: ADN 231/231L

3 credits = 3 lecture

**ADN 234L Nursing Transition: Maternal/Child Clinical Skills.** The clinical component of this course emphasizes the role of the transition student in providing family-centered care in a variety of settings. The role of the nurse as communicator, teacher, manager and member of the profession is continued.

Prerequisites: ADN 231/231L

1.5 credits, plus 3 contact hours = 4.5 laboratory

**ADN 235 Nursing Transition: Leadership.** This course is designed to continue the development of the transition student as a RN and leader. Emphasis is placed on the skills required for managing care of a group of clients at the beginning RN graduate
level. The principles of critical thinking are applied to guide the student with legal and ethical decision making.

Prerequisites: ADN 233/233L and ADN 234/234L
2 credits = 2 lecture

**ADN 235L Nursing Transition: Leadership - Clinical Skills.** Clinical experiences focus on the integration of prior learning as a direct care provider, communicator, and teacher. Emphasis is placed on the transition to the RN role regarding leadership and management principles; professional responsibilities; and legal and ethical accountability.

Prerequisites: ADN 233/233L and ADN 234/234L
2 credits, plus 4 contact hours = 6 laboratory

**ADN 236 Nursing Care of the Older Adult.** This course continues to develop the nurse as a professional by building on the concepts relative to the older adult taught in previous nursing courses. Principles of holistic health are considered with particular focus on the diversity of health care needs of older adults in the community and clinical setting.

Prerequisites: PSY 220 and HE 210
1 credit = 1 lecture

**OFFICE ADMINISTRATION**

**Computer and Office Technology Department (810) 989-5628**

**OA 101 Personal Keyboarding on Microcomputers.** Avoid the “hunt and peck” method of typing on microcomputers by joining this course and learning basic keyboarding (typing) skills. This course is designed for non-office administration majors.

Prerequisite: None
1 credit = 1 lecture/laboratory

**OA 110 Beginning Keyboarding.** Students will learn strategies to help achieve mastery of the keyboard and proper techniques of touch typing, in addition to being introduced to letter styles, memos and tables. Students will also gain mastery of basic word processing commands, as documents will be produced on microcomputers using word processing software.

Prerequisite: None
3 credits = 3 lecture/laboratory

**OA 115 Intermediate Keyboarding.** This course will help students develop speed and accuracy by learning proper formats and keyboarding shortcuts while producing business correspondence, manuscripts/reports, tables and a variety of other business documents. This course utilizes microcomputers, operating software and word processing application software for instruction. Further development of word processing skills also will be stressed in the course. This course should assist students in preparing for the MOS (Microsoft Office Specialist) certification.

A pretest is available for proper keyboarding placement.

Prerequisite: OA 110 or equivalent using microcomputers AND a minimum of 40 words per minute
4 credits = 4 lecture/laboratory
OA 130 Time and Project Management. This course will reinforce time management and self-management tools by establishing long-range goals, defining values and developing planning techniques. This course will introduce an electronic mail and calendaring tool (e.g., Outlook). OA 130 will provide a “hands-on” approach to managing email messages, calendars, projects and reports. The focus will be to improve productivity in busy offices by integrating management techniques with computer tools. Grading = satisfactory/unsatisfactory
Prerequisite: None
1 credit = 1 lecture

OA 135 Automated Office Principles and Practices. This class serves as an introduction to office employment, featuring the administrative assistant in the automated office as both a public relations specialist and a professional in the office environment. Topics to be covered include professional demeanor, the office environment, organization and management of time and work, public relations responsibilities, computer systems and software, dictation skills, processing of documents, in-coming and out-going communications, telephone techniques, applications for business grooming and review of punctuation and grammar usage. The course also features a study of realistic case problems and the completion of related work assignments. Guest speakers and field trips further enhance learning opportunities.
Prerequisite: OA 110 or OA 115
4 credits = 4 lecture

OA 150 Windows and File Management for Beginners. This course is designed to develop microcomputer skills for beginners. This course will introduce Windows software and file management techniques so users will become comfortable before they begin application software instruction. Topics will include getting started, managing programs, managing files and folders, transferring data between applications, managing printing, and accessing software like Paint and WordPerfect for Windows and customizing windows. File management techniques will focus on personal and office organization.
Prerequisite: None
2 credits = 2 lecture/laboratory

OA 151 Home/Student Word Processing. This elective course is designed for the individual who wishes to learn microcomputer-based word processing for student or home use. Students who desire a more thorough orientation to word processing should substitute OA 155 for this course.
Prerequisite: None
1 credit = 1 lecture/laboratory

OA 155 Word Processing on Microcomputers. This course provides “hands-on” microcomputer experience while providing word processing concepts to the student. Various word processing applications such as creating, revising, storing, merging and printing of documents, letters and tables are taught with the aid of appropriate microcomputer hardware and software. Additional lab time outside of class will be required of the student to complete assignments.
Prerequisite: OA 110 or OA 115
4 credits = 4 lecture/laboratory

OA 161 Office Technology. This course covers a hands-on approach to technologies used in offices. Topics include Internet research, Internet communities, electronic mail, webcasting, scheduling, data conversion, voice recognition, desktop publishing, etc.
Students will operate various equipment such as digital and multi-function photocopy machines, scanners, voice activated equipment, printers, digital cameras and other office technologies. Instruction occurs in small groups and in teams, so individuals will build oral communication skills. Individuals are required to participate in a panel presentation. Equipment and software troubleshooting will occur, which will apply critical thinking skills. Because special equipment is used for this course, individuals will be on campus eight additional hours to complete team and individual projects.

**Prerequisite:** None

**4 credits = 4 lecture/laboratory**  
CT OC

**OA 162 Integrative Technology in the Classroom.** This course will give students the practical, hands-on training and experience in several areas of classroom technology, including: using word processing software and external equipment, including image scanning, digital painting, digital photography and image projection; slide shows with software; desktop publishing software to create several fliers, newsletters and other communication materials for classroom use and parent communication; creating classroom management spreadsheets for grade books and graphic reporting; experiencing telecommunications in classroom research and lesson delivery by using the Internet, email, virtual field trips, interactive television and other web resources.

**Prerequisite:** CIS 115

**4 credits = 4 lecture/laboratory**  

**OA 164 PowerPoint Presentation Graphics.** This “hands-on” software course begins with an overview of PowerPoint software by producing outlines and slides. Graphics will be edited and printed. As skills progress, objects will be drawn and embedded from other software packages. Techniques for scanning and importing pictures, movies and sound will be demonstrated and applied. Several projects will be developed to demonstrate electronic presentation skills for the office.

**Prerequisite:** None

**1 credit = 1 lecture**

**OA 200A-C Office Administration Cooperative Education Experience.** These courses provide cooperative education work experience arrangements for students in Office Administration programs. A student is under the supervision of both the employer and the cooperative education coordinator and works a specified number of hours each week. One hundred eighty hours of work experience is required for each cooperative education experience with at least OA 200B being completed in the Office Administration area of specialty (i.e. legal, medical, clinical medical, executive). Seminars to discuss experiences and problems are also held.

Students pursuing dual degrees will complete OA 200C in the specialty area of their second degree.

**Prerequisite:** Permission of co-op coordinator

**NOTE:** Grade of C or better in OA courses and competency courses required for entry into this course.

**3 credits = 3 lecture** (180 work hours required per education experience)

**OA 202 Criminal Law.** This course is a study of substantive law as a means of defining and preserving social order. Sources of criminal law, classification of crimes against persons, property and public welfare; principles of criminal liability, elements necessary to establish crime and criminal intent; specific crimes and defenses and constitutional limitations are examined.

**Prerequisite:** None

**3 credits = 3 lecture**
OA 225 Business Communications. Students will study the building of communication skills for productive work in business, such as planning and writing business messages, including memorandums, letters and reports. Extensive writing will emphasize appearance, accuracy, coherence, clarity, conciseness, courtesy, appropriate tone and organization while producing effective results. The course will also review language skills and mechanics. Students will study strategies for improving oral communication and listening. Oral communication skills will be demonstrated in small and large group discussions, sharing sessions and a number of short presentations, followed by a longer formal, in-class business presentation. All hand-in assignments are required to be typed/keyboarded.
Prerequisite: ENG 101
4 credits = 4 lecture  OC  WR

OA 235 Electronic Office Administrative Procedures. Students will study techniques for learning to work effectively in the office when handling travel arrangements; expediting meetings, understanding computer technology and communication; collecting business information, presenting statistical information; handling banking responsibilities, including investments and insurance; producing and processing legal papers; fulfilling an administrative role, and understanding purposes and functions of management, work flow and procedure manuals. Offered fall semester only.
Prerequisite: OA 115, OA 135, OA 260
3 credits = 3 lecture

OA 255 Advanced Word Processing and Desktop Publishing. This course provides "hands-on" experience in applying advanced word processing and desktop publishing concepts. Various word processing applications such as merging, importing, sorting, selecting, transmitting, drawing, etc. will aid in the creation of macros, styles, templates, tables, columns, graphics, forms, tri-folds, envelopes/labels, etc. This course should assist students in preparing for the MOS (Microsoft Office Specialist) certification testing. Offered winter semester only.
Prerequisite: OA 115 and OA 155
4 credits = 4 lecture/laboratory

OA 260 Machine Transcription for Word Processing. Students will focus on the development of a salable skill in the use of office transcribing machines. Proper techniques of letter placement, necessary English skills of punctuation, spelling and grammar, and other skills essential for efficient transcription are stressed. Offered winter semester only.
Prerequisite: OA 115 and 135, or concurrent enrollment in these courses
3 credits = 3 lecture/laboratory

OA 262 Records Management for the Automated Office. This course includes a hands-on and computer-based approach to teaching the fundamentals of filing and records management. Topics include manual filing--alphabetic, geographic, subject, numeric, alphanumeric; electronic filing--creating and using database management files; and an introduction to records management--maintaining records, types of filing systems, records creation and control. Critical thinking skills will be applied.
Prerequisite: OA 115
4 credits = 4 lecture/laboratory  CT
OA 270 Legal Transcription. The development of skills in the use of office transcribing machines to produce accurate legal documents and correspondence is the focus of this course. Emphasis is placed on efficient transcription techniques, correct legal form and legal terminology. Offered winter semester only.
Prerequisite: OA 202 and OA 115
3 credits = 3 lecture

OA 275 Legal Office Administrative Procedures. This course is designed to provide students with an understanding of the general and specialized office duties performed by a legal administrative assistant. Various facets of law, courts, legal procedures, document production and correspondence at the federal, state and/or municipal levels will be introduced. Skills will be developed by providing project simulations in personal injury, adoption, probate, corporation, real estate and criminal law. Accuracy in production and procedures will be emphasized. Offered fall semester only.
Prerequisite: OA 135, OA 115 and OA 270
3 credits = 3 lecture/laboratory

OA 280 Medical Terminology & Transcription. This course offers a presentation of terminology that a medical transcriptionist is most likely to encounter in five types of reports – consultation, history and physical examination, special procedure, operative and discharge summary. Transcription of reports is based on the terminology presented. Offered winter semester only.
Prerequisite: BIO 160 and OA 115
4 credits = 4 lecture/laboratory

OA 280A Medical Terminology. This course offers a presentation of terminology that a medical assistant is most likely to encounter in the medical field – a physician’s office, hospital or other medical facility. This medical terminology course will predominately include the study of prefixes, suffixes and root words. Offered winter semester only.
Prerequisite: BIO 160
2 credits = 2 lecture

OA 282 Pharmacology for Medical Assistants. This course will study commonly used medications according to body system classifications. This will include their intended purpose along with the benefits and effects of each. Students will also learn how to calculate and convert medication dosages. Offered winter semester only.
Co-requisite: OA 280A or OA 280
2 credits = 2 lecture

OA 285 Medical Office Administrative Procedures. This course will introduce students to the duties of the medical office worker in maintaining an appointment schedule, meeting the patient, receiving and placing telephone calls, managing records, preparing medical histories, billing the patient, managing the office, preparing for medical society meetings, typing professional reports, making travel arrangements and keeping financial records. Presentation of legal ethical concepts of medicine as they relate to the medical office worker, including the licensing of doctors, public relations professional liability prevention, the doctor in court, principles for release of information, the right to die and abortion are also studied. A study of medical specialties is also included, along with a presentation of techniques for obtaining employment and achieving advancement. The use of medical office simulations enhances learning opportunities. Offered fall semester only.
Prerequisite: OA 135, OA 115 and OA 280 or OA 280A
4 credits = 4 lecture
OA 287 Beginning Medical Office Clinical Techniques. This course focuses on a range of topics, including coverage of medical office roles and relationships, infection control, vital signs, examination techniques, body mechanics, basic specimen collection and handling, eye and ear care, sanitation of equipment, minor surgery preparation, sterile techniques, dressing and bandage application and removal, and x-ray procedures. The clinical component of Beginning Medical Office Clinical Techniques provides an opportunity for the student to develop introductory skills in clinical procedures in a laboratory setting. Enrollment in medical clinical assistant program, or consent of instructor, and proof of Hepatitis B vaccine and/or positive titer required. Offered fall semester only. Prerequisite: OA 282 and BIO 160
3 credits = 3 lecture/laboratory

OA 288 Advanced Medical Office Clinical Techniques. An advanced course that provides knowledge and builds skills for family and specialty practices. Course content will include converting measurements, preparing and handling medications, recording procedures, accessing sites, collecting specimens, testing specimens and cultures and processing EKGs. Students will be taught stress management and professional demeanor techniques throughout this course. Offered winter semester only. Prerequisite: OA 287
3 credits = 3 lecture/laboratory

OA 289 Computerized Medical Billing. Students will develop the ability to recognize and define health insurance terms, perform procedure and diagnosis coding and complete universal health insurance claims, such as Blue Cross and Blue Shield, Medicaid, Medicare, TRICARE and CHAMPVA, Worker’s Compensation and dental insurance forms. This course will provide the opportunity to operate a computerized billing system and the experience of using medical office software. The course includes an introduction to both ICD10 (diagnostic coding) software and CPT (procedure coding) and offers some basic parameters involved when submitting bills to insurance companies. Offered fall semester only. Pre/Corequisite: BIO 160 and OA 280 or OA 280A
3 credits = 3 lecture/laboratory

PHILOSOPHY
Communications Department (810) 989-5578

Philosophy studies the fundamental issues and problems of existence, such as the nature, origin and purpose of the universe, and the nature of humans, their freedom and their moral and social obligations, in order to formulate a coherent world view and philosophy of life. To solve these problems, philosophy stresses logical and careful thinking; philosophy courses are especially recommended for pre-professional, liberal arts and science programs.

PHL 210 Introduction to Philosophy. This course is organized with a “problems” approach to show how, through the ages, philosophers have dealt with such recurring problems as those of knowledge, morality, freedom, justice and the nature of the universe and a human’s place in it. The object of the course is to sharpen the student’s ability to evaluate ideas and broaden the student’s world view. Prerequisite: None
3 credits = 3 lecture
PHL 215  Introduction to Logic.  This course introduces the basic principles of reasoning, both deductive and inductive, and gives some attention to informal fallacies and syllogistic reasoning.  The object of the course is to make the student a more logical thinker and more alert to fallacious arguments.  
Prerequisite: None  
3 credits = 3 lecture  CT

PHL 220  Religions of the World.  This course provides a concise, comparative introduction to the major religions of the world, introducing students to the basic vocabulary of the field, theories of origin, the historical and cultural context, the lives of their founders, the teachings, the development and current status within the world and the contemporary socio-political impact of major religions.  
Prerequisite: None  
3 credits = 3 lecture  CT

PHYSICAL EDUCATION
Health and Human Services Department (810) 989-5675

PE 100  Wellness: A Concept of Health and Fitness.  The student’s physical status is appraised with a pre-test program which includes physical activities, postural analysis, somatotyping and body fat calibrations.  Course activities include aerobics, isometrics, weight training and other forms of exercise.  Lectures are provided related to weight control, postural improvement, cardiorespiratory fitness and principles of physical activity.  The course is designed to stimulate the student’s interest in a lifetime of good health and physical activity.  
Prerequisite: None  
2 credits, plus 1 contact hour = 2 lecture, 1 laboratory

PE 110  Defensive Tactics.  This course will provide instruction and practice in the techniques of self-defense.  Defensive tactics is primarily designed for students enrolled in the law enforcement program.  
Prerequisite: None  
1 credit, plus 1 contact hour = 2 laboratory

PE 123  Bowling.  The course will emphasize the development of specific bowling skills.  History, rules and etiquette will be presented.  Fundamentals such as equipment knowledge, stance, approach, delivery, principles of movement to bowling, strike adjustment, spare bowling, league concept and scoring will be emphasized through actual bowling.  This course is designed for any skill level.  
Prerequisite: None  
1 credit, plus 1 contact hour = 2 laboratory

PE 124  Golf.  This is a basic course to develop the skills and knowledge of golf.  The course includes the fundamentals of golf plus etiquette, rules and language of the game.  This course is designed for any skill level.  This course is a once-a-year offering.  
Prerequisite: None  
1 credit, plus 1 contact hour = 2 laboratory

PE 128  Weight Training.  The course will entail a study of the structure and function of the muscular system and development of such through the use of weight resistance training.  
Prerequisite: None  
1 credit, plus 1 contact hour = 1 lecture, 1 laboratory
PE 129 Physical Conditioning. This course is designed for students desiring an aggressive, advanced approach to physical fitness. Pre- and post-fitness testing is combined with skill and technique in improving levels of cardiovascular function, strength, flexibility, endurance, and power.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

PE 131 Beginning Lyrical Jazz Dance. Beginning lyrical jazz is performed, in addition to some related musical theatre routines. This course includes conditioning, theory and technique, introduction to choreography (with computer software), prevention of dance injuries, dance history, and significant issues in dance. This course is also available as THA 131.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

PE 132 Beginning Tap Dance. Beginning tap dance techniques and routines are performed. This course will introduce students to basic through advanced tap dance movements. Units on the background and history of tap will be included. Students will be introduced to the LifeForms choreography software. All skill levels will be accommodated. This course is also available as THA 132.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

PE 133 Fitness Walking. This course is designed to help students improve their level of fitness through vigorous walking. Each student will develop a personalized, healthy lifestyle plan which integrates exercise, diet, and stress management.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

PE 134 Beginning Classical Ballet. This course is an introduction to basic classical ballet. Participation will include stretching, conditioning, ballet barre, centre work, and combinations. Topics will include dance injury prevention, the theory of movement, and becoming familiar with significant people, events, and issues in the performing arts. Students will be introduced to the LifeForms choreography software. There is no mandatory public performance. This course is also available as THA 134.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

PE 141 Personal Health. This course is designed to develop attitudes, skills, and habits favorable to healthful living. The mental, physical, and social aspects of individual and community health are stressed.
Prerequisite: None
3 credits = 3 lecture

PE 143 Emergency Medical Care. This course provides the student with the basic first-aid procedures necessary for administering to the sick and injured patient. The student successfully completing this course will receive American Red Cross certification in advanced first aid.
Prerequisite: None
3 credits = 3 lecture
PE 152 Baseball Theory. This course is designed to assist prospective baseball coaches to develop the skills, knowledge and strategies necessary to coach baseball from the amateur youth level to the interscholastic level. Baseball theory is structured for students who are beginners to students with previous baseball background. Offered winter semester only.
Prerequisite: None
2 credits = 2 lecture

PE 153 Basketball Theory. Basketball Theory teaches the fundamentals of offensive and defensive basketball. This course also teaches the tactics, techniques of scouting, and game plans associated with becoming a successful basketball coach. Basketball Theory is a course recommended for physical education majors and minors. The course will be structured for the beginner as well as the student with a basketball background. The course is open to all levels of basketball background.
Prerequisite: None
2 credits = 2 lecture

PE 231 Advanced Lyrical Jazz Dance. This course is designed for students with some dance background. The two areas of emphasis are (1) a progressively improved performance level, based on the level of student experience, and (2) an introduction to the skills of basic choreography, including the use of LifeForms software. Dance injury prevention, issues in performing arts and overall conditioning are included. This course is also available as THA 231.
Prerequisites: PE 131/THA 131
1 credit, plus 1 contact hour = 2 laboratory

PE 232 Advanced Tap Dance. Continuation of tap dance techniques and routines are performed. This course will continue concepts of basic and advanced tap dance movements. Units on the background history of tap will be included. Students will continue with choreography computer software. All skill levels will be accommodated. This course is also available as THA 232.
Prerequisite: PE 132/THA 132
1 credit, plus 1 contact hour = 2 laboratory

PHYSICAL SCIENCE
Math and Science Department (810) 989-5663

These courses are intended for students who have no background in the physical sciences, and are not majoring in a science curriculum, but are in need of a science laboratory course.

PHS 101 Foundation of the Physical Sciences. This course is designed to provide the student with a solid background in both the principles and the historical development of astronomy, physics, chemistry and meteorology. Experiments correlate closely with lecture and emphasize observation, data collection, and the interpretation and effective communication of information. Prospective teachers and others interested in learning more about their physical world may find this course to be of value.
Prerequisite: None
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory
PHS 131 History of Science. This is an interdisciplinary course that explores science through the medium of history. It allows one a look at science from the perspective of an outsider - much as a political scientist studies politics or an anthropologist explores indigenous cultures. At the same time, the student gains knowledge about where we are today, and how we got here, in our understanding of the structure of the universe, atomic theory, energy, motion, evolution by natural selection, and space and time. This course also is available as HIS 131.

NOTE: Students can only receive credit for PHS 131 or HIS 131, and course designation must be determined at the time of registration.

Prerequisite: None; ENG 102 recommended
4 credits = 4 lecture  CT

PHYSICS
Math and Science Department (810) 989-5663

Two sequences in physics are available, as well as an introductory course. Students needing only a general introductory survey of physics for such areas as medicine, dentistry or the life sciences should complete Physics 121 and 122. Students following a curriculum which requires a strong physics background such as chemistry, geology, physics or engineering should complete Physics 221 and 222 by the end of their sophomore year.

Students intending a major in some phase of engineering may be required to take Physics 231 and should consult the college or university to which they intend to transfer.

Students needing only a brief introduction to physics or needing a preparatory course for the general sequences should take Physics 110.

PHY 110 Introduction to Physics. This is an introduction to the concepts, theories and principles of physics emphasizing the logical structure and general applicability of the science. Topics will be selected from the general areas of mechanics, heat, electricity and wave phenomena. Diverse laboratory experiences will be provided for students relative to their immediate and long-term goals.
Prerequisite: None
4 credits, plus 1 contact hour = 3 lecture, 2 laboratory

PHY 115 Introduction to Engineering. This course will familiarize students with the various branches of the engineering profession, the ethics and responsibilities of the professional engineer, and the skills and techniques necessary for the successful completion of an undergraduate engineering curriculum. The course includes the use of computer graphics and computer-based mathematics.
Prerequisite: Successful completion of, or concurrent enrollment in, MTH 113, and successful completion of EG 180.
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

PHY 121 College Physics I. This is a non-calculus introductory course for students needing a general background in physics. The course includes the study of motion, forces, momentum, energy, fluid statics and dynamics, wave motion, acoustics, temperature, heat and thermodynamics. Offered fall semester only.
Prerequisite: MTH 112, or appropriate placement by college assessment or ACT score
5 credits, plus 1 contact hours = (4 lecture, 2 laboratory)
PHY 122  College Physics II. This course includes the study of electricity, circuit theory, magnetism, radiation, geometric optics, interference, spectra, atomic structure and radioactivity. Offered winter semester only.
Prerequisite: Successful completion of PHY 121 or departmental consent
5 credits, plus 1 contact hours = 4 lecture, 2 laboratory

PHY 221  Mechanics, Heat and Sound. This is an introductory course for students intending to major in a physical science or engineering. The course includes the study of motion, forces, momentum, energy, fluid statics and dynamics, wave motion, acoustics, temperature, heat and thermodynamics. Offered fall semester only.
Students should be concurrently enrolled in MTH 215 or a higher math course.
Prerequisite: MTH 114
5 credits, plus 1 contact hour = 4 lecture, 2 laboratory

PHY 222  Electricity, Light and Modern Physics. This course includes the study of static electricity, circuit theory, magnetism, radiation, geometric optics, interference, spectra, atomic structure, radioactivity and nuclear structure. Offered winter semester only.
Prerequisite: Successful completion of PHY 221 or departmental consent
5 credits, plus 1 contact hour = 4 lecture, 2 laboratory

PHY 231  Statics. This course is for students intending to major in civil or mechanical engineering, and includes the study of systems of forces, equilibrium, centroids, and an analysis of structures, friction and moments of inertia. This course may transfer as engineering credit. Offered winter semester only.
Prerequisite: Successful completion of PHY 221 and MTH 215
3 credits = 3 lecture

PHY 232  Introduction to Electric Circuits. This is a basic course to develop in students the skills, background and understanding necessary for using and designing electrical circuits in the fields of electrical, mechanical, industrial and computer engineering. Topics covered include electrical quantities and waveforms, Kirchhoff’s laws, Electrical Networks, Nodal and Mesh analysis, Thevenin and Norton equivalent circuits, Sinusoidal Steady State responses, Filters, the Laplace Transform and Three Phase AC Power.
Prerequisite: MTH 215 and PHY 122 or PHY 222
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

POLICE WORK (See Criminal Justice)

POLITICAL SCIENCE
Social Science Department (810) 989-5707

PS 101  Introduction to Political Science. Institutions and principles of government utilizing the American experience at the national, state and local levels are examined. It will also include a study of international organizations and global interrelationships.
Prerequisite: None
3 credits = 3 lecture
PS 101H Introduction to Political Science, Honors. The course content consists of the concepts covered in the PS 101, Introduction to Political Science, with an emphasis on more in depth reading, analysis and writing about the topics of Political Science.  
Prerequisite: Acceptance into the Honors Program  
3 credits = 3 lecture   GA   GP

PS 140 Problems in Contemporary Affairs. The focus of this course will be on various current events, people, institutions and problems at the local, state, national and international levels.  
Prerequisite: None  
2 credits = 2 lecture

PS 150 Multicultural Awareness and Intercultural Communication. The course provides students with an opportunity to acquire an awareness of the diversity of cultures in the United States and throughout the world. It also provides an opportunity to develop the understanding and skills necessary for effective intercultural communication.  
Prerequisite: None  
2 credits = 2 lecture   GA

PS 210 National Policies. This course offers a study of national policies and the national policy-making process, along with an examination of the interplay of politics and institutions relative to policy-making and implementation. Emphasis will be placed on the study of the various policy areas of the national government.  
Prerequisite: None  
3 credits = 3 lecture   GP with PS 220

PS 220 State and Local Government. Students will study and analyze governmental structure, political processes and public policy at the state and local levels with emphasis on the experience in Michigan. This course is a once-a-year offering.  
Prerequisite: None  
3 credits = 3 lecture   GP with PS 210

PS 230 International Relations. This course provides an analysis of contemporary world politics with particular emphasis on the development and growth of nations and their struggle for power.  
Prerequisite: None  
3 credits = 3 lecture   CT   GA

PRACTICAL NURSING
Nursing Department (810) 989-5675

PN 115 Dynamics of Human Relations. The course will introduce the practical nursing student to the theories and concepts of human development and behavior across the life span and communication skills. The focus will be on self-concept, stress and adaptation, therapeutic communication skills, group process, mental health, chemical dependency, crisis intervention and psychosocial changes that take place throughout the lifespan. Nursing process and theories form the foundation to provide for caring nursing practice.  
Prerequisite: Admission to the PN Program  
3 credits = 3 lecture
PN 120  Nutritional Concepts. This is a basic course designed to introduce the concepts of nutrition influencing health and well-being. This course will enable the practical nursing student to understand dietary modification necessary to maintain and restore health throughout the life span, in various cultures. This is an introductory course designed for the nursing student based on the fundamentals of nutrition. The content emphasizes the positive correlation between nutrition and health status throughout the life span, in various cultures.
Prerequisite: Admission to the PN Program
1.5 credits = 1.5 lecture

PN 130  Introduction to Nursing Concepts. This course is an introduction to nursing concepts related to the care and caring of the individual patient. A holistic approach using the nursing process is emphasized as the foundation of nursing practice. This course focuses on the acquisition of basic nursing skills and fundamental theories. The role of the direct care provider, communicator, teacher, manager and member of the nursing profession are presented.
Prerequisites: Admission to PN Program
5 credits = 5 lecture

PN 130L  Introduction to Nursing Concepts Clinical. The clinical component of Introduction to Nursing Concepts provides an opportunity for the student to develop basic nursing skills in laboratory and clinical settings.
Prerequisite: Admission to PN Program
4.5 credits, plus 9 contact hours = 13.5 laboratory

PN 140  Pharmacology I. This course is an introduction to the use of pharmaceutical agents in nursing. Concepts include the methods and principles of pharmacology, the classification of drugs and drug administration using the Nursing Process. Drug classifications presented are drugs affecting the autonomic nervous system, cardiovascular system, blood components and blood coagulation and the kidney and body fluid composition. The role of the nurse as provider of care is emphasized, along with legal and ethical accountability.
Prerequisite: PN 130/130L
1 credit = 1 lecture

PN 150  Adult Nursing I. Development in the art and science of nursing as it relates to the adult medical-surgical patient is the focus of this course. The practical nursing student will use the nursing process in the delivery of patient care. This course integrates previous knowledge with medical-surgical principles.
Prerequisite: PN 130/130L
2 credits = 2 lecture

PN 150L  Adult Nursing I Clinical. This course provides an opportunity for the student to care for adult patients in medical-surgical settings using the nursing process and applying concepts of a caring, holistic nursing approach.
Prerequisite: PN 130/130L
2 credits, plus 4 contacts = 6 laboratory

PN 160  Maternal Newborn Nursing. This course provides an opportunity for the student to study culturally sensitive family-centered, maternal and newborn health using the nursing process. It includes reproduction, gestation, pregnancy, labor and
delivery, postpartum and the newborn infant. The focus is on normal, deviations or complications in each area, and related nursing care.

Prerequisites: PN 130/130L
2 credits = 2 lecture

PN 160L Maternal Newborn Nursing Clinical. This course provides an opportunity for the student to use the nursing process in applying maternal newborn concepts of nursing to the patient.
Prerequisites: PN 130/130L
0.75 credits, plus 1.5 contact hours = 2.25 laboratory

PN 165 Child-Adolescent Nursing. This course will present concepts of health and illness from birth throughout adolescence. Human developmental theories are applied to the nursing process as it relates to the care of the child, adolescent and family.
Prerequisites: PN 130/130L
2 credits = 2 lecture

PN 165L Child-Adolescent Nursing Clinical. The clinical component of Child-Adolescent Nursing provides an opportunity for the student to develop skills in the nursing care of the child-adolescent and family.
Prerequisites: PN 130/130L
0.75 credits, plus 1.5 contacts = 2.25 laboratory

PN 170 Pharmacology II. This course is a continuation of PN 140 in the use of pharmaceutical agents in nursing. Concepts include the methods and principles of pharmacology, the classification of drugs and drug administration using the nursing process. Drug classifications presented are: drugs affecting the endocrine system, gastrointestinal system, nervous system and respiratory system in addition to drug therapy in infection and cancer. The role of the nurse as provider of care is emphasized, along with legal and ethical accountability.
Prerequisite: PN 140 and PN 150/150L
1.5 credit = 1.5 lecture

PN 185 Contemporary Practical Nursing. This course focuses on preparation for entry into practice and the professional role of the practical nurse within the health care system. Theoretical concepts of leadership and management are introduced.
Prerequisites: PN 150/150L
2 credits = 2 lecture

PN 190 Adult Nursing II. Continued development in the art and science of nursing as it relates to the adult medical-surgical patient will be the focus of this course. The practical nursing student will use the nursing process in the delivery of patient care. This course integrates previous knowledge with medical-surgical principles.
Prerequisites: PN 150/150L
5.5 credits = 5.5 lecture

PN 190L Adult Nursing II Clinical. This course provides an opportunity for the student to care for adult patients in medical-surgical and extended care settings using the nursing process and applying concepts of a caring, holistic nursing approach.
Prerequisites: PN 150/150L
5 credits, plus 10 contacts = 15 laboratory
PSYCHOLOGY
Social Science Department (810) 989-5707

PSY 170 Psychology of Effective Learning. This course is intended for students who wish to improve their skills and strategies for learning and memory. The topics covered include an introduction to cognitive science; the comprehension of both oral and written material; attention; memory and memory retrieval; strategies for improving memory; problem solving; creativity; learning styles; techniques for motivation; test anxiety; and styles for self-management, including learning how to set and achieve study goals; learning more with less time and effort, increasing test taking abilities, and improving attitudes toward learning. The course provides students with techniques to reduce psychological and social stressors that can interfere with successful learning. Regardless of the area of concentration or the career, the skills and concepts learned in this course will be useful in learning throughout a college career and in life after college.
Prerequisite: None
4 credits = 4 lecture CT

PSY 180 Introduction to Psychology. This course is an introduction to the scientific study and explanation of human behavior, surveying such topics as the biological basis of behavior, development, consciousness and its alterations, sensation, perception, cognition, emotion, motivation, learning, intelligence, personality, abnormal behavior and treatment. This course covers the role of theory, research findings and practical applications in psychology.
Prerequisite: None. Although no prerequisite exists, PSY 180 students are strongly encouraged to wait until their second semester or until they have completed 12 semester hours.
4 credits = 4 lecture CT

PSY 190 Introduction to Empathy and Counseling Techniques. This course is designed to introduce students to the basic skills of “helping” and will focus on the practical issues of the entry-level paraprofessional. Major emphasis will be placed on the process of communication and the barriers to being an effective communicator. Special populations and situations such as suicide, substance abuse, values clarification, stress management and mental illness will be discussed. This course will benefit students who plan to work directly with consumers in a human services setting. This course is a once-a-year offering.
Prerequisites: PSY 180
3 credits = 3 lecture

PSY 200 Social Psychology. This course studies underlying processes of human interaction, focusing on motives, attitudes, norms, the socialization process, social factors of perception and personality development. Emphasis will be on the development of the individual and human nature in a social environment. This course is a once-a-year offering.
Prerequisite: SOC 101 or PSY 180. Students may register for PSY 200 or SOC 200, but not for both.
3 credits = 3 lecture

PSY 210 Child Psychology. This course examines the application of psychological principles and research to the understanding of the behavior of children from the prenatal through later childhood periods. This course surveys physical, cognitive, and psychosocial development in the period prior to adolescence. The course is not
recommended for students who have taken PSY 220.
Prerequisite: PSY 180
3 credits = 3 lecture

**PSY 215 Adolescent Psychology.** This course examines the adolescent from biological, cognitive and psychosocial perspectives. Normal processes of adolescence, such as self identity, puberty, moral development, sexual behavior and mature modes of thinking and reasoning are covered. Close attention is given to special problems of adolescence, including teen suicide, adolescent pregnancy, delinquency and eating disorders.
Prerequisite: PSY 180
3 credits = 3 lecture

**PSY 220 Life Span Developmental Psychology.** This course is a survey of the psychology of human growth and development from conception to death, integrating physical, intellectual, social and personality development through the life cycle. Among the special topics covered are genetic counseling and the amniocentesis debate; effects of drugs, tobacco and alcohol on the unborn child; learning disabilities and psychological problems in children; teenage pregnancies and suicide; the mid-life crisis; and death and dying.
Prerequisite: PSY 180
4 credits = 4 lecture

**PSY 225 Adolescent and Adult Psychology.** This course is designed for students who have completed a course in child psychology and wish to study the remainder of the lifespan. The course begins at mid-semester and is open on a limited basis to students who have completed child psychology, but is not open to students who have taken PSY 220.
Prerequisite: PSY 210 and permission of instructor
2 credits = 2 lecture (one-half semester)

**PSY 230 Psychology of Effective Leadership and Supervision.** This course will explore traditional and contemporary theories of leadership and management with a specific focus on the psychological concepts behind the theories, and the practical application of knowledge, skills and abilities relate to effective supervision. Particular emphasis will be given to concepts of motivation, self-awareness, stress management, problem-solving, group processes, communication skills and conflict management.
Prerequisite: PSY 180 or BUS 155
4 credits = 4 lecture

**PSY 240 The Psychology of Adjustment and Mental Health.** This course emphasizes what is currently known about mental health and effective coping mechanisms. The application of psychological principles to healthy intrapersonal and interpersonal relationships are covered. This course is a once-a-year offering.
Prerequisite: PSY 180
3 credits = 3 lecture

**PSY 260 Abnormal Psychology.** This course studies abnormal or maladaptive behavior – its causes, symptoms, treatment and prevention. Major theoretical and research perspectives are covered in a survey of the major categories of mental disorders.
Prerequisite: PSY 180
4 credits = 4 lecture
PSY 270  Psychology of Women. Emphasis of this course will be on the study of the development of sex-typed behavior and on how social expectations affect the self concept, achievement, sexuality and life decisions of women. Other topics will include the physiological basis of sex differences, the effect of body states on psyche and the psychopathology and treatment of women. Prerequisite: PSY 180
3 credits = 3 lecture

PSY 275 Psychology of Men. This course will review the relevant knowledge in the emerging field of masculinity studies. The dark side of masculinity will be a central feature of this course as well as the various psychological theories pertaining to masculinity. Relevant readings of contemporary materials will be assigned in addition to the textbook. Prerequisite: PSY 180
3 credits = 3 lecture

PSY 280 Human Sexuality. Human Sexuality is designed to introduce students to the biological, psychological and social factors that regulate their sexuality. Part of the course deals with the anatomical, physiological and genetic determinants of sexuality, including the sexual anatomy of men and women, hormonal regulation of sexual function, fertilization, pregnancy, birth, conception control and sexually-transmitted diseases. The course also emphasizes psychological, behavioral and social factors that influence sexuality, including the examination of human sexual behavior, sexual response, orgasm, psychosexual development, variant sexual behavior, sexual ethics and the genesis of sex roles. The course is recommended for, but not limited to, students considering the helping professions. Prerequisite: PSY 180
4 credits = 4 lecture

QUALITY ASSURANCE
Engineering Technology Department (810) 989-5754

QA 117 Statistical Process Control I. This course focuses on the application of various charting techniques, statistical tools and sampling methodology needed to determine process capability and control. Prerequisite: None
3 credits = 3 lecture  OC

RADIO FREQUENCY IDENTIFICATION TECHNOLOGY
Engineering Technology Department (810) 989-5754

RFID 150 RFID Internship. This course consists of work experience in industry relating to radio frequency identification (80 hours of work experience related to the objectives equals 1 credit). This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training agreement developed which is agreed upon by the student, employer and the college. Special requirements may be necessary. Prerequisite: Permission of instructor and completion of first semester of RFID certificate program (GPA ≥ 2.5 in major area of study) 2 credits (160 hours of work experience) = 2 credits
RFID 180 Radio Frequency ID Fundamentals. This course covers radio frequency identification (RFID) concepts and fundamentals, and how emerging electronic product code (EPCglobal) standards are influencing adoption. Content includes RFID capabilities, current applications of RFID in business and practical ways to articulate “use cases” for this new technology to potential employers and peers.
Prerequisite: None
3 credits, plus 1 contact hour = 2 lecture, 2 laboratory

RFID 181 TagNet Middleware. This course covers TagNet middleware, specifically how to install, configure and implement various use cases found in the supply chain. Topics include capabilities of TagNet and how various use case factors influence read rates and reliability.
Co-requisite: RFID 180
3 credits, plus 1 contact = 2 lecture, 2 laboratory

RFID 182 Technology Use in the Supply Chain. This course will use case studies as a tool on how Radio Frequency Identification (RFID) has been used in the supply chain. Examples from the retail, pharmaceutical, defense, manufacturing & logistics industries will discuss how companies have gained competitive advantages by implementing this technology. Topics emphasize impact upon business processes, securing of transmitted data and financial analyses.
Prerequisite: RFID 180
3 credits, plus 1 contact = 2 lecture, 2 laboratory

RFID 183 RFID Standards and Certification. Students will identify, evaluate, and categorize RFID system components with respect to industry standards. Additional laboratory work with hands-on practical problems will be performed and rigorously tested. Problem-solving, teamwork, communication and analytical thinking are integrated into the course work. Set up and management of an RFID system will be developed through class projects.
Prerequisite: RFID 180 and RFID 181
3 credits, plus 1 contact = 2 lecture, 2 laboratory

READING
Communications Department (810) 989-5578

RD 050 Introduction to College Reading I. This course is designed to improve a student’s reading comprehension, vocabulary and thinking skills as it applies to being successful in college. This class can improve a student’s fluency and flexibility within reading and especially learning to master written material in college. Out-of-class lab practice time is required.
Prerequisite: None (possible placement from assessment results)
3 credits = 3 lecture

RD 075 Study Skills. This course focuses on the study skills necessary to help students process, acquire and maintain information. The emphasis will be on developing students’ skills in note taking, study reading, studying, exam taking and physical and psychological preparation for learning.
Prerequisite: None
1 credit = 1 lecture

305
IA 100 Electrical Power & Control Circuits I. This course focuses on the fundamentals of relay circuitry, electric motor control, automation, logic circuits, machine tool applications, blueprint reading, laboratory wiring of D.C. motors and A.C. single phase, and three phase motor control. This course is the same as AET 100. Prerequisite: MTH 101 or appropriate placement by college assessment or ACT score
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

IA 101 Introduction to Robotics/Automation. This course is designed to introduce the student to the fascinating field of robotics and automation, and to provide the student with a general overview of the technologies that are incorporated in an automated system. These technologies include hydraulics, pneumatics, electrical/electronics, machine building, PLCs, robots and computers. The student will build and automate typical robots using PLCs. Students will also work with high-level robots, machine vision and computers. In addition to technicians, this course would be beneficial to anyone who is interested in, affected by, or is otherwise in charge of making decisions relating to robotics and automation.
Prerequisite: MTH 101 or appropriate placement by college assessment or ACT score
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

IA 102 Programmable Logic Controllers. This course introduces students to programmable logic controllers (PLCs). It focuses on the underlying principles of how PLCs work and provides students with the knowledge and "hands-on" training to install, program, modify, interface, troubleshoot and maintain PLC systems. Programming is done both on- and off-line. No previous knowledge of PLC systems or programming is required. This course is the same as AET 102.
Prerequisite: IA 100/AET 100 or ELT 130A and ELT 130B
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

IA 143 Fluid Power & Control Circuits I. This course provides an introduction to fluid power. It focuses on the concepts, physical laws, principles of operation and applications of components and circuits found in modern fluid power systems. This course will provide students with the knowledge and "hands-on" training to install, modify, troubleshoot, maintain and repair basic fluid power components, circuits and systems. No previous knowledge of fluid power systems is required. This course is the same as AET 143.
Prerequisite: MTH 101 or appropriate placement by college assessment or ACT score
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

IA 150 Industrial Automation Co-op. This course consists of work experience in industry relating to industrial automation (each 80 hours of work experience related to the objectives equals 1 credit). This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training agreement developed which is agreed upon by the student, employer and the college. Special requirements may be necessary.
Prerequisite: Permission of instructor and first year in Industrial Automation program (GPA> 2.5 in major area of study) or employer initiated request.
1 to 6 credits (80 hours of work experience = 1 credit) = 1 to 6 lecture/laboratory
IA 201 Advanced Robotics & Programmable Controls. This course is designed to provide the student with an understanding of how to integrate components, equipment and work cells into a completely automated system. The areas of study include computer and robot programming, PLCs, data acquisition, accessing the computer’s hardware, computer communication and control, and advanced sensors such as machine vision. 
Prerequisite: IA 101 and IA 102
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

IA 243 Fluid Power & Control Circuits II. This course is a continuation of IA 143. Topics studied include pneumatic logic, cartridge valves and electro-fluid power components, circuits and systems utilizing discrete, proportional and servo control. Programmable controllers will be used in addition to pneumatic logic as a means of controlling fluid power components and systems.
Prerequisites: IA 143
3 credits, plus 3 contact hours = 2 lecture, 4 laboratory

SOCIOLOGY
Social Science Department (810) 989-5707

Sociology is an introduction to human behavior which is helpful to students striving for a better understanding of themselves and others. Sociology is an essential part of the educational background for any career requiring understanding of group organization and functioning or understanding individuals and their motivations, needs, satisfactions and problems. Any occupation or profession providing services to people - social work, education, health, law, business and business administration, marketing, sales, corrections, rehabilitation, government, research and planning - needs sociology at the undergraduate level of preparation.

Social Work is committed to action that assists people in achieving the satisfaction of their needs in society. This broad commitment permits the social worker to choose from a wide range of professional settings, including public welfare, children and youth services, mental health centers, juvenile courts, community action programs and services for the aged. Students planning to transfer to a university as a social work major should have a strong background in liberal arts. A suggested program of study would include English 101, English 102, Political Science 101, Sociology 101, Sociology 110, Sociology 160, Sociology 210, Psychology 180, psychology electives, science electives, humanities electives, sociology/anthropology electives and general electives totaling 62 credit hours. Since the requirements of specific universities vary greatly, consultation with a counselor or faculty advisor is strongly recommended.

For students who major in sociology, this curriculum provides the foundation for occupations that need to know how to deal with people, their problems and their social organizations. Undergraduate training in sociology leads to careers in government, police and corrections, juvenile and probation work, census work, city planning, personnel, marketing research, sales and administration. In addition, it prepares students for careers in international affairs as well as undergraduate and graduate teaching and study in sociology and social work. A suggested program of study for the sociology major planning to transfer to a four-year institution should include: English 101, English 102, Political Science 101, Sociology 101, Sociology 110, Anthropology 171, Psychology 180, science electives, psychology electives, humanities electives, sociology electives and general electives totaling 62 credit hours.
SOC 101 Principles of Sociology. This course is an introduction to the study of human groups. Topics to be emphasized include culture, socialization, institutions, deviant behavior, social control and social change. Prerequisite: None  
3 credits = 3 lecture  GA

SOC 101H Principles of Sociology, Honors. This course is an introduction to the study of human groups. Topics to be emphasized include culture, socialization, institutions, deviant behavior, social control and social change. Students will be expected to do more writing and class participation than in SOC 101. Prerequisite: Acceptance into the Honors Program  
3 credits = 3 lecture  GA  CT

SOC 110 Social Problems. This course considers the problems of contemporary urban-industrialized United States, including population, crime, race relations, poverty, substance abuse, war and various institutions. Prerequisite: SOC 101  
3 credits = 3 lecture  CT

SOC 160 Marriage and Family. This course studies the structural and interactional aspects of marriage and family. Topics to be emphasized include mate selection, alternative lifestyles, marital adjustment, parenting, family violence and divorce. This course is a once-a-year offering. Prerequisite: SOC 101  
3 credits = 3 lecture

SOC 170 Sociology of Aging. Personal and cultural aspects of aging in relation to social, psychological and economic problems of our aged minority are studied to provide basic understanding for persons who come into daily contact with aging citizens at home, in health or social service agencies, or in business and industry. This course is a once-a-year offering. Prerequisite: SOC 101  
3 lecture = 3 credits

SOC 200 Social Psychology. This course studies the underlying processes of human interaction focusing on motives, attitudes, norms, the socialization process, social factors of perception and personality development. Emphasis will be on the development of the individual and human nature in a social environment. This course is a once-a-year offering. Prerequisite: SOC 101 or PSY 180. Students may register for PSY 200 or SOC 200, but not for both.  
3 credits = 3 lecture

SOC 201 Minority Relations. This course focuses on racial and ethnic minorities, stressing a global perspective. Various aspects of prejudice, discrimination, assimilation, pluralism and possibilities of change in the United States and other countries are studied. This course is a once-a-year offering. Prerequisite: SOC 101  
3 credits = 3 lecture  GA  CT

SOC 210 Introduction to Social Services. This course is an overview of the philosophy, development, setting and operation of social services. Visitations to local agencies, videos, guest lectures and other voluntary experiences may be arranged by
the instructor to promote greater awareness. This course is for students interested in pursuing a career in social work. This course is a once-a-year offering.
Prerequisite: SOC 101
3 credits = 3 lecture

SOC 211 Criminology. This course is an introduction to the study of crime in society. Topics to be emphasized include the definition of crime, the causes of crime, the F.B.I. Uniform Crime Index, criminal statistics and the various types of crime and criminals. This course is especially designed for those students with an interest in the criminal justice system. This course is a once-a-year offering.
Prerequisite: SOC 101
3 credits = 3 lecture

SOIL SCIENCE (See Agriculture)

SPANISH
Communications Department (810) 989-5578

SP 101  Introductory Spanish I. This course takes a conversational approach towards the understanding and usage of the fundamentals of the language. Systematic techniques are employed to develop efficiency in pronunciation, reading, writing and speaking at a beginning level. Audio materials are available to enhance students' speaking and comprehension skills.
Prerequisite: None
4 credits = 4 lecture

SP 102  Introductory Spanish II. Students should obtain a thorough knowledge of the fundamentals of the language and a broad assimilation of a basic vocabulary for practical usage. This class is open to students who have had one semester of the language in college or one year in high school.
Prerequisite: SP 101
4 credits = 4 lecture

SP 203  Intermediate Spanish I. This course offers a conversational approach into the study of the Spanish-speaking countries. Strong emphasis is placed on situations that enable students to think in Spanish, inducing them to express themselves in the language with more confidence. By the end of the semester, students should be equipped to discuss a diversity of cultural subjects pertaining to the people's culture. The class is open to students who have completed one year of college Spanish or a minimum of two years in high school.
Prerequisite: SP 102
4 credits = 4 lecture

SP 204  Intermediate Spanish II. A systematic review of the fundamentals along with vocabulary enrichment leads students to a more effective self expression in the language. Open to students who have had at least two semesters of college Spanish or a minimum of two years in high school.
Prerequisite: SP 203
4 credits = 4 lecture
SP 250 Spanish Language and Culture. This course is offered to students who wish to participate in an intercultural experience related to the Hispanic world. Preparation for the experience begins with classroom exposure of the Spanish language in a simple practical conversational form, and with the exposure of the basic traits of the Spanish-speaking people. This is followed by a directed intercultural experience which will carry students to a specified area of the Hispanic world where they will have the opportunity of living with native families, participating in daily activities with them, being on their own on occasions, visiting places related to the Spanish culture, etc. The end result of this course is to enable students to experience an immersion into another culture, not only as a spectator but also as a participant. Prerequisite: Permission of instructor 2 to 6 credits (variable) = 2 to 6 laboratory

SP 257 Selected Topics in Spanish. This course is an intensive study of one or more specialized interests in literature, language, and/or culture. Topics will be selected by the discipline. Those students planning to transfer and use this course as an elective for a Spanish major or minor will be expected to do their coursework in Spanish. Depending on the course, the instructor may also give alternative assignments in English to students interested in Spanish culture and literature who are taking the course for electives in the humanities. Prerequisite: SP 101 and SP 102 or permission of instructor 1-3 credits = 1-3 lecture

SPEECH COMMUNICATION
Communications Department (810) 989-5578

SPC 101 Speech Communication. This is a beginning course in human communication dealing with speaking before an audience, small group and one-to-one communication. This course includes the study of speech psychology, organization, practice in the presentation of different types of speeches, listening, etc. The course is designed to help meet the communication needs of any student in any chosen profession. Prerequisite: None 3 credits = 3 lecture OC

SPC 101H Speech Communication, Honors. This course will offer students the opportunity to learn speaking and listening skills and apply them to current or future professions. Communications skills learned in this course will be applicable to any major field of study. The Honors section will use more student-oriented techniques and provide the student the opportunity to learn about other cultures by including a cultural awareness assignment. Prerequisite: Acceptance into the Honors Program 3 credits = 3 lecture OC

SPC 102 Advanced Speech Communication. This course presents practice and theory in persuasive, informative and non-verbal communication. Students will also be involved in some educational role playing as well as the study of emotional appeals, interviewing, the art of conversation, argumentation and persuasion in contemporary society. This course is highly recommended for students in the fields of business, education, psychology and political science. It is also recommended for other students who wish to expand their communication knowledge and skills. Prerequisite: SPC 101 3 credits = 3 lecture
STUDENT DEVELOPMENT
Student Success Center (810) 989-5520

SD 110 Career Development. This is a course for students who are exploring or questioning their career choice. Classroom interaction and activity foster a learning environment that promotes self-awareness of values, interests, personality, skills and lifestyle goals. Students will investigate careers by the use of occupational interviews and research using the internet and computerized software applications. The goal of this course is to identify career alternatives and learn the decision making process for future career choices.
Prerequisite: None
1 credit = 1 lecture

SD 120 Assertive Behavior. This course is designed to help students learn to express beliefs, feelings, needs and preferences in an honest, direct and appropriate manner. Students will learn to distinguish between non-assertive, assertive and aggressive responses as well as to identify the basic tenets of human rights. Assertive skills will be learned through in-class discussion, lecture, reading material and role playing.
Prerequisite: None
1 credit = 1 lecture
OC

SD 130 Job Search and Employment Skills. The goal of this course is to develop the skills necessary to secure employment. The course includes job search techniques, resume writing, interviewing techniques, applications and methods to overcome employment barriers.
Prerequisite: None
1 credit = 1 lecture

SD 140 College Success. This course is designed to provide students with insight into their strengths, weaknesses, and preferred style of operation and learning. With heightened awareness in these areas the student can make better use of the campus resources and experience a more successful college career. An exploration of the resources at St. Clair County Community College is included and utilization is encouraged.
Prerequisite: None
2 credits = 2 lecture

SD 150 Stress Management. This course covers the theoretical and practical application components of stress management. Lectures on stress pathophysiology and psychophysiology provide the conceptual understanding. Participants assess their stress level and are taught various techniques to lower and maintain a healthy level. The main focus is on relaxation techniques and how to implement them into your daily routine.
Prerequisite: None
1 credit = 1 lecture
THEATRE ARTS
Visual and Performing Arts Department (810) 989-5709

THA 101 Fundamentals of Theatre. A basic introduction to all phases of theatre is the focus of this course. A background of theatrical history and techniques of acting and play production is studied, in addition to stagecraft, costuming, make-up, lighting and characterization.
Prerequisite: None
3 credits = 3 lecture

THA 102 Stage Craft. This course presents a study of stage craft learned through lecture and laboratory experience. Students will build sets and crew in the many areas related to the production of an all-college play, i.e., lighting, design and costuming. Offered winter semester only.
Prerequisite: None
3 credits = 3 lecture/laboratory

THA 104A-D Theatre Practicum. This course will serve as a description for THA 104A, 104B, 104C and 104D. One course credit will be earned for a student’s major participation in the production and/or performance of college plays. Participation includes significant work in the following areas: acting, directing, lighting, design, makeup, set construction, properties, costuming and publicity. One hour credit may be earned per semester.
Prerequisite: Permission of instructor or department chairperson is required
1 credit, plus 2 contact hours = 3 laboratory

THA 105 Oral Interpretation. This course develops and improves skills in oral reading. Emphasis is placed on understanding the meaning of literature and on transmitting this meaning to an audience. Oral performances and a study of the theories of interpretation comprise the semester’s work. During the semester, an evening performance or reader’s theatre will be presented. Offered fall semester only.
Prerequisite: None
3 credits = 3 lecture

THA 106 Fundamentals of Acting. This fundamental acting course will lead students through the process of character development in theories and techniques of acting by using games, exercise and scene work.
Prerequisite: None
3 credits = 3 lecture

THA 107 Fundamentals of Stage Makeup. This course provides an examination of theory and practical experience in creating and actualizing theatrical makeup design for the stage.
Prerequisite: None
3 credits = 3 lecture

THA 131 Beginning Lyrical Jazz Dance. Beginning lyrical jazz is performed, in addition to some related musical theatre routines. This course includes conditioning, theory and technique, introduction to choreography (with computer software), prevention of dance injuries, dance history and significant issues in dance. This class also is available as PE 131.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory
THA 132 Beginning Tap Dance. Beginning tap dance techniques and routines are performed. This course will introduce students to basic through advanced tap dance movements. Units on the background and history of tap will be included. Students will be introduced to the LifeForms choreography software. All skill levels will be accommodated. This class also is available as PE 132.  
Prerequisite: None  
1 credit, plus 1 contact hour = 2 laboratory

THA 134 Beginning Classical Ballet. This course is an introduction to basic classical ballet. Participation will include stretching, conditioning, ballet barre, centre work and combinations. Topics will include dance injury prevention, the theory of movement and becoming familiar with significant people, events and issues in the performing arts. Students will be introduced to the LifeForms choreography software. There is no mandatory public performance. This class also is available as PE 134.  
Prerequisite: None  
1 credit, plus 1 contact hour = 2 laboratory

THA 205 Comedy Writing for the Theatre. This is a basic course to help students develop the skills and knowledge to write comedy. The course will include segments on character and sketch development and playwriting. The students will write a one-act play.  
Prerequisite: None  
3 credits = 3 lecture

THA 206 Improvisation and Role Play. This course explores role playing and imagination response through intensive planned and spontaneous theatre games, exercises and performance scenes. Utilizing elements of play, students will discover its ability to shape creative expression, free imagination, enhance group interaction and stimulate the flow of fresh ideas in any circumstance. The course is open to theatre majors and non-majors alike.  
Prerequisite: None  
3 credits = 3 lecture

THA 208 Musical Theatre. This course is a survey of the history, purposes and types of musical stage performances. Practical training for musicals in voice, stage movement and staging techniques will be studied.  
Prerequisite: None  
3 credits = 3 lecture

THA 231 Advanced Lyrical Jazz Dance. This course is designed for students with some dance background. The two areas of emphasis will be (1) a progressively improved performance level, based on the level of student experience, and (2) an introduction to the skills of basic choreography, including the use of LifeForms software. Dance injury prevention, issues in performing arts and overall conditioning are included. This class also is available as PE 231.  
Prerequisites: PE 131/THA 131  
1 credit, plus 1 contact hour = 2 laboratory

THA 232 Advanced Tap Dance. Continuation of tap dance techniques and routines are performed. This course will continue concepts of basic and advanced tap dance movements. Units on the background history of tap will be included. Students will
continue with choreography computer software. All skill levels will be accommodated. This course is also available as PE 232.
Prerequisite: THA 132/PE 132
1 credit, plus 1 contact hour = 2 laboratory

TRANSPORTATION AND LOGISTICS
Engineering Technology Department (810) 989-5754

ITL 150 Transportation and Logistics Internship. This course consists of work experience in industry relating to transportation & logistics (80 hours of work experience related to the objectives equals 1 credit). This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the college. There will be a written training agreement developed which is agreed upon by the student, employer and the college. Special requirements may be necessary. Prerequisite: Permission of instructor and completion of first semester of Transportation & Logistics certificate program (GPA > 2.5 in major area of study)
1 credit (80 hours of work experience) = 1 lecture/laboratory

ITL 190 Introduction to Transportation and Logistics. This course provides a clear overview of the key concepts of business logistics. Topics include shipping and receiving, warehouse management and inventory and overall traffic administration functions. Information provided will include: the legal and regulatory environment, costing and pricing, major transportation options, managing transportation partnerships and the use of information and technology in the logistics sector. Current issues and future technology of the industry are also included.
Prerequisite: None
3 credits = 3 lecture

ITL 191 Domestic and International Freight Operations. This course examines current issues and best practices used in domestic and international freight operations. Course topics include transportation providers, regulation and policy, carrier strategies, costing and pricing, information systems, transportation management and the negotiation and bidding process.
Prerequisite: ITL 190
3 credits = 3 lecture

ITL 192 Import Procedures and Documents. This course provides an in-depth view of what procedures should be followed, and what documentation is utilized in importing. The role that various documents play in import transactions and how correct strategies can reduce or eliminate problems will be emphasized. Various documents will be examined as well as the forms needed for import.
Prerequisite: ITL 190
3 credits = 3 lecture

ITL 193 Transportation and Border Security. This course provides an in-depth view of modern border and transportation security. Specific topics include security for ships, aircraft, trucks, pipelines and cargo shipped by any method. The course focuses on the technology needed for security, and also discussion of legal, economic, political and cultural aspects of the problem.
Prerequisite: ITL 190
3 credits = 3 lecture

314
ITL 194 Supply Chain Management. This course provides a study of the management of information, product, service and knowledge flow in the integrated supply chain. Techniques are used to obtain quality suppliers and methods used to evaluate problems in the supply chain. Sourcing strategies, cost analysis and control, planning and scheduling and operations management case studies will be presented and discussed in this course. Topics include inventory management, transportation management, warehouse management and project management.
Prerequisite: ITL 190
3 credits = 3 lecture

WELDING AND CUTTING TECHNOLOGY
Engineering Technology Department (810) 989-5754

WELD 110A Basic Oxyacetylene Welding, Cutting and Brazing. This introductory course provides students with a technical understanding of oxyacetylene welding, flame cutting, brazing fundamentals and safety. It also provides training to develop the manual skills necessary to produce quality welds on mild steel in flat position.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

WELD 110B Basic Shielded Metal Arc Weld I. This introductory course provides students with a technical understanding of arc welding fundamentals, welding safety, arc welding machines and electrode classification and selection. It also provides training to develop the manual skill necessary to make quality shielded metal-arc welds in flat position on mild steel.
Prerequisite: None
1 credit, plus 1 contact hour = 2 laboratory

WELD 110C Gas Metal Arc & Gas Tungsten Arc Welding. This introductory course provides students with a technical understanding of Gas Metal Arc Welding (M.I.G.) and Gas Tungsten Arc Welding (T.I.G.) of low carbon steel, stainless steel and aluminum in flat, horizontal and vertical positions.
Prerequisite: None
1 credit plus 1 contact hour = 2 laboratory

WELD 114 Blueprint Reading, Fitting & Fabricating. This course will give students a basic understanding of the blueprints used in the manufacturing industry, with special emphasis given to the fitting and fabricating field. The lecture portion of the course will include shop math, the metric system, welding symbols, various lines, and orthographic and pictorial views. The lab portion will include set-up tools and the set-up applications used in the fitting and fabricating field. Tools such as angle plates, fitting shims, half-clamps, turn buckles, wedges and rose buds will be demonstrated and used.
Prerequisite: None
2.5 credits plus .5 contact hour = 2 lecture, 1 laboratory

WELD 150 Welding and Cutting. Students in this course will complete twelve weeks or more work experience in industry as a course requirement, in an intensive but varied experience in all phases of the welding program of study. This on-the-job experience will be developed by the employer in conjunction with a coordinator designated by the
There will be a written training program developed which is agreed upon by the student, employer and the college.

Prerequisite: Permission of instructor

1 to 6 credits (80 hours of work experience = 1 credit) = 1 to 6 lecture/laboratory

**WELD 210 Shielded Metal Arc Welding, Advanced.** This course is a continuation of WELD 110B. Students will focus on Butt joints using E6010 for the root and E 7018 for fill and cover passes. Horizontal, vertical and overhead positions will be practiced extensively. Upon completion of this course, students will be required to take the A.W.S. Certification Test.

Pre/Co-requisites: WELD 110A, WELD 110B and WELD 110C

3 credits, plus 3 contact hours = 6 laboratory

**WELD 211 M.I.G. Welding, Advanced.** This course focuses on the different aspects of the M.I.G. (Metal Inert Gas) welding process. Mild steel, aluminum, solid wire and flux cored wire will all be used. Upon completion of this course, students will be required to take the A.W.S. Certification Test.

Pre/Co-requisites: WELD 110A, WELD 110B and WELD 110C

2 credit, plus 2 contact hours = 4 laboratory

**WELD 212 M.I.G. Pipe Welding.** This course focuses on M.I.G. (Metal Inert Gas) welding of 4" diameter and larger pipe in the 2-G and 5-G positions. Students will concentrate their effort on taking an A.W.S. Certification Test on 6-1/2" diameter pipe in the 2-G or 5-G position.

Prerequisite: WELD 211

4 credits, plus 2 contact hours = 6 laboratory

**WELD 213 M.I.G. Pipe Welding, Advanced.** This course focuses on M.I.G. (Metal Inert Gas) welding of 4" diameter and larger pipe in the 6-G position. Students will concentrate their efforts on taking an A.W.S. Certification Test on 6-1/2" diameter pipe in the 6-G position.

Prerequisite: WELD 212

3 credits, plus 3 contact hours = 6 laboratory

**WELD 214 T.I.G. Welding, Advanced.** This course focuses on advanced techniques of the T.I.G. (Tungsten Inert Gas) welding process. Students will be trained on multiple joints in all positions. Mild steel, stainless steel and aluminum will be used. At the end of this course, students will take an A.W.S. Certification Test using the T.I.G. process.

Prerequisite: WELD 110A, WELD 110B and WELD 110C

2 credits, plus 2 contact hours = 4 laboratory

**WELD 215 T.I.G. Pipe Welding.** This course focuses on T.I.G. (Tungsten Inert Gas) welding of 3" diameter and larger pipe in the 2-G and 5-G positions. Students will concentrate their efforts on taking an A.W.S. Certification Test on 3" diameter pipe in the 2-G or 5-G positions.

Prerequisite: WELD 214

4 credits, plus 2 contact hours = 6 laboratory

**WELD 216 T.I.G. Pipe Welding, Advanced.** This course focuses on T.I.G. (Tungsten Inert Gas) welding of 3" diameter pipe in the 6-G. Students will concentrate their efforts taking an A.W.S. Certification Test on 3" diameter pipe in the 6-G position.

Prerequisite: WELD 215

3 credits, plus 3 contact hours = 6 laboratory
WELD 219 Welding Material and Processes. This course deals with various materials and welding processes currently employed in the welding field. Students will design and construct a project utilizing at least four different welding processes and two types of material.
Prerequisite: WELD 110A, WELD 110B, WELD 110C and WELD 114
3 credits, plus 3 contact hours = 6 laboratory

WELD 220 S.M.A.W. Pipe Welding. This course concentrates on the S.M.A.W. (Shielded Metal Arc Welding) (stick) process. Students will focus on 6-1/2” pipe in the 2-G and 5-G positions. Open root with E6010 and E7018 fill and cover passes will be used. Upon successful completion of the course students will take an A.W.S. Certification Test on 6-1/2” diameter pipe.
Prerequisite: WELD 210
4 credits, plus 2 contact hours = 6 laboratory

WELD 221 S.M.A.W. Pipe Welding, Advanced. This course focuses on S.M.A.W. (Shielded Metal Arc Welding) on 6-1/2” diameter pipe in the 6-G position. Students will concentrate their efforts on taking an A.W.S. certification test on 6-1/2” diameter pipe in the 6-G position.
Prerequisite: WELD 220
3 credits, plus 3 contact hours = 6 laboratory
CURRENTLY INACTIVE COURSES

These courses may be offered in the future. If students are interested in having a currently inactive class listed in the fall, winter, spring or summer schedule, contact the department chair or an instructor in the appropriate area.
